The UCSB Bookstore

The UCen Food Store Serves You From A to Z

A is for apples, they're always appealing.

Bis for burritos.

C is for cheeseburgers hot off the grill.

D is for donuts.

E is for entrees that change every day.

F is for fresh fruit pies.

G is for grapefruit that give you plenty of Vitamin C.

H is for hot steamy bagels.

is for ice cream that melts in your mouth.

J is for juices.

K is for kernels of popcorn fresh from the Deli.

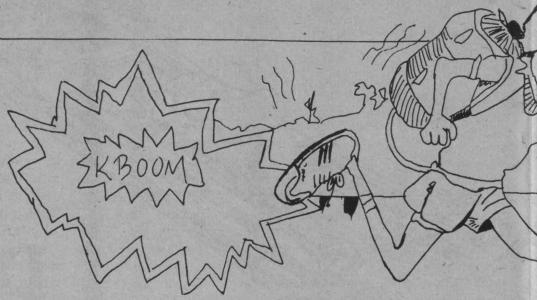

L is for Lasagne.

M is for milk, everyone needs it.

Alternate Gas So Discovered at UC

Energy sciousness has been a concern in the United States for over a decade. Conventional sources of domestic energy which held hopes for easing our dependence of foreign imports have not been developed as quickly as needed. Now, more than ever, students are getting involved in the search for an alternate energy source. The recent trend to hit UCSB has been blowing in the wind for quite some time. Up until recently the popularity of the UCen Burrito has been an unexplained phenomenon which has led to a group of UCSB students to do some experimenting on their own. John Always and Nancy Cutzum, graduate students in the **Economics Department** have found that the UCen Burrito provides them with a natural form of energy Flatulence. This energy source could enable students to travel around campus and Isla Vista for a full day with one fillup. Ms. Cutzum

Model X2F being tested for possible release in Spring '82.

adds, "What is of particular significence is that my energy release increases more than 25 per cent after eating a UCen Burrito. Studies are conclusive that those eating the beanless version are not experienceing the same energy hype."

Dr. P.U. Pharts, a respected professor in the Economics Department here at UCSB shares the students' enthusiasm, "The UCen Burrito is priced comparably to the present price of gas at the pumps. This

could very well mean a significant breakthrough in our economic dependence on foreign imports. In fact," Dr. Pharts adds, "studies show the UCen Burrito far surpasses the Honda Civic in gas milage with an estimated 32 MPG around town. Students are finding that the UCen Burrito is good for 53 MPB around campus and I.V. Of course, as with cars, milage will vary depending on student size, rate of consumption, digestion,

a and combustion."

Dr. Poppinoff, a associate of Dr. Phart

associate of Dr. Phanfeels that, "The bigges problem facing us how to harness thin new energy source."

Agreeing with D
Poppinoff, Ms. Cutzur
states, "Something i
the air leads us t
believe that som
people have not bee
using their energ
release as efficiently a
they could and shoul
be doing."

This new energy alternative pose certain energy decisions. We are not

Win a Meal at the UCen Station!

Your choice of any sandwich, desert and beverage

All you have to do to win is fill out the entry form below and tell us how many sandwiches you think will be sold at the Deli on April 1st. No purchase is necessary but by submitting an entry you will receive a 10° discount on any purchase.

Please put entries in the box that is located by the register at the Deli. All entries must be received by 9:00 pm april 1st to be eligible. Winner will be announced on April 3rd.

This contest void where prohibited. UCen Food Service employees are not eligible.

I guess that the Deli

will make sandwiches on April 1st.

forced to reconsider our options, rate our priorities and come up with policies which realistically reflect our needs. No one energy source can effectively satisfy our energy consumption, but research on the UCen Burrito looks promising in the direction of an efficient energy program that cuts out the middle man. Nancy Cutzum is worried about the direction of research in this area. "With all the recent cutbacks by the Reagan Administration, we are skeptical of obtaining

me

rgy

uld

federal funding."

To deny research on Burrito energy and its effects could pose serious problems for the thousands of UCen Burrito eaters already convinced of its energy effectiveness. Dr. Pharts sums up the cntroversy saying, "Denying research in this field will only cause intense discomfort and pain to thousands ..."

Dr. Pharts and Dr. Poppinoff will meet with the Secretary of Energy next week to discuss the implications

Students Demand Coffee Rights

Recent protests by thousands of distraught students have sparked negotiations between Food Service Coordinator Rita Base and Student Liason Jim Stucenthmudd, to force the return of that ever popular, undeniably delicious frozen liquid coffee concentrate. When questioned about the protests and controversy surrounding the disappearance of the frozen canned concentrate, Ms. Base simply said, "With the outrageous coffee consumption here at UCSB, we thought we were doing the students a favor ... we assumed freshly ground coffee was preferred to the canned liquid concentrate."

The Daily Bogus' roving reporter interviewed several students about what they thought of the new fresh ground coffee currently served on campus.

"Who says fresh is best?" laughed Suzy Stale, a Home Economics major, "I prefer anything that comes in a can."

Another unhappy student Tom Tightwad commented, "Who can afford it? The other 'thick' stuff used to get me flying with only one cup .. now it takes at least 3 or 4 coffees to get just a little buzz going."

Even the faculty and staff have joined the students in their potests. Dr. Sloenthemorn, a respected professor in the energy Department at UCSB Complains that "Things just aren't like they used to be. For ten years now, I have been stopping by the Arbor at precisely 7:30 every morning to get my daily dosage of Caffeine. I have had to change my whole routine to enable me to drink 2 or 3 cups of coffee when all I used to drink was just one cup of that frozen mudd. Now I have to admit that the new coffee definitely tastes better ... but I just can't afford to fall asleep in my own lecture."

Negotiations continue and the outcome is still difficult to predict. Your comments are welcomed.

N is nice service and cashiers who smile.

o is for omelettes to order, fresh all day long.

P is for pastries and pies.

is for quiche and soup, served from 10 until 2.

R is for rolls.

S is for salad bar, simply nutritious.

T is for tacos.

U is for unusually great food.

Vis for vegies.
