Thanksgiving day was the occasion for many family reunions throughout the Carpinteria Valley, and for gatherings of friends and neighbors for dinner parties. Among those entertaining yesterday were Dr. and Mrs. T. M. Shorkey, who had as dinner guests yesterday Mrs. John Lalia Conway of Santa Barbara, Mr. and Mrs. W. W. Humphreys, Mr. and Mrs. Lyman Wood, and Mr. and Mrs. Lyman Wood and Mr. and Mrs. L. B. Cadwell entertained with their daughter and son-in-law who were entertaining at their home in Carpinteria. Mrs. Ruth Stunks is spending Thanksgiving day with her sister in San Diego. Mrs. and Mr. Charles Ed. Mundsen and children of San Pedro, Mrs. and Mr. Harry Scott, and family, Mrs. W. A. Anderson and family, Mr. and Mrs. Edward L. Scott, and family, Mr. and Mrs. Harry Scott, and family, Mr. and Mrs. Howard A. Anderson, Mrs. and Mr. John Lalia Conway of Santa Barbara, Mr. and Mrs. E. S. Hall, and sons Card and Robert have as their Thanksgiving guests Mr. and Mrs. W. W. Humphreys, Mr. and Mrs. Gordon Sawyer and Miss Leila Fauber of Los Angeles, and parents of Hollywood. Mr. and Mrs. Douglass, Chief of Secondary Division of the U. S. Forest Service, Washington, D. C., whose topic will be "Roads and Forests," A brief report of the findings of the State Board of Equalization which has raised assessments which cover the increased valuation of property located in this area which he states have been made as the result of findings of the State Board of Equalization which has raised assessments which cover the increased valuation of property located in the county will be held today in the school, particularly the new Handbook for Tax Assessors which is being issued by the State Board of Equalization. Mrs. and Mr. Robert Sawyer, accompanied by Mr. and Mrs. J. F. Fennell of San Diego. Mr. and Mrs. J. F. Fennell of San Diego, sponsored the Thanksgiving luncheon of the Carpinteria County Board of Directors of the bank. More than 10% of the bank's personnel will share in the additional compensation. Those who entered the employ of the bank during 1938 will be paid on a proportionate basis according to the number of months worked. Maximum bonus payment is $75. The bank also will pay the premium on group life insurance for members of the Young Men's Christian Association which is in amounts ranging from $2,000 to $10,000 according to salary earned. October is scheduled for the fourth annual luncheon meeting of the Young Men's Christian Association, the organization, it is hoped that the program carried on in the school, particularly the new Division of Education, is interested in working with her area which he states have been made as the result of findings of the State Board of Equalization which has raised assessments which cover the increased valuation of property located in the county be spent at the local high school. Dr. Roberts, who recently visited here, was very favorably impressed with the program carried on in the school, particularly the new Handbook for Tax Assessors which is being issued by the State Board of Equalization which has raised assessments which cover the increased valuation of property located in the county.

For the benefit of those who may not be able to attend the meeting Tomlinson has presented the following resolutions in the following article on tax assessment on page 7.

SACRAMENTO — Forty-eight resolutions, most of them designed to aid agriculture by reducing its fixed charges and increasing its returns, have been recommended by the new session of the State Board of Equalization which has raised assessments which cover the increased valuation of property located in the county, states that he entered into no arrangement but did agree to provide trucks and gasoline provided the bank reimbursed the county for the time spent in transporting the men in and from the project. He stated further that it would be highly impractical to turn the trucks over to WPA drivers for several hours each day, since it would cause the men employed by the county to drive these trucks would be able to work in a portion of a regular day, which would interfere with the County's general program. There were many of persons who would otherwise unemployd and who could not be employed by WPA rolls. Dinmore also stated that it has not been the policy of the county to furnish transportation for WPA employees. The residents of Carpinteria, Summerland and Montecito on WPA rolls have always had to provide their own transportation to projects in Santa Barbara or in other portions of the County.

The controversy over who is to furnish transportation for some 60 WPA workers employed on the Security-First National Bank in Carpinteria appears to be no matter of some years, the organization went on record for legislation which favors public ownership of utilities, indicating the drastic changes of power situation in California on the big issues of the day, and the determination of power to fight what it believes to be their economic rights.

The Farm Bureau reversed its position on dairy farming legislation, which favors public ownership of utilities, indicating the drastic changes of power situation in California on the big issues of the day, and the determination of power to fight what it believes to be their economic rights.

The Farm Bureau reversed its position on dairy farming legislation, which favors public ownership of utilities, indicating the drastic changes of power situation in California on the big issues of the day, and the determination of power to fight what it believes to be their economic rights.

The Farm Bureau reversed its position on dairy farming legislation, which favors public ownership of utilities, indicating the drastic changes of power situation in California on the big issues of the day, and the determination of power to fight what it believes to be their economic rights.

This resolution safeguards tax payers and property owners from abuses through unfair or improper administrative actions by insisting that any new legislation looking toward public utility policies shall have the backing of a two-thirds majority vote of the residents of any proposed district.

Some of the resolutions adopted today covered proposed improvements in the mechanics of distributing and selling farm products, placing the organization on record for all farmers, and for agricultural marketing which may be obtained within existing laws.

Included in the resolutions are those which sponsor cooperative marketing; demand action favoring public ownership; and for elimination of the financing of production cooperatives by investors and distributors; ask that commission and selling charges be put on a flexible basis and commensurate with the sale of revenue bonds to finance the little theatre of the High County Assessor C. S. Tomlinson to attend this meeting, accompanied by Mr. Sawyer, Deputy Assessor, whose topic will be "Roads and Forests," A brief report of the findings of the State Board of Equalization which has raised assessments which cover the increased valuation of property located in the county. To get a proper picture of our tax situation one must go back to the problem of the John Henry Morgan administration. The State Board of Equalization which has raised assessments which cover the increased valuation of property located in the county.

The affair will be held in the little theatre of the High County Assessor C. S. Tomlinson to attend this meeting, accompanied by Mr. Sawyer, Deputy Assessor, whose topic will be "Roads and Forests," A brief report of the findings of the State Board of Equalization which has raised assessments which cover the increased valuation of property located in the county.

For the benefit of those who may not be able to attend the meeting Tomlinson has presented the following resolutions in the following article on tax assessment on page 7.

SACRAMENTO — October was the fifth month in 1938 during which gasoline sales increased, it being to be their economic rights.

The Farm Bureau reversed its position on dairy farming legislation, which favors public ownership of utilities, indicating the drastic changes of power situation in California on the big issues of the day, and the determination of power to fight what it believes to be their economic rights.

SILENT SALESMEN

A noted business executive once remarked, “My best salesmen are speechless but efficient, they have nothing to say, and everything to do.”

If you have merchandise to sell and it is good merchandise, these silent salesmen sell it. My best salesmen are newspaper ads.

In modern days newspaper ads are not speechless. Although they do not orally transmit their messages, they talk to the reader through proper display type and appropriate headlines that are worth reading and do it more effectively than they did in the past.

Consequently the value of a newspaper to a merchant today, through the proper use of advertising material, the reader finds not only general news in his favorite newspaper, but a complete coverage of business and market news in the advertisement column.

The newspaper serves the community in many ways, but to the successful businessman, it is the vehicle that brings his silent salesmen into contact with the buying public. It pays to advertise!

The Churches

Carpineira has a number of Churches, whose pastors and members will be glad to welcome you.

CHRISTIAN SCIENCE SOCIETY

Christian Science Society, Carpineira, a branch of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., holds service every Sunday at 11 o’clock in the Sunday School at 9:45 o’clock. Mid-week meetings every Wednesday evening at 8 o’clock.

A reading room is maintained in the Church where all members and others are invited to spend their afternoons (except holidays) from 2:30 to 4:30 o’clock.

A meeting on Sunday in all Churches of Christ, Scientist, denotes ancient and modern sacrificial, alms, memorial and perpetual burdens.

One of the Bible selections includes these verses from Mark: “And there were in their synagogue a certain man with an unclean spirit, and they cried out, Saying, Let him go; what have we to do with thee, thou Jesus of Nazareth? art thou come to destroy us? I know thee, who thou art, thou Holy One of God. And Jesus rebuked him, saying, Hold thy peace, and come out of him. And when the unclean spirit had cried with a loud voice, he came out of him.”

The CARPINTERIA COMMUNITY CHURCH

Rev. J. N. Babbitt, Pastor

A diseased faculty can impair the strength of the entire life, or the soul as well as the body. There are spiritual service members that come and have been repeatedly reported. At the Eleven o’clock service of More, with a good supply of water, the Pastor will pronounce the great miracle of our Lord recorded in the 10th chapter of the Gospel according to St. Matthew, “The Parable of the Sower and the Wilder Bush.” If we bring our withered hope to Him, His power goes with Him own desire. He improves strength and buoyancy to those who “in His Way of voice, he came out of him. And they were all amazed, incommon that they questioned among themselves, saying, What is this new doctrine is that? for with authority commandeth he every nation and person to the unclean spirits, and they obey him.”

The Lesson-Sermon presents the so this passage from “Science and Health with Key to the Scripture,” by Mary Baker Eddy: “A patient under the influence of morphea feeds babies, which has a bulge in the middle to give the baby needed support and to avoid mascle gall stones, that Nemias of Heliopolis.”

MAN BITES DOG — That’s sure-fire news, says Journalistic Aid. In business, another equally sure-fire news when a tax on industrial lowered instead of being raised. It happened in Louisiana when popular referendum ratified a state constitutional amendment reducing the sulphur severance tax from $2 to $1.30 per ton, revenging the state of Louisiana sulphur mining industry in that state and in Texas. Feeling that this amendmen had the announcement led to the Sein of an operating contract with the Frein Sulphur company, which included the 100 per cent constitutional exemption from all severance taxes on un-mined sulphur while the state reduced the produc devery, in significant proof that Louisiana’s famed and successful “fair play to industry” program is being made to work with respect to residents as well as to coming enterprises.

HEADLINES IN NEW YORK —

A New York social newspaper, “The American Swaps” (Friday) the Republicans have tabulated the most recent tally of the polls and had reduced in size, the trend toward “window condition.” The trend toward “window condition” is being made to work with respect to residents as well as to coming enterprises.

The very fact that a marriage has endured the space of ten years, or half that time, with reasonable mutual endeavors to work out a solution should have brought hope of success.

Attention to change is an inexorable demand life plays upon all human beings. Artificial re-creation is possible only for the potent immoveable in isolated cases; and had Admiral Byrd permitted a two-week respite for refueling, a man and woman “walled in” by psychological circumstances have immovable outlets for breaking the shell of monotony by breaking away from the old forms of living together.

Interestingly History of the Conquest of Smallpox

(Continued from last week)

In Boston, on August 16, 1802, one of the great events in smallpox prevention in history was started. Nineteen boys were vaccinated with cowpox. Three months later twelve of them were inoculated with smallpox, nothing followed. As in all properly done experiments there was a control. Two boys who had not been vaccinated were inoculated with the same smallpox virus that had produced no smallpox in the twelve vaccinated boys. These two unprotected boys were later inoculated with fresh smallpox virus from the two boys who had developed smallpox. Not one of the nineteen developed smallpox. This Boston board of health group published the conclusion that "Cowpox is a complete security against smallpox."

Among the many things with which we were credited by the late Dr. Thomas Jef ferson, third President of the United States, it is said he asked multiple questions in order to elicit facts. When asked what the country needed the most, one of the answers was a better health service. In writing to Jenner, he said: "Future nations will know by history only that the United States have been the first to adopt Jenner's discovery and by you it has been extinguished." This same disease which was so feared back to 1802 and say, "it is almost unknown," is very prevalent in some states. In the past we could look back on with startling reduction in the number of cases of vaccination, was allowed to happen. 100 cases of smallpox were reported yearly in the United States. The amount of ignorance and its inevitable consequences, poverty, disease and misery. The only remaining countries which have to fear as a threat to the health of their children and the community is Great Britain. Why should we have this tremendous number (along with Britain, India, South Africa, Germany and all other civilized countries have so few? The answer is—conservation of the economic institution which a single vaccination confers, who need vaccination and re-vaccination. And, as in all counties of California, there is a certain in- flush of indigent, transient laborers, and dust bowl refugees. Large numbers of these people come from states where the public health program has been inadequate and therefore they are un-vaccinated. From these a majority of our cases of smallpox have at least started, to spread to the more stable citizenry. It is in matters of health care that the State Health Department to and your own County Health Department, that the number of cases of smallpox—and hence the danger—has been steadily increasing for several years in California. In 1939 the number of cases in this state was 2500; in 1940 it was 5500; and in 1941 it was 6100. This trend is ominous. Let us compare these figures with those of Santa Barbara County, where the ex-hibiting school program under the careful guidance of its chief, Dr. C. R.Mail, has kept so many vaccinated and has obtained the hearty cooperation of a public which has only to be shown—and then sets. The figure can be increased with pride by every vaccinated person in the country. Last year we had only two cases of smallpox and for the three years previous to that we were none! While we had two this year (an hidden family from Oklahoma), a neighboring county had eighty-eight cases.

Each year throughout the entire school system of the Santa Barbara County is protected by the vaccination program of the County Health Department. The unusual success of this program has been made possible by the cooperation of an excellent school system under Superintendent Muriel Edwards, well trained private phy-sicians, and a laity which demand the best for their children. But this program must be a continuous one and needs the constant efforts, in-scription and cooperation of the laity, teachers, doctors, and health dep-artment. Through the year these are held by the County Health Department, sixteen child health conferences each month, in various parts of the county. Some two thousand preschool children from birth to six years of age are carefully super-vised and, if the parents so desire, given smallpox vaccination with-out charge. At the present time about 15% of the parents ask this protection and insurance for their children of preschool age. If parents desire the vaccination to be given by their private physicians, the health department is glad to furnish the vaccine free to the doc-tor. Chronicles. USC to Celebrate Homecoming Week NOV. 28 TO DEC. 3.

Proclaiming its whole-hearted welcome to 20,000 alumni, the University of Southern California announced yesterday that “They Awaits With Open Gates,” for the return of its graduates during the Fifteenth Annual Homecoming Week celebration, November 28 to December 3.

Selection of the 1938 slogan, composed of John Harrington, junior student at S. C., was the official beginning of the comprehensive program of reunions, rallies and other events to be climax’d by the international football game between the Trojans and Notre Dame.

With Dr. Edward M. Pailette, ’86, former president of the Catholic Medical Association, as altarnate chairman, and Dick Rees, student president of the College of Commerce, as student head, the program is rapidly taking form with the aid of more than 100 student and alumni committee workers.

Monday, November 28, will be devoted to open house at fraternity and sorority and to the “Interfraternity Sing. On Tuesday, colorful house decorations on fraternity Row will be judged by a committee headed by William G. Bonelli, ’86 of the State Board of Equalization, The Women’s Hilo with its theme of “Cherubs in Penmen” will be held that evening.

The Andy Devines have completed the nursery built onto their Van Noy’s home for the new heir or heiress expected shortly after the first of the year. Bob Hope and Shirley Ross taking time out from “Never Say Die” and “Cafe Society,” respectively, to make a Decca record of “Two Sleepy People,” the song hit they introduced in their current picture, “Thanks for the Memory.”

PORTABLE METER FOR MEASURING WATER DEVELOPED
DAVIES—A meter which can easily be carried and fastened on pipe line valves to measure the amount of irrigation water being delivered to any particular field has been developed on the Davis campus of the University of California by C. N. Johnson and E. Christiansen, of the Division of Irrigation Investigation and Practice.

The meter was first constructed and tested for use in experimental irrigation plots maintained by the College of Agriculture. Later it was improved and used for measuring friction losses in concrete pipe lines. It has certain distinctive features which suggest that it might be used as a general purpose meter for use wherever water is delivered in concrete pipe lines.

The meter can be set in operation simply by removing the lid of the pipeline valve and setting the machine on the valve. A disc blade impeller receives the force of the water passing through the valve and registers the flow on a dial which reads directly in acre-feet. The indication band makes one revolution for each one-thousandth of an acre-foot, so that the flow can be measured simply by timing this hand.

Warriors Trim Saintlets

In Post Season Game

The Carpinetia Warriors played their last game of football of 1938 in a post-season game with the Santa Maria Saints on the local field Wednesday afternoon and trimmed their opponents from the northern end of the county by a score of 14 to 6.

Although there was plenty of action in the first quarter of the game neither team reached pay dirt until the second quarter when Carpinetia hung up the first touchdown as the result of a forward pass good for 30 yards from Olds to Kendrick. The extra point was failed by a pass completed from Olds to Gordon Milne. The Saintlets made a desperate effort to tie up the ball and succeeded in making a touchdown when Nourshta interceded to Rice who forwarded passed to Chisholm who travelled into the end zone. However, they failed to make the extra point leaving the score at half-time 7 to 0.

The Warriors proceeded to sew up the game in the third quarter when Olds passed to Milne who went over for a touchdown after a gain of 40 yards on the play. The extra point was scored pass from Olds to Clark.

The game ended with the Warriors in possession of the ball deep in the Saintlets territory.

WARRIORS TO START CAGE PRACTICE

Basketball practice at the Carpinteria High School will start immediately following the Thanksgiving vacation according to Coach Merle Carr. There will be three teams, A, B, and C, and coaches for the B and C teams will be announced later.

Prospects for basketball this year are very good since several notable returners, including Phil Oldershaw, little All American guard of last year; Larry Ballard, Webster Beckerstein, and Gordon Milne, as well as a number of others who played last year are expected out for practice.

While the basketball teams will practice in the Ventura Minor League Arena they will also play a number of practice games with teams in the Ventura Major league. The schedule for the Minor league has been announced as follows:

ANNUAL FOOTBALL BANQUET SET FOR DECEMBER 10

The date of the annual high school football banquet has been set for December 10th, with members of the team as guests of honor. The dinner will be held in the Veterans’ Memorial Building and will be prepared by the P.T.A. and entertainment will be provided by the Girl’s League. Only students and faculty will be invited to attend the dinner. However, students may bring guests to the dance which will follow the dinner, providing they register names of guests in the office.

Committees for the event have been announced as follows: Table decorations, Elsa Lee Grell, Edith Van Metre, Margaret Russell, Nancy Franklin, Daphne Dewar, Beverly Humphreys, Miss Ballard, Richard Hosta, Gordon Milne, Mary Shepard and Bob Corbett, Roberta (orchestra); June Osterman, Babe Stewart, Donald Royer, and seating, Miss Foreman and Beverly Humphreys.

OXY TO PLAY LAST GAME OF SEASON THIS SATURDAY

Twenty-seven Occidental College football players wind up their 1938 season this Saturday when they face Colorado College in Colorado Springs in the first of a two-year home and home agreement with the latter school.

The Tigers left Wednesday morning.

The Tigers will be a slight underdog to the Colorado outfit Saturday. They have dropped five out of seven games thus far. Anderson scores that the high altitude and cold weather may affect his province's play.

FARMER BRITT LOSES MATCH AT MAC ARENA

Much to the delight of all fans present was the fall of Farmer Britt, the meanie from Kansas Britt, a very unpopular gladiator due to his "Armbrucker" tactics was stopped by Leroy McQuirk of Oklahoma. Knee kicks to the jaw did the trick in a very efficient manner. The end saw Britt out for the count with very little sympathy from the fans.

The new lightweight champion, "Taron" Orth won a very unpopular match with Charles Carr. Displaying faces and jumping up and down in disagreement gave him claims to his strange nickname, Carr, much the better wrestler, was subdued by Orth in anything but wrestling tactics. Using every foul in the book he was able to

son Carl Bauhas is home from
school for Thanksgiving in Glendora
for the holiday. Miss Dorothy Duda
accompanied Miss Claire Thurner
home from Scripps college for the
week-end. Another Thanksgiving
guest at the Thurmond home today
after spending the week-end. Another
Thanksgiving guest at the Tromer
home today after spending the
week-end. Another Thanksgiving
guest at the Thurmond home today
after spending the week-end.

IFRIDAY, NOVEMBER 25, 1938

The sum of $9,406,700 is being
spent on new municipal buildings
in southern California. In' California
alone, a total of $6,849,947.
Various California waterworks
projects are being granted $3,071,020
and, loaned an additional $1,025,800.
Farm Compulsion Threat

By ELIOT JONES
Professor of Transportation and Public Utilities
Stanford University

Our present agricultural practice is not yielding the returns it should. The three principal features of our present agricultural practice are, (1) high prices; (2) high taxes; (3) high death rates. These features have been the cause of the demise of the railroads, with a renewal method worked well and was of appraising their holdings. This of the State) the law was changed mobile trucking on the public highways.

In Santa Barbara County the as­ duplicated or missed. So Mr. A. G. and all these utilities were to behaps invalidate all of the tax rolls and.

The inevitable result of this system, if the law were to be changed, is that the government is left holding the bag, and at the possible cost of our present agricultural practice, the prices may be lowered and the production may be reduced. The inevitable result of this system, if the law were to be changed, is that the government is left holding the bag, and at the possible cost of our present agricultural practice, the prices may be lowered and the production may be reduced.

The third, and worst, feature of agricultural policy is in tendency to destroy farmer independence. The third, and worst, feature of agricultural policy is in tendency to destroy farmer independence.

In making these remarks the Sec­ ond, feature is that the government is under­ taking the danger, his politics since that date have carried the country a way in that direction. Moreover, un­ likely as it may seem, the government is working in much the same way in that direction. Moreover, un­ likely as it may seem, the government is working in much the same way in that direction.
