Hurrah for Vance's
NEW DAGUERREAN GALLERY!
LARGEST LIGHT IN THE WORLD!
(OVER 500 FEET OF GLASS.)

New Building, corner of Sacramento and Montgomery Streets, San Francisco.

WHY SHOULD EVERY ONE GO TO VANCE'S who wishes perfect Likenesses? Because he has the best arranged gallery on the Pacific Coast, and not to be surpassed by any in the world; instruments containing lenses more perfect, and with greater power than any ever before used in the country.

2d. Because he has the largest Light in the world, from which he can form three distinct lights—top, side, and half side lights—that now enables him to overcome the great difficulty which every artist in this city has to contend with, namely: In order to obtain perfect likenesses, different formed features require differently arranged lights.

3d. Having the largest light, he is enabled to make pictures in half the time of any other establishment in the city; therefore they must be more perfect, for it is well known the shorter the time the more perfect the expression.

4th. Because every plate is carefully prepared with a coating of pure silver, which produces that clear, bold, and lasting picture that is so much admired, and which cannot be produced on the common plates, as they are now used by other artists.

5th. Because he has, of late, after much experimenting, brought his chemical preparations to much perfection, using compounds entirely different from anything ever before used in the art, which enables him to produce perfect likenesses at every sitting, with that clear, soft and beautiful tone, so much admired in all his pictures.

All those wishing perfect likenesses will do well call before sitting elsewhere, and judge for themselves.

THURSDAY, OCTOBER 30, 1856.

Rotation in Office.

In a former article we undertook to emit briefly certain views concerning the prevalent evil of frauds at elections. We considered it as a deeper slough merely in a boundless Dismal Swamp of governmental corruption, a polluted and offensive sink indeed, but one which has become a necessary and logical consequence of an ineffably pestilential Angean Stable, which it serves in a measure to drain of its more apparent filth.

Who sets forth thus far is pledged, if not to strike with his own puny axe at the root of the enormity, at least to scrape it bare and point out its naked ugliness in the clearest way that to him may be given.

Too restricted our limits to permit—too thoroughly instructed by painful experience our audience to require—to neutral in politics our Gazette to sanction historic research here into the first acorn planting of the Enormity, its gradual growth and rank spread of Upas foliage. Enough that we dwell beneath its deadly shade and are well nigh asphyxiated by its poisonous emanations. Its name is familiar enough, nay, a cherished "Household word" was it ere it became a by-word and watch-word of associated imposture.

But as conjurers were wont of old to resort to set cabalistic formulas to evoke the phantoms of the wicked dead, so will the spirit of the Enormity stand revealed before us, and embodied as it were by the simple utterance of a principle and a maxim: "Rotation in Office" and "To the victors belong the spoils."

Rotation in Office! Cherished hope of the Outs, dread night-mare of the Ins, inexhaustible Fortunatus' purse of the Political Church Militant, Exchange Bank whose vaults are the Public Purse, whose issues, whether redeemed or not, can never be protested, and whose real capital consists in the feverish, insane anxiety of the deluded citizens to become the holders of some part, however small, of its worthless currency. Even as Law's Mississippi shares sold at fabulous premiums only because France had gone mad and stock was fashionable, so must Placeomania have become fearfully rife when Rotation in Office becomes a prevailing doctrine.

Has it come to this, that the incumbent of a responsible office must be removed, just as he is beginning to master its complicated duties, only to make room for another, rotatorily? If the principle be so fraught with unseemly wisdom that in spite of its apparent absurdity, it must govern in public concerns, why not extend it and try its application to domestic affairs? What would you think of a rotation of cooks?

My steaks have been done to charcoal this twelvemonth, my leg of mutton has been served parboiled, my puddings have been crumbs, my cakes dough, my coffee dishwater and my tea a weak solution of creosote. All this I have borne a year or more, though sorely tried; and now that the blundering apprentice is beginning to mend his ways and learn his business, he must—rotate.

Ridiculous though this may seem, it bears a manifest analogy to the operation of the principle in question. No department in the Governmental kitchen that does not suffer from it, "too many cooks" being engaged in "spoiling the broth," while armies of expectant scullions stand longingly awaiting to rotate into the honors of the dish clout.

THE COURTS. The regular term of the District Court, Hon. Joaquin Carrillo, Judge, will commence on Monday next.

The County Court, Hon. Charles Fernald, presiding, will meet on Monday.

The Probate Court has been adjourned from day to day during the week on account of the absence of the judge.

The Board of Supervisors will meet for the transaction of business on Monday.

IMPORTANT ARREST. Last week information was given, by Mr. Cyrus Lyon, to Mr. W. H. Peterson, Under Sheriff, of the lurking place of the notorious Anastacio Garcia, accused of the murder of Messrs. Wall and Williamson, in November last, near Monterey.

On Sunday afternoon, Mr. Peterson, accompanied by Mr. Lyon and Messrs. W. C. Getman and Mr. Robert Wilburn, started out in pursuit of the accused. They had proceeded about thirteen miles from the city, when they met three men on the road, one of whom Mr. Lyon recognized as Garcia, the person of whom they were in search. On being informed of the fact, Mr. Peterson rode up to him and asked his name, which he at once told. He was then asked for arms, when he exhibited a pistol, which was taken from him; he was again asked the same question, when he produced another six shooter; and on a third demand he drew from his legging a large knife, fourteen or sixteen inches long. Garcia made no resistance, for Mr. Peterson, on coming up with him, leveled his double barreled gun upon him, whilst Mr. Getman took his weapons. He was then placed on a horse and brought to town.

Garcia, of his own free will, and without being questioned by the Under Sheriff, acknowledged having killed Joaquin Della Torre, by shooting him through the head; also the shooting of Beckworth, who, with a Sheriff's posse, went to arrest him on the charge of killing Wall and Williamson. In this attack he was wounded. He then made his escape to Montecito, about six miles south of Santa Barbara. Here another attempt was made to arrest him, but he shot one of this party, and again effected his escape. Since that time he has been lurking about San Juan and other places in this county. This fact coming to the knowledge of Mr. Lyon, he immediately communicated with Mr. Peterson, who took the course above detailed, and now has the satisfaction of having captured the most dangerous and daring outlaw in the southern country.

Much credit is due to Mr. Lyon, also to Messrs. Getman and Wilburn, for their prompt and efficient services on the occasion. Garcia will be taken to Monterey the return trip of the Senator.—*Los Angeles Star, 18th.*

CALIFORNIA LAND CLAIMS. In the following cases, says the Los Angeles Star, confirmed by the Land Commission, and on appeal by the District Court, the appeal before the U. S. Supreme Court will not be prosecuted, information to that effect having been received here by C. E. Thom, Esq., acting U. S. District Attorney:

STARTLING DISCOVERIES. We learn by Mr. Compton, says the San Joaquin Republican, who has just returned from the mountains, that the ranch situated on the Cala veras road, between the Calaveras and Stanislaus rivers, formerly belonging to Captain Colebrook, brother to the one hung for the murder of Armstrong, having passed into other hands, the present owner, in cleaning out a well a short time since, discovered portions of the skeletons of twenty-seven men. It was at first supposed that these bones were the remains of Indians, but on closer examination it was clearly proved that they were the bones of white men. There is a suspicion prevalent that Capt. Colebrook has been in some way concerned in this affair. He has, however, disappeared, and active search is being made for him.

A VALUABLE VARIETY OF WHEAT. Two years ago the proprietor of the Rancho de Lagunas, situated in Napa Valley, obtained a handful of an unusual, and as has since turned out, valuable variety of wheat. It grows with a short, stout stalk, each of which produces a cluster of several heads, similar to those of ordinary wheat. This renders it an exceedingly prolific grain, those heads being of full size and well filled. From the yield of a handful sown upon one acre last fall, over one hundred bushels of the finest quality of wheat has been produced this season.—*Atta.*

FRUITS AT THE FAIR. The San Jose Telegraph says the exhibition of fruits at the Fair of the State Agricultural Society was the most surprising and gratifying part of the display. We think it impossible that any portion of the world could produce larger and finer specimens of the most valuable fruits than were exhibited at the Fair.

"Pound" Pears, weighing 2 lbs 4 ozs., and measuring 16 inches in circumference by 21 inches lengthwise.

The "Duchess D'Angouleme," measuring 15 by 16½ inches, and weighing 2 lbs.

Quinces 17 inches in circumference.

Apples—"Gloria Mundi," 17 inches in circumference, and weighing 2 lbs. 2 ozs.

Peaches, measuring 11 inches in circumference, although too late in the season for the finest varieties.

Strawberries of the Black Prince and British Queen varieties, measuring 4 inches in circumference.

Grapes, a bunch weighing 7 and 8 lbs.

Watermelons, 3 feet six inches long, by 4 feet 2 inches.

Cantelopes of great size and excellence.

Pumpkins of enormous dimensions—one weighing 256 lbs., and measuring 7 feet 8 inches round.

REPORTED CAPTURE AND EXECUTION OF TOM BELL. The last we heard of Tom Bell, the highwayman, after his escape on the Auburn road, was that he was seen going south with his arm in a sling, having been wounded in his encounter with the Sheriff's party. We find the following in the Stockton Argus:

We learn from good and reliable authority that on Saturday morning, about 11 o'clock, Tom Bell was captured by a party who was in search of him, and at about 5 o'clock on the evening of the same day he was hung. Bell was taken on the San Joaquin, just below the Tulare slough, about 120 miles from Stockton. When taken prisoner, he declared that he did not know the party he fought on Tuesday night, nor the fate of any of his comrades in that fight. He then escaped untouched. It is certain known that the whole of Bell's band is destroyed, with the exception of "Monte Jack and Bob Carr; and they doubtless have been taken by this time, as parties have been upon their heels a few days past, so that there is no probability they have longer escaped unpunished.

THE COOLIE TRADE. The barbarous nature of the coolie trade may be inferred from the following statement by the Havana correspondent of the New York Journal of Commerce:

Arrived, August 30th, British ship Duke of Portland, Seymour, master, 146 days from Hong Kong and St. Helena, with 202 Asiatic voluntary colonists, of whom 130 are reported to have died, drowned themselves, &c., on the voyage; and to prevent the suicides, the boats had to be lowered away several times a day when the weather permitted, to pick up those who threw themselves overboard, which continued from the ship's leaving the China seas until her arrival here. It is supposed that the actual loss is over two hundred;—not quite consistent with the nature of the contract claimed as being made with each individual. Arrived the 2d of September, the British ship John Calvin, same voyage, 168 days, with 188 same class, and reported 110 deaths; and the same trouble experienced after leaving the China waters to prevent self-destruction.

BURSTING OF THE BIG GUN. At St. Louis, recently, while Mr. Dimick was experimenting on his newly invented rifle cannon, it exploded, breaking into nine pieces. The gun weighed 7,838 pounds, and was made of fine malleable iron. The front part of the gun, about five feet in length, blew away from the breech, the latter blowing into eight fragments. Some of these, weighing five hundred pounds, were thrown forward from two to three hundred feet, and projected into the air from forty to fifty feet. But the most singular part of the story remains to be told. The ball, which weighed eighteen pounds, was thrown to nearly the elevation which it would have reached had the bursting not taken place, striking the ground at about 15,000 or 16,000 yards. It is to be regretted that the accident occurred when it did. The power and greatness of the invention were not fully demonstrated. Mr. Dimick, no doubt, will have another gun made, and, if possible, of better metal.

CALIFORNIA PAPER MILL. The first paper mill in California will be completed in about a month. It is situated six miles from Tomales Bay, upon a small creek, the water of which will be used as the motive power. It is owned by V. B. Post and Samuel B. Taylor, and capable of making a ton of merchantable paper per day of 12 hours. The intention is chiefly to manufacture printing paper, although the machinery is capable of turning out the coarser articles, such as wrapping, &c.

THE GUADALOUPE MINE. Mr. Bland, the Assessor of Santa Clara county, in his report, says: "The Guadalupe quicksilver mine is situated in a ridge of mountains only nine miles from San Jose. This mine has been undeveloped until within the past year, at which time it changed ownership, and is now in active operation, having about one hundred men employed, and judging from its daily increasing richness, bids fair soon to prove, in point of wealth, second to none."

A good story is told of a very learned and well known reverend gentleman of Providence city. A short time since the said clergyman called into a dentist's rooms to try a set of teeth which was being made for him; after placing them in his mouth, he turned to look into the mirror, saying at the same time, "Jesus Christ!" The dentist, very much surprised to hear an oath from one so much noted for his piety, said to him: "If they do not suit you I will make another set." "Oh," said the clergyman, "I was only trying if I could repeat that blessed name without hisping."

THE KIDD TREASURE. This ancient humbug has recently been revived, Mr. Harrington, the celebrated diver, having been applied to by a person in New Jersey, who pretends to have an instrument that will invariably point out metal, even if it is 300 feet under water, and with the use of which he has found the safe of the steamer Lexington, and also the long sought for "Kidd vessel," which lays under ten feet of mud and about twelve feet of water over that.

We once overheard the following conversation between two ladies of color: "Miss Philisy, I say, what do you live now?" "Oh," was the reply, "I don't live what I did—I've moved." "Well," returned the other, "why you no come down to our house some Saturday afternoon and stay all the week, and fetch your knittin' work?" "Well, I dunno," said she, "I'm so tanned I've ashamed to go nowhere most."

An old "revolutioner" says that of all the solemn hours he ever saw, that occupied in going home one dark night from the widow Ben's, after being told by her daughter Sally that he "needn't come again," was the most solemn.

A Schenectady editor, describing the effects of a squall on a canal boat, says: "When the gale was at its highest the unfortunate craft keeled to larboard, and the captain and another cask of whisky rolled overboard."
