CARPINTERIA, CALIFORNIA, FRIDAY, MARCH 25, 1938

NUMBER 4

Venire of Fifty Named for Carpinteria Justice Court

Although it has been the privilege of the County Clerk for some years to appoint a jury venire for Justice Courts in the county, such a venire has been appointed for the First Judicial Township Justice Court of Judge C. P. Moore for the first time in the Court's history.

Although not many jury trials are to be held here, it is believed that such procedure will save time and eliminate the necessity of the constable endeavoring to secure a venire on short notice in event that a jury trial is set for the local court.

Those who have been appointed to serve as jurors are:

Carpinteria, Calif.

Anderson, Alvin E.	" "
Bailard, Ben	" "

TO SPEAK OVER KTMS

Charles E. Neuman, head of the vocation agriculture department of the high school, will have charge next Monday of the quarter-hour program of the Associated Governmental Service clubs which present a program of information on some phase of service each Monday at 12:45 on the News-Press station, KTMS.

WATER CULTURE BEING STUDIED BY AGGIE CLASS

Students of the vocational agriculture classes are watching with interest the growth of the water garden established in the classroom window a few weeks ago. Tomatoes, beans, cabbage and some flowers are growing in jars filled with a synthetic soil solution, and in a large specially built aquarium. The plantlets are set in a wire tray filled with excelsior and their roots reach into the solution which provides all elements needed for their growth and in different quantities for experimental purposes. Records are kept of fertilization, optimum temperatures and effect of light on root growth.

The building which will house the insectary has been completed and the class has been erecting a high wire fence around the yard in which the hot house will be built and a number of shrubs planted to act as pest hosts. The potatoes planted a few weeks ago to furnish sprouts for scale hosts are almost ready to have the scale painted on, and will be transferred to the insectary. Charles E. Neuman, head of the department, invites anyone interested to visit the classroom in the annex facing Oak street.

Joe H. Weging, local field man for the county horticultural bureau, has been confined to his home by an attack of flu.

TEAM TO ENTER JUDGING CONTEST AT ORANGE SHOW

Carpinteria high school will be represented in the citrus judging contest at the San Bernardino Orange show Saturday by Monte Ramey, Wallace Godfrey, Bob Koehler and Bill Jorgensen, it was announced yesterday. The choice of representatives followed the second in a series of judging contests with Ventura Junior college men which took place at the local school Wednesday afternoon.

Ventura won first, second and fourth places in the contest with Carpinteria taking third and fifth. Fruits judged were grapefruit, two classes of lemons, oranges and packed boxes.

The Ventura boys were accompanied by their advisor, Lawrence VerHusen. They were K. Clark, E. Carne, M. Scott, G. Hantigan, B. Booker, C. Orr, G. Peters and C. Kennett. Local boys in the contest were Tony Rodriguez, Monte Ramey, Wallace Godfrey, Dean Waters, Bob Koehler, Carl McIntyre and Bill Jorgensen. The class advisor, C. E. Neuman, will accompany the team to San Bernardino.

CELEBRATION OF ANNIVERSARY TO END SUNDAY

The celebration of the seventh-fifth anniversary of the Methodist Church will come to a conclusion on Sunday with a full day of worship and fellowship. At the morning service, Doctor Walter C. Buckner, District Superintendent of the Long Beach District, Methodist Episcopal Church, will fill the pulpit. Following this service a "pot luck" dinner will be served, the church furnishing a meat dish, coffee and bread.

At three o'clock the Reverend John Ashley, D. D., pastor of First Methodist Church of Santa Barbara will be the speaker and at 7:30 p. m. Rev. Harold Thatcher, pastor of St. John's Methodist Church, Ventura, will bring the closing message.

Dr. R. Ernest Little, formerly of Wesley's Chapel, City Road, London, England, will again speak this evening in the church at 7:30 in connection with his mission of world peace.

On Saturday evening at 7:30 Howard Cory, Layman of the Alhambra M. E. Church will speak in behalf of the Methodist Men's Movement.

Rev. Melvin J. Addington, pastor of the church, has been assisted in arrangements by C. B. Franklin, A. W. Horton, Rev. C. P. Moore, Geo. P. Clark and Wm. H. James.

Members of Group 5 of the Community church will begin their Rummage sale in the Morris building on Linden and Seventh streets next Tuesday. Mrs. Lucie Treloar is chairman of the group.

Whittier College Glee Club To Present Sacred Music

FEBRUARY DEMAND FOR LEMONS IS SLOW

The following report on the Lemon Market is carried in the current issue of the Sunkist Courier for April.

"Demand for lemons during most of the month of February was fairly slow. Nothing developed which would tend to increase consumption above normal. There were practically no epidemics of influenza or colds, which oftentimes occur at this season of the year, causing a pick-up in the demand. The strongest call was for the 300s and larger, these sizes selling at a premium.

The market was fairly steady, with prices about average for February, though considerably below those of last year. Volume of sales also was about normal.

A slight improvement in the demand developed the last week in February, which was attributed to the Exchange advertising on lemon and soda and hot lemonade, together with added push put behind sales by retailers. Excellent cooperation was received from the trade, with special sales promoted by chain stores and other groups of retailers.

Due mainly to rather light shipments made by shippers not affiliated with the Exchange, the movement during the month was somewhat below average, amounting to 674 cars, compared with average February shipments for the past five years of 753 cars."

All residents of the Carpinteria Valley are invited to attend the program of sacred music which will be presented at the Community Church at the 11:00 o'clock hour on Sunday morning by the combined men's and women's glee clubs of Whittier College, under the direction of Frank Pursell.

This will be the first appearance of the combined group in this territory. In 1935 the Mens' and Womens' Glee Clubs made individual tours north covering similar territory. Last year the group combined and toured for a few days in the southern part of the state including Palm Springs. There are thirty-five singers in the group, including the director, who is a well-known baritone soloist and who will offer vocal selections on the program. The accompanist, Herbert Nanney, is a very talented Southern California musician and has been a pupil of Alexander Schreiner for two and a half years. The program to be presented is as follows:

Motets: "Gloria Patri" G. B.

(Continued on page 8)

CHRISTIAN SCIENCE LECTURE RADIOCAST

Local radio listeners may hear an authorized Christian Science lecture on Friday, March 25, at 8 p. m., when Mr. John Randall Dunn, C. S. B., of Boston, a member of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., lectures over KFOX (1250kc-240m.) for First Church of Christ, Scientist, Long Beach.

Importance of Assessor's Office Told; History Given

Continuing a series of articles* dealing with the history and duties of various county offices which are being made possible by the cooperation of county officials in securing historical data we present this week a history and outline of the County Assessor's office which was one of the first county offices to be created since it is through this office that funds are gotten to run the county. The importance of this office was stressed recently by Mr. Dixwell Pierce, Secretary of the State Board of Equalization, who stated in addressing a convention that the Assessor's office was the most important one in the county government and that no other office could do so much good or so much damage to a county as the assessor's.

Charles S. Tomlinson, who is now serving his eighteenth year as County Assessor, stated that in tracing back the records he found it difficult and tedious to get even the names of the early assessors. The office was named, but not the

Chamber of Commerce Dinner Draws Large Attendance

More than 150 persons were seated at the annual dinner of the Chamber of Commerce in the auditorium of the Memorial building Monday evening when the new president, David Safwenberg, welcomed the guests including many from out of town. Presley Lancaster, Jr., secretary of the Santa Barbara Chamber brought greeting to the local group.

Dr. J. B. Lape announced the numbers on the program which followed the dinner. They included tap dances by Miss Ada Mae Lambert, accompanied by Mrs. Marion Linkey; three vocal solos by Danny Cox of Santa Barbara, accompanied by Miss Eva Holey; solos on the electric organ by William Matthias, three piano solos by Will Headley and piano-organ numbers by Headley and Matthias. The speaker of the evening was L. C. Rafferty, district manager of the Shell Oil Company, who spoke on "The Chamber of Commerce and America."

The dinner was served by a

TROUT FISHING OUTLOOK POOR

Trout fishing in Southern California streams for the 1938 season, which opens May 1, will be materially affected by the recent floods, reports the Outing Department of the National Automobile club. Many of the state fish hatcheries in this area were severely damaged and undoubtedly a great many trout were washed away or killed by the rush of flood waters down the canyons. It will be skillful angler that takes a limit on May 1 from local streams.

Mrs. Harold Kenyon and little son of San Francisco are visiting her parents, Mr. and Mrs. George A. Senteney.

Mr. and Mrs. Torvald Neilson are parents of a daughter, Judith Anne, born Monday afternoon at the Cottage hospital. The young miss weighed seven pounds and 14-ounces.

BY THE SWORD

Twenty years ago the ringing bells proclaimed an end to war as weary men, sick with death and hate, crept home to passionate vows that peace, so dearly won, must ever after rule the world.

Today, as spring—lightest and gayest of the seasons—blows its fragrant breath across the earth, once more the seeds of blood and anguish drop on soil that echoes to the tread of marching men, soft skies frame a strife-torn Orient, and nations crouch in readiness to spring across that groan before the oppressive weight of imperial ambitions.

Here in America, happily distant from the bayoneted camps across the seas, it is hard to believe that the costly lesson learned two scant decades ago has been so soon forgotten. Might makes right only so long as they who wield the might are strong enough to hold it. And victory won by the sword must be sustained by the sword.

We cannot know where history is leading those forces which strain at such slender leashes. All we can do is to hope that the memory of the past may lend caution to men who hold the destinies of whole continents in their hands—and be thankful that, with all our troubles, we live in peace.

BREAK THE LOG-JAMS!

On two fronts, California has this month rolled up its sleeves to smash the log-jams clogging up the return to more prosperous times, the return of men to jobs, the return of cash into circulation.

Along with the rest of the nation, California pitched into the used car week program and helped crown it with a topflight record—175,000 used cars, valued at \$50 million, sold during that week! No longer a lean step-child of the automobile industry, selling used cars is now a \$2 billion business.

While that blockade of used cars stalling the new car market was being broken up, some 154 leading California organizations had given their blocking to cracking another one of industry's log-jams, and securing the enactment of Congress of the Pettengill bill, already endorsed by the House, and now being studied by a Senate committee. This barrier is the long and short haul clause, forbidding railroads to charge less for a short haul than a long one. This is what Pettengill bill would repeal. And this repeal is what California businessmen, farmers, and prominent civic leaders want—a speedy, low-cost gateway to the East, unblocked by prohibitory regulation.

Thus on two fronts, California has begun impressive attacks on log-jams clogging the wheels of our national economy. More power to her!

THE CLOCK OF CRIME

America's clock of crime ticks on! As the hands move around the face, each 45 seconds marks the

The Churches

Carpinteria has a number of Churches, whose pastors and members will be glad to welcome you to their services.

CHRISTIAN SCIENCE SOCIETY
 Christian Science Society, Carpinteria, a branch of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., holds service every Sunday at 11 o'clock a. m., Sunday School at 9:45 o'clock. Mid-week meetings every Wednesday evening at 8 o'clock.

A reading room is maintained in the church building, open Tuesday afternoons (except holidays) from 2:30 to 4:30 o'clock.

This verse from the Psalms, "They that trust in the Lord shall be as mount Zion, which cannot be removed, but abideth for ever," is the Golden Text in the Lesson-Sermon on "Reality" on Sunday in all Churches of Christ, Scientist, branches of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts.

The Lesson-Sermon includes these other verses from the Psalms: "Great is the LORD, and greatly to be praised; and his greatness is unsearchable. . . . All thy works shall praise thee, O LORD; and thy saints shall bless thee. They shall speak of the glory of thy kingdom, and talk of thy power; . . . Thy kingdom is an everlasting kingdom, and thy dominion endureth throughout all generations. . . . The LORD is righteous in all his ways, and holy in all his works."

Among the correlative passages from "Science and Health with Key to the Scriptures," by Mary Baker Eddy, are the statements: "Reality is spiritual, harmonious, immutable, immortal, divine, eternal." "The spiritual fact, re-

peated in the action of man and the whole universe, is harmonious and is the ideal of Truth."

THE CARPINTERIA COMMUNITY CHURCH

Rev. Deane F. Babbitt, Pastor.

The Church School at 9:45 will consider "Ways to Make Our Religion More Helpful." Classes are provided for students of all ages.

The Whittier College vocal organizations, under the direction of Frank Pursell, will present an hour of Sacred Music at the 11 o'clock Morning Worship hour. The A'Cappella Choir, consisting of twenty women and fifteen men, is on a tour from Whittier to Sacramento via the coast. Members of the Youth Fellowship of the Church, under the direction of Miss Patty Demaree, will entertain the group at a dinner at the church following the hour of worship in song. In the evening this visiting choir will sing at the First Methodist Episcopal Church of Santa Barbara at 7:30 p. m.

Junior High Christian Endeavor meets at 3:30 in the McLean Chapel. The Youth Fellowship will be directed by Donald Royer, his subject being "Am I a Quitter?" The hour is 6:30 p. m. High school students find a royal welcome here!

METHODIST CHURCH

Melvin J. Addington, Pastor
 March 24, Dr. R. Ernest Little at 7:30 p. m.

March 25, Dr. R. Ernest Little at 7:30 p. m.

March 26, Howard Cory, Layman of the Alhambra Methodist Episcopal church to speak at 7:30 p. m. in behalf of the Methodist Men's Movement. This Movement will especially of be interest to men. March 27 at 11:00 a. m. Dr. Walter C. Buckner, District Superintendent of the Long Beach district will speak. At 3:00 p. m. Dr. John Ashley of the Santa Barbara Methodist Church will speak

on the Altersgate Commemoration. In the evening at 7:30 p. m. Rev. Harold Thatcher of the Saint John's Methodist Church in Ventura will speak.

HIGH SCHOOL NOTES

Serious training was started by the track team this week. Although the instructor, Merle Staub, is planning to try to muster up enough material to make a showing in coming track meets. The first meet will be between Oxnard and Carpinteria at Oxnard this coming week.

The boys of the Hi-Y last Tuesday night were taught more of the manly "art of self defense," when they were shown by the Ju-Jitsu artists of Santa Barbara, tricks and holds.

The F. F. A. chapter is holding their yearly Barn Dance in the high school auditorium next Friday night.

The orchestra will be from the Ventura Junior college and admission for adults will be fifty cents, and students twenty-five cents.

Frank Bradley, who has been in the Cottage hospital for the past few weeks, with a bad case of appendicitis, is able to see visitors.

A Tri-Y meeting was held last Monday night at which Mary Shepard, the former secretary, and Beulay Hutchison resigned. The new secretary is Elsa Lee Grell.

Also, a Gaval was presented by Miss Forman, sponsor of the class, to the club, to be used at future meetings.

There will be an orchestra concert by the high school students, Thursday night at the high school auditorium. It is to be under the direction of Mr. Fred Greenough and there will be no admission charged.

An assembly was held last Monday at the high school at which time Mr. James A. Walton spoke. He represented the Anti-Cigarette League of Los Angeles. His talk was most impressive.

Some of the facts that he gave against cigarette smoking are the following: "As much as is spent for cigarettes per year could pay twice over what we spend for education, and we spend three billion dollars yearly for education."

He also claimed that twenty-six years could be taken from any persons life by the extensive smoking of cigarettes.

The Twenty-Fifth Annual Russell Cup Track and Field meet will be held on April 23, and will be broadcast over station KTMS. There will be thirty-four schools invited from different sections of the state. Invitations are being printed and will be sent out this week.

ORANGE SHOW TO CLOSE SUNDAY

San Bernardino — Tinkling coin gates that have responded to a constant stream of customers have produced in this year's National Orange Show a "best seller."

From the opening of the brilliant citrus show last Thursday a steady stream of visitors have crowded the giant auditorium to witness the gorgeous display of fruits and flowers that go to make up the 28th annual show.

On the last day of the Orange Show, Sunday, March 27 when the greatest single influx of people ever to be inside the citrus auditorium at one time is expected to be on hand, Leo Carrillo will be the principal entertainer.

THE FLOWERS THAT BLOOM

The flowers that bloom in the Spring are daily popping through their earth blankets, urged into the open by the cordial invitation of a warming sun. When they appear, the violets and the lilies, in all the glory of their new life—let's let them live!

Roadsides sparkling with the gay colors of forsythia, phlox, and flowering grasses, sheltered glens touched by the brilliance of trillium and; brodieia, lilacs banked on roads and paths—that's Spring!

Your Sunday drive down the road will be just as much fun if you come home with flowers in your mind, rather than flowers in your hands. Don't pick the blossoms, pick the memory, and leave the petals to remind the next traveler that Spring is coming in.

SOCIETY

**EASTERN STAR HONORS
DISTRICT DEPUTY
GRAND MATRON**

Members of Vallecito chapter, Eastern Star were hostesses to District Deputy Grand Matron, L. Mona Catlin Tuesday evening, the occasion being her official visit to the chapter. More than 150 guests came from other lodges. Worthy Matrons from other lodges were Matrons Mary Ballen, Oxnard; Agnes Corey, Ventura; Tessie Brown, Ojai; Sada Rose, Marguerite, Santa Barbara; Dorothy Frumkin, Santa Paula; Freda Jones, Santa Barbara; Worthy patrons included G. E. Grant of Santa Barbara chapter and R. D. Hugg of Ventura. Mrs. Faith Storr and Albert Coles are matron and patron of Vallecito chapter.

Miss Margaret Russell, accompanied by Fred Greenough, played a violin solo, and Mrs. F. L. Smith gave a reading during the program. Mrs. Catlin was presented with a gift from the chapter by the Star points, Mrs. Dora Beckstead, Mrs. Elsie Buell, Mrs. Mabel Doell, Mrs. Agnes Kline and Miss Claribel Lewis, and Miss Margaret Lewis. Refreshments were served at the close of the evening.

**CAPT. HANCOCK'S ENSEMBLE
TO BE PRESENTED BY
WOMAN'S CLUB**

The Carpinteria Woman's club will present Captain G. Allan Hancock and the Velerio String Ensemble as their annual public program on the evening of April 7, it has been announced by the program chairman, Mrs. Charles E. Neuman. The concert will be followed by moving pictures taken on recent cruises into southern waters in search of unusual marine life. Many of the new pictures are in technicolor which adds to their interest, according to those who have seen them.

The next club meeting will be on the afternoon of April 7, when Dr. David Banks Rogers will speak and illustrate his talk with slides. Mrs. Orin Hales will be chairman of hostesses. During the business meeting the nomination committee, of which Dr. Genevieve Shorkley is chairman, will report nominations for the offices of second vice-president, secretary, treasurer, chairman of entertainment and chairman of hospitality.

DISCUSS PLANS FOR YOUTH FEDERATION

Jack Hoffman, Patty Demaree, and Margaret Senteney accompanied the Rev. Deane F. Babbitt to the First Methodist Episcopal church of Santa Barbara Friday evening to discuss plans for a Youth Federation Movement in this area. Fourteen churches of Santa Barbara, Goleta and Carpinteria were represented.

MANY ATTEND DESSERT-BRIDGE, FASHION SHOW

A large attendance marked the dessert-bridge and fashion show given last Thursday afternoon in the high school auditorium by the members of the junior class assisted by a committee from the Parent-Teachers' association. Acting as models for the show were Mrs. Neil Bailard, Mrs. Barney Kathman, Mrs. Robert Sawyer, Mrs. Joseph Schweizer, Miss Miriam Hendy, Miss Edythe Bright and Miss Ada Mae Lambert.

MRS. H. W. MORRIS ENTERTAINS BRIDGE CLUB

Mrs. Harbron W. Morris entertained the members of her bridge club at the home of Mrs. Rolland J. Ogan, Tuesday afternoon. Places were marked at luncheon for Mrs. Ogan, Mrs. D. A. Carton, Mrs. C. R. Bowen, Mrs. John W. Dorrance, Mrs. Jesse M. Hawley, Mrs. Jerome F. Tubbs, Mrs. Richard W. Morris, Mrs. Alice Thurmond, Mrs. Joseph Schweizer, Mrs. Nelson F. Smith and Mrs. David Safwenberg.

WOMAN'S CLUB HAS VARIED PROGRAM

Members of the American Homes department of the Woman's club were given a demonstration of desserts by Miss Lucille Christiansen of the Los Angeles Junket Folks at their meeting yesterday, and also a demonstration of a refrigerator and stove by the Carpinteria Plumbing company and

the Southern Counties Gs company. The program was arranged by Mrs. J. L. Fraga. Hostesses for the luncheon were Mrs. E. D. Solari, Mrs. F. A. Hebel, Mrs. W. F. Norlin, Miss Hester and Miss Julia Fish.

During the afternoon N. H. Kallman of Santa Barbara talked on spring planting and showed new plants for the Gardens department, with Mrs. David Safwenberg as chairman presiding.

Edgar Harrison Wileman, consulting decorator for Barker Brothers and lecturer at U. C. L. A. described new modes of home furnishings at the meeting of the club last Thursday afternoon, showing color schemes and drapery materials. Mrs. A. W. Horton was chairman of the hostess committee who served tea at the close of the meeting.

JUNIOR ENDEAVOR GROUP ENTERTAINS

Tuesday evening members of the Junior High Christian Endeavor enjoyed a St. Patrick party in the social rooms of the Community church. Sponsors of the group were Mr. and Mrs. Will Bridgforth and Mr. Stanley Lane. Mariko Mizukami is president of the group. Guests present included Denny Taylor, Kazo Mizukami, Donald Lane, Bobby Lane, Billie Boren, Bob Whitcomb, Erlyn Salgier, Rona Jamerson, Betty Strickland, Shirley McDonald, Shirley Davis, and Teddy Taylor.

HOUSE GUEST HONORED WITH PARTY

Mrs. H. L. Beckstead and Mrs. Leonard Kirkes entertained at dessert and Chinese checkers Saturday afternoon for Mrs. Ada Hursh of Portland, who has been their house-guest for several weeks, and for Mrs. John W. Robbins of Ft. Atkinson, Wis.

Other guests were Mrs. Burton Beckstead, Mrs. L. A. Johnson, Mrs. Marvin Davidson, Mrs. George Eldred, Mrs. William F. Norlin, Mrs. R. J. Ogan, Mrs. James A. Lewis, Mrs. Wade Hamilton, Mrs. F. A. Hebel, Mrs. Lucie Treloar, Miss Maude and Miss Minnie Merrihew.

YOUTH FELLOWSHIP GROUP ENJOYS SCAVANGER HUNT

Members of the Youth Fellowship group of the Community Church joined in a scavenger hunt held on Saturday evening and spent several hours busily endeavoring to secure a group of articles that ranged all the way from pennies of a certain date to tires for model T. Fords. The group was divided into teams of three and Beverly Humphreys, Billy Catlin and Gorden Milne were deemed the most successful in the hunt and presented with a box of chocolates.

The group gathered at the church at 7:30 and were divided into teams, returning to the church with their trophies at 10:30 at which time refreshments were served. Those who took part in the event were:

Edwin McDonald, John Young, Bill Jorgensen, Barbara Lyman, Donald Royer, Myron Sturmer, Gordon Milne, Billy Catlin, Peter Hales, John Hales, Tom Reid, Phillip Olds, Jack Hoffman, George Clark, Glenn Capes, Dono-

allace Beery in "The Bad Man of Brimstone," now playing at the Del Mar Theatre. Also on the same program, "A Girl with Ideas."

van Capes, Billie Osterman, Wallace Godfrey, Merle Ingerson, Webster Beckstead, Siguru Mizukami, Melvin Hoffman, Card Whitcomb, Jr., Robert Whitcomb, Pat Hales, Mary Alice Hebel, Beverly Humphreys, Marilyn Shepard, Nancy Thomas, Martha Thurmond, Katherine Ingerson, Patty Demaree, Jean O'Banion, Barbara Bates, Ayaka Mizukami,

Helen Nalty, Ruth Osterman, June Osterman, Nancy Franklin, Betty Thompson, Mrs. Jack Hales, Card Whitcomb, Rev. Deane F. Babbitt.

Mrs. Jerome F. Tubbs returned last Friday evening from Silver Strand where she had spent several days with her grand-daughter, Mrs. Ralph Hayes.

"GOLDEN BOY" TO OPEN AT LOBERO ON APRIL FIRST

Marc Lawrence, who portrays the role of Fuseli, the gangster in "Golden Boy" which opens for two performances on Friday and Saturday evenings, April 1 and 2 at the Lobero Theater, before going to the Curran Theater in San Francisco, is one actor who went on the stage, not against his parent's wishes, but because of them.

He made his professional debut at the age of 18, appearing with Butler Davenport in a road production of "The Bells." His uncle, Jechial Goldsmith, distinguished tragedian, dies in the prime of his career, and because of Marc's flare for dramatics, he was urged by his parents to follow in his uncle's footsteps.

After his road appearance, Marc went into the Broadway production of "The Tree" with Barton MacLane. The play was a "flop" but it helped Marc on his career. Hollywood beckoned to him and between the stage and motion pictures, Marc got his chance to portray tough characters, which were perfectly suited to his make-up.

In "Golden Boy," starring Francis Lederer, Marc Lawrence is seen as the soft spoken but desperate underworld character, who buys an interest in the golden boy, and who is responsible for the boy's quick rise to fame in the prize-ring.

Your Hollywood Correspondent Reports . . .

Gary Cooper and Claudette Colbert both wired friends in Hollywood for a detailed report of the press review of their latest picture, "Bluebeard's Eighth Wife," following the Paramount showing the other evening. Both Claudette and Gary are vacationing away from Hollywood. Joan Bennett calling at Paramount for wardrobe fittings on the clothes she will wear in her role opposite Randy Scott in "The Texans." Dorothy Lamour doesn't get one day off between the time she completes her role in "Tropic Holiday" and starts her assignment opposite George Raft in Henry Hathaway's "Spawn of the North." George Burns and Gracie Allen subscribe to 26 newspapers, because Ronnie and Sandra Jean, their children, like to read all the funny papers.

Mary Livingstone will not be on the Jack Benny radio program March 27 because it will be broadcast from New York, where Jack

Claudette Colbert and Gary Cooper in "Bluebeards Eighth Wife" now playing at the Fox Arlington Theatre. Also on the same program, "Walking Down Broadway."

plans to vacation before starting in Paramount's 1938 edition of "Artists and Models." Eve Arden wears one outfit which weighs 30 pounds, for her role with Fred MacMurray and Ben Blue in "Cocoanut Grove." Betty Grable and Jackie Coogan will leave for a vacation in Sun Valley, Idaho, following the preview of "College Swing." Marsha Hunt has a ruby ring (wears it on her right ring finger) to match that ruby bracelet Jerry Hopper gave her for a Valentine gift. When John and Elaine Barrymore left for a motor trip to Mexico they took along camping equipment. Barrymore will return to Hollywood in another week to start his role in "Spawn of the North." Bee Lillie is vacationing in Florida, where she plans to stay until the New York opening of her latest picture, "Doctor Rhythm." George Raft hopes to get in a Palm Springs vacation between the time he finishes his role in "You and Mee" and starts his next assignment.

The 2-year-old blonde child who accompanies Gail Patrick every place she goes is not an adopted daughter. Her name is Julie and she's staying at Gail's house for two weeks because Gail sold her parents on the idea of just "borrowing" her. She enjoys her company. Gail is scheduled to start

soon in Paramount's "Disbarred." Harriet Hilliard, now in Paramount's "Cocoanut Grove," has dinner at the smart Victor Hugo every evening because her husband, Ozzie Nelson, conducts the band there.

TENNIS NOTES
By G. W. Hitchcock

Leslie Allen and Mike Koury advanced to the semi-finals in the men's doubles tournament sponsored by the Santa Barbara Tennis association when they won two matches Sunday on the stadium courts. This favored pair defeated Rand and Bond, 6-0, 3-6, 6-0, and then came back to beat Shanahan and Sheegag, 6-0, 6-1.

Another top-seeded team, Julio Bortolazzo and Joe Egus, won easily from Sexauer and Taylor, 6-1, 6-1.

Semi-finals and finals will be played next Sunday at the stadium courts.

Other results Sunday as follows:

D. Wilson and P. Wilson won by default from West and Tower; Marincovich and Ferguson def. Davis and Coats, 6-1, 4-6, 6-4;

Importance of Assessor's Office Told; History Given

(Continued from page 1)

officers, and the records available show that in the last sixty-two years, there have been but five assessors, making an average of a little over twelve years each.

In 1855 we find as Assessor, the name of Antonio M. de la Guerra and following him was Raymond Carrillo. In 1857 came Eugene Lies. In 1858 the assessor was Antonio Arrellanes, then William Carrillo. In 1862 came Augustine Jansens and following him, Thos. Sprague and Chas. E. Alford. In 1876 the Assessor was J. M. Garretson who served until Frank Smith was elected to the office in 1882. T. R. Davis followed in 1906, serving until his death in 1912. Clio L. Lloyd was then appointed to the office which he held until February, 1921, when he passed away suddenly of a heart attack while attending a service in the Grace Methodist Church with his Boy Scout Troop No. 1, of which he was master. Charles S. Tomlinson was then appointed to the office and has been returned to office at the past four consecutive county elections by the electors of the county and is now nearing the completion of his fourth term.

Interesting Items from Old Records

Witnessing the changes in the valuation of land in the county are the old records which show that in the early days personal property on land was valued much higher than the land itself, whereas today assessment roles show that in many cases improvements are valued at a fraction of the present day value of the land.

From an old record book marked "1853 Assessment Roll," note the land values, compared to the personal property on the land.

Jose de la Guerra Noriego Rancho San Julian 115,440 acres, assessed, \$43,290, personal property, \$100,000.

Teodora Arrellanes, part Rancho Guadalupe and Punta de Laguna, 22,200 acres, assessed, \$9,990, personal property, \$37,175.

Francisco Cota, part of Rancho Santa Rosa, 9,445 acres, assessed, \$3,542, personal property, \$22,200.

James Box, one league, Mission Lands, 4,440 acres, \$1,500, one town lot, City of Santa Barbara, 38 acres, \$675.

The affidavits tax payers had to sign were written in both Spanish and English. In most cases these large property owners did not sign their names, but made their mark, which was witnessed by the Assessor. Those accustomed to the oath that present-day tax payers must sign, will be interested in the old-time form printed below:

"You do solemnly swear that the list of your property, here this day by you given to me equals the real cash value, as near as you can justly or reasonably estimate the same, of all your individual property and wealth, whether money, lands, gold dust, houses, ships, vessels, notes, mortgages, County, City or State warrants, bonds or scrip or any other species

of property which you own within this County, and of all the property in this County of which you have the charge or management; the amount of your interest in consigned goods; and that all the real and personal property which you own in connection with any other person or persons within this County, is by you correctly and truly stated, according to the best of your knowledge, information and belief so help you God."

Military Roll and Poll Tax

Assessor Tomlinson says that up to about 1909, the assessor had to prepare a military roll, the same consisting of a list of all citizens of Santa Barbara eligible for military service. This roll was never used, so it was discontinued. When the world-war came, a better system was adopted.

The Two Dollar poll tax that was assessed in the early days against all voters was difficult to collect when the voter did not own real estate. Many men would work it out on the roads, or hire someone to do the work for them. Mr. J. L. Barker, a most efficient deputy assessor for many years, told this story of Assessor Garretson. Back in 1878 when a clerk in the old Morris Hotel refused to pay the two dollar poll tax after several demands, Garretson, seeing his coat hanging on a peg, took it under his arm to the court house, and held it until the delinquent tax payer came and settled the tax. Mr. Tomlinson, in relating this antidote laughingly remarked that in these days the assessor no longer takes the coat off a man's back for taxes, but that it is getting so that he does take about everything else.

The Assessor's Job

You have driven from Santa Barbara to Los Angeles on the inland route. That distance just about represents the length of Santa Barbara County. Now then, appraise correctly all the property you pass, twenty-five miles back from each side of the road, all the walnut and citrus trees, all the buildings and equipment on the ranches, all the stock and cattle in the hills, (and Santa Barbara County last year had over 70,000 head) assess all the houses and their furniture in the towns, all the stores and warehouses with the merchandise in them; appraise the one thousand oil wells and leases, with their machinery and equipment; list all the boats along the coast; get, if you can, all the Solvent Credits belonging to the

people. And when doing this, be sure that it is all listed to the right owner, in the correct taxing district, so as to be figured at the proper tax rate. To assess a county like this, of \$250,000,000 valuation, and have it well done, one must have experience and training in assessment work, and also have a real knowledge of the county property.

That the job is a big one, is proven by the fact that not so long ago San Diego county paid \$318,000 for a special appraisal. Alameda county paid \$225,000; San Francisco, \$275,000; and Marin county about the same amount.

The appraising company that did this work tried hard to do this county, at a cost of \$142,000. This expenditure was opposed by Tomlinson. Today he is accomplishing a far better job of classifying the million acres of land in the county, by his regular deputies, at no extra cost to the tax payer, having secured certain data that the Agricultural Department has been preparing during the last four years and has just now released.

Taxes

In speaking of present day taxation, Tomlinson called attention to the fact that the assessor has absolutely nothing to do with the setting of tax rates, stating that a large per cent of tax bills is for "fixed" charges voted by the people, such as bonds and special districts. He also stated that in view of the fact that the interest generally amounts to as much as the public should thoroughly investigate such issues before passing on them and then be conservative.

Suggestions

In regard to bond issues in general, Tomlinson offered the following suggestions:

1. Never vote for a bond that will run longer than the improvement it covers will last.
2. Vote for no bond running over twenty years, except for an income proposition.
3. The amount of the payments on the principal should be the same each year.
4. Be sure the redemption payment begins the first year.
5. Be sure that the amount you are bonding for is no more than the amount actually needed.

A Lecture

on

CHRISTIAN SCIENCE

Entitled

Christian Science: The Science
Which Reveals the Ever-
presence of God

by

Colin Rucker Eddison, C. S.
of London, England

Member of the Board of Lecture-
ship of The Mother Church, The
First Church of Christ, Scientist,
in Boston, Massachusetts.

Mankind instinctively accords to Deity the attributes of goodness, of eternity, of omnipotence and omnipresence; no lesser concept of God satisfies human reason. Yet the ever-presence of God has long seemed more a theory than a fact. Material existence presents on every hand evidence which, taken at its face value, denies the infinite goodness of God. Sickness, sorrow, pain, social injustice, international strife, all claim to bear witness to the wide-spread presence of devil as well as of Deity, of evil as well as of good.

Here Christian Science comes to humanity's rescue. Christian Science shows that it is ignorance of God's real nature which blinds us to His allness, and its teachings reveal the true concept of God which explains His ever-presence. Furthermore, Christian Science declares that all the evils in human experience—the things which seem to contradict God's infinity—are false beliefs arising from that same ignorance of God. The soundness of this proposition is proved by the removal of those false beliefs—that is to say by the healing of sickness, and sin, and other forms of discord and distress—through a right understanding of God. When we recognize the fact of God's allness we see that nothing can really separate man from his Maker nor rob man of the health, the happiness, the spiritual affluence and freedom which abound in the presence of God.

God Is Divine Principle and Divine Love

Probably the misconception which has done most to hide from us God's true nature is a personal sense of Deity. To think of Him in that way inclines us to endow Him with all the limitations of human personality, its passions and its caprice. Yet in the Bible may be discerned the development of thought above and beyond a finite personal concept of God. In the Scriptures, the thought of God as Mind, as Truth, as Life, gradually emerges from more primitive, anthropomorphic notions, until in the New Testament we learn that God is not a loving person but is Love itself. It remained for Mary Baker Eddy, the Discoverer and Founder of Christian Science—a profound and constant student of the Bible—to use in the Christian Science textbook, "Science and Health with Key to the Scriptures," that term for God which more than all others lifts thought above the personal to the impersonal, the universal, concept of God. That term is Principle.

A simple analogy may help to show how the understanding of God as Principle reveals His true nature and His ever-presence. Take, for example, the principle of mathematics. The principle of mathematics is present everywhere and is always available. Its laws operate uniformly in all circumstances. Anyone who understands it can apply it to the solution of mathematical problems, small or great. Failure of

the mathematician is no indictment of the principle.

These considerations—and anyone can think of many similar ones—help us to grasp the universality, the eternal availability, of that divine Principle which is God. Divine Principle is certain in result when scientifically understood and applied. There is no human difficulty upon which an understanding of divine Principle may not be brought to bear. Failure in solving any problem lies not at the door of Principle, but results from our imperfect understanding of Principle. Faithful application of what we understand about God to the everyday problems of life will lead to ever greater success in demonstrating divine Principle, and to the triumphant solution of difficulties which at first may seem stubborn or even overwhelming.

Let no one fear that to think of God as Principle takes anything from His infinite loving-kindness, for the God who is Principle is also Love. Those two words—Love and Principle—taken together immeasurably enrich each other's meaning. Christian Science reveals God as Principle, instinct with all the gentleness and tenderness of Love, and as Love endowed with all the changeless certainty of Principle. How transcendent of all human limitations in its power to bless and save is that union of absolute Principle and all-inclusive Love which Christian Scientists acknowledge as God!

God and Man

In her writings Mrs. Eddy uses seven synonyms for God, and in order to summarize what is meant when we say that God is ever present I will repeat them. They are "Mind, Spirit, Soul, Principle, Life, Truth, Love" (Science and Health, p. 465).

It is upon the basis of God's infinity that Christian Science denies the reality of matter, of evil, and of all the troubles and turmoil of mortal existence—of sin, sorrow, pain, disease. Since God is infinite, then whatever seems to exist but is not the manifestation of Spirit, of Life, of Love, can only have the insubstantial nature of a false belief. I remember once standing upon the wide expanse of a sandy shore at low tide and seeing in the distance what appeared to be waves tossing and breaking. I knew the district well, and I knew that there was no water where the waves seemed to be. The appearance of waves was a mirage—a seeming, not a reality. If I had walked to the spot where the waves seemed to be I should have found only a waste of wet sand. Of just such a nature as those apparent breakers is all the storm-tossed sea of mortal experience; however true it seems, it is insubstantial and unreal. It is proved to be so as we learn through Christian Science the fundamental truth that God is All-in-all.

There is a point which should be touched upon here. The Bible declares that man is made in God's image and likeness. The material man whom we see all around us, the man with whom mortals identify themselves, is obviously not the image and likeness of God, of infinite Life and Love. A study of Christian Science leads us to revise our notions about man, about ourselves, and about our fellows, and to realize that the material concept about man, in common with other errors, is part of the false belief that God is less than infinite, and that something can exist which is unlike and separate from Him.

What then must we understand man in reality, to be? Christian Science teaches us that God is Mind. Mind is reflected or expressed in idea, and that reflection

of Mind, of God, is man in his true being. "Man," Mrs. Eddy writes in Science and Health (p. 475), "is idea, the image, of Love; he is not physique." Mind unexpressed, that is, without idea, is unthinkable, as unthinkable as a father without a child. God can never be without His expression, man; and therefore where God is—and that is everywhere—there man is also, man made in the spiritual image and likeness of God. An understanding of the truth about man enables us to reject the material false belief about man, and to realize that just where that false belief, with all its pitiful mixture of good and evil, its efforts and failures, seems to be there in reality is the perfect expression of omnipresent Mind.

The Discoverer and Founder of Christian Science and Her Work

It was a revelation of God's presence and power which first led to the discovery of Christian Science by Mary Baker Eddy in the year 1866. Recovery from serious injuries, the result of an accident, a recovery which followed her reading in the Bible of the story of the healing of the man sick of the palsy, convinced Mrs. Eddy that the divine Principle which underlay the healing and saving ministry of Christ Jesus is available and operative today. Spiritual law, not chance, explained Mrs. Eddy's restoration to health. With a deep desire to help humanity, Mrs. Eddy determined to search the Scriptures until she found the scientific laws of healing which were demonstrated by Jesus, and by his followers for three centuries after his ascension. For three years she studied the Bible, until she was able to discern the Science which explains the Master's life and work. She submitted her discoveries to rigorous practical tests, and confirmed the truth of those discoveries by the healing of sickness in many and varied forms. Thus she assured herself that she had found the Science of changeless divine Principle; and speaking of that Principle in Science and Health (p. 107) she says that it "points to the revelation of Immanuel, 'God with us,'—the sovereign ever-presence, delivering the children of men from every ill 'that flesh is heir to.'" The healing of the sick and the reformation of the sinner through Christian Science substantiates that statement.

Having discovered the truths of Christian Science and elucidated them in the Christian Science textbook, Mrs. Eddy perceived the necessity for some form of organization to protect her teaching from adulteration and to disseminate it. Just as Mrs. Eddy was alone responsible for the discovery of Christian Science, so it was she who organized The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts, which now has branches all over the world.

One of the effective methods devised by Mrs. Eddy for spreading a correct understanding of Christian Science was the institution of the weekly Lesson-Sermon. These sermons, which are printed in the Christian Science Quarterly, are studied during the week, and read on Sundays in the church services. As is well known, the Lesson-Sermons consist of selections from the Bible, and correlative passages from "Science and Health with Key to the Scriptures;" thus the Bible and the Christian Science textbook take the place of personal teachers in all Christian Science church services. As the weeks go by the Lesson-Sermons touch upon all sides of human experience. They deal with every kind of question—with religious, philosophical,

moral, and ethical problems, as well as with problems of health and of day-to-day living, and they point to the solution of all difficulties through a better understanding of the truth about God and man. It is not uncommon to hear of cases of quick and thorough healing through the study of the week's Lesson-Sermon or through listening to it at the Sunday service. Indeed, the daily study of that sermon and united attendance in church to hear it read on Sunday, makes active in human consciousness a realization of the universal power of God—a realization which must help not only the congregation but the world at large.

The Christian Science Church, its services and Sunday schools, its various activities designed to help mankind, all owe their origin and development to Mrs. Eddy. They all point to her as a wise and divinely inspired Leader, as one who combined that humility and strength of character which come from conviction of a great mission, and the determination, with God's aid, to fulfill it. It is natural that those who have found peace and health and happiness through Christian Science should greatly appreciate and acknowledge their debt to Mrs. Eddy. Christian Scientists recognize the grandeur of her work, and acknowledge her as the Discoverer and Founder of Christian Science, and the Leader of the Christian Science movement through whose inspired labors has been given to the world the Science which reveals God's ever-presence.

Christ Jesus Understood the Presence of God

Christ Jesus knew, more certainly than anyone has ever known, the allness and the eternality of God, and man's inseparable unity with his Maker. He declared, "Before Abraham was, I am," and "I and my Father are one." By this Jesus did not mean to imply that the corporeal Jesus was forever at-one with God; in other words, that matter is the reflection of Spirit. He meant that the Christ, God's spiritual idea, is never for a moment separated from God, the divine cause and creator of all things. It was because of his understanding of the Christ, which constituted his true spiritual nature, that Jesus was able to heal the sick and raise the dead, and to mark out the way of salvation for all men.

It was the Master's certainty that God is everywhere which explained his healing of those who were not personally present with him. To the nobleman who sought help for the ailing child whom he had left at home Jesus said, "Thy son liveth." And later the nobleman found that the boy's fever left him at the very moment when Jesus made that declaration.

It is the fact of God's universal presence which explains the healing work accomplished by Christian Science through what is sometimes called "absent treatment."

It should be understood that Christian Science treatment rests upon the perfection, here and now, of God and of man, God's spiritual image and likeness. The truth of that perfection is universal, and contradictions of it, whether they seem to be situated near or far, are equally untrue. Christian Science treatment is not the effort by means of hypnotism or mental suggestion to make a sick man think he is well, or merely to change a belief of sickness into a belief of health, but it is the understanding of the truth about God and about man, an understanding which eliminates the false beliefs which seem to hide man's spiritual perfection. Mrs. Eddy writes in Science and Health

(p. 476): "Jesus beheld in Science the perfect man, who appeared to him where sinning mortal man appears to mortals. In this perfect man the Saviour saw God's own likeness, and this correct view of man healed the sick. Thus Jesus taught that the kingdom of God is intact, universal, and that man is pure and holy."

Unity Among Men and Nations

It is not hard to see that an understanding of the allness of God, divine Mind, is the only guarantee of unity among men and women. Unity of thought and ideals is the surest and most enduring foundation for any friendship. Divergence of opinion between true friends, at least about the deeper things that matter, can generally be traced to differing modes of expression, rather than to a fundamental difference in outlook. If that fact were realized, many a heartache might be avoided. How much more secure are those human relationships which have their basis in God, which are grounded upon the absolute unity which must exist between the ideas of the one divine Mind! Friendships, or other human ties, such as those, rest upon foundations which vicissitudes of time or separation in space can neither shake nor even touch. Mrs. Eddy wrote in "The First Church of Christ, Scientist, and Miscellany" (p. 131), "Where God is we can meet, and where God is we can never part." Does not that truth hold promise of infinite comfort not only for those who seem separated on earth, but for those whose loved ones seem taken from them altogether? There can be no separation in God, and God is always here.

Again, human relationships which are based on divine Mind lose all the misery of personal domination and personal absorption. Someone once said, "In all human relationships liberty is the only lasting bond." How true that is! And nothing can more certainly secure liberty in the relations of human life than a recognition that each individual is free to obey God alone.

As with individuals so with nations. All men have, in reality, one Mind, and as that fact becomes recognized it will remove the antagonisms which arise from racial and cultural differences. As the allness of divine love grows in human understanding from an impractical ideal to an accepted fact, the rivalries, the "ancient grudges," that separate nations will fade away. To emphasize in thought and speech, wherever possible, the qualities and ideals which unite nations, rather than the apparent differences which separate them, would be a very practical step towards international appreciation and friendship. Discipline of thought along such lines would be a kind of mental disarmament which would do much to promote peace and good will on earth, and would hasten the inevitable coming of the day when nations, as individuals, will live together in combined unity and freedom.

The Eternality of God

The infinity of God means not only His presence in every place, but His presence throughout all time. Principle is both omnipresent and eternal.

The recognition that divine Love not only is present everywhere now, but always was and always will be present, plays a great part in the salvation of men and women from the fears and troubles which enslave them. Many cases of disease and many weaknesses of character have their roots in the past, recent or remote, but that does not affect the power of

(Continued on page 8)

CHRISTIAN SCIENCE LECTURE

(Continued from page 7)

Truth, as understood through Christian Science, to heal them.

Everyone, or nearly everyone, until he learns something of the truth about God and His allness, lives under the shadow of the past or the menace of the future. Someone once asked, "Which do you fear the more, the past or the future?" That is a searching question, and when we have answered it, let us not stop there. Let us meet and conquer those fears, whether they be of the past, or of the future, or of both, with the assurance that there never was, and never will be, a time when man did not express the infinite perfection of divine Love; there never was, and there never will be, a time when error and evil were real or true. In reality, there is nothing but the eternal now, filled with the presence of divine Love, that "perfect love" which "casteth out fear."

It is commonly thought that the future lies, at least in some degree, within a man's control, but that the past is over, and nothing can be done about it. Men may perhaps fear the future more consciously than they fear the past, but is it not frequently something in the past that makes them do so? Of the future we say, "I will do better;" of the past, "Would that I had done better, but it cannot be helped now." That is the tragedy of what "might have been." But to those who realize the eternity of God it need be a tragedy no longer.

Are we perhaps laboring under a sense of "the irrevocable past," whether because of conditions which were within our own control or not? Then let us rejoice in the liberating promise found in the book of Joel, "I will restore to you the years that the locust hath eaten." Most of those who come to Christian Science for help can look back to years which seem to have been ravaged by "locusts" of some kind. Ill-health, loss, sin, faults or omissions in education, misunderstandings and estrangements, mistakes, material heredity—such things too often seem to have robbed the past of health and happiness, and to cast gaunt shadows over the future. Joel's message rings with hope and encouragement for us all, and he crowns it with the words "and my people shall never be ashamed." The understanding of God's ever-presence, which Christian Science gives, vindicates that glorious prophecy.

"God Requireth That Which is Past"

How are those "locust-eaten" years restored? The Bible again supplies the answer, in the book of Ecclesiastes, "God requireth that which is past." That means that we should deny and reject as unreal and powerless everything in past experience which is inconsistent with the nature of God—whether it be in our own past, in our ancestry, or in the past history of the human race. God must be acknowledged as supreme from everlasting to everlasting. Error and evil were never true in the past, and only the belief that they were true can penalize the present or the future.

But it should be remembered that God's requirement of the past does not mean that if a person has, let us say, defrauded or injured another, he should pass his wrongdoing over with the airy comment, "That was never true," and do no more about it. Such an attitude would be dishonest, and would prolong the errors of the past into the present. Repentance and reformation are necessary,

and form part of the demonstration of the eternal, ever-present nature of good. An honest desire to make up for injuries we may have inflicted in the past will insure the means and opportunity of doing so when that is humanly possible.

The parable of the prodigal son provides illustrations of the pains and penalties which come from the belief that God is less than ever present; it also shows how we may escape from those penalties. The younger son thought that there was something to be gained by leaving his father's house—by separating himself from the presence of God. He therefore went into a far country, and there he met with the inevitable bad results of his journey. The belief that we can separate ourselves or be separated from God must eventually result in trouble and unhappiness and worse, because it is a belief in separation from good. The unhappy prodigal sought help from "a citizen of that country" whither he had gone, and found little satisfaction. That is not surprising, for "a citizen of that country" far from the father's house naturally shared the prodigal's own delusions, and did not know the truth of God's ever-presence, the one thing that could help. But at last the prodigal began to awake to the truth about himself. Then there came into play those true qualities of thought which self-will and self-indulgence had hidden—spiritual activity, humility, trust in his father. It was not long before he found himself in his father's house and had regained all that he seemed to have lost.

So with all who seem to have gone into a far country. When once we awake to our true selfhood as the ideas of divine Mind, the sons and daughters of God, we find ourselves in our Father's house and realize that our separation from it was only a false belief, a dream, and that man is eternally conscious of his unity with his creator.

But what of the elder son, that unsympathetic character whom it is sometimes the fashion to despise? What was it that was wrong with the elder son? Was it not that he, too, was limiting the presence of God? He was quite sure that he himself had never left his father's house, but he was equally sure that his brother had done so. Nor was he sparing in his condemnation of his brother's lapses. Yet had the elder son understood the allness of God he would have known that his brother could never in reality have strayed from Love's ever-presence; and he would have rejoiced at his brother's awakening from the false belief of separation from his father's house, with all the sordidness and all the misery of that false belief. The elder son was, in his way, just as ignorant of the infinity of God as the prodigal had been, and so he received that tender rebuke beginning, "Son, thou art ever with me, and all that I have is thine. Did that rouse him to see that the same statement was really true of his prodigal brother? I like to think that it did.

Christian Science teaches us never to condone evil in ourselves or in others, but at the same time not to condemn the sinner, or to grudge him or ourselves deliverance from sin and from its consequence. Whether, like the prodigal we have consciously strayed from the father's house, or whether, like the elder son, we think that we ourselves have remained faithful while others have wandered, Christian Science shows us that the father's house is infinite, since there is neither place nor time where God

is not present. That fact understood means deliverance from pain, from sorrow, from disease and sin, from all evil, because it substitutes for a conscious or unconscious belief of separation from God a present understanding of man's oneness with divine Mind.

Prayer and Spiritual Communion

It is through prayer and through spiritual communion with God that we learn to know Love's ever-presence, and bring that knowledge to bear upon human needs. Christian Science teaches us to find in prayer something more than petition only. The Apostle Paul bade the Thessalonians "pray without ceasing," and it would not seem possible to obey that advice in the sense of pouring forth a constant series of petitions. There would be scant opportunity to enjoy the answer to our prayers. Prayer which begins as petition blossoms into realization as the eternal presence of God grows clearer. In her Message to The Mother Church for 1901, Mrs. Eddy wrote (p. 19), "Prayer brings the seeker into closer proximity with divine Love, and thus he finds what he seeks, the power of God to heal and to save." Christian Science shows that it is possible to gain so clear a sense of the allness of God that thought spontaneously rejects as unreal everything unlike Him. That is true prayer, and though we may not immediately reach or sustain such an altitude of thought, it is an ideal which is attainable, and to attain to it fully would be unceasing prayer. We can at least begin to exercise such prayer now. Good results are bound to follow. Mrs. Eddy writes (Science and Health, p. 261), "Hold thought steadfastly to the enduring, the good, and the true, and you will bring these into your experience proportionably to their occupancy of your thoughts."

There are three qualities which play an essential part in the prayer of spiritual understanding as taught in Christian Science. They are faith, gratitude, and unselfishness.

It is not a blind faith that we need, but a reasoned and intelligent conviction of the power of scientific right thinking to destroy the false beliefs of material existence. True gratitude recognizes thankfully the infinite goodness and presence of God even before prayer is answered. That was the gratitude expressed by Jesus at the tomb of Lazarus, when, before he called Lazarus forth from the tomb, he said, "Father, I thank thee that thou hast heard me." Unselfishness is a part of all true prayer, a selflessness such as our Master displayed in that wonderful prayer of tenderness and love for his followers throughout all time, recorded in the Gospel of John, "For their sakes I sanctify myself, that they also might be sanctified through the truth." As faith, gratitude, and unselfishness come to characterize our prayers, they will grow nearer to those of Christ Jesus, whose prayers are described in Science and Health (p. 12) as "deep and conscientious protests of Truth,—of man's likeness to God and of man's unity with Truth and Love."

The only basis for communion with God is the fact of His ever-presence. With Christian Scientists, spiritual communion with Love is experienced as they become conscious that God and man, divine Mind and its idea, can never for a moment be divided.

The object of communion with God should not be merely to find escape from our own troubles and difficulties, but to gain that spiritual inspiration and consciousness of God's nearness which will en-

able us to help our fellow man and the whole world. Through communion we seek to receive that which we may both keep eternally and also share. We cannot give until we have something to bestow, and in communion with God we find that which is real and true, that which is alone worth giving.

Receptiveness of heart and mind soonest gains communion with Love. Mrs. Eddy writes in Science and Health (p. 505), "Spirit imparts the understanding which uplifts consciousness and leads into all truth." God, out of the inexhaustible resources of His infinite Being, is forever bestowing the understanding of Himself and of His ever-presence. It is our part to accept that understanding. We shall accept it more readily and more fully as we learn to listen to God. The carnal mind is constantly thundering or whispering to us thoughts which contest the allness of God; suggestions of indifference to God's will and to the needs of humanity; suggestions of hatred, disloyalty, self-condemnation; suggestions that life is at the mercy of chance, of disease, of death. As we learn to listen to the voice of God alone we shall cease to hear the tumult or the murmuring of evil, and its false suggestions will fade from our experience. The infinite voice of Truth silences the clamor of the carnal mind. The acceptance of what is true is the natural and spontaneous rejection of what is not true.

There need be no question as to when, and where, and how we may hear the voice of God. God is speaking, is revealing Himself, to this age through the teachings of Christian Science, through the understanding of the Bible which Christian Science imparts. He is revealing Himself to all men as the healing and saving divine Principle, Love.

To become conscious of God as Principle, as eternal ever-present Love, means the destruction, the healing, of disease, sin, and sorrow; it means deliverance from the penalties of the past and from the threats of the future; it means the unity of all men in a brotherhood where duty and freedom are reconciled; it means the kingdom of heaven within us. Mary Baker Eddy sums up what it means in her "Miscellaneous Writings" (p. 263), when she says, "Always bear in mind that His presence, power, and peace meet all human needs and reflect all bliss."

WOMEN IN THE NEWS

By LEONE BAXTER

When a modern husband finds himself suddenly engulfed in the sullen storm of a first-class feminine crying act, he has come to recognize that a little sympathy administered with proper finesse usually can be counted on to turn off the tears. For more wives than one would care to name, thus refreshed from their emotional showers, are able then to muster a smile, however pathetic, powder their noses—and proceed with life, feeling everything's perfectly lovely again.

But is it?

Novelist Josephine Lawrence says: "Emphatically, no!" Very much to the point, she also says: "This country is raising up far too many women with a passion for taking themselves apart and crying over the pieces!"

Interestingly enough, that's the theory, succinctly expressed, that psychological experts for years have maintained that if a woman, intent on "taking herself apart" for a good, miserable cry, looks real sharp, she'll find among the pieces, slivers of selfishness, chips of emotional indulgence, and rather large slices of martyr vanity.

That penchant for spilling one's troubles over into other people's lives, the psychologists have called "martyr vanity." Miss Lawrence dresses it up in a fictional robe and calls it plain bad sportsmanship—which is easier to understand and much easier to take, along with a good story.

* * * *

Avoiding uncomfortably close personal parallels, one needs only to scan the front page of any news paper to see ample evidence of women "taking themselves apart and crying over the pieces"—and usually urging other people to cry, too. For extreme example: There's the recurrent tale of the woman who writes a tear-jerking note to the world at large, goes down to the wharf—and screams loudly for help before jumping in to end it all.

Her theatricals are reasonably safe, and she's likely thrilled to her toes. But her vanity next day must be utterly crushed by the invariably unlovely news photographs of her ugly, dripping, disheveled self being hauled ashore.

"Self sacrifice," says Josephine Lawrence, "as practiced by women who make a cult of crucifying themselves is nothing more than the expression of a childish voluptuous gratification, an orgy of emotional indulgence!"

So be it! But probably neither the warning of the psychologist nor the exhortation of the writer will deter women intent on tears and sympathy. Why? Because there's still far too many a woman who thoroughly enjoys it all—from the first tremble of her own-pouting lip to the final tear shed under her husband's chin—making her feel so childishly young again, so petulantly appealing, and so very taken-care-of.

Quinn Is Talented

Anthony Quinn, who has just finished his role in Paramount's "Dangerous To Know" and is currently enacting a part in "Crime Gives Orders," finds time for painting and literary work. Today he was putting the finishing touches on a play he has been writing since he returned from his honeymoon trip with Katherine De Mille.

LEGAL NOTICE

NOTICE OF SALE OF BONDS OF CARPINTERIA UNION SCHOOL DISTRICT

WHEREAS, the Board of Supervisors of the County of Santa Barbara, State of California, did on the 13th day of September, 1937, order the issuance of \$100,000.00 of bonds of Carpinteria Union School District, in Santa Barbara County, State of California, said bonds being one hundred in number of the denomination of \$1,000.00 each, dated September 13th, 1937, and maturing five each year, commencing on the 13th day of September, 1938, and bearing interest at the rate of three and one-half percent per annum, payable annually for the first year the bonds have to run and semi-annually thereafter; and

WHEREAS, the said Board of Supervisors did on said 13th day of September, 1937, order that sixty of said bonds be sold to the highest and best bidder, at not less than par and accrued interest, for cash in lawful money of the United States, on the 4th day of October, 1937; and

WHEREAS, said sixty bonds were on said 4th day of October, 1937, sold to Heller Bruce & Company as the highest and best bidders for the same; and

WHEREAS, the said Board of Supervisors is now desirous of selling the remaining forty bonds of said bond issue, and did on the 14th day of February, 1938, order that the remaining forty bonds of said One Hundred Thousand Dollar Bond Issue be sold on March 14th, 1938; and

WHEREAS, all bids received on the 14th day of March, 1938, were rejected by said Board of Supervisors;

NOW, THEREFORE, NOTICE IS HEREBY GIVEN that on the 14th day of March, 1938, the said Board of Supervisors ordered that the remaining forty bonds of said One Hundred Thousand Dollar Bond Issue of the Carpinteria Union School District be re-advertised for sale to the highest and best bidder, at not less than par and accrued interest, for cash in lawful money of the United States, on the 11th day of April, 1938, at 10 o'clock A. M.; said bonds to be sold being numbered and maturing and being payable as follows:

Bonds Nos. 61, 62, 63, 64, 65 will mature and be payable Sept. 13, 1950.

Bonds Nos. 66, 67, 68, 69, 70 will mature and be payable Sept. 13, 1951.

Bonds Nos. 71, 72, 73, 74, 75 will mature and be payable Sept. 13, 1952.

Bonds Nos. 76, 77, 78, 79, 80 will mature and be payable Sept. 13, 1953.

Bonds Nos. 81, 82, 83, 84, 85 will mature and be payable Sept. 13, 1954.

Bonds Nos. 86, 87, 88, 89, 90 will mature and be payable Sept. 13, 1955.

Bonds Nos. 91, 92, 93, 94, 95 will mature and be payable Sept. 13, 1956.

Bonds Nos. 96, 97, 98, 99, 100 will mature and be payable Sept. 13, 1957.

NOTICE IS FURTHER GIVEN that sealed bids will be received at the office of the undersigned Clerk of said Board of Supervisors in the City of Santa Barbara, California, up to the said 11th day of April, 1938, at 10 o'clock a. m., at which time the above specified bonds will be sold to the highest and best bidder at not less than par and accrued interest; each bid shall state the amount bid for said bonds and the amount of premium, if any, bid therefor.

Each bid must be accompanied by a certified check payable to the order of the County Treasurer of Santa Barbara County for

three per cent of the par value of the bonds, conditioned that the bidder therefor, if said bonds be awarded to him, will take and pay for said bonds within ten days after the passage of a resolution of said Board awarding said bonds to him.

Payment for and delivery of said bonds will be made in the office of the County Treasurer of said County, in the City of Santa Barbara, County and State aforesaid.

The Board reserves the right to reject any and all bids for said bonds.

By Order of the Board of Supervisors of the County of Santa Barbara, State of California.

Dated: March 14th, 1938.
(SEAL) J. E. LEWIS,
County Clerk and ex-officio Clerk of the Board of Supervisors of the County of Santa Barbara, State of California.

PASSAGE OF PROBATE ACT HELD BOON TO FARMERS

Passage by the special session of the legislature of the amended Agricultural Prorate Act and the new State Soil Conservation District Act, both Farm Bureau measures, provide California farmers with significant assistance in solving their problems, it was declared today by Dr. Von T. Ellsworth, director of the research and legislative representative for the California Farm Bureau Federation, in a wire to Ulah E. Smith, president of the Santa Barbara County Farm Bureau.

"Importance of the newly

amended Prorate Act," he said, "is indicated in the fact that last year approximately 25,000 producers operated under a prorate system in moving their products to market, and 15,000 other farmers now are seeking to bring their industries under its beneficial provisions.

"Among the changes in the amended law, the most important is that which authorizes farm industries, operating under the Agricultural Prorate Act, to raise funds for increasing sales and broadening market outlets with the help of advertising."

The new amendments, Dr. Ellsworth added, also authorize cooperative marketing associations to sign prorate petitions on behalf of their members, on the ground that such associations have full control over the marketing of the crops of their members; provides two-year terms for members of program committees, in charge of marketing programs under the prorate adopted; and authorizes proration by grade, thereby benefitting consumers through distribution of better-quality products.

"Passage of the new State Soil Conservation Districts Act," Dr. Ellsworth said, "provides for the

organization and management of public soil conservation districts, following generally the method employed in organization and management of public soil conservation districts, following generally the method employed in organization and management of California's irrigation districts. This measure aims at the control of soil erosion and the conservation of our natural resources. Management of soil conservation districts is placed in the hands of duly elected directors. Provision is also made for a State Soil Conservation Committee, an educational rather

than a control agency, comprising among others the Dean of the College of Agriculture of the University of California and the State Engineer."

Star Prospects Picked

Phyllis Welch, Annabella, and Olympe Bradna were recently designated in a poll of Hollywood directors as the most likely prospects for stardom in 1938. Miss Bradna has just been given her first starring role in Paramount's "Stolen Heaven."

EXTENSION OF SCHOOL VACATION SOUGHT BY GROUP

With the acceptance of its presidency by Harvey M. Toy, of San Francisco, Vacations, Inc., non-profit, state-wide organization, this week was preparing to initiate an intensive campaign to bring about legislative action making a three months' summer school vacation mandatory in the state of California.
 Sponsoring the program of Vacations, Inc. is a representative nucleus group of outstanding business men, industrialists and corporation executives from all parts of California. These men

realize that the present un-stabilized school vacation system is costing the state hundreds of dollars in tourist expenditures annually.
 Toy, widely known throughout California as president of the San Francisco Hotel Association, has campaigned a number of years to bring about longer summer school vacations as a protection to the state's billion dollar tourist industry.
 His efforts have convinced him that this end can only be attained through suitable action of the State Legislature. Under the present system, he pointed out, individual city or county school boards are the sole arbiters in the matter of fixing vacation periods.
 The result, he said, is that summer school vacations vary throughout the state. As a consequence resorts and other enterprises catering to the tourist trade are placed at a serious disadvantage, often being forced to close their doors at the height of the season, abruptly terminating tourist stopovers and tourist expenditures.
 The list of sponsors of Vacations, Inc. and its campaign for a fixed three months' summer vacation include several prominent Santa Barbara business men. They are: Charles Bedell Hervey, El Encanto Hotel, Santa Barbara; J.

D. Paxton, executive vice-president, County National Bank and Trust Co., Santa Barbara; and Alvin C. Weingand, proprietor, San Ysidro Ranch, Santa Barbara.

Boy Scout News Troop 1, Boy Scouts of America Carpinteria Clair Cummins, Scribe

While nearly fifty scouts and leaders looked on, the nearly completed Council pit was dedicated Wednesday night with solemn ceremonies at the regular weekly meeting.
 The Council pit is the only one of its kind in the Mission Council and has a ceremonial fire in the center. Vistors from other troops are expected to attend the meeting next week in order that they may view the novel idea.
 Plans for advancement were discussed and it was decided that at least one test a month should be passed by each scout in order that the troop may operate at maximum efficiency.
 The patrols engaged in a fire-building and water boiling contest which was won by the Wildcat Patrol.
 Bud Riley of the Chronicle announced plans for a commercial census to be taken at a future

date in which the scouts might participate in order to raise patrol funds.

WILL MOVE TO NEW LOCATION NEXT FRIDAY

Stuart McMartin, who has been engaged in the insurance business for some time, with offices in the Henderson Realty Co., is moving to the Furby Building next Friday.
 Mr. McMartin in addition to insurance will also conduct a real estate office in his new location.
 Your printing orders will be well done and appreciated at The Chronicle office.

YOU WOULD WEAR ORDINARY PUMPS, MY DEAR, NOW I SUPPOSE I'LL HAVE TO CARRY YOU TO MY TANGO STORE.

Tangos are flexible at the instep, the very spot where ordinary pumps hurt most.

THIS WEEK!

See our display of extra large and small sizes. Your size is there.
