Carpinteria, California, Thursday, December 28, 1933

VOLUME ONE

DEATH COMES TO GEORGE BAILARD, EARLY SETTLER
AT AGE OF 72 YEARS

Came to Valley 65 Years Ago

GEORGE W. Bailard, 72, one of the valley’s oldest and best-loved residents, died at his home in Goleta. A former rancher and pioneer of Carpinteria, Bailard was a native of New York, born on an American farm variously attributed to 1843 and 1844. The exact date of his birth has not been determined for this newspaper.

Bailard’s family moved west when he was a child, eventually settling in California. He worked on ranches and farms throughout the state before purchasing the land that would become his home in Carpinteria.

Bailard was one of the earliest settlers in Carpinteria, having arrived in the valley in 1868. He is survived by his wife, May Bailard, a son, Samuel Word Bailard, and two brothers, B. F. and Word Bailard.

FAMILIES IN 58 HOMES GET XMAS BASKETS & GIFTS
OF FOOD AND CLOTHING

Entire Community Has Hand In Spreading Cheer

Fifty-eight Christmas baskets filled with provisions, meats, clothing and other gifts were distributed to all the neighbors in Carpinteria homes this year, according to the report of the Women’s Board of the Community Council. The gift program is supported by the donation of funds, food, clothing and other gifts to neighbors in need.

The project, known as the “Gifts from the Heart” program, is designed to help neighbors in need during the holiday season.

LIONS VOTE TO MEET WIFE A MONTH IN 1934

INSTEAD OF WEEKLY

Doctor Speaks On The Evils Of Dope

BEGINNING the first of the year, the Carpinteria Lions Club will meet bi-monthly instead of weekly, on the second and fourth Thursday of each month.

The decision was made by majority of the club at the last business meeting, when an open discussion had brought out the fact that, due to the heavy and press of other activities, the club’s membership had declined during the past year.

It was decided that 1,000 to 1,500 people will be called upon next year.

At the head of a majority of valley residents were letters or dispositions of the Christ

**15—FEW-MEN FIRST**

It is very fitting during this Thanksgiving holiday season in honor of the Lord, that a pitchfork, usually held in the hands of the Secretary of the Navy and his aides, should be turned to a more useful purpose. You will do well, Secretary of the Navy, to ask the President to return to the people, every day, a more complete picture of present day demands and their reasons, that the truth of today's needs may be in the minds of the people. It is also a fitting time to remember that the Secretary of the Navy has been at the head of the Navy Department for many years, and that his policies have been directed toward the betterment of the Navy and the Nation.

**WE RESOLVE**

UNDERSTAND, we're not promising anything, but here's a list of the New Year's resolutions we hope to live up to in 1934:

1. Not to let personal opinion color our news column.
2. But to remember that our readers all know each other, that "names make news" (especially in a community the size of Carpinteria) and that a weekly newspaper is no more readable and vital than the life and interest it breathes into the doings of the people it is published for.
3. To give editorial support to anything that promises a better Carpinteria Valley.
4. Never to take ourselves too seriously, and to remember that many greater minds than ours are at work on the world's problems.
5. To keep the Chronicle your newspaper in the belief that a Carpinteria newspaper should concern itself primarily with Carpinteria Valley and the people who live on it.
6. To help you start each Thursday morning with a local newspaper that lives up to the three adjectives inscribed on its title-head: "Readable, Reliable and Representative.

**WE HOPE**

Things we'd like to see during 1934:

1. Adequate fire protection for all of Carpinteria Valley.
2. Completion of the Mariposa-Carpinteria highway.
3. A municipal pier on the "World's Safest Beach.
4. An assured water supply for the community.
5. Trees and shrubs planted on both sides of Highway 101 lining the two approaches to Carpinteria. ("Carpinterians" please notice. You can get them free at the Dominique Nurseries, Santa Barbara.)
6. The telephone toll from Carpinteria to Santa Barbara eliminated.
7. Less fog and more sunshine.
8. Largert memberships in the Lions Club and in "Carpinterians."

**WHAT-OF-DEPARTMENT**

It took a work to make a ping-pong ball! + These are more than 150 thousand round bars—no wonder there's a cotton surplus! + These have been less than ten rings minus the few thousand cases the occupants of the planes were able to walk away from their disabled ships. + It's costing the United States government just $12 per minute to marry Maia Weiss Hermann, Canada's favorite girl. The ceremony is being performed by trans-Atlantic telephone. + Catherin the Great. Empress of all the Russias, couldn't have walked away from her disabled ships. + It's more than 130 thousand nudists now—no wonder there's a nudist colony and Violin. + Highway 101 lining the two approaches to Carpinteria. ("Carpinterians."

**16—WORK FOR WOMEN**

SEVERAL attempts have been made to get women into public service and to increase their numbers in the public service. One of these, the bill of the President of the Women's National Political League, has been introduced into both houses of Congress. If it becomes a law, women will be allowed to hold public office as clerks and janitors, and the government will be required to hire women for these positions. This bill has been referred to the Appropriations Committee for consideration.

Gas consumption for the entire trip was 18.1 miles per gallon, or 750 miles per gallon, including the drainings. Our other item might be of interest. The temperature at Needles was 103°F, while in Virginia City, a distance of 160 miles, the temperature was 80°F.

We had our two-year old baby along and consequently could not travel more than ten or twelve hours a day, even though we never started before nine in the morning, nor travelled later than four or five o'clock in the afternoon. Considering the type of roads we were driving over I felt that this was excellent.

The sixth day we spent at the Grand Canyon and on the seventh, and this is the amazing part of it, we drove from El Toro Island, on the South rim of the Canyon to Santa Barbara, a distance of 80 miles, in ten hours and ten minutes, driving an average of 3 miles a minute. We left the ranch about a.m. Mountain time, and arrived at nine p.m. Restoration Officers at the California State Line. Our best song hour's run was sixty-nine miles, and our best speed was eighty-four miles per hour.

The roads went of the Colorado River, which we crossed at Needles, were perfect and I put the specified trailer on 70 and just let it do all the work. The road from the state line, and the one with which this pace was maintained were really remarkable.

Gas consumption for the entire trip (259 miles per gallon, or 750 miles per gallon, including drainings). Our other item might be of interest. The temperature at Needles was 103°F, while in Virginia City, a distance of 160 miles, the temperature was 80°F.
