Former Congressman Michael Huffington smokes a huge doobie of green skunkweed at a rally Friday for hemp legalization. He was subsequently arrested by campus police.

Huffington Serves Time in UCSB Prison After Puffing Tons; Wife Bails Him Out

By A.J. DeNoser
Staff Toker

Former Congressman Michael Huffington was arrested by campus police Friday after burning a citation for marijuana possession at a hemp legalization rally in Storke Plaza. He was released after his wife paid lots of money.

Huffington, still on probation for offensive behavior following the November 1994 election, was cited minutes after lighting a marijuana cigarette and puffing on it in front of hundreds who had gathered in support of the con-

traband weed.

"Hey, it's a plant. How can they make a plant illegal?" Huffington said after the citation was issued. "Let's show them how we think of their laws ... well, come on everybody, spark up!" He then used the burning ticket to light another joint and was arrested.

"We usually try to be pretty lenient at these things — freedom of speech and all that — but this was flagrant and we had to do something," said campus Police Chief John MacPherson. "Dear God, he had a bong the size of a grain silo!"

Huffington said he stood by

his actions and would continue the fight for legalization of the green goodness.

"Unlike our esteemed president, I actually had the courage to inhale," he said. "The pigs just don't understand. If you had a wife like Arianna, you'd light up every night, too."

After posting her husband's bail, Arianna Huffington claimed partial responsibility for the incident, but emphasized the positive attributes of cannabis.

"Mike went through a very difficult period after losing the Senate bid to that [expletive]

Chamberlin Wins Vote in 3rd District Election

■ Lame Duck Wallace Refuses to Give Up Seat

By Zen Ruenarangs
Staff Whiner

Santa Ynez rancher Willy Chamberlin was declared Santa Barbara County 3rd District supervisor Sunday with 51.6 percent of the vote, but a recount and impassioned objections from political rivals are threatening his acquisition of the post.

Chamberlin will assume the seat in January, provided he prevails in a possible recount and current Supervisor Bill Wallace unchains himself from his desk

in the county administration office.

"You can't make me leave!" Wallace cried hours after hearing the results. "I haven't served 19 years to watch that cattle man step in and pave over all my work — recount! Recount!"

Because Chamberlin's vote tally just exceeds the majority needed for outright victory, a recount could force a November run-off between the rancher and his closest contender, Gail Marshall, who garnered 24.7 percent

Chancellor Explodes With Uncharacteristic Emotions

By Milt Loomy
Staff Writer

A peaceful student-faculty luncheon turned ugly Sunday when Chancellor Henry T. Yang launched into an unexpected tirade criticizing students, faculty and staff.

Yang, known for his carefully measured statements and caution in addressing controversial issues, ripped Associated Students President Leo Treyzon as a "greedy opportunist" and denounced faculty members as "pencil-pushing, do-nothing leeches."

"So everyone wants to come to another god-awful function and feel good about themselves," said the embittered chancellor. "I am sick to hell of the students, faculty and staff of

this university. Faculty research? What — the platypus? Student interests? They'd be taking a step forward if they were interested in anything beyond beer and that show, um, *Beavis and Asshead*."

"Where are the perks of this job?" he asked as wife Dilling nodded approvingly. "The dental plan sucks, and every year you ship me to hellholes like Garden Grove and Fresno to recruit more spoiled brats. You know what, I am sick to hell of every one of you."

Yang had particularly harsh criticism for student leaders in attendance, who he said were in government only to get their tuition paid free and pad their resumes. A visibly shaken Treyzon said he was taken aback by the

Mobil Has New Hopes for Oil Rig Near Residence Hall

By Melba laChil
Kite Flyer

Still hoping for a chance to tap offshore oil reserves from a land-based site along the Isla Vista coastline, Mobil Oil Corp. unveiled a new project Friday, dubbed Spillview.

The project, similar to the recently scrapped Clearview development, would be located behind San Nicolas Residence Hall, near the campus lagoon, according to Shauna Clarke, Mobil public affairs adviser.

As with Clearview, the new project would use a 175-foot-tall drill rig to tap offshore oil reserves currently accessed by the company's Platform Holly, which would be dismantled if Spillview is approved.

Critics were quick to attack the project, calling it another attempt by developers to exploit the local environment.

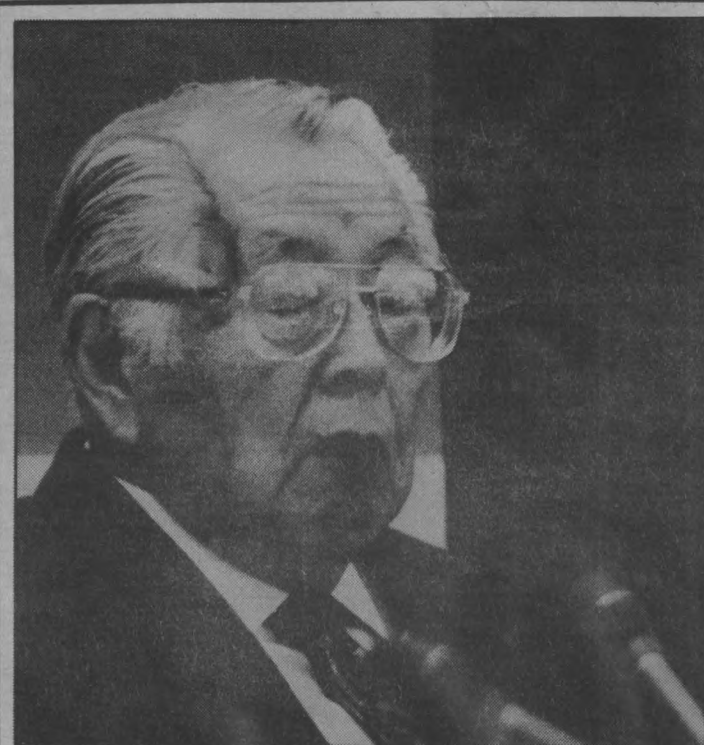

"It looks like Clearview, it sounds like Clearview and it stinks like Clearview. This is just Clearview with a new name. I don't know what kind of shit Mobil's trying to pull, but it sounds like someone over there has been smoking too much crack," said recent graduate Brent Foster during a break from monitoring native grass disturbances.

Foster said plans are already set to bring Toad the Wet Sprocket on campus for a benefit show to raise opposition to Spillview.

Mobil concedes there are similarities between the two projects, but insists Spillview is a worthwhile pursuit, according to Clarke.

"We admit, it is an identical project, but we changed the name because of the negative connotations associated with

FLATLINERS

Kato, Clinton Square Off in Campaign

LOS ANGELES (AP) — President Clinton received a surprise challenge for the Democratic presidential nomination Monday when O.J. Simpson trial figure Brian "Kato" Kaelin announced his leap into the race.

Kaelin's decision to vie for the Democratic nomination comes as an unexpected nuance in a campaign which had previously been viewed as an one-man race to the 1996 campaign.

"I thought that, like, if Clinton was, like, trying to get the president job or something, I might as well go for it, you know what I mean?" Kaelin stated early Monday.

Speaking from his own personal tanning bed in Hollywood, Kato removed his ultraviolet shades long enough to enumerate his presidential qualifications.

"Hey, man, I was the vice treasurer of my high school surf club a few years back, at least until I started breaking into the

bank to get money to impress the babes," he said. "And hey, like, I can do the international relations thing. Tijuana and Cabo are my, like, second homes. Entienden, com-padre dudes?"

Clinton initially expressed bemusement at the notion that a challenger such as Kaelin could

however, faded upon learning that Kato had called him an "old cracker" and not only vowed to replace him in the White House, but to "snag that fox Hillary" — referring to first lady Hillary Rodham Clinton, who, Kaelin proclaimed to reporters, "needs a real man, not some beached whale

as president, nothing will ever get done *except* his hair. And as for his coveting members of my family, not even [Clinton family cat] Socks would have him."

Those jockeying for the Republican nomination ridiculed both Kaelin and Clinton, vowing victory in November.

"Those two liberal homosexual wannabes deserve each other," stated commentator Pat Buchanan as he left Bible study Monday. "Leave the presidency to good, decent, compassionate folks such as myself."

"You know, I can't tell them apart," remarked GOP contender Bob Dole.

The source of Kaelin's celebrity, O.J. Simpson, was eager to share his thoughts on the campaign with reporters.

"I didn't do it!" he said from his suite at the La Costa Spa and Resort. "I'm busy right now trying to find the real killers and bring them to justice. Nicole, I love you!"

NATION

You know, I can't tell them apart.

Bob Dole
Senate majority leader
GOP presidential contender

present a serious threat to his campaign.

"If he wants to challenge me, I say go for it," Clinton told reporters during breakfast at McDonald's. "He seemed to do well enough on television, although I doubt he can play the saxophone the way I did for Arsenio last time around."

Clinton's good humor,

of a washed-up old man."

"I completely resent that remark," Clinton retorted through a mouthful of Big Mac and french fries on his two-hour lunch break. "Let's see if that bleached-out pretty boy is still around in a year."

"And besides, you think that I spent a long time on the runway in L.A. getting my hair done? With Kato

Berkeley Docs Make Der Fuhrer's Clone Reality

BERKELEY (AP) — Two University of California scientists believe their three-year efforts have finally paid off, and that they now have the resour-

ces to create a living, breathing Hitler clone.

Geneticists Emile Schapphausen and Helmut van Bulow beamed at a press conference Friday as they unveiled their prototype for the clone.

"This is an accomplishment unmatched by anything since the 1940s," said van Bulow. "We are carrying out the kind of research that has always

been called for by the UC's master race ... I mean master plan."

Opponents to the program from across the academic spectrum have peppered the plan with criticisms, calling it "unnecessary" and "possibly the worst idea of all time."

"I'm not sure exactly what the purpose of a living, breathing Hitler clone would be," said Harvard biologist Lyndon Mamet. "But it would be unfair to pass judgment on the scientists' research before we see their results."

Adolf Hitler, leader of Germany's Third Reich, was arguably the most evil human being of all time. In his megalomaniacal quest for power, Hitler tore Europe apart and killed millions before committing suicide more than 50 years

ago.

The study continues a Berkeley tradition of supporting what some call socially irredeemable research: Two Berkeley scientists wrote *The Bell Curve*, a book claiming blacks are stupider than whites, and a Berkeley professor is responsible for a theory that claims irresponsible use of hard drugs — predominantly by homosexuals — is the cause of AIDS.

Schapphausen said he disagreed with academics and reporters at the press conference who suggested public enthusiasm may be low at the prospect of a new, 1990s Hitler.

"Fools, can't you see? This research is vital to the survival of the great white ... um, piles of paper that will document our efforts

for posterity," he said.

The geneticists are developing the clone from samples discovered in the basement of failed Republican presidential contender Pat Buchanan's Virginia home. Buchanan said he did not know what the dictator's cells were doing there, but wished the scientists luck on their efforts.

Buchanan's remarks immediately fueled Washington pundits' speculation that the columnist might select the clone as a running mate if he seeks an independent bid for the presidency.

"Berkeley and Buchanan will restore America to the xenophobic, militia-obsessed nation our founding fathers intended," said a source close to the campaign.

Charles Calls Diana Royal Faker in Their Sexual Life

LONDON (AP) — Never had it, never will. Or, at least, that's what Prince Charles is saying about his soon-to-be ex-wife, Diana.

The heir to England's royal throne told members of the press Saturday that

during the 11 years of living together as man and wife, Princess Diana never once experienced orgasm during sexual relations.

"She'd thrash and moan and groan and grab onto my ears," he told the shocked crowd of reporters, "but the entire time she was just pretending. A man knows, you see."

"Now Camilla, there's a real woman," he continued, referring to long-time flame Camilla Parker-Bowles. "When we con-

summated our love, it's so genuine that we've drowned out Big Ben on occasion."

The princess, whose passionate extramarital affairs have been splashed across the covers of publications from *Time* magazine to the *National Enquirer*, expressed contempt for her husband's public revelations.

"All I have to say is, what kind of a man would brag to the public about being unable to satisfy his wife?" she stated. "Camilla can have him."

"And of course I grabbed onto his ears," she added. "They're far larger and more sexually stimulating than any of his other vital organs."

The queen mother supported her son in his claims.

"I always knew Diana was a cold fish," she said. "My son is a sex machine, and I'd have at him myself if we weren't related."

This Story Says Absolutely Nothing, Its Headline Reads

DAILY NIHILIST OFFICE (AP) — Most readers are rather slow to realize that an official-looking article actually isn't, a story in the *Daily Nihilist* April Fool's Day issue proved Monday.

If presented in tradi-

tional Associated Press news format, officials stated, a story written about nothing whatsoever will nonetheless be taken seriously.

"I can't believe it's not butter," exclaimed one incredulous reader.

Including seemingly genuine quotes from sources presented as reliable will assist in the deception, experts noted.

"Even if the statements are completely falsified, they will still often be per-

ceived as valid," said Professor Ima Fakename of It-dontexist University. "Usage of overly complicated phraseology in the description of the issue under discussion will additionally obfuscate the reading material, thus enhancing the perceived expertise of the orator who is engaging in narration of the given verbiage."

"Reading audiences look for familiar patterns, and not necessarily for the text within those patterns," said Dr. Beavis de-Butthead of This Sucks Medical Center in Wherever-the-Hell, Ill. "They tend to lend an almost reverent credence to the media source and often follow any instructions it issues."

All agreed that blank, signed checks should be made out to the *Daily Nihilist* and sent immediately to U.R. Gullible, P.O. Box 000.0, Nowheresville, CA 000000.

Book Claims Gov. Wilson Shot JFK

■ Acuña, Thoreen Discuss Theories

By Loyo Limmit
Sift Writer

Cal State University Northridge Professor Rudy Acuña and Associated Students Internal Vice President Bo Thoreen are on top of the world.

Acuña bested the University of California in October when an eight-member jury concluded that UCSB had practiced age discrimination against him when it turned him down for a senior professorship in 1990. And Thoreen has just broken a world record by being arrested eight times at a single regents' meeting.

We caught up with these two outspoken cult heroes to talk not only about these accomplishments but also about their new book, *Oh No, Man. You've Really Got It Wrong. The Real Story Behind the JFK Assassination.*

The Acuña-Thoreen team has cooked up what critics are calling the authoritative work on the assassination. The book claims President Kennedy was killed by Gov. Pete Wilson.

Nihilist: Dr. Acuña, no one can question your conspiracy theorist credentials—for the last six years you have blamed the UC for an elaborate

Nihilist File Photo

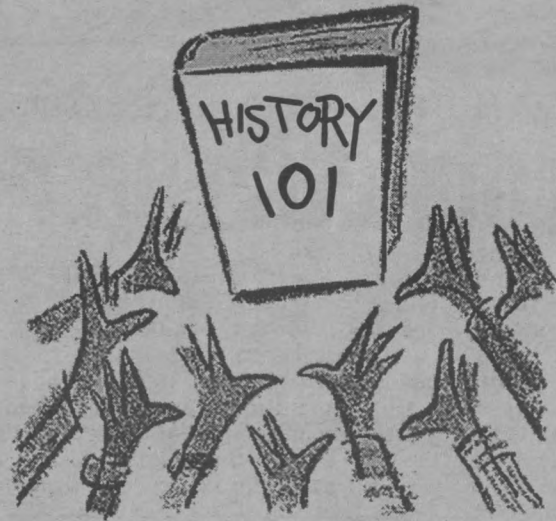

A controversial new book claims this photo of tough ex-Marine Gov. Pete Wilson proves he shot JFK.

plot to keep you off the UCSB campus. But why take on the JFK assassination?

Acuña: With the new information Bo and I have uncovered, I think it is my duty to publish this text. The work will finally ex-

plain what really happened. Also, the UC will feel lame when they see how much money I collect from this book and that they can't build some kind of pseudo-class around it,

IVRPD Is in Charge After One-Day Siege

By B. Fraj Fex
Spunk Writer

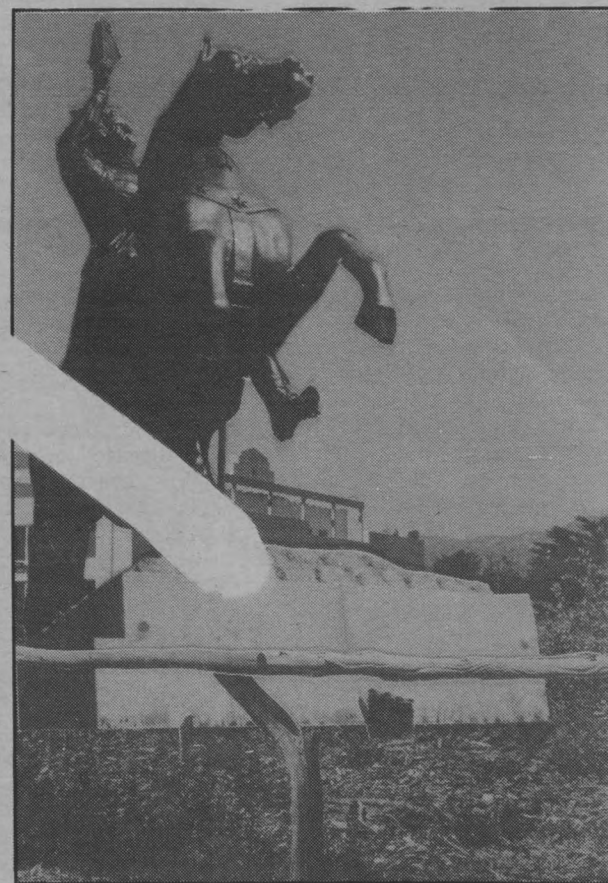

The Isla Vista Recreation and Park District finally came together behind a common goal — taking over I.V.

The five IVRPD directors, who bitterly disagree on nearly every issue, united Sunday under a banner of pride, greed and ambition. They declared martial law in I.V. and captured the seaside town after a brief struggle.

"We whine and squabble like 5-year-olds every meeting — and for what? A park district is small potatoes," said Brad Hufschmid, new secretary of state. "Now when we whine for hours, people have to care."

At 7 a.m. Sunday, Secretary of War Roger Lagerquist breached the outer wall of the I.V. Foot Patrol office with the district's tractor, waking the three deputies inside. Army Cmdr. Brenton Kelly and Navy Cmdr. Derek Johnson quickly impaled the officers with vertical mowers.

The IVRPD commandos then swept through the community, subduing I.V. in dramatic fashion. The few students who remained in town during

Spring Break were overjoyed at the destruction of the Foot Patrol and welcomed the conquistadores.

"Duuuude," said seventh-year senior communications major Archi Cianfrocco. "Duuuude."

By 9 a.m., the district's 18 high-priced lawyers had obliterated Santa Barbara County's legal objections, and dissenters Diane Conn and Ken Warfield had been declared public enemies and taken into custody. I.V. belonged to the IVRPD.

Supreme High Commander Pegeen Soutar will lead the new republic. In her first act as high commander, Soutar had every I.V. street, sidewalk and parking lot torn up and replaced with native grasses from local vendor Dougal House.

"Cars and carnivores are hereby banned from Isla Vista," she said. "Everyone now has to be nice to one another — no foul language — and you don't have to speak at

British Beef Causes Campus Brain Deterioration

By Remy Tawin
Times Wine Critic

County health officials are blaming an outbreak of the so-called "mad cow disease" for a rash of illnesses that struck Francisco Torres residents last month.

The disease, formally known as bovine spongiform encephalopathy, has made headlines across the globe since British health experts disclosed that 10

people have died from eating infected cows.

The malady kills victims over several years by tearing holes in their brain tissue, a symptom of the disease that slowed the investigation.

"We weren't sure whether the holes in the brains of some F.T. residents were caused by 'mad cow disease' or simply smoking an excess of clove cigarettes," said Santa Barbara County Health Inspector Alan Chovril.

"Apparently, a lot of the kids in there smoke them to cope with their dreary living environment."

Officials originally blamed an outbreak that had afflicted nearly 30 F.T. residents on food poisoning from eating in the residence hall's cafeteria. But the discovery of tainted beef forced them to change their minds, according to Chovril.

"After investigating the apparent food poisoning incident last February, we

discovered a load of beef product hidden in F.T.'s basement," he said. "It turned out to be from Britain, which, as far as I'm concerned, means 'mad cow.'"

In an attempt to cut costs and still provide satisfying meals, F.T.'s kitchen staff purchased British beef with slightly expired "sell by" dates, according to Francisco Torres General Manager Kent

Creole Language, Culture and Society

Black Studies 191DD

MW 3:30-4:45pm, Girvetz 1116

This course will focus on the meaning, history and development of the notion of "creolization" or hybridity in race, language and society; and in particular its relevance to black communities in the Americas. Some of the main geographic areas to be examined will include the U.S. (e.g. Louisiana; the Sea Islands of South Carolina, Georgia), various parts of the Caribbean, and Latin America.

In addition to class readings, students will have the opportunity to carry out research on a topic of their choice.

All class levels* and majors are welcome.

Professor Martha Swearingen Davis

*permission of instructor required for lower division students

NEW COURSE – SPRING '96

Intro to Afro-Latin American Studies

Black Studies 193Z

Thurs 3-5:50pm, SH 3631 (Seminar room)

This course will focus on the social and cultural history of various black communities in Latin America. It is designed to explore an overlapping area within Latin American and Black Studies.

We will begin with a general discussion of early (15th century) Iberian society, followed by an examination of African slavery in the Spanish/Portuguese colonies of "the New World", and note surviving black settlements in Latin America during the post-slavery period. The latter part of the course will concentrate on the status of such groups today and examine national policy that might address their continued presence.

Class readings will be in English, but a basic knowledge of Spanish or Portuguese would be helpful for individual research.

"Huh?"

Rise Up in Support of Apathy ... or Not

Editorial

To our dismay, we recently heard vicious rumors of the menacing onslaught of an anti-apathy campaign. This movement is violently targeted at UCSB students. We have heard such ominous statements sweeping this impressionable campus as: "Work hard," "Do your best," "Stand up and blah blah blah" and, worst of all, the infamous "Graduate!" We are not going to stand for it. Instead, we are going to SIT for it!

Where will you all be in 500 years? We know exactly where you'll be, because we've spent years on the couch with a big bag of Doritos contemplating the very nature of procrastination. We have created the ultimate justification for laziness: We are all going to die, so nothing really matters! In the immortal words of our prophet, Jeff Spicoli, "We're all gonna croak anyway, dude!"

Why should we break a sweat doing such strenuous tasks as getting out to vote, making it to class or getting out of bed, for that matter? Why should we worry about petty issues like war and the crashing environment? Fretting about these will make us die sooner because experts have proven that stress causes heart attacks. Besides, it's hard enough sitting around debating whether to visit Wendy's or Panda Express!

In response to these dangerous threats of motivation and determination plaguing our school, we have selflessly decided to make our university better by sacrificing our afternoon television time to sponsor Apathy Awareness Week. Our motto is "We don't care, DAMMIT!" We will be distributing buttons in Storke Plaza reading: "I don't give a hoot" and "Huh?". We need volunteers to wake us up so we can make it out to the plaza before 2 p.m. Get off your lazy butts and SUPPORT APATHY!! We need

your help.

We will be out there next Monday! Well ... maybe the day after that. Uhhhh ... we'll definitely be there by the end of the quarter. Uhhh ... we'll definitely THINK about being there by the end of the quarter. Actually, as long as we've typed this editorial, we feel we have dedicated enough of our energy to the cause.

In fact, we are undermining our very purpose by moving 31 feet from the television to the computer and missing the last 15 minutes of *Dukes of Hazzard* rerun number 85 to type this message. THAT, my friends, is how dedicated we are to this noble cause.

There still remains a couple of inches in this space which we could use excess cerebral activity to fill, but why bother? You got our point. In fact, we probably could have just summed this up in three words. We couldn't say it any better than this: WE DON'T CARE!!!

Doonesbury

BY GARRY TRUDEAU

Screamin' Readers

What's

Editor, Daily Nihilist:

Treyzon (Daily Nihilist, "Flip Me Like the Waffle I Am," March 28), in response to the letters by B. Thoreen (Daily Nihilist, "Hey Leo, Come Kiss My A.S.," March 27) and (Daily Nihilist, "I'll Kick Your Weenie Butt," March 27) and (Daily Nihilist, "Watch Me Utter Classic Quotes," March 26), in response to the letter by E. O'Brien (Daily Nihilist, "I'm Really Angry This Time!," March 24).

I completely concur with the point that was originally made on the subject of dispute.

I'm not really sure what that actually was, but I agree with it completely.

ROBERTO SHILO JONES

That

Editor, Daily Nihilist:

On behalf of the Cheese Manufacturers of America, I would like to express our discontent with the negative reputation given our product by the public at large.

How many times have you heard the phrases "That's cheesy" or "How cheeseball" tossed about casually and lightheartedly, as though they do not affect anybody? Perhaps you yourself have even been a perpetrator of such phraseology. In any event, we as a society seem to have forgotten the value of cheese in our daily diet. Where has our respect for this vital dairy product disappeared to?

From Bessie the cow to us and finally to you, the consumers, cheese is a good, wholesome food undeserving of the ridicule it has received of late. Its essence cannot be underestimated; just let the

names slip off your tongue and you'll know what we mean. Romano, muenster, cheddar, provolone, limburger ... the list goes on and on.

Call it what you will: *queso*, *fromage* or simply the well-known and well-loved "cheese," but for heaven's sake, don't use it as a means for insult. Let's ditch the "cheesy" comments and give new life to an old friend.

Cheese is more than just a delicious snack or an important part of everyone's diet. From the holey Swiss cheese to the good old American variety, this cheese was made for you and me.

RICOTTA FETA diBRIE

Smell?

Editor, Daily Nihilist:

I am wrtign to express my disfusst with the editors of the *Daily Nihlist*. In my recent letter ("Bring Back Barbara Uehling," Marc. 25, Daily Nihlist,) I presented my argument properly succunctly thrigtally and frugally It was wll structured and whould no doubt have brought anyone who was knot of the mind that my arguement was correcte to see the light. but when it was finnally published in the paper, there had been several altertations to my text. Who do you bastadrns think you are to dare to altermy work/ Several of sentatnces mine were put in a different order, did you that think it would make more sense that way? When I in sent my letrter, I was cetrain to spell chenk it previouosle, yet several words were spelledl differenetly from how I submittted it. By messing with my letter, you changeed the entire ourlook from the shining jewel that I had envisionsed and make it soemthing that was no longer truecely mine. Howdareyou! I for one will never wrtie another letter to your parper and you will without be of my pearls of wizrdom in da future. My letter about Ms. Uehling will be the last thing of mine printed in the *Daily Nihlist* for all time and i appoologize to all my lowly readrs who wait for my leardership. Goodby.

CASANDRA KNOWLESS

It's the Cheese!

Say, Do You Hear That Sucking Sound Too?

Horace MacClueless

Hello. My name is Professor Horace MacClueless. I am the professor emeritus maximus signus for the Physics Dept. on campus.

As you no doubt read the reports as described within the *Daily Nihilist* recently, we had a bit of an accident the other day (*Daily Nihilist*, "Physics Building Gone, Only Smoking Pit Remains, Barbecue Scheduled," March 27). In an effort to apologize to the campus at large and explain the possible side effects that forces released may have upon the population, I have penned this column. I would like to stress again that the phenom-

ound the density point and therefore left the building. As far as we can tell, it took some time off and was last seen catching some rays on Sands Beach.

Needless to say, without the surrounding field to control it, the density point grew out of control until the chain reaction forced the effect to eventually shatter into untold fragments, taking a large part of the lab and several undergraduate technicians with it. Thankfully, no damage or loss of life occurred which could not easily be replaced. However, the explosion

black holes that have been released apparently attract and consume time.

These time-sucking black holes do have noticeable characteristics that all should be on the watch for. For some unknown reason, these black holes appear to be attracted to certain inanimate objects, including television sets, refrigerators, computers, six-packs of beer and marijuana paraphernalia. We are not sure why this has happened, but we warn everyone to be wary of the hideous effects that can occur when a black hole comes into

gone bad, it may be due to the effects of a time-sucking black hole. For some unknown reason, milk and dairy products seem to be extremely susceptible to this phenomenon, while frozen foods remain impervious.

Computers are also likely time-sucking targets, especially when used in tandem with the Internet or World Wide Web phenomena. If you find that you have continually lost sleep or have spent an entire night playing upon the "net," your computer could be a breeding ground for time-sucking black holes.

please take the appropriate precautions.

We recommend purchasing only canned or frozen foods to be stored in your kitchen. "Living on Ramen" is also an acceptable substitute. When planning to watch television, make sure that you choose a channel that will broadcast several consecutive hours of decent or semi-decent programming. Barring that, be sure to remove the batteries from your remote control, which seems to have the effect of shocking some viewers out of the time warp when they realize they have been watching tampon commercials for several minutes and actually enjoying them.

As for computers and drug/alcohol products, no known re-

medy is available. These time-sucking phenomena are not necessarily life-threatening (unless one climbs inside their refrigerator). However, they can seriously affect your academic career. We urge you to use caution when approaching these items or you can run the risk of one day waking up and realizing that you are about to graduate, not knowing what the hell happened to your entire college experience.

Of course, that often happens in any case, so what's the difference? *Horace MacClueless is some professor dude.*

The Occasional Adventures of Soberman
by Robertson

CANNY TEACH/Daily Nihilist

on was completely contained and that there is no serious danger to anyone in the area (of course, one should seek medical attention if one becomes ill or begins vomiting).

As you have no doubt heard by now, we were conducting an experiment with space-time theory concentrating on the idea that if a subject is enjoying themselves at a task, that the passage of temporal forces will significantly increase in force, multiplying to a higher rate of spatial length.

It was while we were conducting this experiment into why time flies when you are having fun that the incident occurred. Our containment field around the time fluxuating/sucking density point decided, for reasons that we have yet to determine, that it no longer wished to remain ar-

did apparently scatter small portions of the density point effect across the campus, Isla Vista and the surrounding environs. We ask you to remain on guard for the possibility of coming into contact with these fragments.

These fragments cannot be seen as they are microscopic and have no actual mass. They are essentially mini-black holes and are not visible to the naked eye. It is also important to note that these black holes do not attract and destroy solid matter as do the traditional black holes that we all know and love. Instead, these

contact with any of these objects. For example, if you sit down to watch a few minutes of television, then suddenly realize that you have watched several hours of useless programming drivel, such as *Baywatch Nights*, *Step by Step* or *Family Matters*, it may be due to a time-sucking black hole located in your television.

If you spend several of your hard-earned dollars buying grocery products to live on for the next several weeks of school, but then discover several days later that all the food placed in your refrigerator has mysteriously

As I am sure most of Isla Vista is intimately aware of the possibility of the loss of time associated with the use of alcohol and marijuana products, I will not go into detail regarding the subject.

We here at what is left of the Physics Dept. are working on solutions to the time-suckage problems occurring as a result of our recent mishap, but until we obtain viable results, we would like to make the following recommendations. If you feel that any of the items mentioned that you possess may be affected by these time-sucking black holes,

KaBoooooooooooooooooooooooooooooom!

Tick Rensoborn

Isla Vista is in trouble. Big trouble. Way big trouble. Oh, boy, is Isla Vista in trouble. Trouble besets the seaside community of Isla Vista. And what's more, there's a reason.

We all know that our beach-laden ghetto is the most densely populated square half-mile west of the mighty Mississippi. Because of the millions of residents who reside in this town, there's an average of .84 parking space available in the beach-laden ghetto on any given day.

What's more, those millions of residents are living in severely cramped conditions comparable to those in Squashtalonia, a minuscule island nation in the South Pacific that controls its overpopulation problems by celebrating Lemming Day.

So the question remains: How can we solve Isla Vista's overcrowding crisis, from which so many of our community's problems are born? Some may advocate following Squashtalonia's tradition and having an annual I.V. parade, concluded by a spirited march off the coastal bluffs and into the waters below. While this would eliminate many of the annoying naive freshmen who follow upperclassmen around everywhere anyway, it still leaves our town scarred by the thousands of ugly

duplexes existing on our city streets. So the solution is obvious — it's time to blow up the 6600 block of Isla Vista.

Now, this may seem somewhat extreme at first. But although this would entail mass carnage and destruction in our sleepy hamlet, think of all the good that would eventually come out of it.

For one thing, there would suddenly be enough parking spaces for not only every remaining Isla Vista resident, but all the cheap non-I.V. resident bastards who refuse to pay to park on campus and instead leave their cars in I.V. while attending classes. True, they'd have to hike a whole

not! If we suddenly had a giant field where ugly tract homes once were, all county ordinances currently imposed on us would be so muddled that we could bring kegs out every weekend and recreate Woodstock semi-legally! No more inconvenient fence-hopping or searching for a smeared address written on your hand eight beers ago!

What's more, we could make a great event out of this — Detonate I.V. Day. We could all dance and sing while we strew gunpowder and plastic explosives throughout the dilapidated houses that only our slumlords will miss. When the ex-

plosion occurs, we can all rejoice and yell in utter happiness. "Hooray for the bang! All hail the bang!"

As a side note, we may also want to blow up the Foot Patrol office on Pardall, which isn't in the 6600 block, but would be most effective in keeping away the heat during our celebrations. Afterward, we could all dine on the roasted pork within.

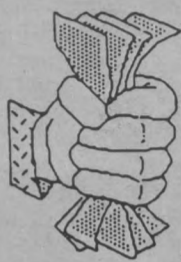

So join me in this cause, perhaps the most worthy of any before seen in Isla Vista. Let's finish off the work that our predecessors started when they torched the Bank of America a couple of decades ago. So what if we don't have a war to protest — it'll be one helluva bang!

Tick Rensoborn is missing several fingers from a firecracker accident.

PRESENTS
YOUR DAILY HOROSCOPE
 BY LINDA C. BLACK

- ★ **Aries (March 21-April 19).** Don't argue with the Quality Control inspector today. Instead, thank him or her for helping you improve your work. That may not be easy, but it sure would be impressive. Tonight, buy something nice for the one you love.
- ★ **Taurus (April 20-May 20).** You're under pressure, but you're up for it. You can do the work and have time left over. Pick up a few travel brochures today. Tonight, go over them with your sweetheart. You can make the vacation of your dreams a reality.
- ★ **Gemini (May 21-June 21).** You're likely to get some constructive criticism today. If your house needs cleaning, beware. And don't spend all day talking to your friends and neglect your work. Tonight, go along with your roommate's request.
- ★ **Cancer (June 22-July 22).** Discuss a career problem with a neighbor today. He or she won't have the answer, but may spur you to face something you've been avoiding. Your mate can teach you a valuable lesson tonight, and vice versa.
- ★ **Leo (July 23-Aug. 22).** Find ways to bring more money into your account today. Work smarter and more imaginatively. An older woman who loves you is also a good source of financial advice. Tonight, call her up and ask for some. You can speak freely.
- ★ **Virgo (Aug. 23-Sept. 22).** Finances — perhaps someone else's — are a source of stress today. It might be the other person who's worried. Try to keep it that way. Your common sense is working well right now, so use it. Tonight, relax.
- ★ **Libra (Sept. 23-Oct. 23).** Do everything perfectly today, even if it takes longer. Go through your stack of paperwork as well. Something you've forgotten is in there. Stay home tonight and have an enthusiastic discussion with your mate.
- ★ **Scorpio (Oct. 24-Nov. 21).** You can get people to do what you want today — at least some of them. Your influence is strongest in a group setting. Learn a new skill by watching an expert. This could help you beat out the competition.
- ★ **Sagittarius (Nov. 22-Dec. 21).** Your energy will be scattered today. Focus hard on your career to make a good impression on a critical observer. You'll have plenty of time for romance tonight and later in the week, so cool it during the day.
- ★ **Capricorn (Dec. 22-Jan. 19).** A long-distance contact brings you luck this morning. Check out a healthy yet exotic restaurant for lunch. Stay home tonight and take care of somebody else's problem. Your common sense is dearly needed, so share it.
- ★ **Aquarius (Jan. 20-Feb. 18).** Balance your checkbook and pay your bills today. Budget enough for a new educational program you've been thinking about. You need to get start learning how to make more money, immediately. Tonight, stay home and snuggle with your best friend.
- ★ **Pisces (Feb. 19-March 20).** Today would be marvelous, if you just had enough to buy everything you want. Get a thrifty friend — a Virgo or Taurus — to help you stick to your budget. A Capricorn can help you find ways to make more money, so consult someone from that sign, too.
- ★ **Today's Birthday (April 1).** This year is about working hard and paying your dues. Don't complain; this could make you rich some day. Take action on a good idea now. Get engaged or married in May. Heed a loved one's advice about money then, too. Take it easy until September, when your workload increases. Take on a partner in September. Travel to wrap up loose ends in December. Accept a good job offer in January. Launch a new project with friends in February, and keep most of what you know to yourself in March.

I.V., 961-1700

Paul to Get Back to A Day in the Campus Life

By Tarzan Zeanad
 Ass Wriider

Though no longer a teen idol or huge rock star, former Beatle Paul McCartney has decided to stop touring, settle down in Isla Vista and attend UCSB to complete his dissertation in music theory.

"For a while, my life was misery," said the 54-year-old McCartney. "Ask me why. Do you want to know a secret? I've been wanting to complete my dissertation for a while, but couldn't decide where to attend. UCSB's the perfect place for me."

There's a place for McCartney in the Music Dept., according to Chair Brianne Epstein. She said it won't be long before UCSB will have an exclusive department dedicated solely to the works of the Beatles.

"We won't pass up an opportunity like this, not a second time," she said.

"We almost had Julian Lennon last winter, but he didn't like the taxman here, so now he's back in the U.S.S.R. With Paul, we can work it out."

While McCartney may have the clout of a celebrity, Epstein said the department's rigorous program will not be a magical mystery tour.

"It'll be a hard day's night for him because he hasn't been to school in so long, long, long," Epstein said. "Tell me why he wouldn't have a tough time. You can't buy me love or an easy grade in my program. You can't do that."

Echoing Epstein, Chancellor Henry T. Yang said he will not let it be and McCartney will have to run for his life while attending UCSB.

"I don't want to spoil the party, but he'll be working eight days a week until he finishes his dissertation," Yang said. "I talked to him yesterday

and I told him to act naturally and don't let me down. I've seen a lot of people here, there and everywhere in my life, and my advice for him is think for yourself."

"Besides," Yang added, "tomorrow never knows."

McCartney's dissertation will be challenging for many reasons, including the fact he can't read or write musical notation. But his musical literacy skills are getting better, according to McCartney's close friend, Michelle Maggie Mae.

"Paul told me, 'Girl, I'm fixing a hole in my life so when I'm 64, I can look back and say I accomplished my degree with hard work and a little help from my friends,'" Mae said.

Another challenge will be adjusting to I.V. after living in posh mansions on Blue Jay Way and Penny Lane. But McCartney says his wife, Linda, provides a lot of support.

"All you need is love, and with the two of us, baby, you're a rich man," McCartney said. "If my honey pie's heart were proportional to her love, she could say, 'I am the walrus of love!'"

On top of the new home and school, McCartney hopes to establish good relations with all the students, faculty and staff to help ease the transition.

"I've got a feeling that happiness is a warm gun and I.V. keggers — even if everybody's got something to hide except me and my monkey," he said. "Why don't we do it in the road all together now? Dig it?"

Epstein hopes her newest student will soon be flying on the long and winding road.

"I wish the best for him, but he's going to have to come together and do something because if not, then he'll have to carry that weight of not accomplishing what he wanted in the end," she said.

JUNTA

Continued from p.4
 meetings if you don't want to."

The regime is operating out of Mitch Stockton's house, since nearly every-

one involved in the takeover lives there already.

Cracks of tension are already appearing in the new government, however. Lagerquist has assumed control of the rumor mill and placed a statue of himself in Perfect Park, exalting his siege on the Foot

Patrol.

In addition, several west-end homeowners have seceded, fearing a tax increase and the possibility that the new nation might become a city. War with the breakaway republic is imminent.

Finally, Secretary of

Torture Bruce Murdock has counted 1,165 violations of the Ralph M. Brown Act, and in the most ominous sign of trouble to come, appointed eco-avenger Geoff Green is growing back his goat.

"Hey! I never thought it looked that bad!" he said.

YANG

Continued from p.1
chancellor's rage.

"This, this is not the Yang I know. This is a mean, cruel Yang. This is a bad Yang," said Treyzon, who said he organized the gathering to foster openness between students and faculty. "I just, I, I just don't know how to feel."

External Vice President

for Statewide Affairs Kris Kohler disagreed. "That was my kind of speech," he said.

Several Academic Senate members immediately announced plans to call a meeting to discuss ousting Yang and replacing him with a cool, laid-back chancellor.

"I would be enthusiastic about a chancellor who is good for morale, who didn't call the faculty 'a bunch of punks,'" said

Academic Senate Chair Stan Awramik. "Maybe we could get someone nice and amusing, like Babe."

Yang apparently couldn't stop Sunday. He was taken from the luncheon by campus security after he berated the floral motif of the function for more than half an hour, causing an elderly staff worker to collapse.

"Get a hold of yourself, man," officers told Yang as they dragged him away.

MOBIL

Continued from p.1
the name Clearview," she said. "Hopefully, this name change will trick enough people and give us a fresh chance to move forward with our plans for lots of development."

Clarke said the project's proximity to the Marine Science Institute and Marine Biotechnology Laboratory outweighs concerns inherent in placing a drill site near student housing and Chancellor Henry T. Yang's residence.

"This is a great opportunity for the students of UCSB," she said. "The educational benefits are outstanding. Where else in the world will you be able to have such close access to a project of this type and study it and learn from it?"

"This could prove valuable to further study the effects of horrible oil spills on the marine environment," Clarke added. "Campus researchers can study the effects as they happen, catalogue every dead bird and marine mammal. We will advance

scientific understanding and push UCSB researchers to the forefront of oil cleanup technology."

Other side benefits cited by Clarke include the 24-hour bright lights of the drill rig, which will keep San Nicolas residents safely awake at night.

Yang was against Clearview but has not yet issued a formal stance on the new Mobil project.

"We will consider the opinions of the students, faculty and staff in meeting our twin goals of academic excellence and diversity," he said.

Mobil should move ahead and ignore all potential environmental risks, according to Andy Caldwell, executive director of the Coalition of Labor, Agriculture and Business.

"This project will bring an economic boom to the county. UCSB should be thankful their campus was chosen as the site," he said. "Hopefully, the county will approve Spillview and stop wasting money on stuff like bikepaths. I mean, really, who uses bikepaths around here? I

don't."

If the university permits Mobil to use campus property, the project will eventually have to be approved by the county Board of Supervisors. The current pro-growth majority should make it easy for Mobil to push Spillview through, according to Supervisor Bill Wallace, whose 3rd District seat represents I.V. and the university.

"Now I wish I had run for re-election so I could be a better help in trying to stop this thing," he said. "Hopefully, I can still be a thorn in Mobil's side. I will wear their anger like a badge of honor."

Some students worry Spillview will greatly inconvenience their daily schedules, especially living in the residence halls.

"An oil rig is not something I'd like to see outside my dorm window," said San Nicolas resident Tyus O'Bannon, an undeclared sophomore. "I'd rather see a Paula Abdul video marathon on VH-1, thank you."

DEAD

Continued from p.1
William T. Bagley, Roy T. Brophy, Clair W. Burgener, Frank Clark, Ward Connerly, Tirso del Junco, S. Sue Johnson, Leo Kolligian and S. Stephen Nakashima.

While most of the dead regents expired from prolonged exposure to themselves, recently found to be fatal by a team of UC Berkeley parasitologists, others died of unnatural causes, according to von Neufschwansteinberg.

"Vard Connerly was found to haf a rare condition, globocardiotomyitis, vich left all his organs vorking except his brain and heart," he said.

Johnson was the victim of a freak accident, when during a trip to Mexico to "get to know those nice Spanish people" last summer, the extreme heat melted the plastic mechanism that supports her constant ebullient smile and turned her into a formless mass.

"Like a puddle she vas," von Neufschwansteinberg said.

Because most of the deceased had been dead for quite a few years, many of the bodies were in various states of decay when they came into the office Friday, said von Neufschwansteinberg's nurse, Otto.

"They were decomposing all over the place," he said. "Ears here, toes there — it was a mess."

While many of the regents have been unfazed by their deaths, Kolligian, who kicked the bucket

two years ago, believes the new revelation may impair his duties as a board member.

"This will seriously hurt my clout in getting unqualified students into UCLA," he said.

Bagley, who bought the farm shortly after he was appointed to the board by then-Gov. George Deukmejian, was pleased with the bad bill of health.

"This is great," he said. "Now I'll have time to tour the country with my poodle show, the Bagley-Keene Act."

Atkinson, who himself has one foot in the grave, does not believe the deaths will affect the regents' performance.

"It's not such a big deal," he said. "They never really did anything worthwhile anyway. Look at [Board Chair] Burgener — you think he ever kept order? Psh! As if."

Von Neufschwansteinberg has given the dead regents the go-ahead to continue in their posts, despite their deadness. "Who de hell cares?" he said.

Clark, who was actually buried in 1982, was unavailable for comment.

Some of the living were mildly startled by the news. "Wow," said Regent Meredith Khachigian, who is still breathing but whose oxygen supply to her brain is quite low. "And all these years I just thought Nakashima was napping."

Living Regent Ralph C. Carmona was outraged by the deaths. But because Carmona is only an alumni rep, his opinion is irrelevant to any action before the board.

UNIVERSITY OF CALIFORNIA, SAN DIEGO

Study in San Diego for the Summer . . .
