FIRST GRADERS TAKE TRAIN RIDE

Pupils of the first grade of the grammar school had an experience which will long be remembered last Monday morning when their teacher, Miss Leonia Smith arranged a trip to Santa Barbara to illus­trate their lessons in transportation. The trip was arranged by the local Southern Pacific agent, E. A. Chaffee, the pupil boards, and the roundhouse and signal building were seen by the Santa Barbara agent who assisted them from the train and gave them a charge on David Gonzalez who had taken the school children on a trip to San Diego before. En route they visited the roundhouse and were permitted to board one of the new streamline engines and ring the bell and blow the whistle.

In return for the privileges they sang several songs for the engi­neers.

The pupils making the trip were Richard Savage, Frank Montella, Alice Willson, Delores Chaffee, Paul Cum­mins, Sally Cowsh, Rosiie Lopez, Ruth Porter, Una Meals, Olavee Sanger, Robert Smithe, Merlo Seglie and Helen VandeBaker.

and Jones at the University of Southern California review the outstanding sports events of 1938, including the Rose Bowl game played by the thirty-six men from Santa Barbara club are expert to attend the meeting.

The second item of the pro­gram will be presented by William Crawford who will play selections on the harmonica, guitar and piano.

Program arrangements are in charge of Ray Taylor.

Four guests of the club last Thursday included L. T. Steiner of Santa Barbara and two Bay Sevens, Bob Jones and Jim Morrison.

Proposed Short Cut To Valley of Local Interest

With the advent of the con­tract for the first unit of the Hemmen harbor and with start of construction work across the way, civic leaders in the Santa Paula-Fillmore and Plain Area are compiling data on two pro­posed short cuts to the San Joaquin Valley which would also be of material value to Carpinteria in making the beach more accessible to valley residents during the summer months, thereby greatly increase its usefulness.

The following paragraphs deal­ing with the proposed roads appear in this article in The Plain News last Friday:

"This is the first step to­ward the construction of the har­bor has been made, leaders in the Santa Paula-Fillmore-Paso area are sleeping fast in the matter of collecting data on the cost of building a high-speed cut-off highway from Fiero to Pinto pass on the ridge route, which will shorten the distance between Bakersfield and Hemmen by approximately 35 miles.

Being the center of the county's citrus industry the three districts stand to benefit from this road in readiness by the times ships start leaving the harbor.

Another short cut from the San Joaquin Valley is also being dis­cussed, which would be a cut-off at the Mariposa Highway. It is thought that the state should re­strain the highway which would provide an outlet to the coast for high-speed travel from the valley.

The directors and members of the Chamber of Commerce met Wednesday evening to consider the finding a court room and voted to change the meeting time to the first Thursday in each month and the next meeting is scheduled for Feb. 2nd at which time the directors and members of the committee will report and recom­mend several minor changes in the constitutio

W. J. James, Secretary of the organization, will issue the following letter to Assemblyman Alfred Robertson and Senator J. J. Hollis, asking that they introduce a state amendment which would permit the political subdivision to buy low equipment owned by another subdivision.

It was the general consensus that such a change in the law would bring material savings to the local residents since it would be possible for a subdivision such as a school district to use equip­ment belonging to another subdivision.

Also on the list for discussion at the next meeting will be the proposed zoning ordinance which is being prepared by the Planning Commission, the semi­annual report to the board of super­vision and taxation and plans for a Fourth of July celebration.

The directors also voted a $33.33 increase in their salary to bring their pay to $50 per month.
NEW GOVERNOR

San Francisco—The appointment of Walter T. Ballou as Director of the Motor Vehicle Department by Governor Olson is a recent selection. Ballou replaces George Rochester, an experienced public servant who has become highly in‐ dignant if accused with the statement “You are a potential killer.” Yet those same parents place a far more deadly weapon in the hands of their children when they permit them to drive a car and those same youths, carelessly skidding around a corner, may leave and die in their wake in no time as it takes to wink an eye.

We sincerely wish that every parent whose children drive cars could have seen the mad dash of a young driver down Eighth Street on Sunday evening and that every youth who drives a car could have seen that mass of steel and iron and glass hurtling to what seemed certain destruction. Perhaps this sight would have impressed both parents and youths that a car in the hands of an inexperienced or reckless driver becomes a juggernaut dealing death and destruction.

Safety campaigns, reams of publicity and talks by traffic officers have little impact on the youth of Carpinteria. Many young people who are otherwise good citizens seem to lose all sense of responsibility and caution when they get behind the wheel of a car. The world is the greatest world problem. The providing of adequate and efficient religious instruction for the children of the church is an integral function of the church. It is important just in proportion as religious education is essential to the direct development of the individual personality.

As to the place of this work Dr. Walter A. Squires says, “The providing of efficient religious instructions for the children of the church is an integral part of the educational problem. The providing of such instruction for the children of the church is the greatest world problem.”

Both the nation and the world are leaving this problem to the church to solve. The church has assigned itself in the most serious task, the great responsibility of our world—the saving and training of men. We invite you to join us and let us get to work in earnest and do our part to save the world. It is 11 a.m. The pastor will speak on “The Supreme Necessity.” In a race there are always two leaders. The one that could be the greatest and the only dependable one to win may be left in the snow of God. Come and think this out with us.

At 7:30 p.m. The church school, Rev. C. P. Moore, general superintendent. Religious education is a fundamental function of the church. It is important just in proportion as religious education is essential to the direct development of the individual personality.

The Leonard-Deer Institute has shown that the combination of toxoid, used in the field of immunology, as toxoid, was not only more efficient as an immunizing agent, but also avoided the horse serum present in antitoxin.

The contest has been divided into two sections: 1. Seventh through Ninth Grade: American Ideals. Limit 500 words. "Why I Believe in Democracy and American Ideals." Limit 500 words. 2. Fourth through Twelfth Grade: "How I Can Help to Make America American." Limit 300 words.

The essays will be evaluated for:

- Orthography
- Originality
- Neatness, punctuation
- Spelling
- Content
- Originality
- Length
- Thought
- Use of expressions
- Grammar
- Length
- Originality
- Length

The essays will then be divided into four groups with the following:

1. First through Fourth Grade: "Why I Love America." Limit 150 words.
4. Tenth through Twelfth Grade: "How I Can Help to Make America American." Limit 300 words.

The winners will be announced at the annual meeting of the school. The prizes will be awarded for the best essays as follows:

- Group 1—$2 for the best essay. Citation for best essay.
- Group 2—$3 for the best essay in each group. $2.00 for second best in each group.
- Group 3—$2.00 for third best in each group.
- Group 4—$1.50 for fourth best in each group.

It can be stopped.

ANN WAYNFLETE RILEY . . . Owner and Publisher

EDITORIAL

CHRISTIAN SCIENCE SOCIETY

Christian Science Church, Carpinteria, is open to the membership of all Churches of Christ, Scientist. As to the place of this work Dr. Walter A. Squires says, “The providing of efficient religious instructions for the children of the church is an integral part of the educational problem. The providing of such instruction for the children of the church is the greatest world problem.”

Both the nation and the world are leaving this problem to the church to solve. The church has assigned itself in the most serious task, the great responsibility of our world—the saving and training of men. We invite you to join us and let us get to work in earnest and do our part to save the world.

At 7:30 p.m. Easter services, P. Moore, general superintendent. It is the most serious task, the great responsibility of our world—the saving and training of men.

At 10 a.m. Church school, Rev. C. P. Moore, general superintendent. Religious education is a fundamental function of the church. It is important just in proportion as religious education is essential to the direct development of the individual personality.

The Leonard-Deer Institute has shown that the combination of toxoid, used in the field of immunology, as toxoid, was not only more efficient as an immunizing agent, but also avoided the horse serum present in antitoxin.

More recently Dr. Ramsey, who is chairman of the World Health Organization at the Pasteur Institute has shown that the same method can be applied to tetanus. While the toxoid of diphtheria and tetanus can be given as a single injection, Dr. Ramsey and others, working in the field of immunology, have shown that the administration of the two toxoids is of benefit.

As to the place of this work Dr. Walter A. Squires says, “The providing of efficient religious instructions for the children of the church is an integral part of the educational problem. The providing of such instruction for the children of the church is the greatest world problem.”

Both the nation and the world are leaving this problem to the church to solve. The church has assigned itself in the most serious task, the great responsibility of our world—the saving and training of men.

PROSPECTS FOR BIG HANDICAP
AT SANTA ANITA ARE LISTED

HOLLYWOOD PARK TO GIVE EXTRA 10% TO CALIFORNIA NAGS

For the furtherance of thoroughbred horse racing in California, the Hollywood Turf Club will pay to breeders of California bred horses an additional 10% on their Derby purses in which California bred horses place first, second, third or fourth.

In making this announcement today, John MacKenzie, general manager of the Hollywood Turf Club explained that this would not apply to races exclusively for California bred horses.

"It is the cherished desire of every true California breeder to see the breeding standards of this state raised to where they will be on a par with Kentucky raising or thoroughbred horses," stated MacKenzie.

"It is the hope of the Hollywood Turf Club that this generous gesture will be a distinct aid and inducement to the more than 200 registered breeders in the state.

These awards will in no way affect the present California law wherein California is deduced from the winner and sent to the breeder.

The second annual meet at Hoully Park opens June 1, 1939 and runs 43 days.

FORMERLY IN STOCK

Stanley Price, a player in Paramount's "Swepstakes Millionaire" with Charlie Ruggles and Marjorie Rambeau, is a former stage star who at one time operated stock companies in Battle Creek, Mich.; Hammond, Ind., Terre Haute, Ind., and Lexington, Ky.

Many of the horsemen pick Xalapa Clown as the horse to beat in the big Santa Maria Stakes at six furlongs, a pronounced favorite for the Big Cap as he is in top form in races but are bad acts of the barrier in the afternoon be- ing taken along slowly and will perhaps make only one start. Nick Wall is lined up to ride him. There are 100 other eligibles who will undoubtedly come along and show...
FREE RADIONIC EXAMINATION

To make our services available to the greater number of people needing our unique service, I offer you a complete Radionic Analysis for which the usual fee is ten dollars, free, when taken with a course of treatments.

The White Light System of Radionics, as used in my office, definitely ascertain under what condition you are in, what part of the body is functioning properly and what is necessary to restore the body to normal health.

This Practical Radionic Health Service is the most successful development in drugless healing in many years and has helped thousands in regaining their health when other methods have failed.

This offer is for a limited time only. Telephone for your appointment today.

THE FAIR IN PICTURES

NEW YORK—With the opening date of the New York World's Fair 1933—April 30—coming nearer, activities on the fair grounds are increasing daily. At the top you see a giant American Flag, 90 x 230 feet, being salute by 1,000 school children in a ceremony marking the dedication of the Court of Peace, around which 62 nations are gathering their exhibits. In the middle appears a modern sculptural group called "Speed," featuring a woman astride a winged horse. At the bottom is one unit of tulip beds. The reward is a 15 per cent return of annual premium on liability insurance, provided no claim occurs or reserve is set up under a policy during the 12 months it is in force. The money is paid to private passenger car owners who are insured for both bodily injury and property damage liability with the company. Besides the money return, the motorists are given gold chevron merit cards as "diplomas" for safe driving. The reward plan is being credited by many safety experts as a contributing factor to the 20 per cent reduction in traffic and bent deaths throughout the country last year, the club reports.

MARKET IN THIS TOWN

STEELHEAD RUN IN SANTA YNEZ RIVER

Large steelhead trout are now running in the Santa Ynez river according to word received by the touring bureau of the Automobile Club of Southern California. Ranging in size from two to ten pounds, the fish are being taken in the rapids and at the mouth of the river on spinners and salmon egg clusters.

A three-fish limit per day has been set for the present season which ends on February 28. Anglers are warned to obtain their 1939 fishing licenses before setting out after the big fellows.

TRAFFIC OVER BRIDGE

The bridge across the Cuyama river at Ojai on the Ventura-Mariposa highway is now open to traffic, advises the touring bureau of the Automobile Club of Southern California.

The chemistry of sex and how the sex of offspring can be predetermined will be shown in an elaborate exhibit at the 1939 California World's Fair.

SAFE DRIVERS GET AWARDS OF MONEY FROM MOTOR CLUB

Money rewards for driving safely! Checks are being delivered by insurance companies this month to thousands of Southern California motorists as awards for a year's safe car operation, said a report yesterday from the Automobile Club of Southern California district office. A vast army of motorists throughout the country will receive similar prizes aggregating about $80,000,000 for the first year, it is estimated.

Payments for careful driving will continue under the Safe Driver Reward Plan inaugurated a year ago by 31 stock casualty companies and their representatives throughout the country, it is stated. The motor club is taking part in the plan as a brokerage agency for one of the companies sponsoring the activity.

A three-fish limit per day has been set for the present season which ends on February 28. Anglers are warned to obtain their 1939 fishing licenses before setting out after the big fellows.

FIVE MILLION FROM FEDERAL FUNDS FOR CALIFORNIA ROADS

California will receive $5,091,752 of Federal funds for highway improvements and grade crossing elimination during the 1939 fiscal year which begins July 1, according to official figures received by the Automobile Club of Southern California. Under the Federal-Aid Highway Act of 1938 this sum is to be matched by the State, with the exception of $729,856 set aside for the elimination of grade crossing which is available without matching.

The average homemaker who has never owned an electric range almost invariably estimates that electric cooking costs from two to five times as much as it really does. While again and again, in actual home cooking, it has been proved that electric cooking costs one-half as much as you think.
