Minow Challenges Libel Trial Decision Motions Submitted By Former Editor

By JONATHAN ALBURGER
Nexus Staff Writer

Four motions to obtain a new trial for the five year old court case of Murv Glass vs. U.C. Regents, *Daily Nexus* and 1975 Editor-in-Chief were submitted Monday to Santa Barbara Superior Court Judge J. Kelly Steele, according to Minow attorney James Sanborn.

Minow decided to submit the post-trial motions in November, after he lost the libel suit brought against him and the other named defendants by former Black Student Union President Murv Glass. Glass was awarded \$18,000 in compensatory and punitive damages after Minow was found guilty of maliciously printing libelous material about Glass in connection with Glass' attempt to run for External Student Body President.

Sanborn said he petitioned the courts because of the "glaring insufficiency of evidence to support the rendered verdict." The jury made their decision out of "emotionalism," Sanborn added, "ignoring the first amendment of the libel law."

Minow also charged that the jury reached an emotional, rather than a "corroborated and substantiated," decision.

Besides the oral and 30-page written argument presented to Judge Steele by Sanborn and Minow, Glass' attorney Lorenzo Campbell submitted an "opposition" to Minow's motions for a new trial.

Judge Steele heard oral arguments Monday from both parties but, according to Sanborn, will make his decision almost entirely from the written documents submitted.

Of the motions, Campbell commented, "I honestly don't feel any of them has any substance. After three weeks of trial and extensive testimony, from our view more than enough

evidence was presented."

Primary to their argument for a new trial was Minow and Sanborn's pre-appeal motion that the jury's verdict was based on inference and circumstantial evidence, rather than the direct evidence they claimed was presented during the testimony of Minow and editorial cartoonist Brian Chin.

Secondly, Sanborn motioned that the entire \$18,000 in damages be readjusted because they deemed the figure "excessive" for a civil case of this nature and beyond Minow's financial grasp.

Campbell, however, said that the general damages, which were sought on a cause of libel, covered the plaintiff's emotional distress brought on by "anger and humiliation." Campbell further called Sanborn's motion for a reduction in damages "an extremely technical argument that we don't feel has any merit."

Another major motion under submission seeks to secure a "judgement notwithstanding verdict," Sanborn explained, which would in effect reverse the jury's decision to find Minow not guilty of the libel charges he was previously found guilty of. This action could be enacted only if Judge Steele is persuaded by the arguments submitted in the written motions.

According to Campbell, should the judgement be reversed, Glass would then have the option to appeal, which would send the case into the Second District Court of Appeals in Los Angeles.

The final motion concerns recompensation of approximately \$600, Sanborn explained, which was at first awarded to Minow from Glass when seven of the original 13 defendants were dismissed by the court during the pre-trial hearings for lack of possibly incriminating evidence. The sum

Radioactive Waste

Environmentalists Name Three Santa Cruz Radioactive Sites

BY BRAD YOUNG
Nexus Staff Writer

Three radioactive waste disposal sites in the Santa Cruz basin, near the Channel Islands, have been identified by the Environmental Protection Agency. This information, contained in a letter to Fred Eissler of the Scenic Shoreline Preservation Conference, was in answer to questions raised in an Oct. 3, 1980 communication between Eissler and EPA secretary Douglas Costle.

Some 30 miles southeast of Santa Cruz island, these sites contain 55 gallon drums filled with radioactive lab tools, equipment and clothing.

According to Eissler, "Environmentalists believe that further investigation of dumping records, which were poorly kept and often lost or destroyed, may reveal more information on these sites."

Other possible sites mentioned in the letter include areas of the Santa Barbara basin, and a site 108 miles seaward of Pt. Concepcion.

The EPA could offer no clear evidence of radioactive disposal in the Santa Barbara basin in the channel. "No evidence has been found of any other multiple radioactive dump sites within or outside the Santa Barbara Channel area," the EPA concluded.

The Pt. Concepcion site, EPA stated, was approved by the state of California and was either never used

or never recorded as used in available documents.

EPA stated that the amount of radioactivity in the canisters is difficult to determine. "Because the wastes were regarded as garbage, precise records were not kept of the specific contents," the letter explained. "Approximately 75 percent of the canisters located in various dumps are intact, but some have ruptured and disintegrated."

The letter further explained that "The disposal of radioactive wastes at sites considered acceptable in the past would be considered substandard today. Accordingly, EPA does not condone those past practices and would not approve those disposal operations today."

EPA gave no firm commitment to the demands by many agencies and organizations that the Santa Barbara regions disposal sites be monitored. According to the letter, however, the EPA plans to "consider" monitoring all the nation's waste disposal sites in coordination with the National Oceanic and Atmospheric Administration.

At recent hearings before the House Government Operations Committee, a coalition of 23 national environmental organizations, including SSPC, urged that some of the 55 known offshore radioactive waste dumps be investigated, including the sensitive

IVMAC Plans For Post Office Opening Soon

By CHRIS MILLER
Nexus Staff Writer

The new post office which will open in Isla Vista on Jan. 12 was only one of the issues discussed at the I.V. Municipal Advisory Council meeting on Monday.

A clerk for the new office has been hired and is currently being trained, according to IVMAC Supervisor Ann Olson.

In other council business, John Buttney, IVMAC District One Representative, discussed the problem of hydrogen sulfide venting by the ARCO natural gas plant north of Isla Vista. According to Buttney, the plant has been leaking the gas into the air as part of its gas processing, and poses a threat of hydrogen sulfide poisoning.

"ARCO has been venting the gas generally over the area," Buttney said, adding that the plant has indicated its willingness to trap the leaking gases and market the sulfur component of the gas by draining off the water.

According to Buttney, John English of the Santa Barbara County Air Pollution District has

Although one student claimed that he could die in line before he reached the cashier's office, this year's reg fee line was no longer than usual. A new computer system should alleviate the problem by Spring.

The State

LOS ANGELES— Two Los Angeles Herald Examiner writers cannot be compelled to surrender their notes or reveal their sources for stories about alleged sale of Super Bowl tickets above face value by Los Angeles Rams owner Georgia Frontiere. The decision was handed down yesterday by U.S. District Judge Harry Pregerson in Los Angeles. He rejected subpoenas served on reporter Scott Paltrow and columnist Melvin Durslag by the National Football League as part of the court battle to prevent the Oakland Raiders from moving to Los Angeles. The NFL sought the subpoenas to support a claim that media coverage in Los Angeles has been biased, and therefore the trial scheduled to begin February 9 in the NFL-Raider suit should be moved out of Los Angeles. In a 16-page opinion, Pregerson called such subpoenas "unrealistic and oppressive."

SACRAMENTO— A specialist in educationalist administration says statewide tests that compare one public school with another are viewed by schools as coercive and are not used much in planning. UCLA associate professor Richard Williams said last night in Sacramento that tests should instead be developed by each district with teachers, and by and for teachers.

SAN FRANCISCO— The death Monday of Justice Wiley Manuel may require the California Supreme Court to hold new hearings on cases in which his vote would have made a difference. However, court officials say there are no laws or formal procedures to decide which cases to rehear or who should hear them, and the court hasn't considered the issue yet. Court spokesman Burt Oliver says the justices have to set their own rules. Among the cases that might be affected are several pending death penalty rulings and a decision on minority admissions at University of California professional schools. Those are issues in which Manuel's death appears to have left the remaining six justices split at three and three.

SANTA MONICA— A Rand Corporation research economist in Santa Monica sees better health patterns. Charles Phelps says doctors may face their stiffest future competition not from other physicians but from their own patients, who are taking better care of themselves. Phelps said in a recent interview that Americans are smoking less, watching their weight and diet more and turning to a variety of exercises. He says the fact that Americans are taking better overall care of themselves could have major impacts on medicine at a time when medical schools are producing ever-increasing numbers of doctors. Phelps says his conclusions are based more on what he describes as "educated speculation" than pure research. However, he is working on a two-year project to investigate the effects of preventive medicine and lifestyle changes on health care.

The Nation

WASHINGTON— Defense Secretary-designate Caspar Weinberger predicts it will be six months before any attempt is made to re-negotiate the Salt II treaty with the Soviet Union. He told the Senate Armed Services Committee the Reagan Administration wants to get, as he put it, "a very clear idea of the objectives we would want to pursue and the way we would like to see it come out."

VIRGINIA— The various court cases against Iran continued Tuesday. A U.S. District Court in Roanoke has impounded 55 Iranian-owned trucks for the second time in less than two months. United Virginia Bank entered an order yesterday, claiming Iran had defaulted more than \$4 million on a loan. The rigs were first impounded in November by two Brown and Root Construction subsidiaries, which claimed owed the trucks as part of 1977 construction contracts.

WASHINGTON— Commerce Secretary-designate Malcolm Baldrige says over-regulation of business has caused a cut in productivity that has, in turn, worsened inflation. He told the Senate Commerce Committee there should be major de-reregulation "from top to bottom" to help medium and small size businesses. Meanwhile, Treasury Secretary-designate Donald Reagan told the finance committee our economic woes are not "causes for panic." He said: "We must have a sense of urgency, not a sense of emergency."

WASHINGTON— The man in line to take over a Secretary of Health and Human Services, Richard Schweiker, offered his prescription for putting the social security system on sound financial footing. He said the three options for his top priority are raising taxes, reducing benefits or raising the eligibility age. Schweiker told the Senate Finance Committee it is going to be "tough medicine." However, he said, it is "necessary for us to do it."

NEW YORK— Mark Chapman pleaded innocent today to charges that he shot and killed former Beatle John Lennon. The suspect's lawyer says Chapman will mount an insanity defense. The 25-year-old Chapman entered his plea during a brief appearance in New York in Manhattan Supreme Court before Justice Herbert Altman.

WASHINGTON— A special Air Force team report recommends a series of measures to reduce further mishaps with the Titan II weapon systems. The task force was formed after the Titan Missile blast last September in Arkansas. The report, published Tuesday, acknowledged "potential hazards" but said design changes could make the missile less likely to explode.

The World

WASHINGTON— The State Department is withholding any comment right now on reports that there may be some small breakthrough on the release of the American hostages. A spokesman for the State Department's Iran working group, George Havens, says the initial reports on statements by Prime Minister Rajai are too vague at this point. Havens would not discuss whether Algerian mediators are offering some kind of guarantees to Iran in their own name. Rajai is quoted by reporters in Tehran as saying today that Ayatollah Khomeini agreed to accept unspecified Algerian guarantees that could lead to release of the hostages. However, other reports of Rajai's interview with Iranian television quote him as saying only that Khomeini has accepted the Algerian "undertaking" and these reports do not mention guarantees. According to an NBC report, Iranian television says Khomeini and his son met with Rajai and asked about the latest proposal of the American government forwarded through the Algerians. NBC says Rajai reportedly told Khomeini that the Algerians have promised to resolve any American-Iranian differences. Also according to the NBC report, Khomeini then told Rajai to accept the Algerian guarantees.

SAUDI ARABIA— Former Secretary of State Henry Kissinger is in Riyadh, Saudi Arabia. Before leaving Jerusalem for Saudi Arabia, he urged the United States to acquire military facilities in the Middle East. He said the presence of U.S. troops in the area would show the Soviets that "attacking key countries is not a matter in which the United States can be disinterested." Kissinger also said he favors a unified Jerusalem. "Everyone has agreed that Jerusalem should be undivided," Kissinger said.

POLAND— A protest by Polish farmers demanding an investigation of alleged official corruption appears to be spreading. Sources say about 70 farmers are now occupying a government building in a town less than 10 miles from the Soviet border. The protest began a few days ago, and farmers in a nearby town apparently joined the demonstration Tuesday.

SYRIA— According to reports from Jordan, Syria executed nine pilots of its own air force as part of a continuing campaign to establish that Syria is torn by dissension. Previous reports of this nature have been denied by Damascus. The report from the state-run Jordanian news agency, Petra, said the pilots were charged with supporting the outlawed Muslim Brotherhood and quoted travelers as saying that the executions took place last month.

At Basic Four, You Won't Just Be Using Computers... You'll Be Designing Them!

What better way to begin your career than at the focal point of advanced computer technology — design. As a computer professional at Basic Four Information Systems, you'll have the unique opportunity to see projects go from initial concept through design, development, manufacturing and marketing.

With a 30% increase in sales over the past five years, we are increasing our staff in both Houston and Southern California, and have positions in the following areas:

Hardware Engineers

Involves the design, construction and testing of digital logic circuits used in MOS microprocessor based computer systems. Responsibilities include designing/specifying circuits, documentation and integration into a computer system. Areas of work include intelligent terminals, central processing units, peripheral devices and communications interface.

Software Engineers

Involves the design, fabrication, modification and enhancement of computing systems, data communication networks, emulations and architecture. Will be involved in BSC, HDC, SOC, X.25, communication protocol, programming wide word 2901 Bits/Slice, microprocessors and designing PASCAL based compilers.

G.I. Bill Provides Benefits

Office of Veteran Affairs Provides Assistance for Service in Vietnam

By BETHANY RUSHING
Nexus Staff Writer

Financial aid, work-study and tutorial assistance is available through the UCSB Office of Veteran Affairs and Support Service to veterans who served at least 181 days of active duty in the Vietnam War and did not receive a dishonorable discharge. The OVA serves approximately 175 veterans of the Vietnam era.

Most veterans at UCSB receive benefits under the Chapter 34, GI Bill. On Oct. 17, President Carter signed a bill to increase educational funds for eligible veterans.

Eligibility is determined by the date of enlistment. Veterans who entered the service prior to 1977 are covered by Chapter 34. After separation from the service, veterans have 10 years to use their entitlement of 45 months of full-time educational assistance.

Those entering later than 1977, are covered under the Veteran Educational Assistance program. The VEA program requires the veterans to pay into the educational fund while in the service. When separated, the Veteran's Administration doubles the serviceman's contribution and the Department of Defense equals it.

"Under this program, benefit entitlement is limited by the amount of their contribution," Barbara Greenlee, Special Services assistant, said.

"There are approximately 175 veterans receiving benefits at UCSB, yet I think there are many more on campus who have exhausted their entitlement," Greenlee said.

According to Dennis Nupdal, a veteran work-study student, "The VEA is not meeting with a whole lot of happiness."

Many veterans are attending junior and state colleges

Growth Seen for Teaching Posts

By MARIA CASAS
Nexus Contributor

Prospects for teaching jobs in the near future are encouraging following a decline in available positions that started in the early 1970s. According to data provided by the National Center for Education and the Bureau of Labor Statistics a shortage of teachers is expected to develop in the late 1980s.

According to Lisa S. Dillich, labor economist for the Occupational Outlook Division of BLS, the trend of declining school enrollments will soon reverse itself. The birth rate started to rise in the late 1970s and it is expected to continue rising moderately until the late 1980s, Dillich said. Since enrollment trends correlate closely with birth trends, the availability of teaching jobs will start increasing in 1983 at the kindergarten and elementary school level. Demand for secondary school teaching jobs will continue moderately until 1990. The overall increase in elementary school teacher employment is expected to be around 21 percent during the 1980s.

Statistics and projections

aside, many school districts, nationwide, are already experiencing difficulty finding qualified staff, according to *Times* Education writer, Jack McCurdy, in an article published July 20.

"There is a desperate shortage of substitute teachers in the Los Angeles and Orange Counties," Ron Zybach, Director of Personnel at Los Alamos Elementary School District said.

"Although the government estimates a 'reserve pool' of qualified teachers who are not teaching, the growing inability of school districts to employ substitute teachers raises question about the actual size of the 'pool.' "There might be a surplus of credentialed people, but there surely is a shortage of teachers," Ed Foglia, president of the California Teachers Association said.

In Los Angeles County, a survey conducted by Dr. Stuart E. Gothold, superintendent of Los Angeles County schools showed there are teacher shortages in more than half of the Los Angeles County school districts.

Shortages of qualified (Please turn to pg.7,col.1)

because of the lower cost. "I don't think anyone can get through school on just GI benefits. As an in-state student, the benefits are almost sufficient," Nupdal said.

For this reason, Linda Perlin, coordinator of the OVA has set up a fund for emergency loans to veterans. They can borrow up to \$100 interest free each quarter, if they agree to pay off the loan by the end of the quarter.

"Other campuses may not have an emergency loan fund available. Ms. Perlin worked it out for the benefit of the veterans here," Greenlee said.

Besides offering financial aid to veterans, there are also programs available for veteran dependents. "I try to reach all of the dependents but I'm sure there are many who don't know about the programs," Greenlee added.

Both veterans and veteran dependents are eligible to receive \$69 per month of tutorial assistance. The OVA has work-study positions open to veterans and a large listing of available jobs elsewhere. Located in Cheadle Hall 1345, the OVA "answers questions about all veteran benefits, not only educational ones," Greenlee said.

Balloon Launch To Protest Plant

Balloons carrying messages of protest against the proposed licensing of the Diablo Canyon Nuclear Power Plant near San Luis Obispo will be launched from the gates of the facility this Saturday, Jan. 10, at 12:30 p.m. in an event sponsored by the Abalone Alliance.

According to Kathy Doi of the Roses Against a Nuclear Environment, a Stanford based member of the Alliance, the purpose of the launch is to demonstrate how airborne radioactive particles might travel if there was an accident at the Diablo Canyon Plant, located approximately two and one half miles from the offshore Hosgri Fault.

Doi said the postcard messages, attached to each balloon will contain the signature of the person who bought and launched the balloon, the date and location of the balloon's launch, and a warning about the Diablo facility, which states "If it is allowed to open and an accident occurs, airborne radioactivity could contaminate the area where you found this card."

The message also requests the finder of the balloon to fill in his/her name and the location where it was found and return it to the Abalone Alliance, Doi added.

Eleanor Anderson, of The Gathering Place in Santa

Barbara, said the event will also include a one and one-half mile walk from Avila beach to the power plant site. She added that songs and speeches would precede the balloon launch. Anderson also said a statewide training session for future demonstrations would be held on Sunday at Rancho Del Chorro near San Luis Obispo.

California Pacific Gas and Electric Company spokesman Sue Brown said PG&E has no formal message planned for the demonstration outside its plant adding, "we're just curious to watch the spectacle of the balloons." Brown also added that the balloon launch was not the first to take place in protest of the Diablo plant.

Brown said there has been no decision on the Nuclear Regulatory Commission's seismic safety and plant security hearings held last year, and added that because the findings from the hearings were submitted in December no decision from the NRC Licensing board on PG&E's request for a test license is expected for a few months.

More information about Saturday's balloon launch can be obtained by calling The Gathering Place.

Close Down

While the administration's ability to close the campus has become a moot point, the controversy surrounding UCSB's closure has not. The university's Dec. 29-31 closure has now provoked a hearing by the American Federation of State, County and Municipal Employees Union.

There is nothing that can now change the situation, but its repercussions can be felt as some UCSB workers were put off the job for several days. Such an action has profound effects on the ability of an employee of the university to survive a monetarily trying time: the holidays. The university has now shown that it has the power to make such a wideranging decision, and yet the fact remains that the action was wrong. In closing down the university, the administration has dealt heavily-handedly with an important and serious matter.

To neglect such a large and important segment as its employees is a major oversight by the university. We feel the UCSB administration has acted clumsily, asserting its authority over university employees without allowing them adequate input.

We hope the upcoming hearing will demonstrate to the administration that it simply cannot ignore the opinions of its employees.

In not soliciting the opinions of individual employees before taking action, the administration shows a dangerous narrowmindedness reminiscent of the John Carroll controversy of last summer. The decision-making process behind this action is one more step in the wrong direction.

Road Work

The Highway 101 thoroughfare through downtown Santa Barbara is one of the slowest and most dangerous areas of the whole freeway. Stop signs which slow traffic through the area have, for many years, been a complaint and traffic hazard for drivers. This problem may soon be relieved by the approval of a \$20.7 million project to expand and remove lights from 101.

We applaud such a project but urge that environmental standards be upheld. It is important to keep the highways free flowing, but it is also important not to disturb Santa Barbara's delicate environment.

We support the enlargement of Highway 101 and see it as a way to avoid further deadly accidents on a dangerous strip of road. An expansion of the highway will eliminate dangerous backups of cars waiting for lights to change on one of the largest highways between San Francisco and Los Angeles.

We also, however, feel the environment must not be forgotten when the freeway is built. Therefore, close examination and review must be made before the highway is built. We urge the Santa Barbara City Council to take these into account.

Why Don't YOU Write?

In the last several weeks, the Nexus editorial pages have been getting some extremely lengthy letters. To help free editorial space and get more opinions across, we are now limiting the length of letters that are submitted. Starting immediately, we will run no letter that is longer than words. We hope this will not be an inconvenience, but it is necessary for the free and continuous flow of opinions.

ANALYSIS

The New Right Comes of Age

By MARTIN COTHRAN
Assistant Editorials Editor

This year's election will probably be remembered as the one which gave birth to a new political force. Most conservatives were elated upon finding that the Senate had been, unexpectedly to many, taken over by the Republicans. According to political analyst Alan Baron, of the 16 new Republican members of the Senate four are New Right activists, three are New Right Pragmatists, six are conservatives, three are moderates and one is liberal.

The political pendulum seems to swing from one side to the other every half century or so. On election eve however, many feared that the pendulum had swung a little too far to the right. They worry about what has become a major political movement — the New Right.

The 'New Right' label is a fairly new one. Just a few years ago it was a label sometimes used for the more conservative members of Congress such as Senators Paul Laxalt, Jake Garn, Richard Lugar, and James McLure. Men such as Jesse Helms and Strom Thurmond were simply termed "ultra-conservatives." However, the Republican Party has attracted onboard many more of these "ultra-conservatives" and they are now claiming the 'New Right' title. Perhaps this is because when looking at the political philosophies of many of the new Republican Senators elected this year, Laxalt, Garn and others pale in political comparison.

Many of the outgoing Democrats will be replaced this month by members of the New Right, whose forces include previously elected Congressman Phil Crane, and Senators Helms and Thurmond. These new Congressmen and Senators were propelled to their victories by the concerted efforts of increasingly powerful conservative action groups such as The Conservative Caucus, The Committee for the Survival of a Free Congress, and the National Conservative Action Committee.

Contrary to the cries of the less informed to the effect that the large corporations are taking over, big business, the perpetual liberal scapegoat, is not the culprit. The forces powering the new movement consist of a few unelected technocrats who fund the conservative action groups. The money does not come, for the most part, from big business, but from the small donations from a large number of average Americans. The funds are collected through direct mail fundraising.

Probably the most powerful of these technocrats is Richard Viguerie, a master of direct-mail techniques. He uses the millions of dollars he collects to help bankroll the five major conservative action groups. These collection techniques have been developed in response to the federal campaign spending reform laws. Direct mail has not been effectively utilized by Democratic organizations as of yet, putting that party at a distinct disadvantage as far as organizing voters. The power of these mailing techniques was demonstrated this year by the defeat of powerful Democratic leaders such as Birch Bayh, George McGovern, and Frank Church.

The New Right is a power that not only the Democrats but many Republicans must face. The funds collected by the

conservative groups have been aimed at many moderate Republicans as well as liberal Democrats, indicating that the well being of the Grand Old Party is not their prime concern. In fact, the day after the election Paul Weyrich announced on national television that Ronald Reagan and George Bush had better reflect the New Right philosophy, or else.

The New Right has demonstrated not only that it is not a wholly Republican movement, but also that it is not necessarily in accordance with much of mainstream conservatism. According to newly elected Senator and chief of the Committee for the Survival of a Free Congress, Paul Weyrich, "We are not conservatives. We are radicals seeking to overturn the Establishment."

Ronald Reagan has, by post-election maneuvering, indicated that he does not intend to give in to some of the more extreme demands of the New Right. Although there appeared to be some sort of courtship before the election, the two never got past holding hands. And indeed it would not be presumptuous to say that some bloody political battles might well develop.

While it is a conservative movement, the New Right coalition cannot rightly be confused with Republicanism and neither can it be confused with conservatism in general. It can and does work outside the confines of both.

The Republican party seems to contain three distinct groups: the traditional Republicans like Gerald Ford and George Bush; the ideological conservatives like Richard Lugar, Jack Kemp and Paul Laxalt; and The New Right, which includes Phil Crane, Paul Weyrich, and Terry Dolan. Ronald Reagan can be said to be somewhere between the ideological conservatives and the traditional Republicans. His cabinet appointments would suggest that he is closer to the traditional mold than the ideological, moreso at least than most had thought.

Indeed Reagan's appointments have disappointed many of the more extreme conservatives, including the New Right. Viguerie in a recent pronouncement echoed the concern of the New Right. Many of the appointees including Weinburger and even Secretary of State designate Alexander Haig have been the target of New Right rhetoric. The only New Right appointment made by Reagan was David Stockman, a New Right pragmatist and influential leader of the economic wing of the movement. For the most part the rest of his appointees are Nixon-Ford holdovers.

The ultra-conservative takeover of the administration foretold by many did not materialize. The Reagan administration is taking the form of a more pragmatic organization than many of his detractors had predicted. Even his choice of Stockman for the Office of Management and Budget was tempered by the fact that Stockman is one of the more pragmatic members of the movement.

The New Right will undoubtedly be a political force to be reckoned with in the future. While the Senate has taken a turn to the right, the prevailing rule seems to be pragmatism. Ronald Reagan seems adamant in his desire to construct an efficient and well qualified administration even at the expense of the New Right which pushed for his election.

Andy Rooney

Day to Day

Would you like a calendar that runs from Jan. 1, 1981, to Dec. 31, 1990? Someone has just sent me one and I'm throwing it out. I do not wish to contemplate that distant future. I am not going to plan my life so far ahead, and I don't care to think about where I'll be when I'm 10 years older than I am today.

The passing of time is depressing to me and planning for something six months in advance makes time pass even faster. I have no interest in rushing through the 1980s in order to get to some event I've put on my 10-year calendar for the year 1990.

The best thing that's happened to me in this regard recently is to have had a president elected who is nine years older than I am. It makes me feel great and gives me reason to hope I haven't even reached my peak yet. Ronald Reagan isn't going to be doing a lot of talking about the year 2000 because he'll be 89 then. He's not going to be initiating programs that come to fruition in 15 years because he'll want to see the programs he starts, finished. I'd be surprised if Reagan has one of these 10-year calendars I'm throwing out.

This feeling I have is nothing new to me. I had it when I was 25. Insurance salesmen were always talking to me about what I'd need when I was 50 or 60, and I didn't want to hear what they said. I bought some insurance from them but I did it more because I thought that's what everyone was supposed to do than because I really wanted it. I guess it pays off in the feeling of security it gives me, though. If I were to die tomorrow, my wife wouldn't have to worry. She'd be taken care of. Between the \$1.35 a month she'd get for the rest of her life from my insurance policy and some money her parents left her, she'd be comfortable.

All of us have to plan ahead as though our lives were going to proceed according to plan, but they never do. It's a good thing, too, because one of the best things about life is how unpredictable it is. No calendar, no digital watch that shows the time in three zones and goes off at 6:30 every morning can make the course of our lives any more certain.

My rule is not to plan on being anywhere more than three months in advance and only at that distance when the circumstances are unusual. I have to make a speech in San Francisco on March 28, and I'm going to worry about it every day now until then. I wish they could have called me a couple of days before and asked me to come out then, but it's a big convention and they always plan way in advance.

I know people who have planned their whole lives in advance. They've stayed with the same company for 25 years in jobs they hated, just waiting for the day they were eligible for a pension. That's what I'd call planning your life away. Spending the best years of your life, gritting your teeth and just getting through one day after another waiting for the time you can retire to nothing, seems like an awful waste of a life. It would serve one of these people right if, the day after they retired, a rich distant relative died and left them a million dollars and their pension meant nothing to them.

I know in my heart and mind that I'm wrong not planning my life more carefully, but I lack the ability to do it, so I take my pleasure from being disorganized. I delight in long-distance plans that go wrong for other people because it reduces them to my level. I don't like insurance companies or the people who take polls or the smart-money people on Wall Street whose businesses are based on statistical evidence that this or that will happen. We are all somewhat defeated by the evidence of our own predictability but I refuse to accept defeat gracefully.

(c) 1981, Chicago Tribune-New York News Syndicate, Inc.

Joseph Sobran

Bo Derek: Signs of a Sick American Society

I see Bo Derek has a new movie, released a while back — just in time for Christmas. That's how we observe the holy season now.

I'll pass on this one. I saw Mrs. Derek in "10" a couple of years ago, just to find out what everyone was talking about. I found out.

Since then I've also seen her interviewed a few times, and it makes me wince. Here is a really beautiful young woman who allows her husband to display her like — like what? Horseflesh? But a horse isn't profaned by admiration. What shall we liken it to?

At this point someone is sure to ask, "Whassamatta? You got hangups you can't enjoy a good lookin' broad?" Sometimes I wish I did. It would be a good bargain for me to swap my present hangups for a more practical set.

As presently constituted, I am made uneasy by constant aggressions against my normal susceptibilities. I really don't enjoy being subject to the ceaseless hawking of flesh-peddlers — whether on the streets or in my living room as I try to watch TV.

Remember a few years ago when all the civil libertarians were howling about privacy? That was their defense of porn and perversion: what you did out of the public eye was strictly your own business.

Very well. But where are they now that I need them? What about my privacy? What about my children's? Why are they supposed to be fair game for the pimps?

It's clear now that the real purpose of all that privacy-talk was simply to legitimize assaults on decency. The pornographers and libertarians hardly mention privacy any more, and for a good reason: they're at war with it. When they get through, you'll have to find a private place to avoid nudity.

Oh, that lovely promise! We would all be left alone by the blueses! Great. Now if only we could be left alone by the liberationists.

Joseph Kraft

Iran and the Final Offer

WASHINGTON— American honor finds cold comfort in the final offer made by the Carter Administration to spring the hostages. Still the national interest lies in an acceptance by Iran. For the incoming administration, while holding a basically sound position, is ill-prepared to deal with what has become a well-nigh hysterical issue.

The offer transmitted to Iran by Algerian intermediaries last week is a straight quid pro quo deal. The Iranians turn over the hostages through the good offices of Algeria. The U.S. makes available to Iran, through the Algerians, some five or six million dollars in assets frozen by President Carter after the hostages were taken. In addition, the Iranians are given a license to hunt for the assets of the late Shah, insofar as they are located in this country (which is to no great degree) and the courts will allow (which is uncertain).

Compared to previous terms accepted by the Carter Administration, the final offer is a Gibraltar of firmness. The U.S. does not, as President Carter once said he would, turn over important stocks of weapons to Iran. It does not admit the principle, explicit in the dealings through the United Nations last year, that an international tribunal (largely composed of America Lasters) sit in judgement of past actions by this country in Iran.

Still the very idea of a bargain for the hostages is abhorrent. It gives legitimacy to illegitimate actions. It shows the U.S. can be held up by the threat of violence against a handful of citizens. It invites further blackmail.

Governor Reagan, throughout the election campaign and since, showed a keen understanding of those points. He is well placed now to take the position which some of us urged upon the Carter administration at the beginning of the affair.

That position starts from the premise that the seizure of the hostages was an illegal act in violation of all accepted norms of behavior. It includes an expression of willingness to negotiate legitimate behavior. It includes an expression of willingness to negotiate legitimate complaints. But not under duress. As a precondition for any discussions pertaining to Iran, it requires the release of the hostages.

By taking such a stance, the U.S. would reverse the conditions which have obtained for the last 14 months. It would lay upon the Iranian government the burden of proving that it is a responsible actor in world affairs.

That position is still the first position. It is the stance a Reagan administration should, and probably would, take, if the hostage problem fell into its lap.

But the issue now goes beyond the matter of a basic stance. The hostages, always an element in the affairs of Tehran, have now become fat on the griddle of Iranian politics. They are not merely being held. If no deal is done, some at least may well be subjected to trial. Some, perhaps, to harsh punishment.

For that eventuality, a sit-tight policy does not suffice. Retaliatory actions have to be taken. They need to be organized in a ladder of graduated chastisement. They have to be coordinated with other countries — friendly and not so friendly. For at some point, and probably early on, blockade of the Persian Gulf approaches to Iran would come up for consideration.

But Governor Reagan and his people are not ready for such a test. They have not studied the negotiating records in detail. They have not familiarized themselves with the cases of the individual hostages.

In those conditions, the incoming administration would probably make even more of a mess of the hostage affair, thus worsening the American position in the Persian Gulf and the world. It is better by far that the final Carter offer be accepted, and that the Reagan people learn the basic lesson of the outgoing administration — namely, that it takes more than good intentions to govern. As to American honor, there are the famous words of Burke on a disgraceful British transaction with French revolutionaries:

"I pass by all the insolence and contumely of the performance as it comes from them. The present question is not how we are to be affected with it in regard to our dignity. That is gone. I shall say no more about it. Lie light the earth on the ashes of English pride."

(c) 1981, Los Angeles Times Syndicate

Some misfits can't find it there. We are all, in fact, misfits until we make some difficult adjustments to adulthood. Let us not sneer and condescend to those who can't make it.

But let's stop letting them call the tune. We have been all too eager to accommodate the debauched and inadequate who have attacked the normal not out of humaneness, but out of a malicious envy. Society, yea, and its laws, should be guided by the knowledge that even Bo Derek is God's creature — whether or not she and Mr. Derek know it.

Forest Service Hiring for Summer

Applications for summer and seasonal employment with the Forest Service will be accepted between Dec. 1, 1980 and Jan. 15, 1981, Pacific Southwest Regional Forester Zane G. Smith announced today.

"This is an excellent opportunity for people to be exposed to conservation type work on a temporary basis. The experience gained may interest and help qualify a person for a permanent career position," Smith said.

The Forest Service hires temporary employees each year as aids and technicians in areas including forestry, recreation, range engineering, fire management, and surveying. Applications, form 6100-23, are available at all Forest Service offices. To qualify for consideration, applicants must be 18 years of age or older at the time they would report for work, a U.S. citizen, and able to meet certain physical standards.

Applications must be postmarked no later than Jan. 15 and sent to: Forest Service, USDA, Temporary Employment, Pacific Southwest Region, 630 Sansome Street, San Francisco, CA 94111.

Starting salaries will range from \$4.30 to \$5.87 per hour. Summer employment is any period between May 12 and Oct. 1.

In other Forest Service News, California homeowners can expect the potential loss of structures and human life from major wildland fires to increase rapidly unless adequate fire safety measures are adopted, according to Smith.

"During the past decade, urban development has greatly increased in wildland areas — foothills, mountain slopes, and canyons — where the fire hazard is severe and fire control is difficult. The recent loss of more than 60 homes in the Los Angeles area has demonstrated once again this increasing problem," Smith commented.

The Forest Service and other federal, state and local firefighting agencies are seeking to call the public's attention to the fact that rugged terrain and highly flammable vegetation make the foothills and mountains of California especially unsafe for residential development unless adequate fire safety measures are taken.

However, proper fire safety measures can reduce the exposure of life, property, and resources to an "acceptable level of risk" and provide "defensible space" that could protect residents and enable firefighting equipment and personnel to operate during a wildland fire.

Firefighting officials believe the roof is the most vulnerable part of a building during a wildland fire,

E.S. Recruits For Film

The Environmental Studies Program is recruiting students interested in taking E.S. 199 Educational Media Course during Winter and Spring quarters.

The course this year will focus on preparing a 30 minute documentary on the Santa Barbara coastline. The film will be aired on local television later this year.

Last year E.S. and Learning Resources prepared the first documentary for this program on the Channel

Islands National Park, which was shown in November on KCOY-TV (Channel 12), a CBS affiliate.

There are three positions available: one researcher and two script writers. The researcher should have a background in environmental studies (coastal planning) and an interest in media as an educational tool. The two script writers must have strong ability in written communication skills and experience in the techniques of video applications is preferred.

Interested students should submit a resume and samples of previous work (scripts, etc.) to the Environmental Studies Office by noon, Thursday, Jan. 8 in Phelps Hall, third floor.

especially a horizontal roof because it can catch and hold firebrands which are capable of traveling over and beyond any natural or artificial firebreak and can be hazardous to structures as far as a mile away from the wildland fire.

Furthermore, thousands of homes and other buildings exposed to the threat of wildland fires are roofed either with untreated shakes or shingles or with those that were merely dipped in fire-retardant chemical. In many cases, the treatment has been leached by weathering. These roofs are serious hazards to the buildings on which they are installed and also to any other buildings downwind from them which are similarly roofed.

The most effective fire resistant roofing are tile roofs which have been fire-stopped with concrete or equivalent fire-resistant material to preclude entry of flames or embers.

Other measures to reduce potential loss of life and property in areas of high fire danger include enforcement of fire safe building codes, construction of adequate road and water systems, land use planning, and zoning to guide development in these areas. Fuelbreaks or greenbelts separating communities and groups of structures from vegetation are also highly recommended. They should be located to protect both developed areas and adjacent wildlands.

California faces such an extreme fire danger because 60 percent of the state is covered by forest, woodland, brush or grassland. Unfortunately, this vegetation includes a wide variety of highly flammable growth that also makes attractive landscaping for homes. This vegetation is easily ignited and burns with great intensity.

Brush is extremely hazardous around homes and communities; because of its natural dryness, structure, and dense growth it can explode instantly into flames. Much of California's brush or chaparral remain "green" after an actual wilting stage of dryness which is deceiving to many people.

Student Housing Crunch Lessens

By KAREN CLABEAUX
Nexus Staff Writer

Student housing will be less of a crunch this quarter than fall, according to Community Housing Director Joan Mortel. Bea Posella, Mortel's administrative assistant said yesterday, "We've been busy in the (housing) office since five minutes to eight this morning, but I don't anticipate having any problems finding housing for everyone that will need it."

"Close to 50 spaces have opened up in on-campus housing due to graduating seniors and transfer students," Joan Devine of UCSB housing stated. "We have had a long waiting list and that's why we allowed students to petition for release from their contracts so late last quarter."

Another university-run housing project is Santa Ynez Apartments, however, they are filling up quickly for winter quarter. Apartment

Living Program Director Alan Kirby said, "We completed construction of the units fall quarter, yet we'll be 100 percent filled for winter quarter."

"First we accommodated those remaining on the list from last years lottery," Kirby commented, "Now we're wrapping it up by taking walk-in traffic. The 150 units will be filled by January."

According to Kirby, prospects of finding housing in the university married student apartments are also very dim. Currently there is a twelve month waiting list for married student housing, although an additional complex is under construction to be completed sometime this spring or summer.

Off campus dorms such as Francisco Torres, Tropicana Gardens and Fontainebleu still have some openings for winter quarter.

"Generally the housing situation seems to be looking better for students," Mortel stated. "There are more month-to-month leases which open up housing availability more readily." In addition, many rental companies have called in listings to the Community Housing Office.

"There are more listings in now, 20-plus a day for all kinds of apartments," Mortel explained. "There will be even more notices as spring quarter gets closer. We are seeing quite an increase in listings," Mortel added. "Handling the housing crunch is getting a lot easier."

Summer Jobs

The UCSB Alumni Vacation Center has openings for staff members to work as:

- Tennis Instructor
- Lifeguard (Current WSI Required)
- Age Group /Nursery School Counselors
- Entertainers (Guitar, Singing, Dancing)
- Athletic Activities
- Equipment Room Assistants
- Crafts Instructor

Job description, salary and dates of employment are included on the application.

Pick up employment application in Alumni Affairs Office, South Hall 1431, Monday through Friday 8:00-5:00.

FILING DEADLINE — JANUARY 30, 1981

WE NEED YOU IF

- ✓ You are a dynamic person.
- ✓ You are highly motivated
- ✓ You are self-confident.
- ✓ You will be a student at UCSB for at least 1 year.
- ✓ You are any of the above.

for a part-time position on the DAILY NEXUS Advertising Sales Staff.

An advertising or marketing background is helpful, but not mandatory. Previous sales experience is also not required.

We offer you potential high income from commissions and bonuses, and excellent experience.

Increased Demand for Engineers Creates Rising UCSB Enrollment

By LORI GOSS
Nexus Staff Writer

The growing nationwide demand for engineers has resulted in an approximate 30 percent increase in enrollment at UCSB's College of Engineering. Dr. Nawoj, assistant dean of engineering for undergraduate affairs said in a recent interview.

"A graduating UCSB engineering major can expect an average of six job interviews and three offers for career positions with an average starting salary of \$21,000," Nawoj said.

Though the job market sounds ideal for graduating engineers, not all the repercussions of the trend have been positive. The unforeseen growth in the field, has sent College of Engineering deans scurrying to find new faculty members just to keep up with the ever growing number of students in the major. Their task is further complicated by the increasing number of professors emigrating to industry jobs as well as a drop in the number of students willing to continue their schooling after receiving a B.A. Both actions are a result of the far higher financial rewards immediately available to engineers in industry jobs as compared to academia.

There are approximately 2,000 vacant engineering faculty positions in this country, according to Dean Myers of UCSB's College of Engineering. "UCSB has eight (vacancies), two in each department. We have lost six professors in the past two years," he noted. "Two to pursue academic specialties elsewhere, two for personal reasons and two to the industry for financial reasons. What's really saving us is the foreigners who come to this country, receive their Ph.D.s and stay, four of the last ten faculty members hired were foreign," he explained.

"Though many engineering programs across the nation are encountering severe student/professor ratio problems, 'UCSB has thus far has been able to accommodate everyone,' according to Nawoj, 'Right now we're running our classes at about capacity.'

Admittance requirements for engineering majors have become more exacting in the last three years in an effort to control the number of students in the major and also allow

applicants enough time to prepare, according to Dr. Nawoj. Applications for admittance in the Fall quarters are not accepted after Nov. 30 while none are accepted for Winter quarters, and applications for entrance in Spring are only taken during the month of October.

Three of the five engineering programs (mechanical, electrical, chemical, physical, and computer science) require a 2.75 GPA and the electrical and mechanical engineering classes are restricted to majors only.

With these restrictions and UCSB's limited faculty, the College of Engineering hasn't yet encountered a severe student/professor ratio problem, but with an increase in engineering majors still projected and only a small percentage of engineering students opting to continue their education after receiving their B.A.'s the search for qualified professors could become difficult.

According to Myers and Nawoj there is an alternative for those students wishing to continue their education but at the same time not willing to forfeit two years salary in the process.

"Many companies are providing time for a student to continue in graduate school by rearranging work hours and in some cases paying part of the tuition. I think this is the best thing a student could do; find a company who will finance their education while working on their masters," Nawoj said.

"But actually you don't go through grad. school to gain money," Myers said, "the only valid reason to go is to gain a better understanding of the field and to become closer to the frontiers of knowledge."

Teaching Posts

(Continued from page 3) teachers are most severe in the disciplines of math, science, vocational training, bilingual education, and special education (for the handicapped). Even the area of high school English, which had a large surplus of teachers just two years ago, is experiencing shortages in various parts of the country. The need for Spanish bilingual teachers is mostly confined to the West and Southwest.

Data compiled by the UCSB Educational Placement Program indicates that in California there are also teacher shortages in the areas of agriculture, business, drama, journalism, music, life science and physical science, and Spanish.

Students interested in a career in education can enhance their probability of employment after graduation by using foresight and planning while

they are still in school. Versatility is important, since the greater the number of extra abilities an applicant has to offer, the more desirable that person is to a school.

Another important consideration is graduating from a first rate credential program.

For general information about UCSB credential programs, call 961-4242 and ask for the Graduate School of Education. Prior experience working with school-age children is a requirement for admission to credential programs, and it is generally good preparation for student teaching assignments. At UCSB, such experience is available through the Pre-Professional Program, operated through the School of Education. To apply to this program, students should contact Marjorie Thompson in Phelps Hall 1174.

Class Credit with CalPIRG: WINTER PROJECTS

A Cable TV Co-op For Santa Barbara?

Santa Barbara's cable television franchise is up for renewal this year, and CalPIRG will be monitoring the process and studying the feasibility of changing the system from private to cooperative ownership. The cable co-op would be owned by the subscribers, returning millions of dollars in fees and profit to the community instead of to an absentee corporation. A cable cooperative could lead to lower rates, channelling of money into local media production, and increased public access.

Student interns will work with faculty and community members of the South Coast Communications Advisory Committee, helping to:

a) research the legal, economic, and political ramifications of the switch to cooperative ownership.

b) develop a plan for the transition to be presented to the S.B. City Council.

c) monitor the franchising process and establish lobbying and public support for the co-op proposal.

This project provides a great opportunity for students to do original and significant public interest work. Five people with interest or background in media, economics, law, or public policy are needed.

Class Credit: 4.0 units in Sociology, Communications Studies, or Political Science.

Standardized Testing Reform

CalPIRG is building a coalition statewide to pass a truth-in-testing law for California. The legislation will address reform of standardized testing practices and will affect the use of test scores in admissions from the undergraduate to professional school levels. Studies have shown that the weight given to test scores (e.g. SAT, GRE, MCAT, etc.), through built-in cultural and economic bias in the testing, put low-income and minority applicants at a disadvantage in admissions competition.

The California bill is currently being drafted by the U.C. Student Lobby, modeled on the New York Truth-in Testing Law. It will come before the Legislature for hearings in April 1981.

CalPIRG has openings for two or more people to research the use of standardized test scores in admissions at UCSB, to inform students of their rights as test takers, and to build grassroots support locally for the legislation. Background information, methodology, funding, and other resources for the project will be provided by CalPIRG.

Class Credit: 4.0 units through the EOP Academic Internship Program.

For details and to find out how YOU can get involved. Contact the CalPIRG office, UCen 3135, or call 961-3907.

Rape Crisis Hotline:

A Profile of Rape and Victim Services in Santa Barbara

This project will analyze data collected in the past five years by the Santa Barbara Rape Crisis Center Hotline. The goal of the project is to gain a more accurate picture of rape as it occurs in Santa Barbara, and to develop specific policy recommendations for the Rape Crisis Center, hospitals, law enforcement agencies, etc., toward more effectively meeting the needs of rape victims.

CalPIRG interns will work with members of the Rape Crisis Center staff to prepare the data for computer analysis, to interpret the results and formulate a statistical summary, and to write a final report for public release. Active follow-up in contacting local agencies with the results and policy recommendations will be a key part of the project.

Up to six students with a genuine interest in rape issues and a respect for the sensitive and confidential nature of all victim data are needed. Computer or statistical experience would be very helpful, though not required by all participants.

Class Credit: 4.0 units in Sociology or Psychology

Santa Barbara

Who Profits From Non-Profit Health Care?

A study of the private, non-for-profit sector in health care. Costs are escalating. Need they go so high? CalPIRG will examine the nature of the relationships among hospital board members, staff, sub-contractors, physicians and others who dominate the health care system. The study will seek to determine if and how any self-serving practices that exist add to health care costs. Interns will work two quarters under the supervision of faculty and community activist volunteers.

Class Credit: 4.0 units per quarter in Sociology.

Energy Conservation For Tenants

CalPIRG is looking for two or three interns to work organizing our Tenant Energy Conservation Program. The work will include:

a) arranging energy audits through local utility companies.

b) contacting managers and landlords of rental units to help tenants get energy improvements made.

c) distributing information on self-help, low-cost energy conservation measures to renters, and organizing workshops in which qualified local instructors will teach do-it-yourself energy repairs.

d) providing outreach and information to tenants and owners on comparative costs and energy savings, tax incentives, financing, etc.

Interns should have organizing ability, good communications skills, and the ability to work independently. Class Credit: 4.0 units through the Environmental Studies Internship Program (open to all majors).

Pick up CalPIRG's *Tenants Guide to Low Cost Energy Conservation* free at the CalPIRG office.

The UCSB women's basketball team returns to action tonight when Arizona visits Rob Gym at 7:30 p.m. The Gauchos are 12-5 for the year.

SPORTS

Women Challenge Arizona

By BARRY EBERLING
Nexus Sports Writer

Even though SCAA league play starts in only two days, the UCSB women's basketball team is not treating tonight's game against the University of Arizona lightly for three reasons:

—The Gauchos want to have momentum going into Friday's SCAA opener against the University of San Diego;

—The Gauchos want to knock off a Division I, Pacific 10 school, and;

—The Gauchos want to win their season opener in Robertson Gym.

"We're hoping we can pull off a good game against Arizona and be primed for San Diego," Gauchos head coach Bobbie Bonace said. But she also said a victory won't be easy.

"They will be looking to win because they have some tough games coming up, and it never looks good for a Division I school to be beaten by a Division II school," Bonace said.

"Also, we beat them last year, and they may be coming here with a little bit of a grudge," she added.

Bonace isn't sure exactly what to expect from Arizona, but she doesn't expect the game to be easy.

"Their head coach, Judy Liwinter, used to play for UCLA," said Bonace. "Because of the caliber of player Judy was, I expect Arizona to use a man-to-man defense and the fastbreak. I don't expect a lazy team."

"Also, they have a big team, so they may go inside," Bonace continued.

The Gauchos don't have a bad team either, though. UCSB is coming off an impressive 55-49 victory over another Division I school, the University of Hawaii, and Bonace says her squad is playing good basketball.

"The team's preseason level of play is exactly what I wanted," said Bonace. "Our defense has been outstanding."

The University of Hawaii will probably second that statement. They hit only 26 percent of their shots in the first half last Sunday while falling behind UCSB, 30-21.

The contest also showed the Gauchos ability to adjust to their opponents' game plan.

"They played a 2-3 zone in the second half and we had to slow down," said Bonace. "We were patient, and changed our pace to match the defense."

The Gauchos have received outstanding play this season from Patty Franklin, who has made every all-tournament team she has been eligible for. UCSB hasn't built its 12-5 record with a one-woman team, though.

"Every player has contributed," said Bonace. "One of our strengths is our depth. We are deep through 14 players. We have kids who come in for two or 10 minutes and do a great job. This adds to our strength."

Bonace's attitude toward her team's weaknesses also reflects the team's development. At the beginning of the year, she would often point to the squad's inexperience, but not any longer.

"We are no longer rookies, we are veterans," said Bonace. "The mistakes we made before are no longer acceptable."

The Gauchos will have an extra incentive to play smart basketball against Arizona.

"This is our first game in Robertson Gym and we're excited about that," said Bonace.

Game time tonight is 7:30.

U.S. Gymnastic Trials Set For Events Center in Fall

Fifteen to twenty of America's premier male gymnasts will compete at the UCSB Events Center to determine the United States team for the 1981 World Gymnastics Championships.

The U.S. trials, which will take place on Oct. 16-17, will be nationally televised on the CBS network. Seven of the men participating will represent the U.S. at Mexico City in November at the World Championships.

UCSB athletic director Ken Droscher made the announcement along with the U.S. Gymnastics Federation on Christmas day. Droscher said he was

"extremely happy" that the event is being held at UCSB but was quick to give the credit to first-year gymnastics coach Steve Johnson. Johnson came to UCSB this year after the men's gymnastics program folded at Colorado State University.

Jay Ashmore, director of events for the U.S. Gymnastics Federation, said that Johnson "did a very efficient and capable job of holding championships and trials at Colorado State."

Bart Conner, currently America's top gymnast, is expected to compete along with Jim Hartung and

Phillip Cohoy. Hartung and Cohoy led Nebraska to the 1980 NCAA gymnastic title.

The World Gymnastics Championships were last held in 1979 in Ft. Worth, Texas. The American team, led by Conner and Kurt Thomas, placed third.

Ashmore was pleased with his visit to the UCSB campus. "I visited your campus and was very impressed with your facilities at the Campus Events Center and with the enthusiasm and interest that was put forth by Steve (Johnson) and your athletic director Ken Droscher. They certainly sold me on Santa Barbara."

Winter Intramurals Begin Next Week

The winter quarter may just be two days old, but already it is time to start getting your old teammates together or finding new ones to participate in UCSB intramurals. The deadline to sign-up for most team sports is Friday.

The winter quarter IM schedule (see above) includes men's and women's basketball, soccer, coed softball, mixed doubles tennis and the newest addition to IM sports — coed bowling.

In the past, bowling was conducted on a low competitive level. But this year, with the help of Orchid Bowl, the leagues will be run just like normal bowling leagues. Competition will take place every Monday night at 9 p.m. with a minimal fee being charged to cover lane fees, shoe rentals and trophies.

Five weekend tournaments are set for this quarter. They are two-on-two basketball, coed tennis doubles, coed four-on-four volleyball and racquetball singles.

Three divisions of play will again be

utilized to give everyone a chance to compete on their own level. "A" leagues are for the highly skilled and competitive athlete. "B" league participants cover a wide range of abilities while "C" leagues cater to the beginning IM participant.

Intramurals are free to all UCSB students. Faculty and staff wishing to participate must pay a yearly fee of \$6 while non-students are required to pay \$10 per year. Teams are limited to two non-students each and are encouraged to sign up early to insure a spot in a league.

Teams are taken on a first-come, first-served basis. If you are not on a team but want to participate, you can sign up as an individual and be placed on a team.

The whole concept behind intramurals is not so much to win but to participate. According to IM director Paul Lee, over 10,000 people took part in UCSB intramurals last year. Remember sign-ups for this quarter end on Friday. If you want to join in on the fun, drop by the IM trailer which is located next to Rob Gym.

WINTER 1981 INTRAMURAL SCHEDULE

MEN'S/WOMEN'S LEAGUES	SIGN-UPS DUE	PLAY BEGINS
Basketball	Noon, January 9	January 13
Soccer	Noon, January 9	January 13

Trial Challenge

(Continued from front page) was awarded in the form of a summary judgement when Minow was the "prevailing party," Sanborn added.

Depending on the results of Judge Steele's deliberation, either side may have the opportunity to appeal, or a new trial could be granted.

Nexus and Minow originally lost on all counts within the libel suit, including determination of guilt of libel, libel "of the plaintiff," intention "with malice" in the printing of the material, and recompensation for damages; \$15,000 in compensatory damages and \$3,000 in personal punitive damages.

The suit, which dated back to 1976, involved charges made by Glass that the Nexus, former UCSB Chancellor Vernon Cheadle, James Minow, and the UC Regents had libelled him and caused him emotional distress. Glass also charged that he had been libelled by the printing of various

editorials and cartoons in the Nexus, under Minow's editorship, which deliberately defamed Glass in an attempt to prevent him from becoming External Student Body President.

IVMAC

(Continued from front page) pursued the venting problem since it originated. Buttney and Tiera Davies of the Winchester Canyon area have been following the issue for the last several months in conjunction with English.

Buttney appealed to the council Monday for funding for leaflet distribution on the issue, and he may receive up to \$1,000 previously earmarked for the Community

Development Block Grant Program of the county.

"The leaflets will describe hydrogen sulfide poisoning," Buttney said. They will also include a 24-hour hotline number for reporting the sulfide odor in the area, according to Buttney.

Funding for the leaflet may also come from the Goleta Municipal Advisory Council, Buttney commented.

The council also discussed the possible installation of 42 new fire hydrants in I.V., which has been declared a fire hazard by the fire marshal of Santa Barbara. Under the county's plan, all buildings constructed in I.V. before 1973 would be allowed a hydrant hookup at the owner's expense. This plan would include all I.V. buildings, since building construction was thwarted in

1973. Possible remedies for the wild dog problem in I.V. were also discussed by the council, including a poster campaign and community awareness program. Santa Barbara County officials will hold a Rabies Vaccination Day in Anis'q'Oyo Park in January.

Waste

(Continued from front page) Channel Islands National Park and National Sanctuary regions.

The Santa Barbara Board of Supervisors and Congressman Robert Lagomarsino (R-Santa Barbara, Ventura) have also requested federal monitoring of these sites and legislation for this purpose, HR8119, is before Congress.

Interning Positions Available

An excellent way for students to gain "real world" experience while enrolled at the university is to participate in an internship. Internships can place you directly into a job situation in which you can explore potential careers and focus on future goals.

The Environmental Studies Program has an outstanding internship program open to qualified students from all fields. Students must be juniors or seniors, have a 3.0 GPA, have the proper academic background for particular internships; and a lot of motivation. Since 1973 over 550 students have participated in this academic internship program.

If you are interested in environmental law, planning, environmental education, careers with the Park Service, the solar future, environmental journalism, working with animals, botanical projects, recycling, political issues and much more, then contact: Katherine Holden, Internship Coordinator, Environmental Studies Program, 3314 Phelps Hall, 961-3185.

Volunteers Needed
for giving speeches about TAY-SACHS Disease Prevention Program, and / or work on Tay Sachs Testing Services at UCSB.
This is a one-time request, you may work a few hours, a few days or a few weeks.
ORIENTATION MEETING
for volunteers
Thursday, January 8,
3rd Floor UCen, CAB Office. Call CAB 961-4296 for more information.
