City Council Revises Local Rental Policy

By DEBBIE NESTOR
Nexus Staff Writer

To eliminate discrimination on the basis of income, race, ethnicity and religion in rental housing, the Santa Barbara City Council amended a proposed housing ordinance at Tuesday's meeting.

The original ordinance prevented landlords from discriminating against families with children by making it illegal to set arbitrary occupation limits on the number of people allowed to live in an apartment. But the ordinance failed to address the issue of income discrimination which is often used by landlords to discriminate against families with children, Nick Pagat-Clarke, spokesman for the Santa Barbara Tenant's Alliance, said.

"It (the ordinance) is an extension of a state law that prevents discrimination in renting to families with children," Santa Barbara Mayor Sheila Lodge said.

Many of the citizens who testified at the meeting did not believe eliminating income discrimination was strong enough and wanted racial, ethnic and religious concerns covered in the new ordinance.

Research Monies

Bill Calls For Bond Sale Project

By JACQUELYN AFFONSO
Sacramento Correspondent

The University of California's wish to expand its research capabilities would be granted under a bill authorizing the construction of research centers through public bond sale.

The Senate Education Committee unanimously approved the bill Wednesday.

Senate Bill 1504, authored by Senator John Garamendi (D-Walnut Grove), would authorize the State Public Works Board to sell revenue bonds to private investors to raise money for the construction and renovation of research facilities on all nine U.C. campuses.

All projects are subject to legislative approval.

Introduction of the bill was prompted by a survey of the research needs of each campus. University chancellors submitted research facilities to Garamendi's office they would like to have if funds were available, according to Garamendi's Senior Consultant Masako Dolan. The requested projects totaled over \$400,000.

Dolan said the bill was introduced to allow the university to build organized research centers exclusively for its faculty. Existing research facilities were built for the purposes of teaching and research combined based on student enrollment, she said.

Garamendi told the committee more research would consequently boost the state's economy. "The centers of research will be a wise investment for the state of California."

The bond sale funding mechanism proposed in Garamendi's bill is not a new one. Funding of university high technology research facilities was approved by the legislature last year. The statute was authored by Senator Nicholas Petris (D-Oakland) and is referred to as the "Petris bill." Garamendi's bill does not change the existing funding provisions under the statute, but only expands them to include research facilities, Dolan said.

Dolan said it is likely that other categories of projects eligible for bond funding will be introduced. "Once the mechanism has been established there is a realization that there are other needs." The committee approved a bill last week to fund library facilities with revenue bonds.

Even as the committees approve the inclusion of other projects to be funded under the Petris bill, the funding mechanism is being questioned.

On the heels of his research financing bill comes a "cleanup" bill by Garamendi designed to correct the misleading intent of the Petris bill. A flaw in the statute has caused a delay in the bond sale for fun-

U.C. Admissions Board Weighs Change In Redirection Policies

By MONICA TRASANDES
Nexus Staff Writer

The University of California Board of Admissions and Relations is considering eliminating the U.C. redirection system and having new students file multiple applications directly to each U.C. school they would like to attend.

Currently, students apply directly to their first choice campus within the U.C. system. Applicants must list in order of preference the other universities he or she would like to attend if a first choice campus should be full, U.C. Director of Admissions and Outreach Services Ed Apodaca said.

The greatest number of applicants are being redirected from Berkeley and UCLA. In the fall of 1983, 9,000 applications were redirected from Berkeley and 2,500 from UCLA, Apodaca said.

"The problem is that after these students do not get into Berkeley or UCLA with a 3.8 or 3.9 grade point average, they are redirected to another U.C. campus where they

will only be considered after all qualified first choice applicants have been accepted, Apodaca explained. Having students file multiple applications would allow top students to be considered as first choice applicants at all the campuses, he said.

For years Santa Barbara has been the leading second choice for redirects, Apodaca said. "This fall we had so many applicants in November that we closed early and did not accept any redirects. We also did not redirect anybody so that everyone who applied in November got in," Director of Admissions at UCSB William J. Villa said.

In the past, 10 percent of UCSB freshmen have been people who were redirected, Villa said.

It is difficult for UCSB administrators to determine how this policy change would affect UCSB. Santa Barbara may end up competing head to head with Berkeley and UCLA, Villa said.

The departments of computer science and engineering on all U.C.

campuses have started utilizing the multiple-filing systems this academic year, Apodaca said.

The proposed expansion of redirection changes is presently under review by the administration. "It is being evaluated to see if it is the best (option)," Apodaca said.

It is possible that UCLA and Berkeley could begin evaluating applications earlier, allowing those students not accepted time to apply at other campuses, Apodaca said. Another option would be to keep the present system but better inform students and urge high schools and universities to give less encouraging advice to the student about his or her chances of getting into the more popular universities, he added.

"I think it's (eliminating the redirection system) a premature move until we assess multiple filing in impacted areas. Then maybe we can talk about multiple filing across the board," Villa said.

He also believes elimination of

Channel Islands Purchase Stalled By Lack Of Funds

By RANDY ZARECKI
Nexus Staff Writer

The National Park Service's plan to purchase Santa Rosa Island and the east end of Santa Cruz Island to alleviate vegetation damage caused by felling and sheep ranching is still awaiting federal funding appropriations.

The purchases would place Santa Rosa and Santa Cruz Islands under National Park jurisdiction. Anacapa, San Miguel and Santa Barbara Islands are currently governed by the park service, while all five islands lie within the National Park boundary, National Park Service Public Relations Officer Nick Whelan said.

The 1980 land protection plan for the islands, which established the Channel Islands National Park, allows for the purchase of the land "to preserve historical and natural resources of the island," co-owner of the Santa Cruz property and rancher John Gherini said. Yet the National Park Service lacks necessary funding to purchase the land, he explained.

A clause in the park purchase law requires all of Santa Rosa Island to be purchased before any Santa Cruz property can be acquired, Gherini explained.

The Gherini family's 6,000-acre sheep ranch, located on Santa Cruz's east end, has been labeled detrimental to the preservation of the island by environmentalists. Scientists believe feral pig habitation throughout the 60,000-acre island has a

more serious effect, even though the pig activity has not been empirically studied, Whelan said.

If the National Park Service receives the necessary funds to purchase the Gherini property, the remaining 90 percent of Santa Cruz will remain under Nature Conservancy control and be managed similarly to the park, Whelan said.

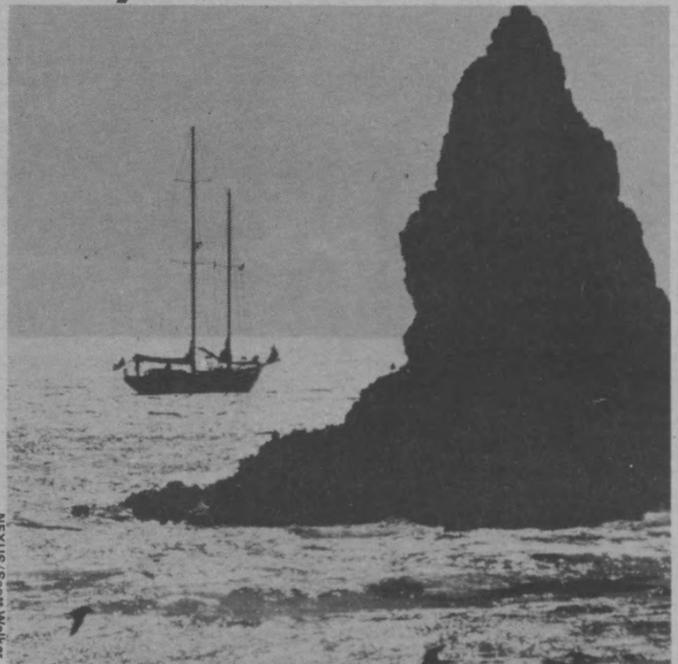

There are also wild sheep on conservancy property which is co-owned and managed by Dr. Carey Stanton, who has conducted sheep hunting expeditions on the island in the past, Gherini said.

The final land protection plan fails to address the controversy over the use of conservancy land. Gherini believes this is inconsistent with the overall purpose of the plan. National Park legislation remains to be the major problem, he said, adding it is insensitive to landowners who are "frozen out" of transactions.

"Nobody likes land taken away from them," a Vail & Vickers Co. spokesperson, the owner of the 55,000-acre Santa Rosa Island, said. The company operates cattle ranching on the island, and has been there since 1902.

There has been "talk of a National Park which would include all five islands for 40 years," but the lack of federal money has always been and remains the most questionable issue, Gherini said.

Under the current proposal Vail & Vickers will be allowed to maintain their cattle ranch and have indicated no opposition to the sale if conducted soon, Whelan said.

NEXUS/Scott Walker

Anacapa Island is already a part of Channel Islands National Park; soon Santa Rosa and Santa Cruz Islands may fall under the protection of the national park also.

Beirut Fighting

Beirut, Lebanon — Hundreds of artillery shells and rockets crashed into Christian and Moslem residential areas of Beirut on Wednesday, killing more than 30 people and wounding more than 100.

The violence was the worst since a cease-fire was declared March 13 by participants at a Lebanese reconciliation conference in Lausanne, Switzerland. The two-hour bombardment came amid reports that President Amin Gemayel planned to convene a political-security committee of representatives of the various warring factions at his palace in suburban Baabda Wednesday evening.

Beirut was not the only site of violence. In the southern Lebanese village of Jibchit, at least three civilians were killed and 10 wounded in a confrontation at a mosque. Lebanese reports said Israeli forces killed six Shiite Moslem villagers who had thrown stones at the soldiers, but military sources in Tel Aviv said the forces involved were Israeli-supported Lebanese Christians.

Nietne, Poland — Communist authorities have ordered defiant teen-agers to obey a ban on crucifixes in classrooms or quit school, an official confirmed Wednesday. Many students said they'd leave.

Bishop Jan Mazur, meanwhile, entered the second day of a bread-and-water fast to protest the government's position in the three-week-old conflict between church and state.

Ryszard Domanski, administrator of the agricultural high school where the "war of the crosses" began, confirmed that the school's 600-plus students would be barred from class unless they or their parents signed a declaration agreeing to abide by school regulations.

Washington — A Democratic leader Wednesday predicted Senate approval of a compromise \$61.7 million military aid package for El Salvador, but Secretary of State George Shultz said he would resist any move to cut off the aid if the government now being chosen is overthrown in a military coup.

"I think it is not necessary and is inappropriate to seem to be predicting that possibility," Shultz said. "The military in El Salvador had gone to great lengths to depoliticize themselves. I don't see any evidence of anything to the contrary."

Shultz made his remarks to the Senate Appropriations Subcommittee that oversees the State Department budget.

WEATHER — The day will begin with low clouds which will clear by mid morning and the rest will be fair. The temperature highs will be in the low to mid 70s and the nightly lows in the low to mid 50s.

Nation

Democratic Candidates Argue In Television Debate

New York — Walter Mondale and Gary Hart debated in heated and personal terms Wednesday night about the charges they had been leveling at one another in the ever more intense Democratic presidential campaign.

Debating six days before the New York primary, the two presidential candidates lost little time going after each other in the nationally televised debate broadcast from Columbia University.

Mondale demanded that Hart act "this night" to withdraw television advertisements "that suggest I'm trying to kill kids."

Retorted Hart: "Why do you question my commitment to arms control and civil rights?"

The Rev. Jesse Jackson said, "Tomorrow the issue will be this rat-a-tat (between Hart and Mondale) without giving a direction. The fact is, the reason they are having this kind of a kinship struggle is because there are such similarities in policy."

Two of the five historic cannons found three years ago at Goleta Beach are extracted by archaeologists. See story page 3.

State

Economic Boost May Bring In More Money

Sacramento — California's economy, in the doldrums a year ago, has improved so much that the state could have a \$2 billion reserve by June 1985, a state commission reported yesterday.

"The recovery, instead of continuing, has in fact accelerated in the first quarter" of 1984, said James Burton of the Commission on State Finance staff.

"California has substantially outpaced the national recovery. You could almost characterize our economy at this point by being somewhat hot."

Burton presented the commission staff's quarterly forecast of state government revenues to the commission members, who are the state treasurer, controller, finance director and top four legislative fiscal experts.

Los Angeles — Teachers at a Manhattan Beach preschool used their "position of special trust" to force at least 125 children into pornographic photo sessions with

themselves and strangers under the guise of playing "Naked Movie Star" or "The Hollywood Game," investigators allege.

Youngsters' claims that they were photographed in sex acts at the Virginia McNartin Preschool mean "the case has grown to much greater proportions" than when the schools' 76-year-old founder and six teachers were indicted, Deputy Attorney Lael Rubin said yesterday.

San Francisco — The Nuclear Regulatory Commission, armed with a new study on the subsea seismic fault near the Diablo Canyon nuclear power plant, has ordered Pacific Gas & Electric to make a full-review of all its fault research on Diablo, it was reported yesterday.

Principal author of the study was geologist and geophysicist James K. Crouch, who told the *San Francisco Chronicle* that "we argue that our data show a fairly strong component of thrust (or up-down) faulting along the entire Hosgri zone."

second largest city Wednesday, and residents living in its path made plans to leave if the molten rock threatened their homes.

"I'll jump in one car and my wife will jump in another car and we'll grab what we can," said Victor Souza, 34, whose home is among those nearest to the flow.

There was no immediate danger to populated areas on the island of Hawaii, said Reggie Okamura of the U.S. Geological Survey's Hawaiian Volcano Observatory. The main flow reached a fairly flat area and its advance slowed to about 400 feet per hour, he said.

Las Vegas — Several thousand union members were scheduled to march on the Las Vegas Strip Wednesday night in a stormy prelude to a strike the powerful Culinary Union may call against Las Vegas resorts Monday.

The demonstration came as both sides escalated their war of words.

Concern over drug trafficking in the nation's public schools clashed with student privacy rights Wednesday in a spirited Supreme Court debate.

A New Jersey prosecutor said all drugs seized by public school officials, even in unlawful searches, should be allowed as trial evidence when students are criminally prosecuted.

State Deputy Attorney General Allan Nodes said school searches must be exempt from the "exclusionary rule" which bans presentation of evidence illegally seized by the police.

But Lois DeJulio, a lawyer representing a former high school student, said such an exemption will rob students of an important lesson — "that our constitutional system of government is more than a collection of empty promises."

Hilo, Hawaii — A mile-wide lava flow from Mauna Loa slowed but moved to within seven miles of Hawaii's

Beach Discovery

Local Scientists Restore Historic Goleta Cannons

By JAMES ALEXANDER
Nexus Staff Writer

With new financial backing local authorities have resumed the restoration of five cannons uncovered in 1981 in the surf at Goleta Beach. Scientists involved in the \$5,000 project are questioning the origins of the guns.

A storm and "months of coastal erosion of beach sand exhumed the iron guns after a burial" estimated between 100 and 300 years, UCSB Newswriter Bob English said.

With the help of volunteers from both UCSB and the community, the cannons, weighing approximately 800 pounds each, were extracted from the ocean.

Following the excavation controversy began over who would gain possession of the cannons, English said. Through negotiation, ownership of the cannons was given to Santa Barbara County by the State Land Commission, he explained. The county, in turn, authorized UCSB to conduct the restoration process.

"Two of the five guns already have been cleaned of successive layers of

magnetite, iron oxide, sand, tar and seashells," English said.

These guns "have been undergoing an electrolysis treatment for the past year to reverse the effects of oxidation," English explained. The remaining three cannons are currently being preserved as found due to lack of funds.

Treatment of the remaining three cannons will begin when the first two guns complete electrolysis, a lengthy process which removes rust forming salt from the metal, Head of the UCSB Office of Public Archaeology Pandora Snethkamp said.

Snethkamp said the first two cannons should complete electrolysis within two months, and after a series of final cleanings will be ready for display. She estimates completing work on the other cannons in two years.

The guns may have fallen from the deck of the schooner Dorotea when she ran aground outside the

Goleta slough in 1829-1830, John Ruhge, author of *The Historic Cannons of Goleta*, believes.

Another theory states the cannons were left behind by Sir Francis Drake and Goleta Bay is actually the harbor named Nova Albion by Drake, according to Jim Gilmore and Jack Hunter in their book *They are the Guns of Goleta*.

UCSB History Professor and underwater archaeologist Frank Frost disputes this theory. Drake would have to have made a four degree latitudinal error to arrive in this area, he explained. Of "a list of 40 latitude positions taken from Drake's chronicles," Frost argues, "the greatest error... ever made was about one and a half degrees."

English said the cannons are believed to have originated in Great Britain. He hopes identification marks will be found on the cannons during restoration, thereby putting an end to the speculation.

Yore Cheatin' Heart...

A recent report on academic dishonesty completed by UCSB Anthropology Professor Brian Fagan documented how pervasive cheating is on this campus. The study was conducted by the administration as a preliminary step in an effort to deal with this growing problem. It remains to be seen whether the policy recommendations in the report will be implemented or ignored.

A large percentage of students have had some sort of experience with cheating in their time at UCSB, whether as observers or participants. Most of us have seen it before — someone feverishly scanning notecards while the professor is out of the room or furtively glancing over the shoulder of the person in the next seat during an exam. It is a familiar scene, and not difficult to comprehend.

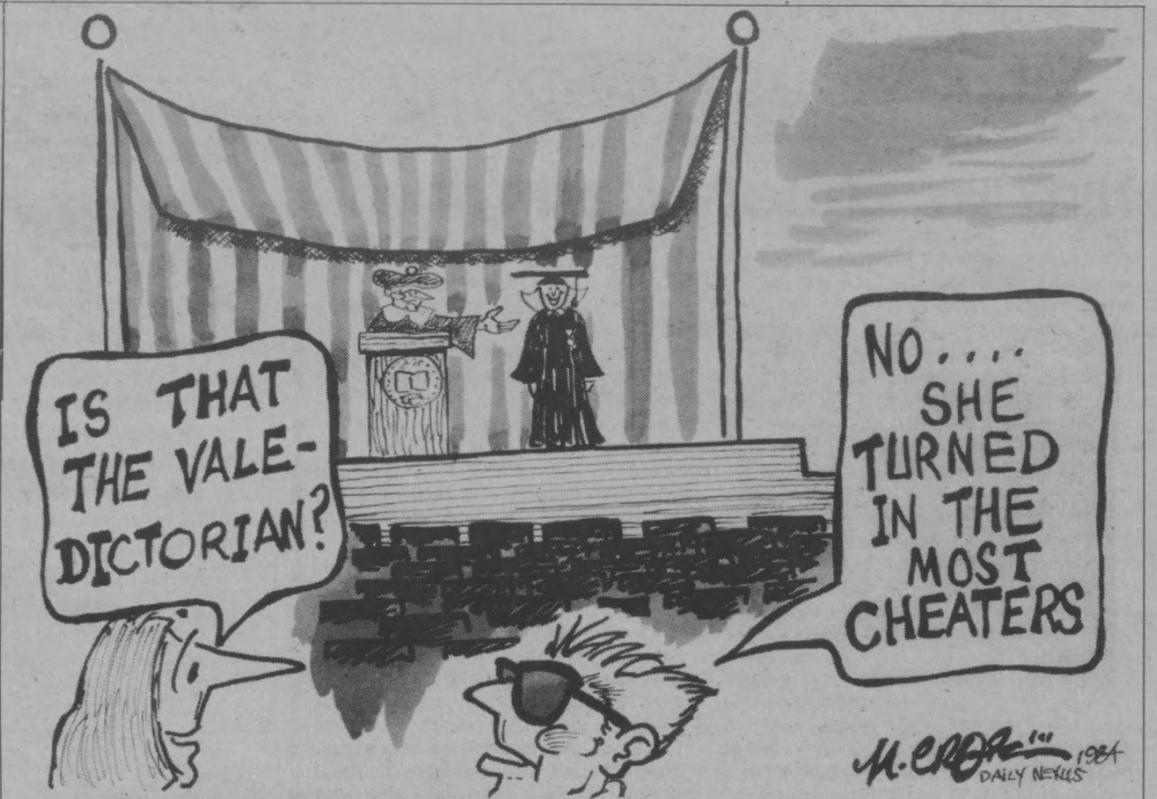

Cheating is an inevitable by-product of our educational system. The pressure to do well on midterms and finals is intense and unrelenting; the incentive to attain real knowledge is displaced by the all-consuming desire for good grades. The competitive system often rewards the most able regurgitators, rather than those who seek understanding in a particular subject area. Too many individuals consider their future to ride on their grades, and it is not surprising many resort to whatever means necessary to achieve a high GPA.

Past efforts to solve the cheating problem have centered upon improving detection techniques in order to catch more culprits in the act. But these attempts are futile and will perpetuate the problem they seek to correct. Cheating is the symptom of a sick system, and improved enforcement methods will only engender more sophisticated cheating techniques.

Reform of the system was recognized as the most effective deterrent to cheating in Fagan's report. He advocated new teaching methods, such as progressive learning and testing, which would remove some of the pressure from examinations. This technique eliminates student competition, allows individuals to complete all the course work at their own pace, and ensures that those students who master the material receive an appropriate grade. Progressive testing replaces competitive pressure with the pressure to learn, and eliminates the incentive to cheat.

Myriad other possibilities are available, but it is up to the administration and individual faculty to implement them. Since this is not likely any time soon, students can expect more effective policing in the classroom.

This is a disagreeable scenario, so here are a few words to deter prospective cheaters from further dishonesty: The university offers an invaluable opportunity to expand one's awareness and broaden intellectual perspectives; please do not squander it. Strange as it sounds, good grades are not as important as what is actually learned. These words may not provide much solace when faced with a poor report card, but heed them anyway; you might end up with a greater sense of self-worth. And if you don't, beware the karmic backlash waiting 'round the corner.

LETTERS

Bookboard

Editor, Daily Nexus:

At the beginning and end of each quarter masses of UCSB students line up in front of the UCen and IV bookstores to sell back their used textbooks at whatever price the bookstores feel is reasonable. Each one of us has had the experience of lugging around a \$30 textbook all quarter and receiving \$7 at the end of the quarter for it. Then, to add insult to injury, the bookstores actually have the nerve to turn around, slap a little yellow sticker on the book that says "used" and sell it to another victim (student) for \$27.95.

Fortunately there is a solution to this very expensive habit. The CalPirg/A.S. bookboard offers a chance for students to buy and sell textbooks directly with each other. That's right, no more middleman. Current bookboard prices are hovering around an equilibrium that is far lower than bookstore prices yet also greater than the meager amounts the bookstores will give you on a buyback. Supplements and other class materials can also be bought and sold through the bookboard. What the heck, as long as we're getting revenge on the UCen and IV bookstores, we might as well nail Kinko's and the Alternative too.

The bookboard is located on the first floor of the UCen at the bottom of the steps near the Post Office. Of course the bookboard is not the answer for all class material needs but it will save you money. Right now there is a wide selection of books for sale (around 250) with especially strong showings from the subjects of Economics, Math,

Sociology, Political Science, English and Psychology. So hurry up and check it out so you can get the best deal.

Dave Wappler

Harvest

Editor, Daily Nexus:

The situation in Nicaragua is extremely critical at this time. The Nicaraguan economy which depends heavily on only a few agricultural exports has been under increasing attack from CIA-backed counterrevolutionaries. Several hundred million dollars worth of damage has already resulted from attacks such as the one against the vital oil storage facilities at the port of Corinto last October.

Nicaragua needs a successful coffee harvest to be able to purchase basic foodstuffs, medicines, spare parts for industry and transportation, and oil. Because of the urgent political and military situation, many Nicaraguans have been mobilized in the defense of their country and cannot participate in the December-February coffee harvest this year.

That is why I have chosen to respond to Nicaragua's call for international work brigades to ensure a successful coffee harvest this year.

In the United States, the National Network in Solidarity with the Nicaraguan People (NNSNP) is working to coordinate volunteer participation. U.S. citizens have a particular role to play in this harvest, because if it were not for our own government's open attempts to overthrow the government of Nicaragua, the Nicaraguans would be free

to develop their own political life and their own economy in peace.

By participating in the volunteer coffee harvest, I hope to show that as an American citizen, I stand with the people of Nicaragua in their moment of need and that I oppose the policies of the Reagan administration. I urge others who hold similar beliefs to write to NNSNP for further information on how to help the people of Nicaragua and to make donations. Their address is NNSNP, 2025 "I" Street NW, Suite 402, Washington, D.C., 20006.

The time has come to give Central America back to its people.

David L. Wiltzie

Disgusted

Editor, Daily Nexus:

Recently, I brought my father's telescope to UCSB from Los Angeles thinking that, since Santa Barbara is considerably smaller than L.A., I could really get a good view of the stars. I thought that on Campus Point, I wouldn't have city lights adding to the atmospheric conditions that would obscure the heavenly bodies. But, when I arrived at the point, I thought that I was in Los Angeles because of the unnatural glare coming from the oil rigs, UCSB, and the Santa Barbara area. After carting thirty pounds of telescope down to the beach at twelve midnight, my ambition of seeing the stars were smashed by the "Big City" lights of the area. My friend and I were thoroughly disgusted. Boy, if we were in a wartime situation, high flying bombers would not know the difference between L.A. and Santa Barbara. In fact, I think this glare would blind the pilots. I long for the time when I could walk along the beach and see the beauty of the night sky without

having it lit up like the fourth of July. Yet, as our cities grow, I can only feel sad that we will never be able to enjoy the night sky without having to drive hundreds of miles to the desert or some remote place.

Robert Durand

Wake Up

Editor, Daily Nexus:

When is the A.S. going to wake up? Don't they know they can't please everyone in the issue of married student housing? It's gotten to the point where if one person says "discrimination," A.S. will take steps to change things. Why doesn't A.S. draw a line? They refuse to take a stance that requires them to differentiate between what is discrimination and what isn't.

This is the story: I'm being discriminated against since I'm not allowed to live in married student housing. I'll file suit stating that I'm allegedly being denied housing because I'm single, gay, lesbian, hetero, black, white, or polka-dotted. I'll select a sufficient cause so that an A.S. club with political clout can back me up to help me get what I want. Then, A.S. will pass legislation stating "polka-dotted students should be able to live in family student housing."

Why doesn't A.S. save itself all that trouble and do what it really wants to? Let anyone live in family student housing.

Thoughts On Spring

Despite appearances to the contrary, spring, not summer, is the season which begins March 21 with the vernal equinox and ends June 22. For many people, spring can't possibly begin without the first sighting of a redbreasted robin. Others are rendered incapable of recognizing the change of seasons until they read the first box score of the new baseball season. Such baseball fanatics usually cloister themselves from the moment of the last out of the World Series, and their very appearance is a sure sign of spring.

Spring is not only a time for baseball, but for base desires as well. During the spring, youthful spirits are evoked which correspond to the regenerative processes of the earth, as deadly winter leads to the bringing forth of life. Longer hours of daylight and the fresh scent in the air are aphrodisiacal, as the relationship of the terms spring and offspring are not coincidental.

The significance of the seasons may be lost on those who don't experience the coldness of a snowy winter. At times Santa Barbara seems immune to the fluctuation of seasons, as the pervading sunshine gives a feeling of constant springtime. Awareness of spring is difficult, however, when there are no other conditions with which to compare. In most regions of the United States, leaves fall off the trees at the end of

autumn, and foliage doesn't return until March. The effect of a barren landscape is to heighten the anticipation and resultant joy of spring.

In areas of snowfall the last weeks of winter tend to become dreary, as the bitter cold and grimy snow become exceptionally grim. But as the snow thaws and the leaves return, everything is seen anew, and the welcoming signs of spring are everywhere. Dew, rather than frost, begins to cover the early morning ground. The dying vegetation of late fall is replaced by blossoming foliage, as the first signs of harvest are visible.

Once spring is seen as something which emerges, it proceeds to affect you. Poets speak of "love which is never so potent/ as in the springtime, Heaven sent." Vernal attractions are the most powerful (and plentiful) because the sensations of blooming flowers and watching the life cycle sets off a reaction in the body. This reaction is a primitive urge to participate in the cycle, as spring is an open invitation for indulging in sensual pleasures.

Mankind participates in experiencing spring spiritually as well as physically. Not surprisingly, both Easter and Passover are commemorated in spring, when man's awareness of his surroundings is most acute. The inspiration for freshness and newness is greatest in spring, as "spring

cleanings" demonstrate. Spring has a year-round basis. Christopher Croton is a junior English literature major at UCSB.

Womanwise

Abortion: The Painful Struggle

Editor, Daily Nexus:

The topic of abortion I feel is a very important and relevant subject for women today. I recently underwent an abortion and it proved to be a very painful experience. Whether or not you print this story, I hope that in the future you will print something on the subject of abortion.

The actual writing of this story was helpful for me in terms of sorting out thoughts and feelings. The idea to submit my therapeutic writings came after I read the article on fathers in the *Daily Nexus*.

I think *Womanwise* is the best thing to happen to an already great school newspaper. Keep up the good work and thanks for listening.

Editor's Note — The preceding letter was submitted unsigned in a sealed envelope to the *Womanwise* box.

Early abortion is performed by means of the vacuum aspirator. The opening in the cervix is gradually stretched by a series of long, narrow rods (dilators), each a little wider than the one before. The largest one may be about as thick as a fountain pen. When the cervical opening is wide enough to admit it, a blunt-tipped tube is inserted into the uterus. This is attached to a suction machine, which is then turned on. During this procedure (which will last approximately five minutes), you may feel moderate to severe menstrual type cramping. After the initial aspiration, the doctor will check to be certain that the abortion is complete by scraping the uterus with a spoon-like instrument called a curette. If necessary, the vacuum aspirator will be used again for a few seconds to ensure a complete abortion. — Excerpt from a Planned Parenthood Handout.

The most sensitive and understanding of men are incapable of comprehending the physical and emotional trauma of abortion. Even an unabridged dictionary or thesaurus does not contain enough words to describe the

scope of emotions a woman faces with abortion.

The process of pregnancy ending in abortion is twofold: physiological and psychological. The difficulty of this process is that the two components must be made while the body is in a state of hormonal chaos, with or without the aid of a partner. The obvious decision is not as obvious as it may seem to the rational observer. I believe the mental anguish surrounding abortion is universal. Though the circumstances may vary among individuals, the concept of sacrificing a life, be it yours or the child's is not easy to grasp.

The protagonist of this story is a career-minded college woman who recently grappled with the decision of abortion. The protagonist of this story is myself.

My period was a week late. The decision to get a pregnancy test was merely a formality to confirm what I already knew to be true. As I expected, the result of the test was positive. The visual, written proof was the catalyst necessary to create a multitude of reactions. Disbelief: "Why me?" "Maybe the test is wrong." Anger: "What an idiot, I am an intelligent woman! This should not have happened." And incredible sadness producing tears and more tears.

Realizing that my hormones were off balance, which put my emotions in an uproarious state, I forced my practical side to take charge of the situation.

While my physical body was perpetually tired, feeling sick and hungry at the same time, my feelings were requiring nurturance and support. The mind-body split was complete.

Throughout the preceding, I was also providing reassurance for my partner, dealing with the financial aspect, attending classes at UCSB (in body only), and generally feeling overwhelmed and depressed.

Since neither my partner nor I could meet the ensuing expense, the problem of finances was just a matter of

bureaucratic red tape called Medi-Cal. Luckily the program of emergency Medi-Cal still exists, no thanks to Reagan. Medi-Cal was a three-step process. The first step was the creation of a file. To create the file required a two-hour wait after which an impersonal woman in purple polyester allowed me past the security guard into her office. The lady in purple then took my name, reason for request for assistance, handed me masses of forms and made sure I knew they were doing me a favor. The total interview lasted 10 minutes. I missed one class.

Step two consisted of a comparably short wait and 45 minutes of intense scrutiny of my financial status. I missed another class. The final step was relatively simple: picking up the fruit of our labor, the card.

Feeling confident and filled with support from close friends, family and that special someone, the crucial day arrived. "A" day is how I labeled it in my appointment book. Nausea was the pervading feeling that morning. I wore no make-up because I knew tears were close to the surface. The waiting was the worst part which is when the doubts and ethical questions began to arise. The questions and doubts were occurring just as the valium pill was beginning to take effect.

The conversation between my emotional self and my rational self went something like this:

Emotional: "I have the ability to create life, how can I destroy it?"

Rational: "I have to finish college. It just isn't the right time. Would it be fair to the child? I'd probably end up hating the kid."

E: "I am carrying the child of someone I love, a part of both of us created in an act of love. I want this child, how can I kill it?"

R: "I am not ready to be a mother; someday, but not now."

They called me into the examining room. Early abortion is performed by means of...

I cried through the whole procedure. I was home in one hour and attending classes in 24.

The procedure was short and relatively painless. The part that hurts no matter how hard one tries to avoid it is the realization of what is being done; the necessary, unnecessary destruction of life.

Andy Rooney

Mining For Gold

My idea of a great television show is a presidential press conference. They're important, interesting and often funnier than any situation comedy.

In the process of doing some research for a speech I was giving, I looked through transcripts of press conferences of the last nine presidents, going back to Franklin Roosevelt. Reading through them is like mining for gold. There are a lot of rocks and mud but there's plenty of gold.

Franklin Roosevelt held the most press conferences, 998. Ronald Reagan has had 22 so far.

When I was a young reporter for the Army newspaper, *The Stars and Stripes*, I was home on leave from Europe for three months in 1945 and attended one of Roosevelt's press conferences in the Oval

Office. One reporter, I recall, questioned Roosevelt on why he hadn't talked more about the federal budget in his last speech. Roosevelt had a little smile for the reporter. He said that if there were a catastrophic fire in the reporter's home town that destroyed much of the center of the city, it could probably alter real estate values and might even have an effect on future taxes, but he'd noticed that the stories the reporters wrote about the fire and the pictures didn't put much emphasis on next year's city budget.

Roosevelt loved his own jokes. Harry Truman held the second most press conferences, 324. At one of them, Harry handed out a memo saying he'd just appointed "a secretary for columnists."

"His duties," Truman said in the memo, "are to listen to all radio commentators, read all columnists in the newspapers, coordinate them and give me the results so I can run the United States and the world the way it should be."

There are two interesting deviations in the style used by various presidents. Of the nine I reviewed, five of them consistently used the first person "I" when they were talking about themselves. They said, for instance, "I am going to take action on that."

Four of them avoided the use of "I" as if it were immodest of them. Nixon, for example, almost always said, "We are going to take action on that," when he meant "I."

In some of the press conferences, the reporters asking the questions are never identified. If a president called a reporter by name, he usually said "Miss," or "Mr." John Kennedy was very formal even with reporters he knew intimately.

President Reagan is friendly with reporters. He makes a point of calling reporters other names. Dwight Eisenhower, a personal hero of mine, was criticized for his grammar, but listen to his answer to this question:

"Sir," a reporter said, "would you define our national purpose? Many Americans think we're losing it."

"I'm not concerned about America losing its sense of purpose," Eisenhower said. "We may not be articulate about it and we may not give, daily, the kind of thought to it that we should; but I believe America wants to live, first in freedom and the kind of liberty that is guaranteed to us in our

founding documents and, secondly, they want to live at peace with all their neighbors so that we may jointly find a better life for humanity as we go jointly forward. This, to me, is the simple purpose of the United States."

The syntax may be a little rocky, but the thoughts are pure Ike, pure gold.

I.V. Foot Patrol

Jogging Awareness

Nobody wants or expects to be assaulted or accosted. There are simple guidelines to follow as preventative measures. Personal safety is a relatively easy thing to acquire. It is composed of good judgement and common sense.

This week's message is addressed to the area joggers. We see people jogging around campus and Isla Vista, more often than not alone and at all hours of the day and night. The trails and routes taken are at times very secluded and dark, thus making them potentially dangerous. So if you are one of these joggers, keep in mind where you are going and try to take someone with you. If this isn't possible, at least tell someone where you are going and when you expect to return.

While jogging you may encounter suspicious activity or people which need to be reported. This could provide us the opportunity to prevent a crime from occurring.

If you have any questions or concerns please feel free to contact the Isla Vista Foot Patrol at 968-1544.

Religious Right Influences Politics

Churches Increase California Power Base

By ROBIN STEVENS
Nexus Managing Editor

Mainline institutional churches have "absolutely failed" in preaching the gospel, according to Paul Weyrich, director of the Free Congress Foundation, a component of the New Religious Right in the United States.

"Modern churches in most cases do not offer what the public is hungry for," Weyrich told UCSB professor Walter Capps' Religion and Politics class last quarter. As a result, Weyrich said, people have turned to television evangelical preachers or "electronic churches." He claims 45 percent of the people in the U.S. watch a television evangelist each week.

Political organizers in the New Religious Right face a problem, however, when they attempt to mobilize the large number of people who share these evangelical views. "It is getting beyond the mindset of these people who in some instances believe that they are going to be raptured out of society at any given moment, and therefore it doesn't matter whether they get out and vote or not, which taxes all of our abilities," Weyrich explained.

The movement does not maintain support in California because it does not have a concentration of fundamentalist evangelicals in individual communities which would tend to translate into political impact, Weyrich said.

"Probably we are three to five years away from any major manifestation of religious impact in California; simply because it will take that long until the viewers of the television programs begin to see themselves as wanting to do something political," he added.

Weyrich hopes to have stronger political impact in the future by building more effective training networks across the country. Because of the growth of video technology, the Religious Right now has greater potential for training toward political efficacy, he said.

"Pentecostals now have 1,000-plus churches which are linked by satellite. It is possible to do a training seminar at one of the Pentecostal churches and be reaching simultaneously more than 1,000 churches across the country," Weyrich said. He also hopes to use video tape programs, and textbooks to teach the viewers of religious programs how to be effective in the political process.

If Reagan runs against Walter Mondale, and if the economy doesn't make a downward turn before the election, he stands a good chance of re-election, Weyrich predicts. But "if he draws a Gary Hart for example, it will

cause them (the Republicans) to have a rather different type campaign than they really had planned for, and I am not sure that they are prepared to handle it."

Certain moral issues which the Religious Right addresses can not be legislated without inciting "some kind of a revolt in the country," Weyrich said. "We must evolve into some kind of a system of rights which accommodates the feelings and rights of, for example, the people who believe deeply that abortion is murder and yet does not trample upon the feelings of the people who believe the opposite."

"We do live in a pluralistic society and we have to operate in that context," he said.

Weyrich disagreed with anyone who sees a decline in the power of the Religious Right. "I've got bad news for you," he said. "The Moral Majority is two and one-half times as large as it was two years ago."

Paul Weyrich

KIOSK

TODAY

MORTAR BOARD: Mandatory meeting 5 p.m. APC today.

STUDENTS FOR JESSE JACKSON: Meeting today in UCen Room 1 at 5:30 p.m. Plans for upcoming rally will be discussed.

GSA COUNCIL: Meeting, all grads welcome, 6 p.m. Elections discussed. UCen room 2 tonight.

CHICANO PRE-LAW: Mandatory meeting for members who are planning to attend visit to law schools at El Centro 12:00.

CHICANO AND OTHER EOP: is having their annual spring retreat, and you are invited! March 30-April 1, Camp Pendola Hot Springs, hiking and camping. For info 961-4040.

UCSB AD CLUB: will resume meetings today at 4 p.m. in Snidecor 1649. The competition is four weeks away.

CALPIRG/A.S.: Save money! Buy and sell your textbooks and supplements through the student bookboard located at the first floor UCen. Why get ripped off by the two bookstores?

KIOSK POLICY

All announcements must be turned in by 10 a.m., two days before they are to be printed. Announcements submitted late will not be printed. Announcements may be turned in up to two weeks in advance of publication.

New Kiosk forms are available at the Nexus office, Storke Communications Bldg., Rm. 1035. The yellow forms are located in a tray beside the door and are to be completely filled out. No Kiosk announcement will be accepted over the telephone, nor made from any letter or correspondence.

Kiosk forms limit each announcement to 168 characters, which must include: the name of the group sponsoring the event, the nature of the event, and the day, date, time and place of the event.

The Daily Nexus reserves a space for Kiosk announcements. Kiosk announcements will be selected to run in the space permitted by virtue of when they were submitted.

NOMINATIONS BEING ACCEPTED FOR OUTSTANDING GRADUATING SENIORS & GRADUATE STUDENTS

All 1983-1984 Fall, Winter, and Spring Quarter

Each year the UCSB community recognizes the contributions and achievements of our outstanding graduates by soliciting nominations for two highly esteemed awards.

THE THOMAS MORE STORKE AWARD

One hundred bronze medals, as pictured, were sculptured for UCSB by Francis Minturn Sedgwick, nationally famous sculptor. Each year one medal is awarded to the outstanding graduating senior. The basic criteria for selection are courage, persistence, achievement, leadership, OUTSTANDING SCHOLARSHIP AND EXTRAORDINARY SERVICE.

THE UNIVERSITY SERVICE AWARDS

The awards are presented annually to graduating seniors and graduate students who have performed "above and beyond the call of duty" in the giving of service to the University, the student body, and the community. While there is no definite GPA required, the awards are normally given to students whose academic performance is equal to or higher than that of the scholastic average of the graduating class.

Therefore, we are seeking nominations on behalf of graduating seniors and graduate students whom you believe are deserving of recognition and THANKS for the special contribution they have made.

Nomination forms are available at the Activities Planning Center, the Library Lobby, the Registrar's Information Desk, the Residence Hall Trailers, and Community Housing Office, the Student Health Center Lobby, the Graduate Students Association Office, the Ombudsman's Office and the Placement Center. A nomination form can be mailed to you by calling Eileen O'Mahony, at 961-4569.

In advance, thanks for helping us acknowledge the students who have made UCSB a better place to learn, to be and to grow.

NOMINATIONS ARE DUE IN THE ACTIVITIES PLANNING CENTER UCen 3151 ON TUES. APR. 17 BY 5 pm

Visiting Professor Talks On Supreme Court Oil Verdict

The implications of a recent Supreme Court decision regarding offshore oil and coastal zone management were discussed by Visiting Political Science Professor and federal expert Robert Knecht at UCSB in March.

On Jan. 11, the Supreme Court decided coastal states have no control over offshore oil leases conducted by the federal government beyond three miles, Knecht said. Until two months ago, the state of California believed any questions concerning the controls of the Coastal Zone Management's Federal Consistency Provision had been resolved, he added.

The Coastal Zone Management Act, passed in 1972, states that federal actions directly affecting state coastal zones must be consistent with a states' coastal management program. But, the Supreme Court said, the language does not apply to federal lease-sale activities.

The stated purpose of the Coastal Zone Management Act was to provide incentives for state governments to develop a set of coastal policies that would act as a guide for federal decisions in the management of coastal resources, Knecht said.

The act agreed to supply grants to help state governments develop and implement coastal management programs, and pledged a policy of federal consistency, Knecht said.

The Supreme Court decision stated that language in the Coastal Zone Management Act was aimed principally at activities conducted by federal agencies on federal lands within the coastal zones and did not apply to activities outside the zones. Secondly, the court found the act was not intended to breach federal activity conducted outside of the state's three mile coastal limit. Knecht explained the coastal zones of the nation have

To provide adequate protection from oil development, states need to be more careful in the designation of critical and sensitive areas.

—Robert Knecht

been experiencing increasing growth and environmental problems in those limited spaces where the land and water meet. These areas are important for recreational purposes as well as being biologically productive, due to the mixing of fresh water and salt water. The areas are also considered economically important because they include all ports and harbors.

The federal policy of consistency, under the Federal Consistency Provisions, requires: federal and financial

assistance to state and local government to be consistent with state coastal policies; federal development projects be consistent with state programs; federal licenses and permits to private parties be certified as to their consistency with state programs; and federal activities directly affecting the coastal zone be consistent with the state coastal policy.

Knecht also discussed the legal leverage coastal states have and options available. States could amend the Coastal Zone Management Act and make it clear that federal activities on the continental shelf directly affecting the state's coastal zone must be consistent with state policies. The state could also amend the Outer Continental Shelf Lands Act and require the Secretary of the Interior to get the state governor's approval for all lease sales.

Knecht suggested states be more careful to designate sensitive and critical areas in advance of oil development so that the areas are adequately protected. The extension of direct state-law jurisdiction — more than three miles — should be broadened in the territorial area, Knecht said.

"State and local governments need tools to develop and help shape key decisions concerning this issue," he said. "Only then will the public interest be served."

Give us 1 hour.

We'll give you the way to higher grades and more free time.

Would you like to:

- Raise your grade average without long hours over texts.
- End all-night cramming sessions.
- Breeze through all your studying in as little as 1/3 the time.
- Have more free time to enjoy yourself.
- Read 3 to 10 times faster, with better concentration, understanding, and recall.

Evelyn Wood's new RD2 reading system makes it all possible.

Evelyn Wood works — over 1 million people, including students, executives, senators, and even presidents have proven it. A free 1 hour demonstration will show you how to save hundreds of hours of drudgery this year (as well as how to increase your speed immediately with some simple new reading techniques).

It only takes an hour, and it's free. Don't miss it.

**DO YOU WANT TO ENTER
AN
IMPACTED MAJOR?**

Petitions for declaring the following majors will be considered **THIS QUARTER ONLY**. If you wish to be considered, pick up a change-of-major petition in your college office or in the department you wish to enter. You'll need to follow full instructions given at that time, and submit your completed request no later than April 27.

COLLEGE OF LETTERS & SCIENCE	COLLEGE OF ENGINEERING
Pre-Economics*	Chemical Engineering
Pre-Business Economics*	Electrical Engineering
Pre-Communication Studies*	Mechanical Engineering
Pre-Computer Science BA	Nuclear Engineering
	Pre-Computer Science BS

* If you were admitted to UCSB prior to Fall 1983 and want to declare Pre-Economics, Pre-Business Economics, or Pre-Communication Studies, you are not bound by this date restriction - see department.

Each department will rank petitioners and select from the highest-ranking candidates as many as it can accommodate. For all students who submit their petitions and supporting documentation by the dates listed, quality of performance rather than date of submission will be used in determining admission.

Redirection Options Considered...

(Continued from front page) redirection is not the best solution since currently students who meet the qualifications of the University of California are assured entrance into at least one campus, although not necessarily the campus of his or her choice. If this is

changed there is a possibility that some students will not be able to get into any of the nine campuses, Villa said. By eliminating the redirection system, students would have to pay for more applications, Apodaca said. Students would also have to fill out additional financial

aid and housing forms, he added. The change would also mean a great deal of additional work for the campuses to review the additional applications. The number of applications received systemwide has gone from 39,464 in 1980 to 57,587 in 1984,

but the number of students the university can accept has not risen, Apodaca said. This year both UCSB and UCSD closed their application periods earlier than usual, and subsequently redirected students had fewer redirection sites to choose from, Apodaca said.

Ordinance Amendment...

(Continued from front page) Because of the strong concern, the council agreed to amend the ordinance to include these forms of discrimination as well as income discrimination.

The city ordinance will make prosecution in discrimination cases easier because it will address the problem at a local level. "We don't have to wait for the landlord to show a pattern or practice of discrimination in order to prosecute," Councilmember Tom Rogers said.

"It (the original ordinance) was not inclusive enough. There were a couple of problems with it," Nancy Davis, member of the Legal Aid Foundation, said. Because the guidelines in the ordinance were not spelled out explicitly "they were useless," she said. "Any kind of occupancy limit that limits one person per bedroom is discriminatory."

However, several citizens objected to the new law stating without occupation limits on rentals, the population of Santa Barbara would rise. They pointed to the city's growth ceiling of 85,000 people as the absolute limit to the number of Santa Barbara residents.

But there are several areas of Santa Barbara that do not limit occupancy and are not overcrowded, Network Spokesperson Vicki Bloome said.

Bloome also objected to requirements forcing tenants to earn over three times the rent in order to qualify for an apartment. "Wages are low and rents are high in Santa Barbara," she said. "Most tenants will not move into an apartment they cannot afford."

The council is continuing discussion of the effects of the ordinance due to the introduction of the amendment.

Bond Sales To Fund Research...

(Continued from front page) ding of the U.C. Davis Food and Agricultural Sciences building, the first high tech facility approved by the legislature.

The bond council, a private law firm in San Francisco which makes recommendations on the sale of revenue bonds, would not approve the sale of bonds for the Davis project until the Petris bill is revised, Dolan said. The Petris bill now requires the legislature to give a second approval of the project. This has caused a delay in plans, making the project "uncertain" and not favorable to bond sales, she said.

The bond council could not be reached for comment. U.C. Director of State Governmental Relations Steve

Arditti said the flaws in the Petris bill are technical and should be cleared up by the Garamendi bill, Senate Bill 1200. The measure is expected to reach the governor's desk in two or three weeks.

The measure also constitutes second approval of the U.C. Davis project and allows for interim financing of projects before revenue bonds are sold. In addition, the bill specifies that once the university pays off the bonds, it will own the buildings instead of the State Department of General Services.

Before the measure goes on to the Senate floor, it has been sent to a conference committee for further deliberation.

**COUNSELING CENTER GROUPS
SPRING 1984**

GAY & BISEXUAL MEN'S GROUP
A group for gay and bisexual men to address their special needs and issues.
TBA

MONDAY

EATING DISORDERS GROUP
This group will focus on self-management skills for dealing with a binge/purge eating problem. A personal interview is required prior to entrance to this group.
1:00 p.m. - 4:00 p.m.
Beginning April 9, 1984

COMPULSIVE OVEREATERS GROUP
A therapy group for women who compulsively overeat but do not purge.
3:00 p.m. - 4:00 p.m.
Beginning April 2, 1984

CHOICE NOT CHANCE
Learn to identify your values, interest skills, and to choose realistic educational and career goals that allow you to use your individual strengths and resources. Meets at the Women's Center.
7:00 p.m. - 9:00 p.m.
Beginning April 9, 1984

TUESDAY

TEST ANXIETY GROUP
Better test performance through stress reduction. Get the best results out of the time you put into studying.
11:00 a.m. - 12:00 p.m.
1st session begins April 3, 1984
2nd session begins May 1, 1984

WEDNESDAY

ADULT CHILDREN OF ALCOHOLICS
Being raised by an alcoholic parent can cause difficulties that the individual carries into adult life. Self-awareness and rights will be discussed in an atmosphere of group sharing and support. Personal interview required prior to entrance.
9:00 a.m. - 10:30 a.m.
Beginning April 11, 1984

ASSERTIVENESS TRAINING
Build self-esteem through learning to express feelings, thoughts, and opinions showing both self-respect and respect for others. Meets at the Women's Center.
12:00 p.m. - 1:00 p.m.
Beginning April 11, 1984

WEDNESDAY (cont.)

RELAXATION GROUP
Feeling tense, stressed, uptight? Learn how to manage stress through relaxation and positive imagery.
2:00 p.m. - 3:00 p.m.
Beginning April 4, 1984

LATINA WOMEN: ASPIRATIONS, IDENTITY AND ETHNICITY
This group will explore the role of Latinas at UCSB in relation to personal and career goals. It is a support and problem solving group.
3:00 p.m. - 4:30 p.m.
Beginning April 4, 1984

THURSDAY

BULIMIA GROUP
A therapy group for women who binge and purge. Membership closes after third meeting.
10:00 a.m. - 11:30 a.m.
Beginning April 12, 1984

SELF-ESTEEM AND RELATIONSHIPS
A skill building group designed to make use of group interaction, imagery, and assertiveness training as tools for developing self-esteem and effective relationships.
3:00 p.m. - 4:30 p.m.
Beginning April 12, 1984

LESBIAN AND GAY SUPPORT GROUP
An on-going support group designed to meet the needs of the lesbian and gay student community. Offers speakers, films, and topic discussions. Meets at the Women's Center.
7:00 p.m. - 9:00 p.m.
Beginning April 5, 1984

FRIDAY

CAREER DEVELOPMENT GROUP
For students interested in learning about and choosing a career plan based on their current position in the decision-making process.
11:00 a.m. - 12:00 p.m.
Beginning April 6, 1984

Sign-ups for Groups at the COUNSELING CENTER
Bldg. 478 961-2781

Sponsored by: COUNSELING, CAREER PLANNING & PLACEMENT SERVICES
Services available free to registered UCSB students.

Baseball

Gauchos Lose Conference Opener In Extra Innings

By PHIL HAMPTON
Assistant Sports Editor

Long Beach State first baseman Dan Twist laced a solid single up the middle off of UCSB reliever Frank Spear in the bottom of the tenth inning, chasing home Brad Broadhead with the winning run and handing the slumping Gauchos a disheartening 4-3 defeat in their SCBA opener Tuesday at Long Beach.

The Gauchos have now lost six of their last ten games and are 31-10-1 after having won an incredible 12 consecutive contests to commence the 1984 campaign. The 49ers are 19-19-4 and 2-3 in conference action.

Spear (4-3) took over for UCSB starting southpaw George Bonilla with one out in the eighth inning and the score locked at three apiece and did not yield a hit until the last — and most damaging — pitch of the game. Broadhead, Long Beach's leadoff hitter, reached first via a base on balls and advanced into scoring position on Kevin Keyes' sacrifice bunt.

As well as tallying the game's final run, Broadhead also notched the first run on Tuesday after doubling, advancing to third on a fly out to center and scurrying home on Bonilla's wild pitch.

Both Bonilla and UCSB Head Coach Al Ferrer have said that the lefty frequently has a shaky first inning before settling into his rhythm. Tuesday was apparently no exception as evidenced by Broadhead's leadoff double, Bonilla's wild pitch and Long Beach's scoreless second, third, fourth and fifth innings.

But Bonilla seemed to lose some of his rhythm in the sixth as the 49ers strung together three consecutive singles by Twist, designated hitter Chris Yates and center fielder Steve Brodie to score a run. Bonilla managed to pitch his way out of the jam, but not before Mike Carozza launched a sacrifice fly to center field to score Yates.

UCSB picked up its first run in the second inning to tie the score at one when center fielder Dereck Vanacore and shortstop Dan Clarke sandwiched walks around Jim Friedl's single, setting the stage for catcher Joe Kmak's RBI sacrifice fly to center.

Dave Stewart chalked up another run two innings later when he doubled and scored on two passed balls by Long Beach catcher John Billinger.

In the fifth Bob Gray — who was an all-tourney selection last week in Fresno — singled with two outs, was forced to second on Stewart's base on balls, and scored on Vanacore's RBI single. The Gauchos seemed in excellent position to capture a victory in their SCBA opener with a 3-1 lead after five frames and Bonilla settled on the hill.

But the 49ers tied the score in the sixth—as Bonilla (two whiffs and 11 scattered hits in seven and one-third innings' work) became tired—and later took advantage of Spear's free pass in the tenth to earn the win for Adrian DeLaossa (2-1).

DeLaossa retired the Gauchos in order in both the ninth and tenth innings, the only frames he pitched.

Much of UCSB's woes of late have been due to the absence of clutch hitting. Unlike the beginning of the season when the Gauchos would muster runs in the late innings seemingly at will, UCSB has recently been unable to produce runs at crucial times. Their 2-5 record in one-run ball games illustrates the point.

Runners left on base has also been an unenviable statistic rapidly accumulating in the Gauchos score book. UCSB set a

Fresno tournament record by stranding 56 runners in their six games last week. Tuesday the club left nine runners on base, seven of which were in scoring position.

Gray and Stewart, both of whom had two hits Tuesday, will lead the Gauchos attack on Saturday when the University of San Diego Toreros come to the Campus Diamond for an SCBA twin bill beginning at 12 noon.

No. 1 Pomona Next

Softballers Continue Skid

By JEFF NATHANSON
Nexus Sports Writer

The UCSB women's softball team is having one of those seasons that people always say, "builds character."

With a record of 2-36-1, and the recent remembrance of Tuesday afternoon when the Gauchos let UC Berkeley sneak away with both halves of a very disappointing doubleheader, it would seem that head coach Bobbi Bonace and the rest of the team would have very little to look forward to. Unfortunately, UCSB does have Cal Poly Pomona to look forward to on Thursday afternoon, a team which just happens to be ranked number one in the entire

season, combining a stong offensive attack with an excellent pitching performance from sophomore Monica Richey. Richey started the seventh inning by

allowing three hits and a walk, and then Bonace replaced her with the team's most successful pitcher, Sandy Ortgies.

Four hits later the Bears had scored five runs to tie the game, most of those (Please turn to pg.10, col.4)

Sports

Editor Ed Evans

Good friends will give you a break when you're broke.

The dinner was sensational. So was the check. The problem is, the theater tickets that you insisted on buying broke your whole budget. Enough to declare bankruptcy by the time the coffee arrived.

A nudge under the table and a certain destitute look in the eye were enough to produce the spontaneous loan only a good friend is ready to make.

How do you repay him? First the cash, then the only beer equal to his generosity: Löwenbräu.

Löwenbräu. Here's to good friends.

Big Weekend Ahead For UCSB Volleyball Squad

By ED EVANS
Nexus Sports Editor

How well the UCSB men's volleyball team plays in two crucial matches against USC and Stanford this weekend will have a lot to say about whether the team will qualify for the regional tournament this season.

UCSB is currently sixth in the California Intercollegiate Volleyball Association standings with a 5-6 record. Only the second through fifth place teams in the conference will be invited, so it is important that the Gauchos start to beat some of the teams in front of them.

That explains the importance of the two matches this weekend. USC is the number two team in the CIVA with three losses, and Stanford is fifth with five losses, if UCSB can beat these two teams they will move into a better position to gain an invitation to the regionals.

With two important matches back to back there might be

a temptation for the Gauchos to think about both matches instead of concentrating on the one they are playing, but head coach Ken Preston is aware of the possible problem.

"We've got to be sure to take them (the two matches) one at a time," he said. "We can't look past even a single game, we have to play hard on every point, and we can't afford to mentally let down."

On Friday at 7:30 pm in the Events Center the Gauchos will face the Trojans of USC in the first of the big weekend matches.

The two teams have met three times already this season, with the Gauchos winning at their own tournament in January, the Trojans winning the first CIVA match at USC and the Gauchos winning again in the recent UCLA tournament. USC is led by outside hitter Bill Yardley, and the Gauchos can expect a battle at the net. These are two of the better teams in the country year in and year out, and their matches are always exciting.

The Gauchos will have little time to rest, or reflect on their USC match; because on Saturday at 7:30 pm the Stanford will be in the Events Center for another important CIVA contest.

The Cardinal of Stanford are a good young team according to Preston. Led by sophomore John Root, the Stanford squad is capable of playing some very tough and competitive volleyball. The Gauchos got a taste of how tough the Cardinal can be earlier this year when the two teams met at Stanford. UCSB had to rally from a 2-0 deficit to take a 3-2 win over a determined opponent.

"The team is playing well and not just the six guys that start," Preston said. "The whole team is improving and a lot of the bench guys are looking better and better."

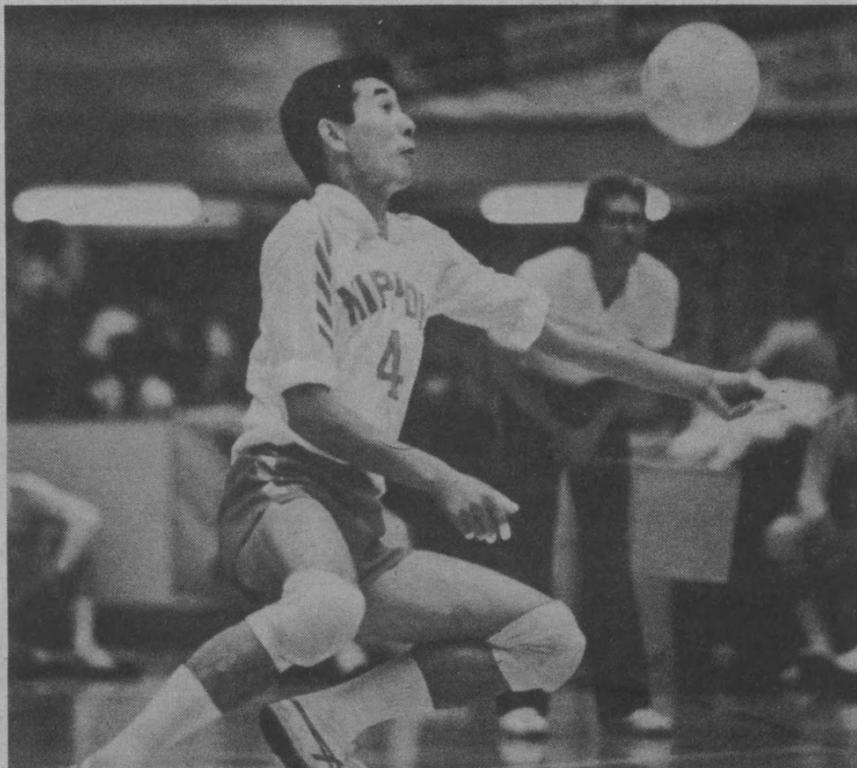

If the Gauchos can continue to play like they have been lately, then UCSB fans can expect to see some very good competitive collegiate volleyball this weekend.

IM News

VOLLEYBALL TOURNAMENT— Sign ups start April 2 for the coed doubles volleyball tournament. Play is scheduled for Saturday and Sunday April 7 and 8. The fee for the tournament is \$5. Get organized and come join us for fun in the sun.

POWER LIFTING— On Saturday April 14 there will be a power lifting contest sponsored by the IM office. There will be six different weight classes in men's and women's divisions. Competition will consist of pull ups, dead lifts, dips, squat lifts and bench press. The entry fee is \$2 for students and \$4 for non-students.

Sign ups will begin April 9 and end April 13.

TOURNAMENT ACTION — National teams from Japan, Canada and Czechoslovakia will join the U.S. national team for a volleyball tournament Monday, April 2 and Tuesday, April 3 in the campus Events Center. There are four of the best teams in the world, and the matches are sure to be exciting. Ticket information is available at the UCSB Athletic Ticket Office and at the UCSB Bookstore. Softball...

(Continued from pg.9)
coming across the plate with two out. For Bonace, who watched the Bears score two more runs in the ninth to win 8-6, that seventh inning was one of the longest in her 12 year stay as head coach.

"I don't think anything that anybody could have said we were going to lose that game," Bonace said. "It's been a real trying season for the players and coaches, and that game just reminded me that you don't pack up the bats before the game is over."

The Gauchos also had a good chance to win the first game with Berkeley as they went into the seventh tied 2-

2. The Bears then came up with two runs in their half of the seventh to win the opener and set the stage for their dramatic comeback in the second.

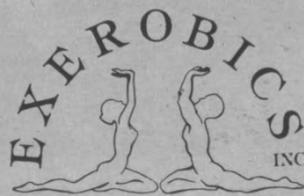

"The mistakes we made were throwing the wrong pitch at the wrong time," Bonace said. "They are ranked 20th in the nation and we played a great second game against them, but I can't really say how the team will react after a loss like this."

One thing's for sure, with Pomona coming to UCSB on Thursday the women won't have a lot of time to think about Berkeley. In their first meeting of the year with Pomona, the Gauchos lost a

1-0 battle that spanned 19 innings and five and a half hours. Even though coach Bonace and the team have re-evaluated their goals for this season, a win over a strong Pomona could put a little spark back into the year.

"Pomona always seems to bring out the best in us," Bonace said. "We have a young team and the girls are able to bounce back quickly... A lot quicker than I do."

The Gauchos will play a doubleheader with Pomona on Thursday afternoon starting at 1:30 on the campus diamond.
