Post Office Figures Show Steady Growth of Community

Post Office statistics have long been depended on to indicate the growth of a community and figures just released by Postmaster Minnie Bauhaus of Carpinteria are no exception and show clearly the development of the town during the past five years.

Postal receipts have increased from \$9421.21 in 1933 to \$10,825.88 in 1938, a net gain of \$1,404.67. Domestic money orders issued in 1938 totaled 6151 as against 4240 in 1933, a gain of 911. Foreign money orders have increased from 192 in 1933 to 282 in 1938, a gain of 90.

Further evidence that Carpinteria needs a larger post office building is shown by the fact that in 1933 there were but 250 post office boxes rented while in 1938 there were 354, a net gain of 101. While figures on rural route patrons would indicate that there has been a loss in this department this is not the case since the route covered 31.65 miles in 1933 and was reduced to 25.15 miles in 1937. In 1933 there were 187 boxes serving 223 families or 985 patrons. In 1938 on the route, shortened by 6 miles, there were 183 boxes serving 198 families or 802 patrons.

Also active during the past year was the Postal Savings department which was established in 1937 and has proven popular with a number of Carpinteria residents. Likewise, Savings Bonds which are on sale at the Post Office have found favor as an investment with many residents.

LION'S CLUB TO HEAR ASSISTANT COACH FROM USC

The Santa Barbara Lions club will meet jointly with the local Club in the Veterans' Memorial building this evening to hear Bob McNeash, assistant coach to How-

Proposed Short Cut To Valley of Local Interest

With the awarding of the contract for the first unit of the Heuneme harbor and with start of construction but a few weeks away, civic leaders in the Santa Paula, Fillmore and Piru areas are compiling data on two proposed short cuts to the San Joaquin Valley which would also be of material value to Carpinteria in making the beach more accessible to valley residents during the summer months, thereby greatly increasing tourist business.

The following paragraphs dealing with the proposed roads appeared in an article in the Ventura News last Friday:

"Now that the first steps toward the construction of the harbor has been made, leaders in the Santa Paula-Fillmore-Piru areas are stepping fast in the matter of collecting data on the cost of

FIRST GRADERS TAKE TRAIN RIDE

Pupils of the first grade of the grammar school had an experience which will long be remembered last Friday morning when their teacher, Miss Leona Smith arranged a trip to Santa Barbara to illustrate their lessons in transportation. The trip was arranged by the local Southern Pacific agent, E. A. Chaffee, the pupils boarding the morning train. They were met by the Santa Barbara agent who assisted them from the train and put them in charge of David Cummings who had taken the school bus to meet them. Enroute home they visited the roundhouse and were permitted to board one of the new streamline engines and ring the bell and blow the whistle. In return for the privilege they sang several songs for the engineer.

The pupils making the trip were Richard Savage, Frank Martella, John Stewart, Robert Vaughan, Dolores Chaffee, Patsy Connell, Sally Coshaw, Rosie Lopez, Ruth Rock, Ruth Rodriguez, Marilyn Sangster, Robert Shmate, Merlo Seglie and Helen VandeBaker.

ard Jones at the University of Southern California review the outstanding sports events of 1938, including the Rose Bowl game of this year. Some fifty men from Santa Barbara club are expected to attend the meeting.

The musical program of the evening will be presented by William Crawford who will play selections on harmonica, guitar and piano. Program arrangements are in charge of Frank Wykoff.

Guests of the club last Thursday included I. T. Steiner of Santa Barbara and two Boy Scouts, Bob Jones and Jim Morrison.

CARS DAMAGED IN COLLISION

A car driven by Don Sudin of Santa Barbara crashed into one driven by Gordon Hall of Carpinteria about 8:00 a. m. last Thursday morning at the corner of Linden Avenue and Seventh street. Although both cars were badly damaged, both drivers escaped injury other than shock.

Hall was traveling towards the beach on Linden Ave., and Sudin was approaching Linden on Seventh street from the west. According to reports Sudin stated that he was blinded by the sun and did not see the other machine.

YOUTH CITED FOR RECKLESS DRIVING SUNDAY

A sixteen year old Carpinteria youth will face probation authorities in Santa Barbara tomorrow on reckless driving charges as the result of a wild ride through the residential and business section of town Sunday evening which culminated in a narrow escape from death for himself and companions and resulted in serious damage to the car he was driving.

Rounding the corner from Walnut avenue onto 8th street in the direction of Linden avenue, while pursuing another car, the youth narrowly missed crashing into a parked car on the left side of the street. A few minutes later he returned, still chasing the other car, traveling east on Eighth street at a speed estimated over 50 miles an hour and hit the dip in the intersection by the new school with such force that the car was thrown several feet into the air and completely out of control. The car then careened on two wheels toward the other side of the street and just as it started to turn completely over the back end crashed into an avocado tree in front of the John E. Jones residence with such force that it righted the machine.

Finding that the car would still run the youth fled the scene and returned to his home and went immediately to bed unaware of the fact that in his haste to escape, the license plate which had been torn from the car by the impact had been left at the scene. Highway patrolman Tatjes and Nelson investigated the accident and secured the registration of the car from Sacramento and immediately went to the lad's home and issued a citation for reckless driving.

"DEAD MAN" IN ROAD PROVES TO BE DUMMY

Pranksters created considerable excitement for a few minutes Tuesday night when they placed a dummy in the middle of the highway on Rincon Hill. Several excited motorists stopped at the Seaside Station and reported that there was a dead man in the road.

Fire Loss for District for 1938 Is But \$1,619.50

FIRE DEPARTMENT ANSWERS UNUSUAL CALL FRIDAY

The Carpinteria Fire department was called out last Friday afternoon to extinguish the most unusual fire that has occurred since the establishment of the department and one that might well do to send into Ripley, when a report was phoned in stating that smoke was pouring from a pump house on Rincon creek.

Arriving at the scene firemen waded the creek with a chemical extinguisher expecting to find a blazing motor but found to their amazement that the smoke was pouring out from the depths of a well and that no motor was involved. The wooden casing of the dug well was found to be burning between the casing and the dirt walls a number of feet below the surface and it was necessary to lay a hose line and pour many gallons of water into the well before the fire was extinguished.

The well is the property of Mrs. D. A. Carton and had not been used for fourteen years. The origin of the fire is unknown although it is believed that a party who inspected the well that morning with a view to leasing it might have dropped a cigarette which landed between the wall and wooden casing.

Mrs. Rome Bradford left Tuesday morning for San Francisco to join her husband, now in that city.

Upon investigation it was found that the "dead man" was a dummy stuffed with straw. This was the second time that such a trick has been played recently, a similar event having taken place in Old Town recently.

Should the identity of the jokers be learned they will be prosecuted since their joke might have resulted in a serious accident by causing motorists to swerve off the road or into another car.

* Figures just released by Chief L. R. Carter covering the activities of the Fire Department during 1938 reveal that Carpinteria Fire District enjoyed an unusually small amount of loss from fire. The total loss for the district, which includes both Carpinteria and Summerland was but \$1,619.50. There were only two major structural fires during the year, one being the Davis property near the beach and the other a small house in the Old Town section. The majority of calls were for grass or brush fires burning uncontrolled and threatening to destroy property.

During the year, Truck No. 1, stationed at Carpinteria answered 19 alarms and Truck No. 2, stationed at Summerland, responded to 8 alarms, both trucks being called into service on one occasion, making a total of 26 alarms for the year. In combatting these fires 23 hose lines were laid aggregating a distance of 4135 feet of hose.

An average of 9 men responded to each alarm. Fire drills were held regularly throughout the year and latest methods of fire control work studied, which coupled with the addition of new hydrants and the low fire loss for the year is expected to bring further reductions in fire insurance rates within the near future.

ANNUAL CRIBBAGE TOURNAMENT TO START NEXT WEEK

The annual cribbage tournament, with the Chamber of Commerce cup as the goal, is scheduled to get under way Friday evening, Jan. 27th at the Veteran's Memorial Building at 8 p. m. and will continue over a period of 8 weeks.

Teams will be entered from the Chamber of Commerce, Lions Club, Knights of Pythias, Masonic Lodge, American Legion and the Cribbage club. All persons who are interested in the game are invited to be present at the opening of the tournament.

C. of C. Asks Change in Law On Use of Public Equipment

The directors and members of the Chamber of Commerce met last Wednesday evening in the Justice court room and voted to change the meeting night to the first Thursday in each month and the next meeting is scheduled for Feb. 2nd at which time the constitution committee will report and recommend several minor changes in the constitution.

W. H. James, Secretary of the organization, was directed to write a letter to Assemblyman Alfred Robertson and Senator J. J. Hollister, asking that they introduce an amendment which would permit one political sub-division to borrow equipment owned by another sub-division. It was the general

feeling that such a change in the law would bring material savings to taxpayers since it would then be possible for a subdivision such as a school district to use equipment belonging to the county or another district.

Also on the list for discussion at the next meeting will be the proposed zoning ordinance which is being prepared by the County Planning Commission, the semi-annual spring dinner of the organization and plans for a Fourth of July celebration.

The directors also voted a \$5.00 raise in salary for the Secretary bringing his salary to \$30 per month.

 Advertising Rates on Application

IT CAN BE STOPPED

There is not a parent in Carpinteria who would not look at you as though you had lost your senses if you were to ask if they thought a stick of dynamite or a loaded gun was a fit toy for their offspring and there is not a youth who would not become highly indignant if accosted with the statement "You are a potential killer." Yet those same parents place a far more dangerous weapon in the hands of their children when they permit them to drive a car and those same youths, carelessly skidding around a corner, may leave dead and injured in their wake in less time than it takes to wink an eye.

We sincerely wish that every parent whose children drive cars could have seen the mad dash of a young driver down Eighth Street on Sunday evening and that every youth who drives a car could have seen that mass of steel and iron and glass hurtling to what seemed certain destruction. Perhaps this sight would have impressed both parents and youths that a car in the hands of an inexperienced or reckless driver becomes a juggernaut dealing death and destruction.

Safety campaigns, reams of publicity and talks by traffic officers seem to make no lasting impression on the youth of Carpinteria. Many young people who are otherwise good citizens seem to lose all sense of responsibility and caution when they get behind the wheel of a car and, other means having failed, there remains but one solution to the problem and that is to deny them the privilege of driving a car. If the citizens of the community desire to put a stop to the numerous accidents which have occurred in recent months they can do so easily enough by reporting cases of reckless driving and swearing to warrants if necessary, not in a spirit of meanness to deprive youth of its pleasure, but in the interest of the safety of every man, woman and child in the community and the protection of youth from the consequences of its own carelessness.

APPOINTMENTS BY NEW GOVERNOR ARE MADE PUBLIC

The appointment of Walter T. Ballou as Deputy Director of the Motor Vehicle Department by Governor Olson is a recent selection. Ballou replaces George Rochester, Merriam appointee, who has been in the Los Angeles office of the Department. Ballou, 53 years of age, has lived in California since 1907. For twenty-five years he has been engaged in the automotive industry holding executive and administrative positions. He was, at the time of his appointment, Secretary of the Democratic State Central Committee, and prior to his election as Secretary was Assistant Manager of the Olson pri-

mary campaign. He has been closely associated with the Governor for the past four years.

Governor Olson has appointed Phil Gibson Director of Finance, and Frank W. Clark Director of Public Works to serve on the Golden Gate International Exposition Commission.

Dr. and Mrs. Thornton M. Shorkley motored to Hollywood Sunday afternoon where they were joined by the daughter Mary for dinner at the home of Mr. and Mrs. William J. Roulston. During the evening they attended the concert of the U. C. L. A. a capella choir at the Wilshire Methodist church, Miss Mary Shorkley singing in the chorus and playing a violin obligato for a solo.

The Churches

Carpinteria has a number of Churches, whose pastors and members will be glad to welcome you to their services.

THE CARPINTERIA COMMUNITY CHURCH

Rev. Deane F. Babbitt, Pastor.

Liberty is one of the supremely great words of our language. Life itself has no value and happiness is impossible without liberty. To the Christians of the Church in Galatia the great Missionary Paul wrote:

"Stand fast therefore in the liberty wherewith Christ hath made us free, and not be entangled again with the yoke of bondage." Galatians 5:1.

Unless there is inward as well as outward freedom, bondage is the result. Contributing to the Adoration and Worship of the Eleven o'clock Service of Praise, the pastor will preach upon "The Spirit of Liberty." Music will be furnished by the Tuxis and Men's Choruses of the church. Beatrice B. Babbitt is the acting pianist.

Sunday school 9:45 a. m.

Public Worship 11 a. m.

Study Council 2:30 p. m.

Youth Fellowship 6:30 p. m.

Jack Hoffman, President of the High school and College Christian Endeavor groups, will present: "Jesus, Our Divine Example," at the Fellowship Hour. Bill Jorgensen and Madelon Southworth will present plans for the coming "Roller Skating Party" at the Ventura Casino on Saturday, the 28th. A Chartered Nite is scheduled, beginning with a five o'clock meeting at the church followed by a picnic lunch at Ventura. Affiliate with Christian Youth and grow into a "balanced Christian Character."

METHODIST CHURCH

Rev. J. A. Woodson, Pastor

10 a. m. Church school, Rev. C. P. Moore, general superintendent. Religious education is a fundamental function of the church. It is important just in proportion as religion is valuable to life and as education is essential to the direct development of life.

As to the place of this work Dr. Walter A. Squires says, "The providing of adequate and efficient religious instructions for the children of America is our greatest national problem. The providing of such instruction for the children of the world is the greatest world problem."

Both the nation and the world are leaving this problem to the church to solve. The church has assigned to it the most serious task, the great responsibility, of our world—the saving and training of men religiously. We invite you to join us and let us get in earnest and meet this responsibility.

11 a. m. The pastor will speak on "The Supreme Necessity." In a day like this who can say but that the greatest need and the only absolute insurance of victory lay in being led of God. Come and think this out with us.

6:30 p. m. Meeting of the two leagues. The topic for the older youths will be, "What Does a Crusader Need? Come on young folks and catch hold here in this Youth Crusade that will extend through the forthcoming quadrennium. Installation of officers of both leagues just preceding the evening service.

7:30 p. m. Evangelistic message by the pastor, subject, "Busy Here and There. Gone." It has been said that the greatest step taken by the General Conference at Birmingham last May was the creation of the Commission on Evangelism

AMERICAN LEGION AUXILIARY TO SPONSOR CONTEST

The American Legion Auxiliary has announced an essay contest for children from the 1st through the 12th grade on the theme, "Appreciation of America." Winning essays in the local contest will be entered in a state contest with prizes awarded to the winners.

The contest has been divided into four groups with topics as follows:

1. First through Fourth Grade: "Why I Love America." Limit 150 words.

2. Fifth and Sixth Grades: "The Reason I am Proud to Be an American." Limit 200 words.

3. Seventh through Ninth Grade: "How Can I Help Perpetuate Americanism." Limit 300 words.

4. Tenth through Twelfth Grade: "Why I Believe in Democracy and American Ideals." Limit 500 words.

The essays will be judged as follows:

40%—Patriotism

40%—Originality

20%—Neatness, punctuation, spelling.

Prizes to be given are as follows. Group 1—\$2 for the best essay. Citation for next best; Group 2—\$3.00 for best essay. Citation for next best; Groups 3 and 4—\$3.00 for best essay in each group; \$2.00 for second best in each group.

A. E. Southworth and Miss Elizabeth Platt of the high school attended a school conference in Los Angeles yesterday.

with a group in every church. We observed Covenant Sunday Jan. 1st. If you have not already then join at once this Fellowship of Evangelism.

Rev. James Gibson "The Irish Evangelist" will begin a series of meetings here Jan. 31st. Come and learn about this.

CHRISTIAN SCIENCE SOCIETY

Christian Science Society, Carpinteria, a branch of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., holds service every Sunday at 11 o'clock a. m., Sunday School at 9:45 o'clock. Mid-week meetings every Wednesday evening at 8 o'clock.

A reading room is maintained in the church building, open Tuesday afternoons (except holidays) from 2:30 to 4:30 o'clock.

"Ascribe ye greatness unto our God. He is the Rock, his work is perfect: for all his ways are judgment: a god of truth and without iniquity, just and right is he." This verse from Deuteronomy is the Golden Text in the Lesson-Sermon on "Truth" on Sunday in all Churches of Christ, Scientist.

The Lesson-Sermon includes also these words of the Psalmist: "Withhold not thou thy tender mercies from me, O LORD: let thy lovingkindness and thy truth continually preserve me. . . I will praise thee, O Lord, among the nations. For thy mercy is great unto the heavens, and thy truth unto the clouds. . . Happy is he that hath the God of Jacob for his help, whose hope is in the LORD his God: Which made heaven, and earth, the sea, and all that therein is: which keepeth truth for ever: . . . The Lord openeth the eyes of the blind: the Lord raiseth them that are bowed down: the LORD loveth the righteous."

Among the selections from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy, is the passage: "The understanding of Truth gives full faith in Truth, and spiritual understanding is better than all burnt offerings."

NEW OFFICERS INSTALLED BY MASONIC LODGE

Installation of officers at Masonic lodge Monday evening drew a large attendance of local Masons and Eastern Stars from Santa Barbara as well as many from the local organizations. Bernard Church was installed as worshipful master of the lodge. John McRae, inspector of the 70th district, was the installing officer, assisted by W. W. McKee of Santa Barbara and Merton F. Lewis. Music during the ceremonies included solos by Mrs. Jean Milne Coyes and Larry Butler of Santa Barbara, accompanied by Charles Cox.

Other officers installed were: senior warden, Henry Milne; junior warden, Emanuel D. Solari; treasurer, Mads Christensen; secretary, John E. Jones; chaplain, Charles Curtis; senior deacon, Clifford C. Benedict; junior deacon, Earl Southworth, marshal, Ray E. Doell; senior steward, Ralph Smith; junior steward, Lewis Gann; tyler, George A. Senteney.

SINGLE MEDICINE FOR DIPHTHERIA AND LOCKJAW

SAN FRANCISCO—The use of a single agent designed to protect against both diphtheria and tetanus (lockjaw) is being started by the department of pediatrics of the University of California Medical School as part of its disease prevention program. In the past, diphtheria prevention was first accomplished by the use of toxin-antitoxin mixtures. It was later shown that formalin could be used in place of the antitoxin and that the resulting preparation known as toxoid, was not only more efficient as an immunizing agent, but also avoided the horse serum present in antitoxin.

More recently Dr. Ramon, who first developed toxoid at the Pasteur Institute has shown that the same method can be applied to tetanus. While the toxoids of diphtheria and tetanus can be given separately, Dr. Ramon and others working in the field of immunology have shown that the combination of the two toxoids is of benefit.

Thus, an infant or a child with no more manipulation than is now done to protect against diphtheria, can also have the benefit of protection against tetanus. It is hoped the procedure may avoid for some sensitive individuals the hazard of tetanus antitoxin administration.

At the present time emergency hospitals use the antitoxin as a preventive measure against tetanus developing in injuries, particularly from street accidents. It is hoped that with the new program a final injection of toxoid for such individuals who have had the program will be more efficient and simpler.

The program has been adopted by the French army and a few clinics in the United States. As a measure of considerable merit for public health a more extensive adoption can be anticipated.

Mr. and Mrs. Milton G. Gann and daughter Erlene of Fellows were week-end guests of Mr. and Mrs. W. Lewis Gann.

Mr. and Mrs. James L. Kent had as their luncheon guest Tuesday Mrs. Sophie Hammel of Petaluma.

Colonial in style, the Missouri Building at the 1939 California World's Fair, forms one wing of the Court of States.

THE WEEK'S SPORTS

Prospects for Big Handicap At Santa Anita Are Listed

Reported at Santa Anita as the meeting swings into its third week pointing to the running of the \$50,000-added Santa Anita Derby on Washington's Birthday and the \$100,000-added Santa Anita Handicap on March 4:

Porter's Mite, on the strength of his impressive victory in the Santa Maria Stakes at six furlongs, is a pronounced favorite for the Derby. Trainer Ted Horning plans to give him a let-up for several weeks and then give him perhaps two starts before the big race for the three-year-olds, and if the colt goes well he is a possibility for the Big 'Cap as he is in with scale weight of 106 pounds.

Many of the horsemen pick Xalapa Clown as Porter's Mite's most serious rival. Xalapa Clown is being taken along slowly and will perhaps make only one start. Nick Wall is lined up to ride him. There are 105 other eligibles who will undoubtedly come along and show indications of going the mile and a furlong.

Seabiscuit, top weight of 134, is coming along and trainer "Silent Tom" Smith is looking for a spot to place him. Fact is, last week Seabiscuit was almost put in a six-furlong sprint. He's worked a smashing 3/8 in :34 2-5. Ralph "Dizzy" Neves has been riding all the C. S. Howard horses and is seriously striving to get the mount on the 'Biscuit. "Diz" is light and not as strong as George Woolf or Red Pollard, neither being available, but is a hustler and has been showing excellent form.

Dauber (124) is not being rushed after his breakdown last summer. He worked a mile in 1:41 2-5, and may get a tightener in two weeks.

Heelfly (117) and Specify (115) are getting a special schooling at the barrier in the afternoon between races. Both have shown tip-top form in races but are bad actors and promise trouble at the start of the big race in case of a big field, as now appears likely.

Ligaroti (122) still has many supporters, but the other prominent invaders have not shown anything startling. Sorteado (124) is still several weeks away from a race; O'Grady (120), Beti-Bat (118) and Courtill (112) have not shown much in training.

Marica (121), champion mare, will probably go later in the month but her rival, Esposa, is hot as a firecracker, reeling off a trial mile

REFEREES TACTICS BOOED AT MAC

Our hearts went out to Manager Poole during last week's show when the fans stood up as one man and booed the referee. In all the history of the Mission Athletic Club there has never been such a farce permitted as the bit of work put out by "Pat" the erstwhile ref. In the last bout between Sleepy and Orth, it was felt by all and made quite evident by the ref that Sleepy was wrestling or at least pitted against two men—Pat and Orth. Using his special tricks of hair pulling, biting, and eye-gouging the redoubtable Orth (with the help of the referee) managed to pin Sleepy for two out of three falls. It is such incidents as this that will kill wrestling in Santa Barbara.

Pappy and Sleepy will again go into a team match against Orth in 1:38 -5, in preparation for the San Pasqual.

Main Man (117) has taken the lead for Louis B. Mayer's best color-bearer. Perifox (112), British stakes' winner, is galloping well but has not turned on the steam. Ossobaw (116), converted jumper, has many of the boys booming him on the strength of a fast work reported at Tanforan but he has made no impressive moves here. Magic Hour (115), is out of the picture and Brooklyn (115) pulled up lame in recent work.

Isaroma (121) is about ready to start after a year's lay-off and his performance is being eagerly awaited. Tony Pelleteri has another threat in Sir Raleigh (114), who has won two corking races.

War Minstrel (112) showed a brilliant race last week, and Major Austin C. Taylor has a four-year-old maiden, Pom Kee (112), which the boys are watching.

Honey Cloud (112), War Magic (112), Grim Reaper (112), Bottle Top (110) haven't started as yet.

Flying Fox (110) is training sensationally and Count Arthur (114) came out of his only start in good shape.

There seems to be more interest and prospects of an open race in the Big 'Cap this year, than in the previous four runnings, but much is being centered on how champion Seabiscuit comes to hand and who will ride him.

HOLLYWOOD PARK TO GIVE EXTRA 10% TO CALIFORNIA NAGS

To further the cause of thoroughbred horse breeding in California, the Hollywood Turf Club will pay to breeders of California bred horses an additional 10% on stakes and purses in which California bred horses place first, second, third or fourth.

In making this announcement today, Jack MacKenzie, general manager of the Hollywood Turf Club explained that this would not apply to races exclusively for California bred horses.

"It is the cherished desire of every true California breeder to see the breeding standards of this state raised to where they will be on a par with Kentucky raising of thoroughbred horses," stated MacKenzie.

"It is the hope of the Hollywood Turf Club that this generous gesture will be a distinct aid and inducement to the more than 200 registered breeders in the state."

"These awards will in no way affect the present California law wherein 3% is deducted from the winner and sent to the breeder."

The second annual meet at Hollywood Park opens June 1, 1939 and runs 43 days.

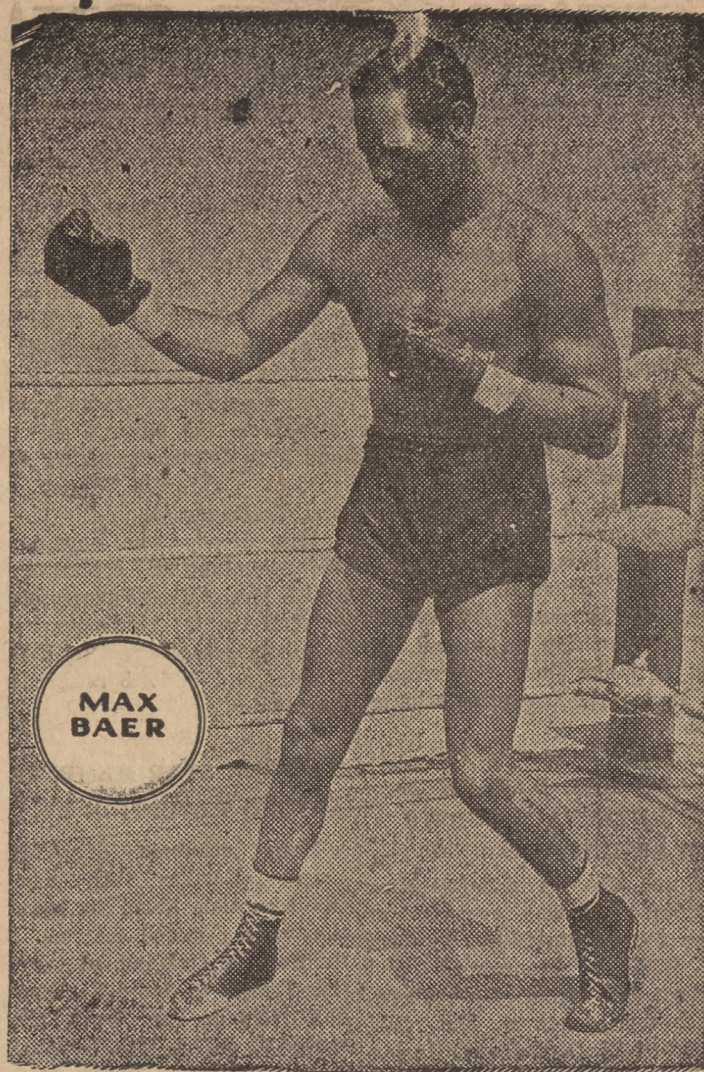

FORMERLY IN STOCK

Stanley Price, a player in Paramount's "Sweepstakes Millionaire" with Charlie Ruggles and Marjorie Rambeau, is a former stage star who at one time operated stock companies in Battle Creek, Mich.; Hammond, Ind., Terre Haute, Ind., and Lexington, Ky.

and Pete Belcastro, who last week acted as Otrh's second and is one of the same breed. Far from a wrestler, Pete makes up for it by imitating his companion in tactics. This final appearance of the Hillbillies should prove a killer-diler.

In the semi-windup, Jackie Nichols meets another "villain" Monte LaDue. This bout is slated for extra falls with a 45-minute time limit. This will give Nichols a chance to prove that he can take it against rough handling that is due him from LaDue.

The opener will see Buddy Knox against Marshall Carter. This is scheduled for one fall, with a 30-minute time limit.

"Slapsie Maxie" Baer who will stage a new come-back this year and is expected to meet the Brown Bomber some time this summer.

By pushing a button at one of the many amazing exhibits in the Hall of Science at the 1939 California World's Fair, a spectator will be able to see the birth of a plant and the secrets of plant propagation.

P.T.A. FASHION SHOW SCHEDULED FOR FEB. 10TH

The date of the annual Fashion Show and dessert bridge sponsored by the High School P.T.A. and Junior Class mothers has been set for February 10th, in the high school auditorium at 1:30 p. m.

Mrs. A. E. Southworth is general chairman of the affair and will be assisted by the Junior mothers and members of the P. T. A. Mrs. Cecil Thomas is chairman of the modeling committee.

Plans are being made for 50 tables and a small admission charge will be made. All persons who are planning to attend are asked to make their reservations with Mrs. O. L. Lyman as soon as possible.

MR. AND MRS. D. SAFWENBURG ENTERTAIN GUESTS FROM SWEDEN

Mr. and Mrs. David Safwenberg entertained Tuesday evening at dinner for guests from Sweden, Dr. Wilhelm Mannegord and daughter Sili from Gothenberg, and another daughter, Mrs. Carl Morbey of Santa Barbara. During the afternoon Mr. Safwenberg took the guests on a tour of the valley, following the lemon industry from the trees to the packing house.

DESSERT BRIDGE GIVEN FOR MRS. ROY S. BOWDEN

Mrs. Harold McKnight of Santa Barbara joined with Mrs. W. Lewis Gann in entertaining at a dessert-bridge Saturday afternoon at the J. C. Furby home honoring Mrs. Roy S. Bowden. Score prizes were won by Mrs. Robert Williams, and Mrs. Reid Prince of Santa Barbara.

Others present were Mrs. Francis Castro, Mrs. Leslie Carter, Mrs. Leslie Carter, Mrs. Harold Heltman, Mrs. Robert Sawyer, Mrs. Merle Shride, Mrs. Ford Kline, Miss Vivian Rodriguez, the Misses Margaret and Claribel Lewis.

ATTEND FEDERATION COUNCIL IN SANTA MARIA

Carpinteria Woman's club was represented at the bi-monthly conference of the county federation at Santa Maria Tuesday by the president and vice-president, Mrs. Joseph H. Hendy and Mrs. W. Guy Stockton. The morning session was held in the new Veterans' Memorial building followed by a luncheon at the Methodist church and the afternoon meeting in the church auditorium. Mrs. Bradley Burns played a short organ program before the afternoon session and the boys' a capella chorus

from Camino grammar school sang four numbers.

Mrs. Albert Launer of Fullerton, vice-president at large for the state federation, and Mrs. Frank Rospaw of Placenta, editor and manager of the state publication, The Federation News, spoke during the afternoon, Mrs. Rospaw talking on federation activities as seen from the editor's viewpoint, and Mrs. Launer speaking on the subject "California Women, today and Yesterday."

Mrs. Hendy was appointed to the nominating committee of which Mrs. Alfred Fauerso of Santa Barbara is chairman. Other members being Mrs. Frank Baker, Goleta, and Mrs. Bert Dinnes of Orcutt.

EASTERN STAR MEMBERS ATTEND RECEPTION

Many members of Vallecito chapter, Eastern Star, attended the reception given in honor of the worthy grand matron, Mrs. Fleutsch of Oakland, at the Masonic Temple in Santa Barbara Friday evening. The local chapter served as escort, Mrs. Edwin Storr and Mrs. John C. Furby, marshal and conductress, acting for the chapter.

On Saturday evening Mr. and Mrs. J. V. Van Meter, Mrs. Thomas, Church, Mrs. Merton F. Lewis and Mrs. John B. Hudson motored to Santa Paula to attend a similar function.

LEGION AND AUXILIARY HOLD JOINT DINNER

The American Legion and American Legion Auxiliary held a pot-luck dinner Tuesday evening in the Veterans' Memorial building. Following the dinner Clarence Cadwell showed motion pictures taken in the High Sierra after which the two organizations adjourned to their rooms for short business sessions.

Those attending the dinner included: Mr. and Mrs. Henry Sturmer, Mr. and Mrs. Marc Latham, Miss Arianna Moore, Ben Moore, Mr and Mrs. A. E. Southworth, Mr. and Mrs. F. W. Thomas, Mr. and Mrs. Richard Kistler, Clarence Cadwell, Mr. and Mrs. E. Solari, Frank Roberts, Cecil Thomas, Mr. and Mrs. Chester Miller, Mr. and Mrs. Robert Orrill, Mr. and Mrs. Joseph Fraga, Mr. and Mrs. C. R. Vaughan and daughters, Virginia and Eleanor, Mrs. L. K. Hebel, Mrs. Randall Curtis, Dr. T. M. Shorkley, Dr. Genevieve Shorkley, Mrs. Frank Hebel, Mr. and Mrs. A. W. Horton, Mr. and Mrs. Henry Milne, Mads Christensen and Gus Torres, Ann W. Riley.

SURPRISE PARTY HONORS MRS. WALTER A. JOHNSON

Mrs. J. B. Lape joined with Mrs. Joseph L. Fraga is giving a bridge luncheon yesterday afternoon honoring Mrs. Walter A. Johnson, who with Mr. Johnson is leaving next week for Idaho to make her home. Favours were in the shape of small suitcases, and the honor guest received a piece of luggage as a gift.

Guests included Mrs. L. K. Hebel, Mrs. Henry Sturmer, Mrs. Barney Kathman, Mrs. Gerald Hatton, Mrs. Myron Robertson, Mrs. Merle Staub, Mrs. Stanley Shepard, Mrs. Marc Latham and Mrs. Lloyd Hales.

MRS. J. V. VAN METER ENTERTAINS SEWING CLUB

Mrs. J. V. Van Meter entertained the members of her sewing club Tuesday afternoon at her home on Linden avenue. Her guests included Mrs. J. W. Young, Mrs. C. C. Heltman, Mrs. S. B. Hohmann, Mrs. W. C. Hohmann, Mrs. J. C. Furby, Mrs. Thomas Church, Mrs. Merton Lewis, Mrs. Merle Shride, Mrs. F. L. Smith, Mrs. Frank Stewart, Mrs. Albert Jarvis and Mrs. H. C. Motley.

PERSONALS

L. R. Carter attended the meeting of the Fire Chiefs' Association which was held in Riverside last Saturday.

Mr. and Mrs. Pete Truhitte and daughter, Wilma, left by car last Sunday for Purdy, Missouri, where they will visit relatives. They expect to be gone about a month.

Mr. and Mrs. W. H. James and Mr. and Mrs. Robert Orrill attended the dinner at El Paseo Wednesday evening given in honor of C. L. Preisker, County Supervisor, who has just returned from a four months European visit.

Rev. C. P. Moore was the speaker of the evening at the celebration of the founding of the Odd Fellows Lodge which was held in Santa Barbara on Tuesday evening. Also attending from Carpinteria were Mr. and Mrs. W. H. James, Mr. and Mrs. C. R. Vaughan, Mr. Mr. and Mrs. Ed Mathews, and Mr. and Mrs. Harry Ingerson.

HOLLYWOOD STAR NEW SHRINE HEAD

Harold Lloyd, famed motion picture star and producer, just elected Potentate for 1939 of Al Malaikah Temple of the Shrine.

Rev. and Mrs. John J. Woodson attended the monthly meeting of Methodist pastors and wives at the home of Rev. and Mrs. John Ashley, 636 East Solo, Santa Barbara, Monday. A chicken dinner was served. The next meeting is to be at Barsdale with the pastor and wife, Rev. and Mrs. Ellis Monday, Feb. 27th.

GIRL SCOUT DINNER TO BE HELD MONDAY NIGHT

The annual Girl Scout Dinner is to be held on Monday evening at 6:30 in the cafeteria of The State College in Santa Barbara and all girl scout committee members, leaders, and mothers of Girl Scouts and Brownies are invited to attend. Tickets are 75 cents and reservations must be made with Estelle Hebel before Friday evening.

Mrs. J. B. Lape will leave for Los Angeles this afternoon and is planning to attend the races at Santa Anita tomorrow and Saturday.

Rev. John J. Woodson, Art and Lester Kohler attended the dinner-meeting for Methodist men at the First Methodist church in Ventura Thursday evening. Around one hundred laymen and many pastors were there and a very inspiring address was given by Wray Anderson of Long Beach.

TREE OF LIFE

NEW YORK—This is a picture of a 60-foot statue being carved from an elm tree at South Windsor, Conn., by Lawrence Tenney Stevens. It will symbolize a great ethereal spirit and, with two smaller companion pieces representing man and woman, will be placed in a plaza at the New York World's Fair 1939.

Your Hollywood Correspondent Reports . . .

Shirley Ross and Ken Dolan are vacationing in Death Valley since completion of Shirley's role in "Cafe Society." Claudette Colbert's maid, Winifred, is a favorite on the "Midnight" set because she has good hunches about the horses and tells Don Ameche, Francis Lederer, John and Elaine Barrymore how to bet. Mary Boland bought a lot in Santa Barbara. Plans to build there some day. Dorothy Lamour is busy with secretarial duties, answering mail and banking between scenes of "Man About Town." Her regular secretary, Harriet Lee, is ill with bronchial pneumonia. Gary Cooper, now at Paramount preparing for his forthcoming role in "Beau Geste," has been assigned the studio dressing room occupied by Franciska Gaal when she worked in "Paris Honeymoon." Isa Miranda will motor to Mexico for a brief vacation when she completes her role in "Hotel Imperial." Ray Milland, who appears opposite her in that picture, is scheduled to report back in Hollywood the end of the week from a European trip to start working in William Wellman's "Beau Geste."

Paramount secretaries who copied Claudette Colbert's "Zaza" upped hairdo are now wearing the "little girl" coiffure Barbara Stanwyck introduces in Cecil B. DeMille's "Union Pacific." Louise Campbell and Horace MacMahon, Hollywood's newest newlyweds, have taken a home in Beverly Hills. Patricia ("Persons in Hiding") Morison is trying to find a good home for a dachshund sent

James Cagney, Pat O'Brien and Ann Sheridan in 'Angels With Dirty Faces' which starts Saturday at the California Theatre. Also on the same program, "Young Dr. Kildare."

MAUDE ADAMS TO SPEAK AT LOBERO THEATRE MONDAY

Her modesty and desire to avoid publicity have made Miss Maude Adams, who will speak at the Lobero theatre on Monday evening, Jan. 23, almost a legendary figure of the American stage. But she is one of the most beloved actresses of our theatre. It is not generally known that she once won an automobile in a competitive vote for the most popular actress in New York, and that a life size golden statue of her was sent to the Paris exposition as that of the most popular American actresses.

Very retiring by nature, she is nevertheless extremely interested in many things, and talks interestingly and interestedly in private conversation of the world today. The cello is her favorite of the three instruments she plays, piano, harp and cello. Color photography

and lighting have long been favorite hobbies, and she is credited with an influential part in development of the powerful incandescents which have replaced the sputtering, popping arcs of old.

Miss Adams became professor of drama at Stephens college in September, 1937. Now she tries to transfer to others the secret of projecting personality across the footlights. Miss Adams has known the great managers and actors who have handed down to the modern theatre a rich heritage. Her personal and professional contacts with them provide a wealth of fascinating material on which she draws in her lecture.

PAT O'BRIEN STAR OF CALIFORNIA FEATURE PICTURE

Pat O'Brien, in a sweatshirt, sneakers and black clerical pants, spent half a week recently refereeing a basketball game at the Warner Bros. Studio. O'Brien had not gone athletic on the studio. It was merely one of the sequences in his latest picture, "Angels With Dirty Faces," Warner Bros.' powerful drama which will open Saturday at the California theatre with Pat O'Brien and Jimmy Cagney co-starred again.

In the picture, O'Brien plays a priest who tries to teach slum boys to play with a basketball instead of with knives and guns. The slum boys in the film are the famous "Dead End" kids.

Want Ads In The Chronicle Bring Results.

Tyrone Power and Nancy Kellman picture "A Man to Remember" at the Fox Arlington Theatre. Co-starring with "Angels With Dirty Faces."

"KING OF THE GOLDEN RIVER" TO BE AT LOBERO

Both boys and girls will be delighted by the dramatization of John Ruskin's "The King of the Golden River," to be presented by the Clare Tree Major Children's theatre of New York at Lobero, January 30 at 3:30 p. m.

This is the last of the series of three plays for children which the Lobero has brought to Santa Barbara.

The king of the Golden River is played by a real dwarf, dressed in a glittering golden costume. The way he punishes Hans and Schartz, the two selfish brothers, and rewards their brother Gluck for his kindness will amuse the children.

The six and a half ton Bourdon bell in the carillon tower of the Snu on Treasure Island, will swing 85 feet above the earth at the California World's Fair, 1939.

SCHOOL PLAY TO BE PRESENTED TOMORROW NIGHT

Ticket sales for the play, "Three Live Ghosts" which is to be presented by the Dramatics Group in the High School Auditorium tomorrow evening indicate that there will be a good attendance. The production is being sponsored by the Junior Class and tickets may still be obtained at Tennyson's Drug store.

FOOTBALL STAR FEATURED

Vic Demourelle, reputed to have completed two of the longest forward passes on record in a single game while playing for the famous Audubons of New Orleans, has a featured role in Paramount's "Tom Sawyer, Detective."

A Lecture

Entitled

Christian Science:
Its Challenge To The
Wrong Thinking
Of The Ages

by

PETER V. ROSS, C. S. B.
of San Francisco

Member of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts.

A normal, satisfactory life is impossible without good health. Naturally therefore we wonder how disease ever got into the world. In casting about for a reason people have pretty generally reached the conclusion that disease comes as a punishment for wrongdoing. The sick man has been disobedient. He has been pursuing some evil practice. His suffering is the penalty.

The weakness in this logic is seen when we observe that good people as well as bad are subject to sickness. Therefore we shall have to look farther than mere wrongdoing for a satisfactory answer to our question. Here Job's experience is enlightening. He was a good man. Yet he was seized by a painful malady. Friends who gathered about to sympathize argued that he must have strayed from the straight and narrow way else he would not have encountered misfortune. Indeed one of them asked, "Who ever perished, being innocent? or where were the righteous cut off?" But Job, unconvinced, insisted upon his integrity, though he confessed, "The thing which I greatly feared is come upon me."

Looking for Disease

Job typifies ordinary human beings. All down the ages they have accepted the suggestion of disease thrust upon them by mortal mind. Generation after generation have they talked disease, pictured it, built it up into a universal belief or mesmerism. Today this mesmerism settles down upon mankind generally—good, bad, indifferent—as the rain falls upon the just and the unjust.

Hence it is that the best of men and women, uninstructed by Christian Science, are occasionally victimized by this mesmerism. It cannot be said that they are being punished. They have not done anything to be punished for. They have however failed to challenge the general belief in disease. Thereby have they left their defenses down. That is enough. That is all anyone need do in order to become vulnerable to the attacks of mortality.

Disease then is not genuine. Of course it is not. This is why sufferers are constantly in revolt against it. This is why every system of healing looks for the time when sickness will cease to appear. If disease were a reality people would accept it without protest. They would have no alternative, because realities cannot be evaded or overcome. People dispute only the unrealities—the things of belief, of ignorance, of appearance. Here is seen the inconsistency of mortals who argue for disease on the one hand and combat it on the other.

When we say that disease is in belief or in appearance or in ignorance, rather than in reality, we place it in the same category with the belief in the flatness of the earth. For certainly the earth appears flat. Occasionally to this day may be found a person who believes it flat. Obviously the flatness is in his thought, in his ignorance. Some day the simple fact will dawn upon him that the earth is round. Then the flatness will be cured.

Some day the undeniable fact will dawn upon the supposedly sick man that Life is God. Then his sickness will be healed, because disease and mortality cannot be ascribed to Deity. If God is Life, then Life must be diseaseless, ageless, endless.

Diseaselessness of Life

What basis is there for the statement that Life is God? Time after time in Scripture Deity is referred to as Life. When the Israelites were struggling so desperately in the desert on their journey to the Promised Land, Moses, by way of encouragement, declared to them, "God is thy Life."

Fifteen hundred years later Jesus, in talking with the Samaritan woman at Jacob's well, referred to God as Spirit. Spirit and Life are synonymous terms. They have essentially the same significance. The woman supposed God to be a sort of judge or king who held court in the nearby mountain. Jesus made it clear to her that God is not manlike or kinglike but that He is incorporeal Spirit or Life.

New Testament writers following Jesus spoke of God not only as Spirit but as Life, Mind, Love. What a word Mind is for Deity! For Mind can know all things and be everywhere present. But Mind does not differ essentially from Life. It would be rather difficult to differentiate between intelligence and animation.

Life is the one indisputable fact. You may doubt most things. You may doubt everything—except that you live. You may sometimes wonder about other people. You may suspect that they are creatures of your own fancy. But you are absolutely sure that you exist—exist as an exhibit of Life. God's witness, to use Scriptural language,

Where is that Life? Nearer than hand or breath or thought if could be. Paul gives the classical answer when, in his letter to the Ephesians, he writes of one God "who is above all and through and in you all." What sort of Life must this be? Diseaseless, ageless, endless. It is yours, genuinely, to the remotest recesses of being. This is the truth which will make you free so far as you recognize and utilize it.

People have been healed, by the very arguments you are now listening to, of such difficulties as worry, grief, resentment, unemployment, pneumonia, sinus trouble, eczema, personal injuries, impaired sight and hearing. There is no reason why you should not be relieved of your distress immediately. Expect it. You have a right to liberty and usefulness.

Clearly it is a sin to believe that God, who is Love, sends disease to His people. The belief, like other sinful beliefs, brings punishment so long as entertained. The believer stands in the shadow of suffering and mortality. Writes Mrs. Eddy on page 385 of Science and Health: "Let us remember that the eternal law of right, though it can never annul the law which makes sin its own executioner, exempts man from all penalties but those due for wrong doing." To be forgiven, the person who believes that Deity imposes or is responsible for sickness needs to abandon the belief and accept the fact that Life is God and hence that true existence is invincible.

We have thought that life comes and goes. We have supposed that life is given to one at the time called birth and taken away at the time called death. Yet Life does not come. It does not age, it does not sicken, it does not depart. Life is! It was! It will be! There can be no escape from this logic when it is remembered that Life is God. All of which has tremendous significance when it is recognized that man is an expression of Life, its tangible representative.

Making the Right Choice

In his farewell address to his people Moses said: "I call heaven and earth to record this day against you that I have set before you life and death, blessing and cursing. Therefore choose life that both thou and thy seed may live." To appearances there have always been before mankind both life and death, health and disease, success and failure, plenty and poverty. But human beings, in their ignorance of God, have overlooked the Scriptural injunction.

They might have chosen Life with all that that implies, but, giving credence to the while to the devastating suggestions of mortal mind usually they have chosen to make a reality of disease, mortality, and misfortune. They have done more. They have argued for these impositions. So long and so industriously have they argued that the belief or mesmerism of disease has become part of unconscious thought.

Thus it is that people are sometimes beset by diseases they never have thought or heard of. And this liability to sickness will continue until men and women rise up and intelligently challenge disease as a thing that is not necessary, not true. Such existence as it may seem to have is in appearance or belief or mesmerism rather than in actuality. This is why disease and mortality can be overcome. Were they actual there would be

no alternative but submission.

Human experience consists to a considerable degree in making choices and decisions. Christian Science acquaints the individual with the spiritual facts which enable him to judge and choose wisely, rightly. He makes a right choice, he gives himself a Science treatment, when he embraces Life and renounces everything opposed to Life. When he recognizes that Life is irrepressible, unconquerable, incorruptible. When he realizes as best he can that this restless Life is his, that it is in full and unrestricted operation right where his infirmity may seem to be. Which means that the infirmity is not there, is not his, is not in existence.

Were it not for the wrong thinking of the ages, the consequences of which mankind inherit, disease could not come near you today. It could not find you. How could it? It has no intelligence. It has no power of locomotion. One encounters it by looking for it. Have you ever found yourself doing this? You will perhaps if you observe yourself critically for the next few days.

Revolt Against Disease

You do not have to listen to disease when it pretends to argue to you. Really it has no voice, no intelligence, no symptoms, no presence, no existence. The presence of God as boundless Life and Love makes its presence and existence impossible. Realize these unalterable truths. God has given you the power. Assert, in definite thought and word, your absolute freedom and harmony as His representative.

The world abounds with well meaning people who say almost nothing because they fear they will say something unscientific. Any statement, any attitude, any mood which denounces disease as a lying imposition, and which exalts Life and health as ever present realities, is scientific, is legitimate treatment.

It is even reverent prayer, reverent in this that it absolves God from responsibility for sickness and suffering. It is the sort of prayer which works a change in the individual. For the effect of prayer, after all, is not on God but on the man who prays. Such prayer unites the individual with that Life to which disease and age and dissolution are unknown. It unites him with that Mind which imparts to man all the intelligence he needs for success and usefulness.

All down the centuries the belief has been entertained that man is material and mortal, whereas the fact is, as both reason and revelation inform us, man, truly, is spiritual and immortal. The individual who insists that man is mortal will be a mortal to all intents and purposes. He will come under intolerable limitations. He will be borne down ultimately by infirmities.

But when an individual stands up and intelligently and thankfully admits that man in the likeness of God is an immortal, an exhibit of Life to which restrictions and distresses are unknown, he enters that reverent mood which is prayer, he makes that rational argument which undermines the belief in disease, he administers that Science treatment which dissipates the mesmerism of mortality. In a word he begins to find his true status as, to use the words of Mary Baker Eddy, "the expression of God's being" (Science and Health page 470).

Putting Aside Skepticism

Not a person should walk out of this auditorium the same person he was when he came in. Each one of you should depart with more hope, strength, courage, and endurance than you had an hour ago. Many of you could well spare ten years of age or ten younds of weight. Why not allow these undesirables to dissipate and depart along with your aches and failures and loneliness? They are not actualities. They are only deceptions. You can lose them all if you will suspend your unbelief long enough to permit the truths you are hearing to take lodgment in mentality.

It is not an easy thing for a person to revise his opinions, to subdue his prejudices, to waive his skepticism. It is so much easier to say: "These pronouncements are wonderful. They may be true of spiritual man but what have they to do with me?" They have everything to do with you, for are you not in your genuine make-up a spiritual man?

Accept these precious gifts of the Almighty which hitherto you may have been putting aside. Yours is the life that does not come

or age or fail or despair or sicken or fade out; yours is the life which by the grace of God is invincible. As you silently talk these truths over with yourself, while at rest or at work, you will become aware of a better body, a better intellect, a better career, a better world. You will come more certainly into the possession of that Life whose joys eternal flow.

Rigidity of Thought

Every instant of his experience does the individual make a choice, a decision. Normally he chooses success, works for it, achieves it. But if not on his guard he may choose failure and work for it. He will have to do this if he ever encounters failure, because failure cannot find him. Like disease failure has no intelligence, no power to move around, no ability to find anyone. It is quite helpless, quite harmless, of itself.

No man is likely to get into a pit without deciding to walk toward it and fool around on the edge after arriving. The pit can hardly come to him. With the same effort he can take at least a few steps in the opposite direction of security.

Not all of one's difficulties can be attributed to the folly of past generations, of course. One's own mental attitude has a vital bearing on one's well being. For example he who goes about tense with anxiety, resentment, remorse, or other abnormal emotions can hardly expect permanently to enjoy good health or reasonable success.

Tensity of temperament in the upper realm of mind becomes tensity of tissue in the lower realm of body. Rigidity of thought reacts at once in rigidity of bodily functions. Whereas flexibility of mentality, confidence, friendliness, ease, and poise build a sure foundation for soundness of body and attractiveness of individuality.

Acquisition of Attractiveness

Every individual who chooses to act and live his best possesses attractiveness. This must be so in view of the undeniable logic of perfect God and perfect man. He who has the courage and at the same time the graciousness to rise to this height will find needful things flowing to him—opportunity, position, companionship, all the conditions essential to an abundant life.

No one of course denies that human existence appears to have its trials and disappointments. Everyone observes that the good things of the world seem most unevenly distributed. Yet in the face of so-called failure and even despair

There's a wideness in God's mercy,

Like the wideness of the sea;
There's a kindness in His justice
Which is more than liberty.

For the love of God is broader
Than is seen by human mind,
And the heart of the Eternal
Is most wonderfully kind.

Conversing in Heaven

The mesmerism of the material world is not a permanent affair. Man's genuine status of perfection has not departed. It has not even faded. If unseen or forgotten in this wilderness of mortal belief and ignorance, it is nevertheless at hand. It is not a condition so much to be struggled for as it is to be called to remembrance. Life with all its glories is here to be recognized. It is yours this day, yours to be enjoyed.

It makes no difference how busy you are, you are choosing, you are making decisions, you are talking with yourself. If you are not cautious you will be picturing age, fashioning ill health, deploring the inefficiency of government. When you select this line of conversation you add to the mesmerism which is already weighing you down. You make the wrong choice. With a little more discernment and

resolution you can make the right choice. You can order your conversation along healthful and wholesome lines. All day long you can talk with yourself of the vigor, the buoyancy, the resistlessness, the eternity, the glory of Life, keeping in thought all the time that it is your life you are talking about.

In this way you put vital truths to work in your own premises instead of idly contemplating them in the abstract. In this mood you are not far from invoking the Daily Prayer set forth by Mrs. Eddy in her Manual of The Mother Church: "Thy kingdom come; let the reign of divine Truth, Life, and Love be established in me, and rule out of me all sin."

Relation of Body to Mind

At the outset of our argument we agreed, did we not, that God is Spirit, Life, Mind, Love. Which means that His people must be mental and spiritual, that is, constituted of intelligence. They cannot differ in quality from their creator. A moment's self-examination leaves no doubt that man is made of intelligence rather than of non-intelligence. This is why he is so secure. Intelligence cannot grow old, cannot become sick, cannot suffer fractures, cannot be extinguished.

Intelligence does not differ essentially from consciousness, which reminds us of Mrs. Eddy's definition of man as "individual consciousness" (Science and Health, page 76). Here again one observes how safe true selfhood must be. For consciousness cannot be seen, cannot be touched, cannot be put in danger. And yet how real, how tangible it is. Immediately an individual's sense of being quickens as he recognizes that he is consciousness rather than physicality.

What about the body? Science teaches and observation confirms that the human mind and the human body are one. They are different levels of the same mentality. What we call body is the lower, the grosser stratum. What we call mind is the upper, the more ethereal stratum. Together they make up that intelligence which we call a human being.

Not a perfect intelligence, certainly but an intelligence which appears partly good and partly bad, partly spiritual and partly material. So that consciousness appears to be a mixture of human and divine ingredients. As one emphasizes the divine and repudiates the purely human, one puts off limitation and mortality and gradually discovers that true selfhood, the perfect man of God's creating, occupies the whole ground and always has occupied it.

Bodies Come and Go

Since the human mind and the human body are different layers of the same mentality, an improved mentality must bring an improved body. Better thinking must result in better health. No mystery then about the process whereby a Christian Science treatment reaches the body. To use Mrs. Eddy's inimitable language, "Consciousness constructs a better body when faith in matter has been conquered" (Science and Health, page 425). As one corrects the material beliefs, the ignorances, the mesmerisms which through the human mind, one finds that consciousness builds for him a healthier, stronger, younger, body—a more prepossessing personal appearance.

Consciousness is continually at work. The physiologists say that it builds each individual a new body every year or so. Why are the same scars and limbs and idiosyncracies imaged forth year after year? Because the individual holds them in thought. He refuses to forget the accidents, the ailments, the misfortunes that have appeared to cross his path in this material world. He describes them,

(Continued on page 7)

THE CHRONICLE PRESS

115 E. COAST HIGHWAY

PHONE 4461

(Continued from page 6)

boasts of them, whenever he can find an audience. In short he fills thought with the worst sort of materials for consciousness to use.

Because consciousness is not only the builder but the building material. It is at once the sculptor and the marble. Serene and possessed of divine substances—integrity, animation, wisdom, affection—consciousness becomes spiritual and thus is equipped to rear a princely structure. Upset by alarms and anxieties, animosities, and supplied with mortal materials, consciousness becomes darkened and produces forms and figures which do well if they survive three score years and ten.

Bodies come and go but consciousness persists. It refuses to be put under ground. Eluding the grave it builds in the hereafter such a body as it may need to operate through. You get a hint of this process in your dreams. The moment you fall asleep consciousness evolves another body. Your friends do not see it. You take it a hundred miles on a visit. It has all its members. You may have only one arm when awake. You have two in slumber.

Identity in the Hereafter

Does this not help you to understand what takes place when one falls into the last sleep? Immediately consciousness evolves another body untouched by the "last illness" and invisible to anxious friends. The departed, becoming invisible in the form we are accustomed to, take on another form which our dull senses cannot comprehend. But with vision quickened by the truths of Christian Science we shall some day see that the real man does not come, age, sicken, or depart. We shall see that the real man is, was, and will be. He lives on and on indefinitely, maintaining his identity, distinguishable and recognizable, made in the pattern of endless Life.

Things of Spirit may seem at first approach elusive to him accustomed to deal with the supposedly sure, firm things of matter. But if difficult to define, they are impossible to deny. In number they are as of the sands of the shore. In union they are the substance of spiritual man. Outstanding among them are affection, faithfulness, generosity, acumen, integrity.

Integrity as God knows it! Can there be a time or place from which it is absent? From everlasting to everlasting it endures in form more palpable to enlightened vision than the wayside rock to darkened material sense. So it is of all divine qualities or ideas. They exist in mold and structure as tangible as they are permanent. Not one of them can lose or surrender its identity. And as they are when viewed singly so must they be when fitly joined together in man.

Birth is not the beginning of an individual's career and death is not its conclusion. Birth and death are events in the voyage of human experience. You cannot trace the beginning of the tiniest thing in the world. You cannot foresee its end. Even a fluffy snowflake, transient and insubstantial as it is, was something before. It will be something after, for a time. Silent as thought it tumbles down to earth bent on an undefeatable purpose. Can you then not believe that you were something before? That you will be something after? That you have come into being for an undefeatable purpose?

Leaning Back on Mind

You have seen the surf riders of the South Sea, at least you have seen pictures of them. They seem to lean back on an unseen power and receive its impulse and propulsion. They glide over the waves with as much assurance as others walk the city streets.

You could cultivate the habit of leaning back on all-knowing Mind and permitting it to give you direction. This mind would then keep you out of mistakes, out of dangers, out of follies. It would release in you thoughts that would enable you to build a better business or to carve out a finer career than you have yet attained. That Mind might impart to you some idea which would enable you to launch an entirely new enterprise in some hitherto unexplored field where there is no competition.

If the unemployed would lean back on divine Mind it would direct them to where they are needed. For every individual is needed. No man has been brought into being for uselessness or idleness.

God has an active career for each of His men and women. He has a vital purpose for every one of them, a purpose that cannot be frustrated.

Undefeatable Career

You may fear that the injustice of others can defeat that purpose, can keep from you the good things God has prepared. Nothing of the sort really can happen. Not even your own folly can indefinitely postpone the destiny God plans for you as you "press toward the mark for the prize of the high calling of God in Christ Jesus."

You remember the morning Jesus was brought before Pilate, charged with making himself king. At one point in the trial where he refused to talk Pilate said to him: "Speakest thou not unto me? Knowest thou not that I have power to crucify thee and have power to release thee?" "Thou couldest have no power at all against me," answered Jesus, "except it were given thee from above."

Then Pilate delivered him to his accusers and he was executed. But presently Jesus was back alive the same man he was before. How little the conspiracy accomplished except to speed and glorify the career of that great man. There was not power enough in the clamorous rabble or even in the Roman government to defeat the purpose God had for Jesus.

There is no circumstance, no injustice, no power in this world to defeat the purpose God has for you if you make the right choice and stay resolutely with it. And life is still before you.

Discovery of Christian Science

Christian Science has now been in operation three-quarters of a century. Discovered and founded in New England by Mary Baker Eddy, it has long since reached world-wide dimensions. Its churches encircle the earth. Its periodicals, including The Christian Science Monitor, an international daily newspaper, are read and appreciated in all lands. The headquarters of the movement are in Boston, Massachusetts, where its affairs are administered by a board of five directors. So faithfully and efficiently do they discharge their duties that the influence of Christian Science is constantly widening.

Prior to her discovery of Christian Science Mrs. Eddy was seldom free from sickness. Finding no material remedy, she eventually concluded that there must be a spiritual law of healing. As a spiritually minded woman and a great student of the Scriptures she naturally sought for this remedy in the Bible. She found it there. She discovered that Jesus in healing the sick was not working miracles but practicing Science.

Having discovered the Science of Christianity she tested it on people in distress and found that she could relieve them. She next set forth the teachings of Christian Science in her famous volume "Science and Health with Key to the Scriptures." The book can be read in any public library or in any Christian Science Reading Room. Many people have been healed of serious ailments by studying its pages.

Science in our times has gone as widely abroad perhaps as has the Sermon on the Mount. In other words it has permeated universal thought. There is hardly a person in western civilization who is not talking a different and a better language, who is not pursuing a different and a better life, who is not living in a different and a better world because this great woman has lived and labored here.

Remedy for Lawlessness

Every individual can make the world better. He can have part in quieting the present unrest. This he can accomplish by recognizing and insisting that the Lord God omnipotent reigneth. We all know that he does reign, reign wisely and absolutely. We should be sufficiently alert and just and reverent to admit the fact. In this very admission, this very recognition, we help to make of none effect the turbulence at large in the earth.

The world, with its affairs and its people, is, after all is said and done, governed by the one Mind. Chaos and disorder therefore cannot run riot. The world is a place where divine Principle governs, making sinister intrigue, selfish ambition, attempts at ruthless domination unavailing. The certain effect of a constant and resolute acknowledgment of these truths will be to still the harsh noises of the day.

The impatient and turbulent utterances of the day scarcely reach the plane of intelligence. They

FIRST TRAINS CROSS BAY BRIDGE

SAN FRANCISCO — The "railroad" across San Francisco Bay, talked about since the days of the Central Pacific, has been built.

It is the San Francisco-Oakland Bay Bridge Railway, constructed by the State Department of Public Works and owned by the California Toll Bridge Authority, of which Governor Culbert L. Olson is chairman. Frank W. Clark is the new Director of Public Works, and C. H. Purcell, who built the Bay Bridge, is Chief Engineer.

The new railway facilities were dedicated in front of the San Francisco Terminal Saturday, January 14. First history-making revenue train crossed the bridge early Sunday morning, January 15. This was the Interurban Electric's 7th street line, leaving Dutton Avenue, San Leandro, at 4:48 a. m. west-bound to San Francisco. It entered upon the bridge proper at 5:37 a. m. and arrived in San Francisco terminal at 5:50 a. m.—13 minutes across San Francisco Bay.

Next train was the Key System's 22nd Street line, leaving Underhill in Oakland at 5:40 a. m. and arriving in San Francisco at 6:17.

Sacramento-Northern brought the first revenue passengers ever to enter San Francisco on a directly connected railroad with Sacramento. The train was scheduled to leave Concord at 6:27 a. m., and arrive in San Francisco at 7:46 a. m.

It required the construction of the world's longest bridge to make the dreamed-of railway possible and the expenditure of approximately \$800,000,000 including the cost of the bridge construction, approaches to the bridge, and the electric inter-urban facilities.

No one dreamed of electrically operated trains in the days of Governor Leland Stanford, one of the "Big Four" of the Central Pacific, nor of the highly perfected automatic signal system and safety devices developed for the Bay Bridge Railroad.

Three railroad systems will operate across the Bridge rather than one contemplated in those early pioneer days. These are the Interurban Electric, Southern Pacific subsidiary, Key System, and Sacramento-Northern. This last for the first time brings a direct train connection from the State's capital at Sacramento into San Francisco.

Actual ownership of the railroad system rests in the hands of the California Toll Bridge Authority. The facilities are leased to the railroads through an agreement not to exceed five years, at which time it may be renewed. The railroads pay to the California Toll Bridge Authority a toll of 2½ cents per passenger. Fares will not be increased, in accordance with an agreement made between the State and the railroads, for at least a period not to exceed 18 months from the start of operations.

Total cost of the railway facilities approximates \$18,000,000. The modern terminal in San Francisco

was built for some \$2,300,000. More than 60,000 persons daily are expected to pour through the structure's spacious doors. Half of the passengers will be within walking distance of their destinations in San Francisco, providing a savings in transportation costs for twenty-five percent more persons than those entering the city thru the Ferry Building. It involves a savings for more than 30,000 persons daily.

As many as 15 entrances and exits give on to Mission, Natoma, First, Fremont and Beale Streets, allowing for easy distribution of pedestrian traffic. Within the building a series of stairs and ramps for each train permit easy access to the train level, the structure having been designed to eliminate unessential walking. Waiting rooms are on the street floor; directional signs, information booths and ticket offices on the mezzanine.

Key System trains will enter and leave the Terminal over the three southerly tracks. Sacramento-Northern will use the Key's most southerly track. Interurban Electric will operate over the three northerly tracks.

Due to difference in voltages, the Key System trains will receive their power from a third rail, while Interurban Electric and Sacramento-Northern trains will operate through an overhead trolley (catenary) system. Key runs on 600 volts, Interurban on 1300.

A cab-control automatic system will prevent train operators from exceeding speeds indicated in a signal box within the cab. If the signal is not obeyed within 2½ seconds, the train automatically comes to a stop.

Interlocking systems in the East Bay yard and the San Francisco loop and terminal are operated through push buttons on a six-foot control board replacing the old switch tower. Control boards are located in the signal tower in the East Bay Yard and in the San Francisco Terminal.

Passengers arriving in San Francisco may board street cars immediately in front of the Terminal. Cars will loop over a ramp at mezzanine level, operating from Market over First Street and returning via Fremont Street.

Frank Wykoff will motor to El Centro tomorrow for Mrs. Wykoff who has been spending the past three weeks with her sister, Mrs. A. B. Hansen.

SCIENCE and HEALTH with key to the Scriptures

by MARY BAKER EDDY

Published by the Trustees Under the Will of Mary Baker Eddy

The original, standard and only text book on Christian Science Mind-healing, in one volume of 700 pages.

- Library Edition, cloth...\$3.00
- Clear Type Large Edition \$7.00
- Sunday School Edition in blue or brown cloth...\$2.00
- Vest Pocket Edition, in black, brown or blue Morocco...\$3.00

THE FAIR IN PICTURES

NEW YORK—With the opening date of the New York World's Fair 1939—April 30—coming nearer and nearer, activities on the Fair grounds are increasing daily. At the top you see a giant American flag, 90 x 230 feet, being saluted by 1,000 school children in a ceremony marking the dedica-

tion of the Court of Peace, around which 62 nations are gathering their exhibits. In the middle appears a modern sculptural group called "Speed," featuring a woman astride a winged horse. At the bottom is one unit of tulip beds. More than 1,000,000 bulbs were imported from Holland to accentuate landscaping.

Trees, shrubs and flowers native to the eleven states which will exhibit in the Hall of Western States at the 1939 California World's Fair will be planted around the building.

Anatomy of the heart and functions of heart valves will be demonstrated in an unforgettable exhibit at the 1939 California World's Fair, by use of a huge model.

SAFE DRIVERS GET AWARDS OF MONEY FROM MOTOR CLUB

Money rewards for driving safely!

Checks are being delivered by insurance companies this month to thousands of Southern California motorists as awards for a year's safe car operation, said a report yesterday from the Automobile Club of Southern California district office. A vast army of motorists throughout the country will receive similar prizes aggregating about \$6,000,000 for the first year, it is estimated.

Payments for careful driving will continue under the Safe Driver Reward Plan inaugurated a year ago by 31 stock casualty companies and their representatives throughout the country, it is stated. The motor club is taking part in the plan as a brokerage agency for one of the companies sponsoring the activity.

The reward is a 15 per cent return of annual premium on liability insurance, provided no claim loss occurs or reserve is set up under a policy during the 12 months

FIVE MILLION FROM FEDERAL FUNDS FOR CALIFORNIA ROADS

California will receive \$5,091,752 of Federal funds for highway improvement and grade crossing elimination during the 1940 fiscal year which begins July 1, according to official figures received by the Automobile Club of Southern California. Under the Federal-Aid Highway Act of 1938 this sum is to be matched by the State with the exception of \$728,856 set aside for the elimination of grade crossings which is available without matching.

it is in force. The money is paid to private passenger car owners who are insured for both bodily injury and property damage liability with the companies.

Besides the money return, the motorists are given gold chevron merit cards as "diplomas" for safe driving. The reward plan is being credited by many safety experts as a contributing factor to the 20 per cent reduction in traffic accident deaths throughout the country last year, the club reports.

STEELHEAD RUN IN SANTA YNEZ RIVER

Large steelhead trout are now running in the Santa Ynez river according to word received by the outing bureau of the Automobile Club of Southern California.

Ranging in size from two to ten pounds, the fish are being taken in the lagoon and at the mouth of the river on spinners and salmon egg clusters.

A three-fish limit per day has been set for the present season which ends on February 28. Anglers are warned to obtain their 1939 fishing license before setting out after the big fellows.

TRAFFIC OVER BRIDGE

The bridge across the Cuyama river at Ozena on the Ventura-Maricopa highway is now open to traffic, advises the touring bureau of the Automobile Club of Southern California.

The chemistry of sex and how the sex of offspring can be predetermined will be shown in an elaborate exhibit at the 1939 California World's Fair.

DISCOVERY MONTH

ELECTRIC COOKING COSTS 1/2 AS MUCH AS YOU THINK
