## Reversal Sought On Olympic Resolution

By JACQUELYN AFFONSO  
Sacramento Correspondent

The California legislature's resolution denying Soviet Union participation in the 1984 Summer Olympic Games may soon be reversed.

Identical joint resolutions, which would welcome "all invited participants" to the Olympic Games, were introduced in both houses last week.

Senate Joint Resolution 37, backed by 28 Senate members and Assembly Joint Resolution 94, supported by 50 members, would contradict SJR 31 chaptered Sept. 19, 1983.

Authored by Senator John Doolittle (R-Sacramento), the resolution was introduced after a Korean airliner was shot down by the Soviet Union Sept. 1. However, its initial purpose, before being amended by the Assembly, was only to encourage the federal government "to take appropriate action to oppose Soviet aggression."

The resolution was introduced "out of honesty and concern over the killing of innocent people," Administrative Assistant to Doolittle, John Feliz said.

The new resolutions, authored by Senator Ken Maddy (R-Fresno) and Assemblymember Michael Roos (D-Los Angeles) are an attempt to redefine the legislature's earlier position.

"It (SJR 37) was really not the intent of the legislature," Rich Millner, principal consultant to Roos, said.

The Assembly included the Olympic provision into the resolution. It was then passed by the Senate. The majority of the Senate members were not "aware" of the amendment upon voting, Pete Bontadalli, aide to Maddy, said.

After SJR 31 was passed, letters were sent out to members of the legislature asking them to re-evaluate their opinions. Their response indicated they did not agree with the resolution, Bontadalli said. "The only role the politicians have in the Olympics is to extend their welcome and not get involved," he said.

Doolittle is considered by Maddy's office to oppose the proposed (Please turn to pg.10, col.3)

## Protests Continue At Diablo Power Plant

By MARK ROWE  
Nexus Staff Writer

Eighty-six anti-nuclear activists have been arrested since Friday for refusing to leave the front gate area of the Diablo Canyon nuclear power plant.

Abalone Alliance media spokesman Jay Newbern predicted "at least 25 more (arrests) would be made Tuesday when Abalone people encounter the sheriff and the Pinkerton security in the back country."

San Luis Obispo County Sheriff George Whiting said his office has been "responding well to the needs of both sides, keeping the roads clear for employees and making things as smooth as possible for those arrested." Whiting has stationed four men at the gate and "expects no problems will arise in what has been a very peaceful demonstration."

"The first group is going to court today, and we will keep the process running with hopefully no hassles at all," Whiting said.

Non-violent action, in accordance with the People's Emergency Response Plan, began Friday, with the strongest display of force coming on Sunday when 2,000 to 3,000 people showed up to oppose the licensing of Diablo for low-power testing.

"We ended up having mostly

locals protesting at the front gate and our Abalones hiking through the back country to the plant site," Newbern said. "The march on Sunday went off quite well with a lot of people from Santa Barbara participating."

The high point of Sunday's demonstration came when faculty and staff members of Cal Poly San Luis Obispo arrived carrying banners and signs claiming "Diablo Flunks" and singing anti-nuclear songs. When confronted by sheriff's deputies, many of these protesters "arrested" themselves by boarding a police bus while other protesters cheered them on.

"It has been a very quiet, non-violent demonstration at the gate and it's been business as usual inside the plant," PG&E Public Information Specialist Suzanne Brown said. "As long as we can get to work, we're fine. The sheriff has been there to keep the roads clear."

The action was "smaller than ones in the past," Brown said. "There are not the numbers out there which would require us to bus in our workers as we have had to do before." She also emphasized that "the plant itself is seven miles from the Avila Beach gate so no one who comes on the premises is committing a breach of security," (Please turn to pg.10, col.3)

SCOTT SEDLIK/Nexus

A noon rally was held in Storke Plaza Tuesday to commemorate the birthday of Martin Luther King Jr. and the continuing struggle for human rights that he inspired. The Men's Glee Club (top) and UCSB Professor William Edwards (left) were among several who participated in yesterday's events. A candlelight march (above) also took place Monday night.

## Chemical Spill

### Firefighters Evacuate Building

By KEITH ROSS  
Nexus Staff Writer

A small chemical spill on the second floor of the Music Library Tuesday caused firefighters to temporarily evacuate the building in order to ventilate it.

There were no injuries reported, and the Music Library returned to normal operations shortly after the incident. "There should be no problems after this," Music Service Desk Supervisor Joanne Murray said.

The spill, which occurred at noon, consisted of a one gallon glass container of micro-film cleaning solvent which "spontaneously broke" on a counter top, melting part of a librarian's rubber shoe sole, according to firefighter David Sadecki.

With the exception of a small amount of solvent that seeped into an adjoining study area, absorbing pillows contained the spill within the card catalog area of the library. A ventilation system was also set up by firefighters to dissipate vapors trapped in the room.

The solvent, later identified as Retec Solution B, presented no immediate danger to people exposed to it, though in high concentrations, can irritate the eyes and respiratory tract, according to Industrial Hygiene Technician Rich Chan.

"It is generally not a human toxic type of hazard. I am going to check back with the RTI Corporation that manufactures it to make sure," he said.

"The greatest danger was the broken glass from the bottle," Sadecki said. "But what I can't understand is that if they felt it was hazardous enough to call the fire department, why didn't they feel it was hazardous enough to evacuate the room until we got here?"

After hearing the sound of glass breaking, and a "rushing water sound," library attendant Joe Kucera immediately telephoned health and safety officials.

"There were probably 60 to 70 people in the room. I think most of them were oblivious to the accident," Kucera said. "I know from using the solvent in the past, that in small quantities it isn't dangerous, so I started wiping off library materials before the fire department arrived."

While wiping off library materials, part of Kucera's rubber shoe soles melted, leaving a black imprint on the library floor.

"It smells to be of a hydrocarbon base," Fire Captain Ron Bruns said of the solvent. "His shoes being rubber would naturally dissolve in the stuff."

The small amount of solvent that seeped into the study area left a brown, coffee stain-like spot on the library floor. The two spots appear to be the only lasting effects of the incident, according to Bruns.

Sadecki suggested a change in room temperature and insufficient space for the solvent to expand in the bottle was the possible cause of the accident.

## Oil Lease Decision Evokes Mixed Reactions

By DEBBIE NESTOR  
Nexus Staff Writer

Oil development off the Santa Barbara Coast may increase as a result of last week's Supreme Court ruling that prohibits the state from participating in the leasing process.

The court overturned a 1982 appeals court ruling which stated former Secretary of the Interior James Watt leased 29 tracts of offshore land illegally since the sales had not been found to be consistent with California's coastal management plan. The new decision says that states have no

part in the leasing process.

But the state will still have the power to regulate the actual drilling that occurs off the coast, William Travis, deputy director of the California Coastal Commission, said. "It leaves us with the responsibility to deal with development after the leases are sold."

"We were very surprised at it (the decision) — surprised, disappointed and frustrated," Travis said. "It's going to make it very difficult for us to do our job."

"We are pleased with the decision," Exxon Public Relation

Manager D.I. Bolding said. "The state delayed the process of being able to determine how much oil there is," he stated.

"The ruling will allow the Department of Interior to inventory the amount of oil we have. The only way we know how much oil is at our disposal is through drilling, and exploratory drilling is only available through leased land," Bolding explained.

"The only thing the Supreme Court did was to take local decision out of the leasing process," John Helmer, coastal energy specialist with the City of Santa Barbara,

said.

He explained this could have major impacts on the Santa Barbara area because it is difficult to fight oil projects later when they have reached the development stage. "What happens is that, by then, the oil companies have forked out a lot of money," Helmer said.

"It's like telling someone 'you get to buy the lot, but you can't build a house on it,'" Helmer explained. "It (owning the leases) will give the oil companies a much stronger position when it comes to the development decision."

"It's one step closer to drilling and production," Santa Barbara County Supervisor David Yager said. "It opens up the lease sales without sufficient protection for the county." He explained the county needs to have a greater say in oil development because of the adverse effects it has on air quality and tourism.

Ellen Sidenberg, executive director of Get Oil Out, is also concerned with the decision's effects on the environment. "It could have disastrous effects," she said. "The only thing to be (Please turn to pg.10, col.3)

## Nation

### Affirmative Action Quotas

The United States Commission on Civil Rights in Hunt Valley, reversing a policy of former members, denounced affirmative action quotas Tuesday as "unjustified discrimination" that creates a "new class of victims."

At a news conference after a two-day meeting, Chair Clarence M. Pendleton Jr. said it voted six to two to "declare our independence" of old policies that supported mandatory quotas for hiring and promoting women and minorities. He said the commission will go on to study the affects of President Reagan's budget cuts in social programs.

But commissioner Mary Frances Berry, one of three members from the old panel, called its new majority, White House puppets.

The Air Force is ready to launch the first flight test of its new anti-satellite weapon that has control advocates that it could spark a new round in the international arms race.

The U.S. weapon, a small rocket fired from a high-flying jet, is designed to counter a Soviet anti-satellite (ASAT) weapon that has already been tested successfully, according to the Pentagon.

The first flight test of the American ASAT has been put off for several months, but the problems that led to the delay have now been solved, according to officials who declined to be named.

In a major legal setback for the film industry, a divided Supreme Court ruled Tuesday that the sale and use of home

video recorders to tape TV shows for later, private viewing is legal.

The court voted 5-4 that the Sony Corp. and other makers are not violating U.S. copyright laws by selling the popular machines, which the industry estimates are owned by about one in every 10 American families. U.S. sales of the recorders total nearly \$2 billion.

The high court may not have the last word, however, in the high-stakes battle over video recorders. Movie producers are seeking a final victory in Congress, which has the power to rewrite copyright laws, and the court said, "It may well be that Congress will take a fresh look at this new technology."

In San Antonio, Tex. the death of a two-star general found bound and hanged at Fort Sam Houston last week has tentatively been ruled a suicide, the Associated Press learned Tuesday.

A source, who asked not to be identified, said, "All the evidence at this point indicates suicide."

Major General Robert Ownby was found hanging last Wednesday in a stairwell of a Fort Sam Houston headquarters building in San Antonio, his hands bound behind him.

In Washington, President Reagan's spokesperson Tuesday rejected interpretations that Reagan's speech on U.S.-Soviet relations was related to U.S. politics and said he hoped it would have a favorable impact on a top-level meeting with the Soviets in Sweden.

## State

### Activist Continue Protest

In San Luis Obispo anti-nuclear activists said more of their numbers were penetrating the property of Diablo Canyon nuclear power plant Tuesday while some of the 81 already arrested were being arraigned on trespassing charges.

"We had 16 people go in (to Diablo property) this morning," said Mary Moore, spokesperson for the Abalone Alliance, the group spearheading a prolonged protest that began Friday at the twin-reactor nuclear plant mid-way up the California coast.

She said the protesters want to show by peacefully entering the rugged back-country around Diablo that the \$4.3 billion plant's security is vulnerable to potential sabotage.

In Los Angeles a man who visited the set of the "Twilight Zone" movie refuted previous testimony Tuesday that the parents of two children killed in later filming were not warned of the dangerous nature of the work.

Roger David, a Midland, Texas, geologist who was visiting in Los Angeles about a week before the July 23, 1982, filming accident, testified that George Folsey, one of the five film executives facing charges of involuntary manslaughter, had explained that explosives

and a helicopter would be used.

In Sacramento backers of a voters initiative aimed at pressuring Congress to balance the federal government said Tuesday they are close to qualifying their measure for California's Nov. 6 presidential ballot.

An earlier attempt by the National Tax Litigation Committee to collect the 393,835 signatures required to win a spot of the California ballot failed to make the Nov. 29, 1983 deadline for California's June 5 presidential primary ballot.

But Lewis Uhler, a former aide to then Gov. Ronald Reagan who is founder and chief of the tax limitation group, said qualification for the November ballot is "now certain."

State engineers from Sacramento Tuesday examined a gaping hole in the 444-mile-long California Aqueduct, where a section in use only two weeks may be responsible for the spillage of 326 million gallons of water, a spokesperson said.

The 40-by-20 foot hole grew Monday from a break in the cement lining of the Aqueduct which carries Northern California water to Southern California faucets, said Bill Burke, superintendent of operations for the state Department of Water Resources at the facility.

## World

### Consul Kidnapped In Lebanon

Gunmen with automatic rifles abducted the Saudi Arabian consul from his limousine in Beirut, Lebanon, Tuesday, wounding his driver and beating his bodyguard. State-run Beirut radio said the kidnappers were trying to sabotage a Saudi-mediated security plan and "in-flame the Lebanon situation."

No one immediately claimed responsibility for the abduction of consul Hussein Abdullah Farrash, 45, in Moslem west Beirut's seaside Rouche neighborhood. There was no word on whether the Saudi Embassy or the Lebanese government had received any ransom demands.

The state radio, meanwhile, said Druse and Christian militiamen traded artillery and rocket barrages throughout the day in the Kharroub region overlooking Israel's defense line at the Awali River in southern Lebanon. No casualties were reported.

Elsewhere, police said, guns were silent after a day of heavy bombardment Monday that left 34 civilians dead and 100 wounded in Beirut's Christian sector and Druse-inhabited central mountain towns.

In Stockholm, Sweden, Secretary of State George Shultz will tell the Soviet foreign minister on Wednesday that the United States would welcome talks on any

level in an effort to control nuclear weapons and curb conventional forces in Europe.

Administration sources told the Associated Press Tuesday if the Soviets are reluctant to resume talks, the United States is ready to open their channels to reverse the U.S. and Soviet arms buildup.

Shultz, seeking to reopen a dialogue with the Soviet Union, will meet Foreign Minister Andrei Gromyko on Wednesday. Both are attending a 35-nation conference on peace and security in Europe.

East German Foreign Minister Oskar Fischer urged a treaty between the NATO and Warsaw pact renouncing use of military force, a freeze on nuclear arsenals, nuclear-free zones in Europe, a European ban on chemical weapons and a freeze or cut in military budgets.

Schultz declined to comment on those proposals, several echoing previous Warsaw Pact ideas, until he had studied them.

**WEATHER** — Fair with temperature highs in the 60s and lows in the 40s.

## Board Of Supervisors

## County Not Liable For Boathouse

By DEBBIE NESTOR  
Nexus Staff Writer

An amendment freeing Santa Barbara County from any liability caused by flooding of the UCSB boathouse at Lake Cachuma, due to raising the water level, was approved by the Board of Supervisors Tuesday.

The boathouse is used by the UCSB Crew team to store its boats, Wayne Horodwich, outdoor recreation supervisor and director of club sports, said.

The boathouse was built in 1982 on land owned by the county at Lake Cachuma under a permit awarded to the university by the county in 1968. Construction was delayed because the university did not have sufficient funds to build the facility.

The supervisors have approved an amendment to the permit freeing the county from any liability resulting from flooding of the land where the boathouse is located.

"It was to protect ourselves in the event that water from the lake rose and caused the boathouse to be damaged or destroyed," Parks Director Michael Pahos, said. When the facility was originally approved, the possibility of raising the water level in Lake Cachuma was not an issue, he explained.

Raising the level of Lake Cachuma is being considered by the Goleta Valley Water District as a possible solution to the water problem, he explained. "It's just one of the op-

tions being examined."

If the water level is raised the university will have to move or rebuild the boathouse. Under the new agreement the county assumes no liability for the boathouse unless it (the county) decides to terminate its agreement, Pahos said. The county will have to compensate the university for the boathouse only if it terminates its original agreement with the university.

"This is the first I've heard of it," Horodwich said. "That's our storage facility, and they practice out of it."

The university has very little control over the boathouse site since the land belongs to the county, he explained. "We have the use of the county's land," he said.

"My reaction to it (the board's decision) is that I don't like it," Horodwich said. "It (the boathouse) is an investment of thousands of dollars and that would be lost."

Horodwich did not believe the facility would be rebuilt in the event the level of the lake is risen. "I don't think that would be a top priority item."

In other business, the board discussed the use of the Goleta Beach Pier by Atlantic Richfield Company for loading and unloading of personnel, a report on the terms of the COX Cable franchise in the South Coast area and a condominium development near the intersection of Hollister Avenue and Entrance Road in Goleta.

## I.V. Beat

## Fraternity And Sorority Unite To Sponsor Fundraising Activity

By JAMES ALEXANDER  
Nexus Staff Writer

To raise money for the American Cancer Society and Child Abuse Learning Mediation, Inc., the men of Sigma Nu fraternity and the women of Kappa Delta sorority have joined together in a teeter-totter marathon.

They plan to continue teeter-tottering until this Friday — totalling 168 hours, Kappa Delta member Kim Laschi said.

Members will work in one-hour shifts and pledges will be accepted for every hour they ride. It is a combined effort with a fraternity member on one end and a sorority member on the other end, Laschi said.

The two houses are raising money for their respective philanthropies, Sigma Nu member Mike Willey said. Sigma Nu hopes to earn \$5,000 for the American Cancer Society, Willey added.

Kappa Delta's philanthropy, Child Abuse Learning Mediation, Inc. is a local non-profit organization primarily concerned with the physical, mental and sexual abuse of children, CALM Administrative Assistant Jan Sorrow said.

CALM tries to identify problems and reach out to parents and children, Sorrow said. The organization offers therapy for both parent and child, and offers parenting classes for those that just want to learn, she added.

The national fraternity has previously held teeter-totter fund-raisers and the

local chapter felt the teeter-tottering would be a lot more fun that going door to door for donations, Willey said.

Although the teeter-totter marathon is already in progress, pledges are still welcome, Laschi said. There is a minimum pledge of two cents for each hour teeter-tottered, she added.

The money collected by each house supports their respective philanthropies.

To pledge to Kappa Delta for CALM call Kim Laschi at 685-2893. To pledge Sigma Nu and the American Cancer Society call Mike Willey at 968-1173.

The Isla Vista Community Council and Goletans Organized for Orderly Development confirmed a commitment to work jointly towards the separate incorporations of I.V. and Goleta.

Because GOOD had previously supported a combined incorporation of I.V. and Goleta, I.V. resident Jeff Walsh questioned the intentions of GOOD. GOOD member Donna Simons said she is convinced GOOD is committed to separate incorporation, however.

GOOD President John Watson said he feels joint cityhood is best, "but the people don't want it." However, if the separate incorporation movement runs into roadblocks in the future, the groups might want to work towards joint cityhood, he said. At this point, though, Watson is committed to separate incorporations.

# Report

The long-awaited Kissinger Commission report on Central America has finally arrived, full of contradictions and lofty sentiments.

The report is a masterpiece of ambiguity which can be interpreted differently from every perspective. This is not surprising considering the size of the commission and the dissenting views of its members. The report has something for everyone.

But as a result of its political fence-sitting, the commission failed to make a coherent statement. The report shifts continually from a social and economic explanation for existing problems to one based on the Soviet-Cuban-Nicaraguan menace.

This type of schizophrenic writing does not lend itself to consensus building. It is unlikely Congress will approve the massive increases in military and economic aid the commission recommends. Liberals will object to supplying more money to El Salvador's corrupt military and the contras fighting in Nicaragua. Conservatives will disagree with the amount of money proposed for social programs. However, since the report basically boils down to an endorsement of current policy, the president is quite pleased with it.

Despite the dissension there is no doubt increased funding is needed for conditions to change in Central America; and unless conditions change, fighting will continue.

As past experience has blatantly illustrated, however, simply providing large sums of money will not bring about the necessary changes. Billions of U.S. dollars have been sunk into Central America during the last decade, and conditions have only deteriorated. The money served to fatten the pockets of corrupt politicians, businessmen, generals and perpetuate the existing social order.

The commission appears to have recognized the folly of this present policy when making its recommendations. They advocate the establishment of an international organization to oversee and direct some of the development funds intended for the region. But the commission fails to provide any concrete proposals to ensure the remainder of U.S. aid will be used for economic and social development.

It is a shame such a highly touted commission could not produce a document containing some real compromises and concrete proposals for a much needed increase in aid to Central America. In its present form, it is unlikely to raise anything more than debate.

# Oil Leasing

The Supreme Court recently ruled state and local governments have no jurisdiction in the offshore oil leasing process. By this action the court has usurped the power of such state agencies as the California Coastal Commission, originally created to protect our coastal environment.

The only voice California now has in determining offshore drilling comes after companies have spent millions to obtain leases and begin exploration. Even then, a protest by the Coastal Commission can be appealed by oil companies to the U.S. Secretary of Commerce.

This decision has stripped away the capacity for state and local governments to regulate the pace of offshore oil development. The Department of the Interior, under the Reagan administration, along with the multi-billion dollar oil companies, now have a clearer path toward establishing unlimited oil rigs along the California coast. Once the oil is located and the extent of its presence assessed, few paths of recourse will be available to prevent large scale production.

The commission has expressed its dismay over the Supreme Court's decision. Regulation of each state's coastal environment must be left to that individual state. As similar cases have demonstrated in the past, the federal government places monetary concerns before our environmental interests. Legislation to counter the Supreme Court's decision must be introduced to protect our irreplaceable resources.

## LETTERS

### Harassment

Editor, Daily Nexus:  
As a senior in geology here at UCSB I am well acquainted with the staff, T.A.s, and professors in the department. I am writing in regards to the Womanwise column of 1/12: "What Woman Wouldn't Go Out With Him" where the writer Lauren Schipsi tells a story about her harassment by a geology T.A. The explanation at the end of the story says it was intended to encourage victims of sexual harassment to come forward to authorities with their stories. So, I would like to know: is it a true story or a fictional one? If it is fiction I feel the writer is doing our department a great disservice by not clearly stating this. The T.A.s and professors in our department are hard working, conscientious people and don't deserve to be the brunt of this story. Also, on another topic, should not the phrase "Any girl would have killed for a date with him" be "Any woman...?"

Lynn Johnson

Editor's note: The Womanwise column written by Lauren Schipsi was a fictional account, designed "to encourage actual victims of sexual harassment to seek assistance from campus services." The column was not designed to embarrass or incriminate anyone within the Geology Department, but rather create a believable situation here on campus in which such an incident could occur.

### Nuclear

Editor, Daily Nexus:  
I couldn't believe someone would write a letter like Alexandria Crowley's

"WWIII" (Nexus 1/12/84) in 1984. Are you sure that you didn't inadvertently reprint a letter written in 1968? I have known so many people who wrote and said the same things in the late sixties and early seventies: nuclear holocaust is inevitable, so why do anything at all? Instead, ignore social convention, live for today, and do your own thing. Turn on and drop out.

Today my friends who practiced those ideals are 35 or 40 years old. Most are married and have children. They're also struggling to make up for 10 or 15 years lost time because they're rapidly approaching middle age and the holocaust (or revolution for some) didn't occur as soon as they had anticipated.

No one can know for sure if the world will eventually suffer nuclear destruction or not, but only a fool would insist that the end would be inevitable within a couple of years and plan his or her life around such a prediction. We have fortunately survived four decades of nuclear arsenals and who is to say we shall not survive another four? If you're convinced that global destruction is near and inevitable, why not do something positive and constructive to postpone the holocaust? "Dropping acid" or dropping out of society won't help the situation at all.

Alfred Smiley

### Gardner

Editor, Daily Nexus:  
Last week, His most Noble and Sovereign majesty, Lord of Lords and King of Kings, His most Royal and Sacred Highness, the President of the University of California paid our campus a visit.

occasion I had been laboring under the misapprehension that the prez of the UC was a simple public servant. From the way he was feted, however, his Lordship is clearly the scion of an exceedingly wealthy family who is considering a large endowment for tax purposes.

The reception this man received would have been considered extravagant by Nancy Reagan. Lunch alone required a catering staff of well over 30 people and entailed closing the UCen to students. It appears that Caviar was served. I am told that dinner and breakfast were even more extravagant (and costly).

This cavalier misuse of funds is completely infuriating. It is the height of hypocrisy to speak of fiscal responsibility out of one side of your mouth while stuffing Caviar in the other. Let visiting dignitaries eat in DLG like everyone else. They can even reserve a table if they want to sit together. It's all you can eat, too.

Whose money was wasted on this shameful display, anyway? If the alumni paid for it it is a sad waste of much needed funds. If the University paid for it (read "the students") it is probably criminal and a full investigation should be launched immediately with an eye to charging those responsible with malfeasance and misuse of public funds.

### Stolen

Editor, Daily Nexus:  
Have a nice weekend? I didn't. I never thought a Friday the 13th would effect me but my bike was stolen. My plea in this letter to the editor is for its return.  
It was your basic black cruiser with a new front (red) rim and some blue

pinstriping I had done myself. Besides the financial loss, (combined with my current economic plight which prevents me from buying another) I have lost my transportation in an environment that demands some.

What frustrates me to no end is the loss of the same kind of bike last year in the dorms. It was locked (free standing) in front of Anacapa and literally lifted away. I found it somewhat reasonable to have a bike stolen is such a setting such as this, where people lower their moral standards (or maintain them) to make a buck. This second loss in two years seems a little much though.

In all honesty, after both losses I seriously considered just stealing one back. First, I'd get my transportation back, and second, it would ease the mounting pressure of revenge. Beside being against the law, neither action is productive toward getting my bike back and I could not bare to inflict the loss of someone's bike on them by stealing it — believe me I know how it feels.

So, what to do? In an effort to seek a miracle, I'd like to ask for my bike back.

So maybe you had a few beers, or under peer pressure, or you just got tired of walking — maybe all of the above — I don't care! I'd like to suggest a simple non-legal, non-personal way of returning it. Just drop it back in the near future; it'll be the same action all in reverse. At some convenient late hour during the week just ride it back into the driveway and leave it at the bottom of the stairs next to the motorcycle — you know the spot. I don't need to see you, you don't need to see me; nobody has to know (pardon the grammar) nothin'. So come on, show a little compassion, huh?

## Architecture At UCSB

Most of UCSB was built in anticipation of the great boom of college students during the 1960s. Does the campus appear to be a product of the Eisenhower years? The complacent, unexciting fifties seemed to influence the architecture of California universities, Santa Barbara especially.

The aesthetics of UCSB can be seen in the architecture of its buildings, distinguished only by indistinguishable plainness. The buildings are at once cursed and cursory, rapidly constructed with scant attention to detail. The campus previously served as a Marine base, thus explaining the resemblance of various buildings to barracks. The Santa Ynez apartments are a maze of recently constructed buildings remarkable in generic white-wall splendor. Looking at Santa Ynez one realizes the school needed to accommodate housing for students as quickly as possible, and the result is noticeable.

Entering campus from El Colegio road a building of unparalleled ugliness is noticeable on the right, the Student Health Center. This pseudo-classical structure consists of a gaudy sculpture surrounded by a ridiculous colonnade. Fortunately for the university, the number of driving deaths attributed to the specter of the building is minimized by the proximity of doctors.

Architecture can function to shape and form ideas and perceptions. Every edifice at UCSB is based on a block of concrete indented with a square design. The overall effect of the design is numbness, although I doubt this was the purpose of the architect. Many

students are victims of the mind melting edifice complex, especially those surrounded by the squared pattern in dormitories.

One exception to the squared design domination is Storke Tower. Affectionately referred to as Dork Tower, this obelisk-bell tower is an outstanding example of phallic monumentalism. Although the Storke Tower doesn't reveal the box design, the wood paneling must surely keep it hidden.

The drabness of the buildings at UCSB is easily escapable; just go to the top floor. Don't jump — just look over the surroundings. Almost every building on campus offers a beautiful vista. The twin towers, San Miguel and San Nicolas dorms, offer panoramas startling in contrast with their exteriors. The Psychology building could be considered an example of minimalized architecture, as there are no windows. Possibly this reflects the confidential nature of the department, but the ruinous effects of sunlight on experiments is a more plausible explanation.

The biggest architectural failure on campus is Storke Plaza, as it fails to provide a comfortable gathering place. Students can sit on the steps easily enough to hear rallies and musical performances, but most prefer the UCen or front lawn. The pool of water in the plaza is presumably a fountain, but for what purpose is unknown. Storke Plaza successfully provides hundreds of birds with a home above the arches. The architect didn't think of this when he designed the arcade, but at least it's being put to good use.

Without considering the favorable climate and environment, UCSB developed around monotonous functional facilities. Although the location is not matched by many colleges, the campus is forgettable and bland. Regrettably, the structures serve to detract rather than complement the sedate beauty of the area.

Christopher Croton is a junior English literature major at UCSB.

Ellen Goodman

## ERA-GAY-AIDS

One of the least pleasant aspects of working for a newspaper is reading the occasional sleazy stuff that comes in the mail. When I receive this sort of letter or pamphlet, my strategy is to pick it up with the longest pair of tweezers in the office and drop it quickly into the nearest waste basket.

But sometimes I save one as a reminder. I have such a pamphlet on my desk today. It was forwarded to me a few weeks ago, and I've been looking at it, deciding whether and when to dump the thing. This pamphlet was prepared (it says on the back) by The Eagle Forum, Phyllis Schlafly's outfit in Illinois.

Schlafly, onetime Sweetheart of the Silent Majority and longtime right-wing activist, is a friend of the nuclear bomb and an enemy of the Equal Rights Amendment. Her Eagle Forum began life as an anti-ERA group, and over the years it has taken up the cause against sex education and even herpes.

As a Schlafly-watcher I can testify that she's produced some pretty good copy for the media. Her best lines are absolutely memorable. The atom bomb was "a marvelous gift given to our country by a wise God." Sexual harassment isn't a problem because "men hardly ever ask sexual favors of women from whom the certain answer is

no."

It's been a perverse pleasure to chronicle her career, even the Eagle Forum "birth control" pamphlets that warn, "There is only one way to be sure you never get herpes: Avoid sexual relations."

At first, I hoped this pamphlet was a political trick, a Dick Tuck or Lampoon satire of the Schlafly style, but it isn't. Nor does it lend itself to light-hearted commentary, although I prefer not to take Schlafly seriously. But this is as scurrilous a piece of hate literature as could come off Goebbels' presses.

In lavender letters bannered across a three-page spread, the Eagle Forum now proclaims: "The ERA-GAY-AIDS CONNECTION." The pamphlet uses all the practiced techniques of propaganda — from guilt by association, to half-truths, to scare tactics — in order to draw some bizarre connection between a constitutional amendment that would guarantee equal rights for women and a deadly disease that is epidemic in the gay community.

I don't have the space or stomach to take you through the perverse reasoning and profound homophobia of this attack but let me just give you a few highlights. The argument begins by suggesting that the Equal Rights Amendment is a gay rights amendment for homosexuals who want the right to flaunt "their deviation as role models for children" and "to use public restrooms and parks to solicit sex with strangers." But the linchpin of the argument is the inference that, under ERA, we will all be left unprotected from the "Gay Plague."

"If ERA puts 'sex equality' into the Constitution," we are

asked:

"Would police, paramedics, dentists, health personnel and morticians be permitted to take adequate precautions to defend themselves against AIDS and other homosexual diseases?"

"Could we restrict homosexuals from working in the food handling business, such a restaurants and as flight attendants on airlines?"

These are the absurd, wild non sequiturs of the hate-monger. As such, they deserve the tweezer treatment, not more publicity. But the fact is that the words come from the Schlafly factory and Schlafly has been given national respectability.

By now, the lady from Alton, Ill., has won credence as a legitimate spokesperson for "the other side." Always available to the media, she is a permanent fixture in the ERA debate. She perfects an image of mainstream, eagle-crested American motherhood. But here, under her organization's imprint, we have an indecent, cruel fistful of bigotry, one that uses human tragedy for political manipulation.

The whole sorry affair takes us back a full 30 years to the day at the McCarthy hearings when attorney Joe Welch finally lost his patience with the senator's character assassinations, and said, "You have done enough. Have you no sense of decency, sir? At long last have you left no sense of decency?"

Now, into the wastebasket.

## The Kissinger Commission Report: No Surprises

The biggest surprise about the report from the Kissinger Commission on Central America is that it contains no surprises. The report proposes no new definitions of the appropriate U.S. role in the region. Instead, its consensus is business as usual: huge sums of economic and military aid bestowed upon shaky regimes engaged in a regional civil war that has implications for U.S.-Soviet relations.

The immediate consequence of the commission's proposals is to endorse President Reagan's policy judgment. As he said himself in remarks last week to a Republican women's group at the White House, the report "substantiates" his position. Reagan can rightfully be pleased with the commission's findings. In nearly every aspect, the report confirms the administration's military and economic aid policies, as well as its depiction of Central American conflicts in East-West terms.

Over the next five years, if the report's recommendations are carried out, at least \$8 billion in U.S. economic aid will be spent among six Central American nations. According to excerpts from the report published in last Thursday's *Los Angeles Times*, "significantly increased levels of military aid" will go to El Salvador. All of this money, according to the report, is intended to improve regional economic growth and help keep "international terrorism, imported revolutionary ideologies, and ambitions of the Soviet Union, and the example and engagement of a Marxist Cuba" from "threatening the hopes for political progress."

Much of the commission's attention was apparently devoted to El Salvador and Nicaragua. The report rightfully lauds El Salvador's progress in providing for national elections, land reform and "other aspects of democracy, however imperfect." At the same time, however, it fails to note that the land reform program has been drastically scaled down since its inception. Nor does the report adequately address the implications of the still-unresolved murders of six Americans — two agricultural advisors and four churchwomen — over the last three years in El Salvador.

One of the few bright spots in the commission's report is its proposal that military aid to El Salvador be strictly tied to demonstrable progress in curbing human

rights violations. Another is the report's affirmation of the need to negotiate with the Nicaraguan government to seek "a political alternative to continuing confrontation in the region." At best, however, the recommendation is half-hearted; the commission also endorses continued U.S. support of the *contras*, the force of anti-Sandinista insurgents fighting against the Nicaraguan government.

Such inconsistencies riddle the Kissinger report. At the same time that it contends Central American conflicts should be reduced "to Central American dimensions," for example, the document urges stepped-up military aid to El Salvador and a stronger American role in regional politics. In another instance, the commission expresses hope "that arms would support diplomacy rather than supplant it." But instead of proposing a negotiated settlement of El Salvador's civil war, the report recommends continuing the Salvadoran government's U.S.-backed military campaign, with no plans for negotiation. Finally, the commission states that "Indigenous reform, even indigenous revolution, is not a threat to the U.S.," yet it characterizes the Salvadoran insurgency as *non-indigenous* and therefore a serious threat to U.S. interests in the region.

The best the report has to offer is a firm acknowledgement that some of Central America's most severe problems are economic ones. Declining per capita income, a decrease in world prices for sugar, coffee and other regional commodities, and the impact of high international interest rates are all noted by the commission as difficulties at least as severe as the region's political troubles. Even here, however, the report refrains from bold recommendations such as that offered by commission member Dr. Carlos F. Diaz-Alejandro, a Yale economics professor specializing in South American economies, who urged opening U.S. markets to Central American exports.

That the report goes through a lot of rhetorical acrobatics to end up endorsing present U.S. policy in the region is understandable, given the precedent of bipartisan presidential commissions. As commission member San Antonio mayor Henry G. Cisneros noted, there is an implicit pressure against dissent in any such group whose task is to reconcile opposing views. In

the end, either the chief executive agrees with the findings of his commission, as Reagan did with the Social Security Commission, or it agrees with him, as the Kissinger Commission did.

The Kissinger report does little beyond provide a chronicle of the debate over present U.S. policies in Central America. No doubt, the Reagan administration intends to use the report's provisions as a basis for future economic and military aid proposals,

programs which several key members of Congress have already indicated they are reluctant to support. Consequently, the debate over the Reagan administration's Central American policies will continue, with the same disputes over what the United States is doing in that region and why it is doing it.

**Research Team Receives Grant To  
Study Microcomputer Application**

By ELLI VEIDEMAN  
Nexus Reporter

A team of researchers in the department of Special Education and Education at UCSB have received a \$1 million federal government grant to fund a four-year study on the use of microcomputers for teaching learning disabled children in elementary schools.

The goal of the study is to determine how microcomputers are going to be effective in improving the learning situation for students with learning handicaps, Susan R. Goldman, assistant professor of education at UCSB, said.

The first year of the study will be spent doing surveys and observing microcomputer use by the learning disabled in elementary schools throughout Santa Barbara, Los Angeles, San Luis Obispo and Ventura counties to determine their effectiveness and to discover information that will allow for their optimal use.

Many schools have at least one computer, several of which are acquired from federal and private sources as a result of parental pressure or teachers who bring their own personal computers into elementary schools, Merith A. Cosden, one of the co-principal investigators of the project, said.

Although schools are acquiring computers at an exponentially increasing rate, information on how to use them to best benefit the learning disabled has not kept up. "Right now we don't have a good idea on the strengths and weaknesses of the types of software they're using," Goldman said. "The programs available will seriously affect the effects we see."

The intent of the federal government's office of Special Education (in the Department of Education) is to develop a broad data base to aid teachers and those involved in the commercial aspects of computer software in making decisions regarding the use of microcomputers for the learning disabled.

One concern is although computers may offer myriad ways to aid mildly handicapped students' learning,

microcomputers will not be effective if information on how to use them efficiently is not gathered and disseminated to the educators and computer program designers, Cosden said.

The second part of the study will involve three years of experimental research to determine what software equipment and instructional materials are most effective for the different sorts of cognitive problems affecting the students, Cosden said. Results of the study may require modifications of existing software or development of new kinds better suited to student needs, he added.

Research will be carried out in a microcomputer lab where students can be observed and tested and where researchers can determine the effectiveness of existing software programs and instructional materials in such areas as drill practice, word processing, and arithmetic rate.

A national committee of educators, parents, professors and individuals involved in the technological areas of the computers will exchange input with the researchers so they may be aware "of what goes on elsewhere Vis-a-Vis the national picture," Goldman said.

Another aspect of the study is to try "to build bridges" by having contacts with other projects in the country. University researchers will work closely with corporate research teams involved in the commercial development of software.

In addition to the large number of schools participating in the project, the researchers will also have contacts with other similar projects currently underway across the country.

Melvyn I. Semmel, professor of special education, is director of the project at UCSB. Other researchers on the project are Michael M. Gerber, and Dorothy Semmel. In addition, there will be a team of graduate students working as assistant researchers on the project, which has been in the preparation stages since October.

**Mission Canyon**

**Sewage System Gains Certification**

By KAREN MOLITZ  
Nexus Reporter

A report stating provisions for a new residential sewage system in the Mission Canyon area has been

certified, despite a ban against building new or additional septic systems, Interface Planning and Counseling President John Joustice said.

The sewer project will begin construction in the fall of this year, Assistant Director for Public Works Vern Bugh said.

Portions of the Mission Canyon area will remain under the septic tank system because the ground in the area cannot accommodate the new sewer system, Bugh added.

The report was written in response to a "great deal of concern about the inefficient septic tanks," Jeff Harris, county environmental hearing officer, said. "The fluid from the tanks was oozing out of the ground because the ground cannot absorb all the waste material."

The report was put before a Santa Barbara environmental hearing officer last Thursday to determine if the conditions stated in it would allow its certification

or not, Mike Montoya, senior planner, said.

"Any environmental document has to have some adverse impacts," Harris said.

The sewage project's

*'Any environmental document has to have some adverse impacts,'*

—Jeff Harris

advantages have been questioned by the city of Santa Barbara. The city "became concerned about the growth-inducing impact of the plan to extend city sewer services into the area that has a history of septic tank failure," Harris said.

The city's primary interest is to accommodate any growth caused by the new system, Montoya said. Originally, the sewer project was to provide new sewage to 133 additional homes in the Mission Canyon area.

"We have now found that 221 homes can be developed," he said.

Almost one year ago, the regional Water Quality Control Board "imposed a moratorium on the further development of septic services to the Mission Canyon area," Montoya said.

But now, Joustice added, there is no longer a restraint "due to septic tanks now being used in some areas."

The supplemental document has to have an "addendum or addition to this pre-existing report," Montoya said. "The way the county works is that it certifies the report first and then allows the additional information to come in as soon as it is readily available."

This additional section will clarify the number of homes that can be built in the area, Montoya said.

On Jan. 12, the report goes before the Local Agency Formation Commission, its first hearing body, Harris said. (Please turn to pg.11, col.1)

## Friendship Manor Senior Citizens Enjoy Students And Community

By GINA GLENNON  
Nexus Staff Writer

"The contrast of youth and old age is always healthy; and living in Isla Vista gives the seniors at Friendship Manor the opportunity to develop friendships with students, therefore reaping the benefits of both worlds," Shirley Major, Friendship Manor administrative assistant said.

Many of the seniors at Friendship Manor have established friendships with UCSB students, Major said. The student volunteers from the Community Affairs Board operate the senior escort service, and CAB volunteers are very helpful in making it possible for seniors to audit classes at UCSB, she explained.

"I delight in working with CAB and find the student volunteers enthusiastic, sincere and extremely dedicated to their work," Major said.

Major is very happy with the location in Isla Vista. "The seniors have the advantage of the university, the beach and the view of the mountains, while still residing in a little community with all its informalities," she said.

CAB is implementing a program entitled "Adopt a

orientation party."

CAB has had an Adopt a Grandparent program, but this is the first quarter it will work with Friendship Manor, Hanle said. Previously, the University Religious Conference was doing Adopt a Grandparent with Friendship Manor.

According to CAB project

*'Seniors have the advantage of the university, the beach and the view of the mountains...'*

Shirley Major

Grandparent," which matches students and seniors according to the interests indicated on their applications, CAB Project Director Gleen Hanle explained. "At present we have lots of ideas. For example, we are working on getting the applications out and we are also planning an

director Deanne Bernstein, CAB has tentatively set up some people for the Adopt a Grandparent program. Some volunteers operate on a one-to-one basis with a senior while others prefer to act as friendly visitors to many seniors, Bernstein explained.

CAB is very enthusiastic

about the volunteer program at Friendship Manor, Bernstein said. "Since a lot of student volunteers in Isla Vista don't have cars, they are very happy that Friendship Manor is so close," she added.

Friendship Manor, located at 6647 El Colegio, was established in 1973 with the help of a Christian service, Major said. "We are a non-licensed facility, which means we operate on our own. Our prices are geared toward low-income seniors and rent is on a monthly basis with no leases required," she added.

In order to reside at Friendship Manor, a person must be 62 years or older, able to adapt to communal life and be able to care for themselves since Friendship Manor is non-licensed. The Manor has approximately 240 residents between the ages of 62 and 99, some of whom work or attend school.

### Bird Preservation

## Audubon Society Remains Active

By DEBBIE NESTOR  
Nexus Staff Writer

Originally a group of bird watchers, the Santa Barbara Audubon Society has become an environmental organization active in conservation as well as educating and entertaining the public.

The biggest conservation issue the group is involved in is preservation of More Mesa, a scenic stretch of coastline that is home to many species of rare birds. "we are trying to raise enough funds to purchase More Mesa," Society President Robert Lindsay, a UCSB graduate student, said. The society is involved in changing the zoning designation of the area so it cannot be developed, he added.

Other conservation efforts the Audubon Society is involved in include helping injured birds. "We do have a couple of people who take in injured birds," Lynn Gausman, an Audubon volunteer, said. "A lot of people call in about that in the spring when baby birds fall from their nests."

However Gausman said, when birds are mistreated the Humane Society or the Fish and Game Department handle the cases. "We got a call about some people who were mistreating pelicans on the wharf," Gausman said. "They were feeding them beer bottles and lighted cigarettes. People who see that kind of thing really get mad and want to do something about it."

The Audubon Society also arranges educational programs at the request of any class or organization. "Teachers call in and ask for one of our slide presen-

tations," Guasman said.

Many members of the Audubon Society are interested in identifying new birds. Originally it was the Santa Barbara Bird Watchers' Society, Lindsay explained, adding it became part of the National Audubon Society 20 years ago.

"But we're reasonably autonomous," he said, explaining most of their policies and issues are not dictated by the national organization.

One custom carried out with the national group is the annual bird count competition, where the Audubon members go out and count all the different kinds of birds they can spot, Gausman said.

The Santa Barbara group and a rival group in Texas usually come in first place she said. "We are neck and neck. This year we won. We can take a kind of pride in that."

The society is currently involved in sponsoring an environmental conference scheduled for Jan. 28 at the Garvon Theater. "It will be a discussion of what's going on in the environmental movement," Lindsay said.

The Audubon Society has 1,200 members countywide. Lindsay explained that, although it is a diverse group ranging from students to elderly members, the active members are the older ones. "I am surprised at that," he said.

Membership dues support the society along with income from various legacies left to the organization, Gausman said. "We have managed to receive a fair amount of assets," Lindsay added.

### ENGINEERING STUDENTS

The Air Force is offering a limited number of scholarships for electrical, aeronautical, aerospace and astronomical engineering students. These scholarships cover the entire senior year, and culminate with the applicant entering the Air Force Officer Training School after graduation from college. Junior and Senior engineering students are eligible for this program. To see if you qualify, call your Air Force representative.

**Marxism ≠ Black Radicalism**

**UCSB Professor Releases Book**

By DANA SNYDER  
Nexus Reporter

*Black Marxism: The Making of the Black Radical Tradition*, "is an attempt to argue that Marxism and black radicalism are two different social ideologies," UCSB Political Science Professor Cedric Robinson said of his newly released book.

Robinson, who has been researching and writing this book for the past six years, is the director of the Center for Black Studies at UCSB.

"The book seems to be doing very well," Robinson said, since its release in

Britain and America in October last year.

"The topic is an important one, since some of our leading intellectuals have been Marxists," Douglas Daniels, professor of history at UCSB, said.

Marxism and black radicalism have different historical routes, Robinson said. "One developed in Europe in the 18th and 19th centuries, and the other in Africa heading back to the 15th and 16th centuries. They converged in the 1920s and 1930s when black men and women became conscious of black Marxism," Robinson

explained.

Racism was permeating societies, Robinson added, and for centuries the English considered the Irish and Scots to be of the lower classes. Their bigoted attitude partly caused a slower political development of English workers, Robinson said.

After slavery was introduced in the 16th century in Europe because Blacks were thought of as the devil, this association was "common knowledge in Europe," because of the importance of the Church, Robinson said. The civil rights movement in the United States, centuries after African slavery and racism in Europe, revolved around the church, Robinson added.

Though some Blacks sought out protection from slavery in small communities of refugee slaves in places like the Caribbean and others with swamps and forests, African slavery was still very prevalent, Robinson said. Those who chose to disengage themselves from violence farmed and lived according to ancient traditions, he added.

"Only in the beginning of this century did the true history of black Marxism come about," Robinson said. Historian and sociologist W. E. B. DuBois wrote *Black Reconstruction*, Richard Wright wrote *Native Son*, and C. L. R. James wrote *Black Jacobians*, all of which provided the first truthful and actual accounts of the black experience, Robinson added.

A large part of Robinson's

book looks at slavery and the rebellions in the marooned communities of Latin America. "It traces the routes of Marxism," as well as articulating the resolutions and acceptances of black Marxism," Robinson said.

"It (black Marxism) is an area that needs our attention," Douglas commented.

Robinson has recently begun research on his third book which will deal with the reaction of Blacks in the West Indies to the advent of Fascism in the 1930's.

Professor Cedric Robinson's new book focuses on the division between black radicalism and Marxism.

**READERS KNEADED**

Do you have the eyes of an eagle? Are you dying to express your creativity in six words or less? Do your friends refuse to let you proofread their papers because they say you're too picky!? Do you find typos in the *Daily Nexus* every day? Come help correct those mistakes before they ever get printed!

The *Daily Nexus* is looking for students, preferably with work study, to copyread and write headlines approximately five hours a week. If you have all, or at least some, of the above qualifications and can spell too, see Ruth, Leah or Vanessa in the Nexus office under Storke Tower soon.

## Protests At Diablo...

(Continued from front page) they are only committing a trespass."

Newbern said, however, his organization will "continue our presence both at the gate and in the back country with people creatively designing protests in their own way. We have affinity groups from San Joaquin doing civil

disobedience in the back country today ... and we'll have gate action by a lot of high school people from San Luis Obispo on Wednesday." Newbern added, "We are very encouraged by the turnout of local young people."

"The NRC (Nuclear Regulatory Commission) will hold meetings on Jan. 23

to discuss our hot functions testing, which tests the ability of pipes to withstand expansion, and on Feb. 10 before we go into low power testing," Brown explained. "We hope to be doing the testing by the middle of February."

Newbern said the Abalone Alliance is "also strongly encouraged by the NRC's

refusal Friday to issue an operating permit at the Commonwealth Edison Byron nuke near Rockford, Illinois." This is the first time the NRC has refused to grant such a license.

News that the Public Service Company's Marble Hill reactor in Plainfield, Ind. ran out of money when only half completed was also "greeted with great enthusiasm at the Abalone Alliance," Newbern said.

## Resolution Permits Soviets...

(Continued from front page)

resolution. "We are supportive of the concept of peace," Feliz said. He added the resolution would be hypocritical unless everyone is "truly invited," including South Africa and Taiwan.

South Africa is not listed as a participating country in the Olympics, according to the Public Information Office of the L.A. Olympic Committee.

The resolutions have 30 days to be heard. Introducing them into both houses should speed up the process, Millner said.

Also supportive of the resolutions, is the legislature's Select Committee on Olympic Oversight. The committee was appointed by Assembly Speaker Willie Brown on Feb. 23, 1983.

Assemblymember Roos, chair of the committee, defines it as "a selected group in the legislature that provides timely, factual and good information on what the Olympic effort means in terms of state involvement."

The committee held its first hearing with the Assembly Agriculture Committee in November, 1983. No other meetings have yet been scheduled.

## Oil Leases...

(Continued from front page) done is to see that there is legislation in Congress."

"There will be legislative relief possible," Yager said, referring to legislation proposed in Congress by Representative Leon Panetta (D-Carmel Valley) that will give states a say in the leasing process.

When asked if the decision would result in a line of oil platforms along the length of the coast, Travis said it is too early to tell. "We are at-

tempting to meet with (Secretary of the Interior) Clark this week." Travis explained the present administration has promised "to concentrate on those areas where there is high interest from the oil industry and little local opposition."

"With that kind of attitude, while we have been stripped of legal authority, there seems to have been a major change of policy in the Interior Department," Travis said.

## Clarification

In the Tuesday addition of the Daily Nexus, there was a story concerning reg fees costs next year. The article stated the reg fee cost to operate the foot patrol would be \$23,000. This information, attributed to Reg Fee Advisory Committee Chair Steve Jeffries, should have read \$230,000.

# Sewage System...

(Continued from pg.6)

said. This body reviews the report and "makes recommendations and proposals so that all of its conditions can be approved," he said.

Once it passes through this body, the report is transferred for final approval to the Santa Barbara County Board of Supervisors, Harris added.

With an efficient sewer system, further development is a big possibility, Montoya said. The area with the best grounds will grow, likely causing complications in other areas, such as water control, traffic, land development and erosion, he added.

Montoya emphasized the importance of measures taken to improve traffic signals in the area. "With the addition of more than 200 homes, about 2,000 some-odd daily trips will go through the Mission Canyon-Foothill Rd. area," Montoya said. "This will cause a need for additional signals and proper striping on the roads."

"There will be at least 200 people during the peak traveling hours, and as a result, I see the need for some mitigating measure to allow signalization," he explained.

Harris added the traffic in this area may be rerouted for a period of time.

Another concern deals with land development. Once sewers are put in, it is difficult to divide the land, forcing new boundaries on individual land plots, Harris explained.

The water supply to the Mission Canyon area must be re-examined, according to Montoya. This area's impact on the city's water

supply will determine whether the amount of water in the area will be increased and by how much, he added.

The residents will have an opportunity to voice their opinions during a public hearing concerning this project, according to Harris. At the hearing it will be decided what areas can have this new sewer system. These "service areas" will be chosen with the input of the residents, he said. Residents will also be informed of those maintenance areas where septic tanks will still be allowed to

dispose sewage. "Most residents in the Mission Canyon area are all for it," Joustice said. "This sewer service will mean they will no longer have sewage in their backyards."

Until the report can be re-evaluated and receive final approval of the Santa Barbara County Board of Supervisors, no action to correct the sewage problem in the Mission Canyon area can be taken. Bugh anticipates the recommended project will reach the supervisors within four to six weeks.

# S.B. United Way Grants

United Way of Santa Barbara County announced that applications for Priority Program Grants will be available Wednesday, Jan. 24, 1984 at a training session for applicants. Organizations interested in applying for these one year grants should attend this informational session being held from 2-4 p.m. at the United Way office, 414 Cota St., Santa Barbara.

This funding program, in its fourth year, expands United Way's ability to reach and help as many people as possible in the South Coast area. The grants are for the period from July 1 to June 30, 1985.

Any private, non-profit, incorporated South Coast agency is eligible to apply for grant funds, up to \$10,000, providing the agency has a program that meets a priority human service need on the South Coast.

More information is available from the United Way office. The deadline for return of the completed applications to the United Way office is 5 p.m. Feb. 29, 1984. For further information contact Harry Talbot, 965-8591, between the hours of 9 a.m. and 5 p.m. daily.

# 50 PROTESTERS ARRESTED

Chants of "Hell No We Won't Glow" and traditional protest songs floated through the air on Sunday as San Louis Obispo County Sheriff's officers herded 50 willing, but handcuffed, Diablo Nuclear Power Plant blockaders on a bus bound for the county jail.

An estimated 2500 "concerned citizens" participated in a two-mile peace walk from Avila Beach to the plant's main gates. During the peace walk, a group of children took time to leave a message for those walkers still to follow, (bottom right).

Upon arrival at the gates, 50 of the demonstrators trespassed on to the plant's property, while the remaining protesters supported their actions from behind a line of crowd-controlling California Highway Patrol officers.

Isla Vistan Jonathan Steinberg waves to his own Santa Barbara cheering section as sheriff's officers prepare him for a mug shot, (far right). An officer tried to coax a smile, but Stacia Liamarch, 11, maintained her serious composure throughout the "arresting" procedure, (right).

1-4 In PCAA Play

# Gauchos Drop Game To Aggies

By PHIL HAMPTON  
Assistant Sports Editor  
Basketball is, and always will be, a thinking man's game.

The UCSB Runnin' Gauchos found out the hard way that if a team doesn't maintain mental toughness for the full 40 minutes which compose a game, it could cost them a few points (not to mention a victory).

The Aggies from New Mexico State taught the visiting Gauchos this valuable lesson as they dropped UCSB 74-59 Monday night in the Pan America Center in Las Cruces, New Mexico.

With the loss the Gauchos fell to 1-4 in PCAA action and 6-8 overall.

Poor shooting again spelled defeat for the Gauchos as they made only 39 percent of their shots from the floor. UCSB has yet to shoot over 50 percent in a conference outing.

Rather than poor shot selection or an intimidating defense, the less-than-pretty shooting effort, according to UCSB's Assistant Coach Tom McCollom, resulted from "a lack of concentration."

"We were getting open shots," McCollom insisted. But for one reason or another, they just wouldn't fall. "We even had uncontested shots go over the glass," he added.

McCollom was able to sum up the Gauchos' problem more precisely when he said, "We're so concerned as a team with getting the good shot ... we're turning what should be a habit into a thought process."

McCollom explained the UCSB players need to look at the basket as soon as they receive a pass and look to shoot first rather than searching for alternatives. In short, the Gaucho offense remains tentative.

UCSB trailed by only one point at intermission, 31-30. But the Aggies, led by Steve Colter who scored a game-high 20 points, shot at a 69 percent clip in the second half and pulled away from the icy Gauchos.

McCollom said New Mexico shot uncharacteristically well from the perimeter and cited this performance as the game's deciding factor.

He was, however, quick to mention the Gauchos' missed layins as a major contributing factor to the loss.

Ah, but there is a bright side. "We feel good about getting the ball inside" so often, said McCollom. "... especially since their coach said it was their (the Aggies') best defensive effort of the season."

The Gauchos themselves

will need a super defensive effort when they travel to Fullerton State University to face Leon Wood and his fellow Titans on Saturday night.

Wood set a NCAA national assist record last season. He averaged 11 assists a contest while collecting a number of

All-America honors at point guard.

McCollom said, "He is at his best when he is allowed to step inside the defense to create a 5-4 situation."

Thus, UCSB hopes to keep Wood on the perimeter where he cannot penetrate and create openings. "We

want to make him launch it (the long perimeter jumper)," McCollom said.

Fullerton coach George McQuarn will undoubtedly counter with a scheme of his own. But UCSB Head Coach Jerry Pimm and McCollom will have the Gauchos ready for anything.

McCollom said the difficult assignment of guarding the elusive Wood will probably go to senior guard Tony Hopkins.

The Gauchos will return home to the ECen on Thursday Jan. 28, when the Rebels of the University of Nevada, Las Vegas come to meet the Gauchos.

**Men's Swimming**

**Gaucha Tide Rolls Over Rebels**

By DAVE COOL  
Nexus Sports Writer

The University of Nevada, Las Vegas came into last Saturday's PCAA swim meet against UCSB as decided underdogs; when the meet was over they left decided losers as the Gauchos' romped their way to a 78-35 victory.

UNLV began the meet on a positive note by winning the 400-yard medley relay. From that point on all the Rebels could muster were two more individual victories in the 50 and 100-yard freestyles, both by Paul Carroll.

The Gauchos took 10 out of a possible 13 events, yet only had one double winner, that being Sean Daily. Daily's times of 9:27.56 in the 1,000 free and 4:35.88 in the 500 free were two of many great swims turned in by UCSB.

Ken Tittle took his 200-yard butterfly race out in a blistering pace and was able to hold off UNLV's Sadri Ozun at the finish to post a quick midseason time of 1:54.48.

Talented backstroke Steve Hatch took an early lead in the 200-yard breaststroke, then never looked back as he destroyed UNLV's Pablo Newallo with a 2:07.1.

The diving competition was dominated by UCSB's Hans Hanson and Bob Lang as they traded victories in the one-meter and three-meter springboard events. Lang's total on

the three-meter was a scant 20 points off the NCAA qualifying standard.

UNLV's top swimmer, Tim Dobias, missed the meet due to illness, though he most likely would have proved little more than a nuisance for the Gauchos. Dobias, last years conference champion in the 200-yard Individual Medley and NCAA All-America, would have had a very difficult time hanging with Sophomore Mike Carpenter's 1:56.02 in the 200 I.M. Carpenter's swim was perhaps the finest of the day.

Gaucha Head Coach Bernie Stenson was "pleasantly surprised" with his team's performance.

"That was our best meet since we swam Santa Barbara Swim Club early on," Stenson said. "I wasn't expecting times quite this fast this early in the season. Our goal now is to keep this quality of swimming right through the PCAA's."

Other winners for the Gauchos included freshman Mike Shaffer in the 200 free (1:43.90), he was barely able to hold off teammate John Boegman (1:43.95). Freshman Craig Hopps was also victorious in the 200 backstroke (1:58.61).

UCSB travels north this coming weekend to take on powerhouse Stanford on Friday and Cal on Saturday.

**ATHLETES OF THE WEEK**

**Sean Fallowfield**

This week the UCSB "Athletes Of The Week" come from two very different sports, volleyball and swimming.

The male athlete who is being honored this week is Sean Fallowfield, a junior outside hitter on the nationally ranked UCSB men's volleyball team.

In last Saturday's home opener for the Gauchos, Sean was a big part of the victory over the University of Victoria. In the match Fallowfield had a team-leading 21 kills in 43 attempts, for a percentage of .302. In addition he had a service ace, and was an important part of the Gauchos' blocking in the match.

**Cynthia Zutter**

The female athlete being honored this week is Cynthia Zutter, a freshman backstroke from Canada on the women's swim team.

In two meets last weekend Zutter scored six individual event victories to boost the Gauchos' team scoring. On Friday against San Diego State she won both the 100 and 200-yard backstroke races as well as the 500-yard freestyle. On Saturday against the University of San Diego and Utah State she again won the two backstroke races, as well as the 1,000-yard freestyle.

**Mustang Convoy**

The ROTC and Athletic Departments at UCSB are sponsoring the first annual UCSB ROTC Mustang Convoy Day on Jan. 29, 1984. It will serve as a promotion for "the Runnin' Gauchos" basketball team.

Mustang convertibles, any year (however, 64s, 65s and 66s are the most desirable) are needed to carry distinguished leaders of the university, the booster club and members of the Athletic and Military Science Departments. All Mustang convertible owners who are chosen will be provided free tickets to the regionally televised game against U.C. Irvine, and free parking and full use of the Founder's Room at the Events Center.

Military Science Department Chair Alex Woods of the is the point of contact. Woods said, "We want to make this an annual community affair; and what could be better in January than a convertible ride in the sun." If you have questions or wish to participate, contact him at 961-3042/3058.
