Report Says UMG may be subject to large earthquakes

By KAREN CLABEAUX

A Geographical Survey Report has determined natural gas at Pt. Conception may be subject to large earthquakes, with Richter scale near the Pt. Conception gas field being estimated to reach 7.5 on the Richter scale near the Pt. Conception gas field. If the construction of the terminal is completed, 900 million cubic feet of natural gas will be transported daily.

The Geographical Survey Report noted that the area of the site is rising as much as one-eighth of an inch a year, but because of limited data, the survey team was unable to make any further estimations.

Endorsed by Governor Jerry Brown, the Pt. Conception site has been called by Norbert Dahl, a Sierra Club lobbyist, as "a political fix" to give Brown an energy issue to focus on in his presidential bid. Lee Stittenger, a spokesperson for Citizens to Protect Pt. Conception commented, "We basically construe this State Resources Agency vote yesterday to mean that the group whose periodic visits are more nominal than anything else is in charge.

The survey team is comprised of the University of California Regents', the Lawrence Livermore Laboratory, the Los Alamos Scientific Laboratory, and the Laboratory of Nuclear Medicine and Radiology at UCLA. Although all 26 of the regents were invited to attend the meeting, only a few attended. The State Resources Agency voted to permit the construction of the terminal at a site that is already sacred.

According to an LLL spokesperson, since DOE sets the research goals and the university's work is mostly administrative, the committee is merely an "oversight group" whose periodic visits are "more nominal than anything else." The State Resources Agency approved the terminal in July of 1978 by the State Resources Agency, the site was ordered to undergo extensive seismic investigations. Incomplete as yet, the exploratory digging has been slowed due to the objections of Indian protesting the placement of the terminal at a site considered sacred.

The survey said that possible damage to the region by the Ynez fault, located three miles from Pt. Conception, could reach as high as 7.5 on the Richter scale near the Pt. Conception gas field.

Last week's rain showers caused this stream at Red Rock to swell. For today's weather forecast turn to page 2.

Supervisors Alter Land Use Plan To Limit Coastal Development

By HELEN BASHAM

Development potential in much of the local coastal zone was limited by the board of supervisors at a special meeting held Wednesday to re-establish land-use designations.

In the Carpinteria Valley the supervisor changed the designation from five-acre minimum parcels to ten-acre minimum parcels. This has long been opposed by landowners in the area because it removes their option to subdivide and sell down to five-acre lots. The minimum acre limit serves to maintain agricultural land in parcels too large to be subdivided into lots viable for non-agricultural purposes.

The move to install 10-acre minimum parcels in the Carpinteria Valley passed with a 5-2 vote; Bill Wallace and Robert Holland supporting limitations of extensive development and Robert Kallman and Harrell Fletcher favoring such development. David Yager represented the swing vote.

Kallman maintained that agriculture was viable in five-acre parcels, but Wallace claimed that the five-acre estates would be owned by "gentlemen farmers, not making use of the land." Wallace added that he thought larger parcels were needed to prevent "speculation.

In more Mesa, the board voted to allow the development of 350 units of housing. Originally, one developer had requested 540. The land had been zoned for agriculture.

Santa Barbara shores, an undeveloped 232-acre lot, was designated under a one-acre-per-lot development in a cluster housing system. The local coastal program staff had called for a 100-acre minimum parcel size limit. Wallace recommended a rural, or agricultural designation for the area. Current zoning allows development of 1.25 units.

For Haskell's Beach, the supervisors passed a recommendation for subdivision in 26.

Proposal To Establish Coops As Alternate Housing Offered

By PATRICIA TURNER

A proposal to establish more than 2,000 student coops as an alternative form of student housing was presented yesterday by university officials to the Rochdale Housing Coop in cooperation with the Community Development Corporation.

Citing the present student housing shortage, CDC representative Frank Thompson emphasized the ability of student cooperatives to give students a measure of control over the I.V. housing market. "They reserve spaces for students," Thompson said. "We wouldn't have had a problem as we have if we had more coops."

Absentee ownership, high rental rates, and the declining quality of apartment units are among the housing problems which university housing could help alleviate. At present, "students don't have control over their backs," said James Green, director of the CDC.

"Evidently the university people like the idea," said Patty Newman, manager of the Rochdale Housing Coop.

The proposal, which was met with "an enthusiastic response," has been called by Norbert Dahl, a Sierra Club lobbyist, as "a political fix" to give Brown an energy issue to focus on in his presidential bid.

Local Church a 'Potentially Dangerous Situation'

Sources Say EOC Has Total Authority Over Members

By STEVE BARTH

A potentially dangerous situation, several sources have responded to a series of Nexus articles on the Evangelical Orthodox Church claiming that the church exercises total authority over the lives of its members.

After that series, which ran in the Nexus from Oct. 17-19, the second part of this series of articles has been confirmed by over 24 sources and hundreds of documents.

This is the first in a series about the power structure within the Evangelical Orthodox Church and its effect on the church's popular image. The second part of the series will outline the history and development of the Evangelical Orthodox Church.

Many church members are angry over the power the few leaders of the EOC: of the former monasteries of the church. Some church members contacted by the Nexus, more than two dozen refused to allow their names to be associated with their comments.

Some fear for their personal safety. When one woman refused to talk with Nexus, he warned, "If you're going to use our name, you're going to get into big trouble." For the most part, however, the people contacted are afraid of the leaders of the church who would attempt to publicly disgrace them, as they have done to friends.

Church leaders challenge these sources to meet openly with them. "If there's someone who thinks they've been treated unfairly, we are willing to meet with such people," said Bishop Jack Sparks.

Bishop Richard Ballew added, "Let's not sneak around in the dark, let's come out into the light."

Referring to former members of the church, Ballew said, "We've got a complete record on every case.

Initially many sources expressed concern over the EOC's attempt to gain political power in Isla Vista. One former member commenting on this said, "I wouldn't say you've got a very serious problem."

Church members Gary McFarland, David Lewis and John Sommer were elected to local office last Tuesday. McFarland to the Santa Barbara Water Board, Lewis to the I.V. Sanitary District and Sommer to the I.V. Community Council. With these church members gaining office, some belie the EOC will take over the city.

"Ultimately," said one former member, "I think they want total control of I.V. They're dealing from a power standpoint."

"I really do believe they've got a very serious problem," said one former member commenting on this.

While some were hesitant to use such strong terms, others feel that the EOC has the potential to do as much damage as the People's Temple. One former member called the situation, "a powder keg." Some...

Source: Nexus
SAN FRANCISCO — Butchers Union members have rejected a proposed three-year contract with northern California supermarket chains, but spokesmen in San Francisco said there is no immediate threat of a strike. Leaders of five union locals, representing about 7,500 retail butchers, said they would meet Nov. 16 to revise their contract proposals. Journeymen butchers are now paid $9.23 an hour. The union members rejected a contract that provided for an 18.5 percent raise over the next three years.

SACRAMENTO — The state Supreme Court has handed down a decision that may allow all of California’s public agencies to give special consideration to hiring and promoting women and minorities in order to meet affirmative action plan guidelines. The case dealt specifically with the Department of Corrections and its affirmative action program. A lower court had ruled that such a plan was unconstitutional reverse discrimination, but that was overturned at the appeal level and the Supreme Court then refused to grant a hearing on the case.

SAN JOSE — The pilot of a small plane landed it safely in heavy traffic on Monterey Highway, near downtown San Jose, startling diners at a nearby coffee shop and motorists on the road. The single-engine Groomer Arrow, piloted by Blacky Blackman, made the emergency landing around midnight Friday, striking two cars and grazing some power lines.

MALIBU — A 12-man team of Malibu Sheriff’s Department reserves rescued 15 high school students, all 17 and 18 years old, stranded on a rocky incline in Malibu State Park. The group had been on a nature walk for a natural resources class with their instructor, Jim Gabriel of Narbonne High School, San Pedro.
Women in Ventura

Symposium Held

On ‘The Law and Women’ in Ventura

By BARBARA MILLER

Women interested in a career in law should attend a symposium titled ‘Women and the Law’ to be held tomorrow. The keynote speaker will be Justice Joan Dempsey Klein, presiding justice of the California Supreme Court.

The symposium will be held at 10 a.m. tomorrow in the Abraham Kaplan Room of the Ventura Holiday Inn located on East Harbor Blvd.

Akbarzadeh believes that the Shah entered the U.S. under the guise of needing medical treatment that is presumably not available elsewhere. He said that he has documented evidence that the Shah's doctor said that if the Shah is sick he can be treated anywhere.

Another UCSB student from Iran, Jafar Ebadi, said that he has a picture of the Shah taken in Mexico ten days before his arrival to the U.S. Ebadi said that the photograph shows a healthy Shah eating and laughing at a dinner party.

Both Ebadi and Akbarzadeh believe that the Shah's presence in the U.S. is a threat to Iranian national security because the U.S. government supports the Shah and may attempt to restore his power and influence. They believe that a CIA coup returned the Shah to the throne in 1953 after he had been forced by rebels under the leadership of Dr. Mossadegh to leave the country in 1951.

In agreement with the Ayatollah Hashemi Hashemi, Akbarzadeh said he believes the U.S. embassy is a center of espionage. He added that the CIA has infiltrated the embassy and that documents in the CIA and Prime Minister Baktiari were found at the embassy. Akbarzadeh said that Iranian foreign minister Dr. Yazdi was in the U.S. before the Shah's arrival in an attempt to convince the American government not to allow the Shah to enter the U.S. but the U.S. government was unresponsive to his request.

According to Akbarzadeh and Ebadi, the Shah is the richest man in the world and has $22 billion that he stole from the Iranian people. Akbarzadeh said David Rockefeller put pressure on the Carter administration to give the Shah a visa. He said the reason is because the Shah has investments with Chase Manhattan Bank.

Another UCSB student from Iran, Jafar Ebadi, said that he has documented evidence that the Shah's doctor said that if the Shah is sick he can be treated anywhere.

The two Persian students support Khomeini and do not object to his refusal to meet a U.S. envoy because of one of its attempts to make the U.S. lose face, but he believes that size and strength are insignificant and that justice in politics is important.

The Persian students were denied permission to hold a rally in Los Angeles last Saturday. In Washington D.C., Carter refused permission for another rally, citing present day and present day attack on the Ayatollah and the clause of the constitution pertaining to the freedom of speech.

Far Iranian students at UCSB have not experienced any violence but have been verbally assaulted with phrases like ‘Go back to Iran.’

Giving Volcker Alternatives

By ROBERT LEKACHMEN

American hostages is unraveling as major test for both respective populations. We feel Carter must continue diplomatic efforts to end this tense situation. But we urge Americans to keep the problem in perspective. One cannot deny that this situation in America. Within weeks of the Iranians' demonstrations, both groups displayed their prophetic value may be realized all too soon.

We hope the American public will not overreact. We realize what can escape that." Certainly Volcker and his colleagues, busily sponsoring the depression of 1980, can imagine how that went. As a loyal American economist, I do my best to help my leaders. First, then, a reminder for Volcker. As early as last Wednesday, public outcry at the Hill Police Department had pledged to arrest anyone engaged in unlawful demonstration on Friday, Nov. 9, 1979. They did not live up to this pledge. Instead, they allowed hundreds of thousands of the Jewish Defense League, and other assorted hoods and morons to engage in a demonstration against what would have been a peaceful demonstration by a group of Iranians. Then they moved in and arrested, for the most part, only the Iranians. In demanding the actions of the police, which are unconstitutional, the city government of Beverly Hills are also condoning the organized violence against the Iranian demonstrators. In this light, Mayor Kreins are no better than the Ayatollah Khomaini in his support of the takeover of the U.S. Embassy in Tehran. Both

Do you know any Iranian?" I said.

"No, I don't. They're all a bunch of cocksockers and should be sent back home. Do you know what they did to that poor American?" His eyes were filled with tears.

"We ought to do the same to them."

I took down his sign. It was a large red and black sign. He said, "I don't know if you ought to go back and begin haranguing me about the cocksockers and their friends." He had apparently seen some secretly televised from Tehran. He was thin, average height, with dark hair. Then he could have passed for one of the Arab students I know. Yet he saw them as all one single, all-hating, menacing mass which had passed in front of him. He then went on, "I mean, I'm not trying to go back and explain to the police. I understood what they had meant for him in Beverly Hills."

"Why do you think it is in your country rather than in yours," asked him.

"Your country!"

"No, everyone who lives here. He stepped on my sign and threatened me, if I found his sign in front of my house, I'd be the only one taking them down."

"You're the only one I know of. If I catch you on the street at all,"

I laughed and took down his sign. Again, he left shouted and dejectedly hugging his sign at me. Good humor is the best weapon in this war.
**SALT Realism**

Editor, Daily Nexus

The initial threats posed by the UCSB Racquetball Club have been thwarted thanks to a clever journalistic campaign.

When I read the Nov. 2 letter from the two chairpersons from the Student Union Collection Committee, it was with a mixture of concern and amusement. The letter suggested that the club, which has been a major source of income for the union, was organizing a "bomb" to put an end to the club's activities. The letter went on to say that the club was "behaving like a Nazi" and that the union should take action to prevent this "nuclear device" from being built.

I have to assume that the writer of the letter is not familiar with the history of the club or the nature of its activities. The club is a recreational organization that has been in existence for over 50 years and has won numerous national and international championships. It is not a political organization and does not have any connection to the nuclear arms race.

The letter suggests that the club is using rhetoric to gain support for its cause. It is possible that the club is using the rhetorical device of "nuclear escalation" to gain attention and support for its cause. However, it is unlikely that the club would use this device to actually build a nuclear weapon.

I hope that the union will continue to support the club and that the club will continue to provide entertainment and enjoyment for its members.
Palmer's Rock 'n Reggae Blitz

By RICHI ZIMMERMAN

Attending a Parallax Productions concert at the Arlington without the benefits of mind-altering drugs is like driving into L.A. on a hot, smoggy day without the reinforcement of a stereo system. Ice chest full of cheap beer. The "wall of sound" of amplified amplification (Overkill Brand Stadium Concert-Size Speakers) should have been a tip-off to the shape of things to come.

Although this production was considered part of the "Secrets Tour, '79," it was no secret, after three numbers, where Robben Ford and Band were coming from. Since Pablo Cruise, Steely Dan, and Boz Scaggs have succeeded commercially with jazz funk, then far be it for Ford & Co. not to jump on the bandwagon. The only problem with this act is that disco funk is, according to billboard and Rolling Stone, on its way out. But, don't tell this band, please, "cause they are trying. Ford's vocals are strong and clean, but best suited for the blues. Russell Ferrante's keyboard leads are reminiscent of the Allman Brothers, circa 1973.

A Bad Case of Robt. Palmer.

Hewlett-Packard Thanks You

GENERAL DYNAMICS

The General Dynamics Convair Division, located in San Diego, wants to talk to engineering students about the diverse work assignments in such engineering areas as: Research, Test, Design, Quality Control, Assurance, and Manufacturing. Currently there are major, long-term contracts that involve work in Advanced Space Structures, Energy Conversion, Airframe and Engine, and the BMD Missile Program.

Excellent growth opportunities exist for these programs in the following engineering fields: Industrial, Electrical, Mechanical, Aerospace, Engineering Technology, and Manufacturing.

Also, let's talk about our excellent educational assistance and management development programs, tuition reimbursement for furthering your college education, and our liberal relocation allowances.

To learn more about General Dynamics Convair Division, contact your Placement Office today. Or, if you prefer, send your resume to Mr. Earl Bailor, College Relations Administrator, GENERAL DYNAMICS Convair Division, Mail Zone 11-1306-1081, P.O. Box 80847, San Diego, CA 92138

LET'S TALK TECHNOLOGY

The Decibel Meter pegging 130!

After five fairly unimaginative songs, Ford pauses, possibly feeling guilty, and asks the audience, "What do you think—is there a market for this kind of music?" "Rock and roll" is the rhetorical response from the cheap seats. Typically, Ford's style of guitar playing is competent, but his moves and grins lead one to expect something just a bit more intense. Robben Ford, unfortunately, is no Eric Clapton.

By song number seven, Ford's band has well established their predictable pattern of jazz funk with reggae overtones. This formula would have succeeded if the band had the harmonies of Pablo Cruise or the uniqueness of Steely Dan.

The P.A. is cracked and begins to throbb. Ford's guitar solo does not justify the volume, but the drummers (Ricky Feld), the sound simply didn't have the soul, inspiration, or the variation to elicit much more than the automatic stoned yells acknowledging the fact that no one was letting on that they were getting anything less than their full ticket's price worth of enjoyment.

Thirty-five minutes into his set, Palmer offers us "something soothing," and it's a virtual duplication of the recorded version "Give Me an Inch, Girl." The music is turned up so loud by this time, though, that it's difficult to discern who's leading when and what exact instruments are getting forth the sounds (guitar, Moog, keyboards?).

At this point, people are walking out, shaking their heads and holding their ears. "The fact that they won't do anything about it (i.e., the sound amplification) stinks," one lady lamented. Another long-time Palmer fan comments, "I don't think that the people who came to this concert expected it to be this loud. His old stuff wasn't like this.

At 10:45, the sound is actually turned down for "Sailing Shoes," which just like on the album, segues into "Streets Soapy Sally Throop the Alley." The mix is clean half way through until, for some unaccountable reason, the volume is once again raised. Finally, after a quick band introduction, the last song of the set, "Bad Case of Loving You," is turned up loud by this time, though, that it's difficult to discern what Palmer is saying. The sound simply didn't have the soul, inspiration, or the variation to elicit much more than the automatic stoned yells acknowledging the fact that no one was letting on that they were getting anything less than their full ticket's price worth of enjoyment.

Two-thirds of the main floor remains to clap and sing along with Palmer's rendition of his only Top 40 hit. At 11 p.m. Palmer says, "Thank you, good night," and the folk in the back rows, who have had enough, leave without waiting for the encore. Fortunately, Palmer returns in three minutes before the place empties, and gives the place a good dose of rock 'n roll as a parting shot. Louder even than "Bad Case," Palmer runs through "Jealous" and people walk out singing along. "You know, it makes me want to feel...(dead)," Palmer sang "Jealous" into, appropriately enough, "You're Gonna Get What's Comin'." Hopefully, he's not talking about a hearing aid.
Korean Students See Both Sides in Park’s Fall
By SUE MURRAY

The assassination of South Korean President Park Chung Hee has ironically undermined the same Korean students, church members, and intellectuals who were suppressed under the despotic Park Regime. said UCSB student Young Chan Bo.

"Many Americans can't understand why the republic mourns over the death of Park. The event was sad because Park was a symbol of the Regime, said UCSB student Young Chan Bo.

Agreed with Young saying, "Park's death itself is bad, but the assassination may be a beginning step towards the peaceful free world," Bo added. "On the other band, many Blitted toward the progress which includes the death of Park's chief dinner party by Kim Jae Kyu, chief of his own intelligence service, in General Chung Seung Hwif of the Army chief of staff and martial law taking over the country. he Park regime and to give aids with appropriate conditions con-".

"might ignore the issue in South Korea, Through their demon-"

"But Young admitted that most Koreans have mixed feelings about the_Regime, said Young. "No matter what they believe, the military is avoiding any radical changes. They are trying right now to keep the status quo."

Young said he was encouraged by what he had seen and heard during his recent visit to Korea. "The military believes that the continuation written by Park should be changed, since it was only written specifically for the regime. The military seems to be aware of the problems and will hopefully move towards a civilian government, he added."

Park, ruler of the Republic of South Korea since 1961, was shot at a dinner party by Kim Jae Kyu, chief of his own intelligence service, in what was first described by government officials as an "accident." But the assassination, which included the death of Park's chief of staff, Choe Man Chi, and presidential bodyguards was later revealed to be a well-planned assassination.

A third version of the murder story, a "semi-official" account according to Time magazine, claims that Kim tried to persuade General Chung Sung Soo, the Army chief of staff and military law commander, to join the conspiracy, declare martial law and mobilize certain military sources, presumably for the purpose of taking over the country.

Although the Park regime was supposed to be a democracy, once in power Park lived almost totally in the KGB under the constitution of Korea, allowing himself to be eligible for life-time presidency. According to the Korean Student Association, Park oppressed citizens, especially intellectuals and political opponents. Labor rights, written into the constitution, were ignored as an impotent to economic growth and national security. The kind of labor rights enjoyed by Americans are "just a dream within a dream" in Korea according to the KSA.

During the past 30 years, American taxpayers have paid billions of dollars in aid to Smith Korea. Yet, the KSA claims that President Carter, who so emphatically advocates human rights, has com-pletely ignored the issue in South Korea. Through their demonstra-tion, the KSA asked the American government to stop support of the Park regime and to give aids with appropriate condition con-considering human rights.

UNICEF: 'Good Response' Students Work to End Hunger
By MISSY APPLEMAN

Some UCSB students are not too old to trick-or-treat. For the fourth consecutive year, the Student Hunger Action Group sponsored a Trick-or-Treat for UNICEF in Isla Vista.

Approximately 40 UCSB students took a group of children door to door through the community to collect funds for starving children. This year, the efforts produced between $600 and $700.

"You wouldn't expect such a good response from a low income community like I.V., Maybe they're more aware of the suffering because they are nosed with a dilemma," said Young. "No matter what they believe, the military is avoiding any radical changes. They are trying right now to keep the status quo."

Young said he was encouraged by what he had seen and heard during his recent visit to Korea. "The military believes that the continuation written by Park should be changed, since it was only written specifically for the regime. The military seems to be aware of the problems and will hopefully move towards a civilian government, he added."

"But Young admitted that most Koreans have mixed feelings about the Regime, said Young. "No matter what they believe, the military is avoiding any radical changes. They are trying right now to keep the status quo."
Evangelical Orthodox Church

(Continued from p.1)

ex-church members suspect that several leaders in the EOC have the charisma, the following and the inclination to assume total control over the church. The Evangelical Orthodox Church is a recently formed national denomination whose center of power is located in Isla Vista and it is governed by a council of 19 bishops. Five of these bishops, (allegedly the most important ones), are in Isla Vista.

In each diocese, the EOC operates within a hierarchy of authority: bishops, elders, deacons, etc. The Imam relating to Islam and he church is dependent upon submission to the system. In this pamphlet "Coming in from the Cold," Ballweg discusses the concept of "church government." Essentially, Ballweg feels the church's role is guiding its flock in an ineffective way without authority. "We believe in good counsel, but good counsel is not under authority, it won't solve problems in the long haul," Ballweg wrote. "Under authority, people will do as they are counseled." Spurks explained how this authority relates to a member's daily life. "We believe that the Lord ship of Christ extends over every area of a Christian's life and since His Lordship is expressed in the church, the church must enter in as necessary." Reportedly the church "enters in" by telling members how to run their households and businesses, what to read and other such advice. In cases where the elders have felt someone un- worthy of belonging to the EOC, sources claim spouses have been told by the church to divorce their husbands or wives.

In a paper entitled "How Practical Authority Works in the Church," EOC Bishop Dale Aaron states, "The government of the church is responsible for her people, even beyond the people's understanding."

In regard to the amount of authority, the church exercises, some observers remark that while this church is certainly not as extreme as compared to other fundamentalist groups. That's the way it seems in the beginning," Ballweg, a former member. Critics point out that the extent to which leaders of this church exercise their authority is extreme, and couple it with several factors adding to the pressure on members.

The EOC has a concept of communication and in most cases the members of the church are told not to inter to the excommunicants. Until February of this year when the Evangelical Orthodox Church was formed as a national denomination, a group of associated churches around the country made up the New Covenant Apostolic Order. What is the Grace Catholic Church of Isla Vista. In 1977, Jack Watts became a member of the Grace Catholic Church in Isla Vista. Watts became concerned with the effects of so much pressure on the members of the church itself. In a letter written to Jon Braun, a bishop of the denomination, Watts addressed these concerns and appealed to the leaders of the church. Those who disagree are left with only three choices: one, they can leave and go somewhere else; two, they can quiet keep about their questions; or three, they can become mindless robots that do absolutely no critical thinking or evaluating," Watts wrote.

There is an unspoken idea that exists in the church, simply stated: "whosoever a decision of the church government is to ask the Lord Himself. To doubt the wisdom of the elders is to doubt the wisdom of God." Watts continued.

Watts referred to this pressure to where to live, what to read and other such advice. In cases where the elders have felt some- worthy of belonging to the EOC, sources claim spouses have been told by the church to divorce their husbands or wives.

Winning Weekend: Two League Titles Won

By DAVE LOVETON

By a vocal crowd, the U.C. Santa Barbara's third straight Southern California Athletic Association title.

Northridge came into Robertson Gym with thoughts of paying the Gauchos out again by bringing their entourage of rowdy supporters that UCSB fans were prepared and after the Gauchos jumped on top in the first game, the Matador fans quieted considerably. UCSB won the match in three straight games 15-2, 15-9 and 15-9.

"I expected to win," said fifth-year Gauchos' head coach Kathy Gregory. "But we didn't play our best. It was important for us to win that second game."

The second game was definitely the turning point of the match. After Santa Barbara had dominated the first game, 15-2, Northridge came back to take a 7-0 lead in game two. UCSB then proceeded to outscore the Matadors 7-1 to tie things up 8-8. From that point on, the scores changed hands five times before two straight Marina Schiff spikes gave the Gauchos the game 15-13.

After a slow start in the third game, the Gauchos built up a 9-4 advantage. With the score at 16-16, it took UCSB nearly 26 minutes to earn that 15th point. Four side outs (checking the other team's serves) and four Gauchos' server (in a row) delivered the serve with Laurel Melitta Sverev and senior middle blocker Schiff all playing impressively for the Gauchos. Santa Barbara is now 8-1 in league play and 25-10 (.714) overall. The Gauchos have three games left for Nationals and was up against a non-league rival Pepperdine, with all three scheduled for this week.

Swim Team Takes Second

By ERIC BIDNA

After finishing second in the SCAA relays this past Saturday at the campus pool, the UCSB women's swim team and their coach, Inge Renner, did not feel too dejected about losing to Cal Poly Pomona. But UCSB fans were downs considerably. UCSB won the match in three straight games 15-2, 15-9 and 15-9.

Flying High—Freshman 5-8 outside hitter Ann Hansen provides some smacking play, while Melissa Fisher looks to avenge over the team that broke Southern California Athletic Association title.

Northridge earlier this year. The end result was sweet revenge over the team that broke the Gauchos' 26-game winning streak in league play.

Saturday's win also clinched Santa Barbara's third straight Southern California Athletic Association title.

Saturday, UCSB will again take to the road for a season-ending match versus nationally-ranked USC with the victor gaining important status for the upcoming regional competition at San Diego State Nov. 23 and 24.

For the second straight year, UCSB won the PCAA cross country championship and a chance to go to the National championships in the NCAA Region 8 Division 1 Championships at Stanford this past Saturday. Not only did UCSB runners win the honor of the PCAA championship, but coach Tom Lavoie was named PCAA cross country coach of the year.

In the race, UCSB collected 39 points, ten points less than second place Fresno State who scored 49. (Please turn to p.11, col.1)
BORSODS COFFEEHOUSE is going to expand hours. Therefore, we are looking for several additional cooks and dishwasher. The work is kind of busy but not too inhuman. Interviews will be held Monday, Tuesday and Thursday at 3 p.m. at the Coffeehouse.

Stanford Showdown Cuts UCSB Down, 12-8

By MAURA K. DALY

"We made so many dumb mistakes we didn't deserve to win," said a dejected water polo coach Pete Snyder about his team's 11-8 loss to defending NCAA champion Stanford.

Over the weekend wasn't totally disappointing. UCSB played all three games at the Stanford pool. On Friday they beat Cal-Poly 10-7, and Saturday afternoon they drowned Pacific 15-4. Still, the game everyone was looking forward to was the Stanford game. UCSB had a 12 game winning streak and for the National title. The first time the two teams played earlier in the season the Gauchos had lost 14-2. The stands were packed with Stanford fans for Saturday's game, and the Stanford band and pom-pom girls were out in full force, making it obvious that UCSB was indeed on enemy territory.

"The Stanford crowd was large, but the really good teams should maintain their poise. They shouldn't be entering their minds," Snyder said. Stanford dominated the game throughout, and UCSB was always forced to play catch up. "There were a couple of points when we thought we could come back, but then they would get a key turnover. We were within one point for a lot of the game," said Snyder.

"We were taking stupid errors, thoughtless passes that they would steal. We were also ten turnover, which is twice as many as usual," Snyder said.

Twelve goals is the most UCSB has given up in one game all season long. They also didn't score on any fast breaks, which is another season first.

One player did play a very good game. Senior Greg Boyer scored five of UCSB eight goals. Dave Hendrickson, Woody Lavajen, and Dave Philips each scored one point. "Stanford has improved since our first game with them, and they played a good game. I just wish we would have had them some real competition. We really handed them that win," Snyder said.

Snyder thought Cal, which UCSB split with, would probably be seeded number one in the NCAA tournament. He also said that he believed that UCSB and Stanford would be seeded second and third.

"We are going to work on our fast break before the NCAA and the NCA. We also have to realize we aren't going to be playing at home anymore. It's hard, but we just have to play more mentally tough," Snyder said.

Shipping off the old blocks—UCSB placed second to Cal Poly SLO in the SCAA relays, which kicked off the women's swim season.

UCSB Swim Meets Behind CPSLO

Continued from p.9

When Renner said "real good," that was an understatement. To qualify for the Nationals is the dream of any red-blooded swimmer.

Along with Cindy Vincent, who had been selected to the 11-ad, were Missy Huebner, Bronwen Bridley, Nannette S.Cross and Cindy Vincent qualified, as did the 400 yard medley team of Nancy Brindley, Nanette S.Croix and Melinda Wallace.

"The Stanford crowd was large, making it obvious that UCSB was on enemy territory.

Alternative Housing

(Continued from p.1)

ministrative services and student affairs. "Every time you finance a building, the increased administrative services and student tenants in the form of higher rents. If student coops are well managed, the coop residents can realize a profit." As owners of their building, students within the coop are responsible for the maintenance of their complex, that坦克 appeals to a landlord or owner unnecessary. "It's a self-help kind of program," Newman said.

Under the proposal, a non-profit title holding corporation would be established by the university and Rochdale, with the help of CDC, in order to handle the purchasing of the coop buildings. This corporation would be annually ap­proved by the university, with its board of directors nominated by the coop members.

Although the university would own the buildings, each coop would be leased to its residents, who in turn would have the option to purchase the building after the expiration of the mortgage. Begun three years ago with the assistance of a $5,000 grant from UCSC, the Rochdale Housing Coop would serve as a model for all future coops.

"Rochdale is an excellent example of cooperation between students and the university," said Evette Kirkelke, a founder of Rochdale and director of housing and residential services at UCSB. "It's been extremely successful in every way," he added. The reaction of university ad­ministrators to the proposal was generally favorable. "The whole approach makes a lot of sense," said Robert Kros, assistant vice chancellor of administrative services and student affairs. "It gives us a balance of the kind of housing we can offer."

Although he was unable to attend Thursday's meeting, Vice Chancellor Ed Birch was enthusiastic about coops. "I see coops as one of the few ways to move on what is becoming increasingly difficult for students. (They have) full support from this office." Although A.S. has yet to take a formal stand, several council members have expressed their support of the proposal. "I would think we should have realized that the housing crunch would get worse each year. It should have been done five or ten years ago," said External Vice President Jim Kros.

The proposal is presently under review and revision by a committee composed of university, CDC and A.S. representatives. "I hope that we can get through this with the cooperation of the students," said Kros.

Rochdale, with the help of CDC, in order to handle the purchasing of the coop buildings. This corporation would be annually ap­proved by the university, with its board of directors nominated by the coop members.

Land Plan Altered

(Continued from p.1)

accre..e parcels. Kallman, claiming that the land is without agriculture potential, urged greater allowable density, urging that one-acre parcels be approved. The state wants to purchase the the laboratory, allowing the committee to talk with several members of the staff. Following the tour, presen­tations were given on several of L.L's most important projects included were presentations on their research into the gasification of shale, laser and magnetic fusion and the biomedical aspects of heavy ions.

The coastal development plan closely followed a plan presented by the local coastal program staff, with a few exceptions.

Isla Vista Church...

(Continued from p.8)

Sparks has also written a book called "The Mind Benders." In it he subjects "cults" such as the Hare Krishna movement and the Unification Church to theological criticism. A tour member commented about the EOC, "They're mind benders them­selves."

However, even some of those who have spoken out strongly against the authority of the EOC elders cite the church's strong community em­phasis.

At the EOC's Sunday public worship meeting, tour members ap­pear happy and dedicated. They sing loud and listen attentively to the sermon. "They have some wonderful people and some wonderful concepts," said a former member, "but where I take issue is authority."

Describing the leaders of the church, one source said, "They are learned men with a great deal of talent and potential to do good. But because of their misguided priorities, just the reverse could happen."

The NAVAL FLIGHT OFFICER HE DOESN'T FLY THE PLANE, HE RUNS IT.

Look in the cockpit of a Navy jet and you'll see something you've probably never seen a few years ago.

Two seats.

The Navy's planes are too fast — and too sophisticated — for one person to handle by himself. So the Naval Flight Officer is there. To run the weapons systems, the computers and the electronic navigation system. He's a navigator, radar operator, sub hunter, target tracker. He's on the plane for hours, and when. And he wears the wings of Naval Aviation.

If you're a college man in good physical condition (20/20 vision isn't necessary), with an aptitude for math, and an aptitude for adventure, you should visit with the Naval Officer Information Team when they visit your campus.
