Interesting Sights Found in Community

By M. JONES

Since summer school is supposed to combine business with pleasure, and, ye editor being short of news this week, we take pleasure in recommending the sights of Santa Barbara to those of you who are newcomers to the city. In spite of all the advertising of various civic organizations, there are a number of interesting land marks here, as well as panoramas to make even the hardened cynic catch his breath.

The city is steeped in history and romance. Among the most famous of the historic buildings is the Old Mission located on Los Olivos and Laguna streets, just below the campus. For your edification, it is the tenth mission of the California chain, and was founded in December, 1786. It is now occupied by the Franciscan order, and a friar guide will show you through the parts of the mission open to sightseers, including a neat group, the chapel, which incidentally is very lovely, and the mission garden.

The Franciscans also conduct a Seminary on the mission grounds, where boys are trained for the holy orders. The seminary chapel may be visited from 3 to 5 p. m. any afternoon.

This is sightseeing. However, if you would appreciate the real beauty of the mission, attend a service there. The Padre Choiresters are very fine, and the dignity of service in the impressive setting of the chapel is beyond the bounds of creeds.

The De La Guerra house, now known familiarly as El Paseo, is a landmark of Spanish residency in California. It was built in 1827 to be the home of Captain Jose De La Guerra, who served as comandante of Santa Barbara for many years. Now it is closely connected with the De La Guerra studios and houses artists' studios and specialty shops. Other historic adobes are the Carillo adobe, 15 E. Carillo street; the Covarrubias adobe, 715 Santa

Inaugurate Field School in Nature Study Extension

Lincoln Library Second Largest West of Rockies

The Lincoln Library, located in the south east corner of the library, was donated to the college in 1928 by William Wyles, a resident of Santa Barbara and possesses most of the biographies of Lincoln.

With the exception of the Huntington library in Pasadena, which contains the noted Judd Stewart collection of Lincolniana and many items from the famous Lambert collection, Santa Barbara State college is fortunate in having the only large library of Lincolniana west of the Rockies.

The library includes books by Barton, Masters, Nicolay and Hay, Sandburg, Beveridge, Lamon, and Herndon and Weik. There are also copies of the early campaign biographies which were written in 1860 after the young politician's nomination for the presidency, notably those by D. W. Bartlet, J. H. Barrett, W. D. Howells, and a pamphlet reprinting John Locke Scripps' "Campaign Life of Abraham Lincoln." This biography, for which Lincoln furnished the data, is the only one of himself that he ever authorized, revised, and indorsed.

In defining material as Lincoln literature, it must be noted that the term is used in a liberal sense to include composite works, magazine articles, Civil War items, lives of the President's contemporaries, and books about slavery.

The Lincoln library at State college meets a need of students in the history department by supplying first hand information, but the students are not the only patrons,

Two Semester Units May Be Earned in Attendance

The Division of Biological science inaugurates a field school this summer during the two weeks immediately following the close of the regular summer session, Aug. 5-16. Students, parents, classroom teachers, and organization leaders from all parts of California will assemble for a fortnight devoted to the study of living things.

Classes will be held in open "rooms" at Rocky Nook park in Mission Canyon, at the Blakesley Botanic gardens, in the college laboratories, and along the ocean shore. A faculty of seven will conduct the session. Selection of courses and instructors, time for leisure and recreation, as well as attendance at evening lectures and campfire entertainments are optional with each student.

Two semester units of college credit may be earned in attendance. Since the primary objective is not to cram students with factual material, but rather to furnish through capable guidance a medium for enrichment and appreciation, competitive examinations will be dispensed with. Students will be marked "passing" or "failing" only. Faculty and students will board and room themselves in accordance with individual preferences, the camp originally established in connection with summer nature work having been discontinued.

Registration for the summer session nature study course or other previous training in biological science is not required, presentation of material being such as to prove useful and interesting to anyone.

Places to Visit in Santa Barbara Cited

(Continued on Page Four)

Barbara street, El Cuartel, 122 East Canon Perdido street.

The County Court House on Anacapa and Anapamu streets, is said to be one of the most interesting of its kind in the world. At any rate, the architecture and decorations are unusual and are carried out in the Spanish-Moorish manner. The murals in the Supervisor's room are particularly noteworthy. For a view of the city and surrounding country, take the elevator to the clock tower. The tower is locked at three, although the rest of the court house is open daily from 8:30 to 5:30, except on Saturday, when it closes at noon. There are no guides, so you may wander at your own pleasure as long as you manage to stay out from under foot in the busy offices.

For the student-minded, there is the Santa Barbara Public library, and the art wing, the Faulkner Memorial gallery, which is usually open from 10 a. m. to 5 p. m. Transient exhibitions of paintings and prints, with especial emphasis on the unusual and beautiful are held here.

The Museum of Natural History on Puerta Del Sol road in Mission canyon contains exhibits of Indian days, as well as collections of animal and plant life of the region. Students planning to attend the Nature camp this summer will find much of interest here. It keeps regular hours of from 9 to 5.

Santa Barbara's garden spots are exhibited every Friday by garden tours arranged by the Plans and Planting branch of the community arts association. The tours leave Recreation Center at 10 a. m. and 2 p. m., and many attractive gardens and private estates are on exhibition. Also for the horticulturist is the Blakesley Botanical gardens, on Mission Canyon road. Here plants indigenous to California are carefully grouped and labeled. The gardens may be viewed from sunrise to sunset.

There is plenty in the way of recreation: swimming, tennis, golf, polo, and the theater. The Lobero is the Community Arts association theater, and will present a new play soon. Additional information may be secured from the Santa Barbara Chamber of Commerce.

Mr. and Mrs. Fred L. Allred announce the arrival of a son, Douglas Owen, on Wednesday, June 19, in Santa Barbara.

RADIO NOTES

By BOB KRAUSE

RAY NOBLE

More has been written about Ray Noble in the past few weeks than about any other figure in radio broadcasting. Since his arrival in this country, the rise of this orchestra leader to fame has been nothing short of sensational. He recently undertook a longtime engagement in the Rainbow Room, Rockefeller Center's smart night club in New York. Let's listen to his smooth music over K.F.I. 6:30 Wednesdays.

WINNERS

Radio Guide Magazine recently conducted a nation wide vote to determine the favorites in six divisions of radio entertainment: The leading performer, dramatic program, orchestra, team and announcer. Winners respectively in the five groups are: "One Man's Family," "Showboat," Wayne King's Orchestra, "Amos 'n' Andy," James Wallington. Both Wayne King and Amos 'n' Andy led their division in the 1934 contest conducted by the same magazine.

WELCOME GARBER

With the completion of a very successful six weeks engagement in the famous Casino at Catalina, Ben Bernie departs on a tour of the Pacific Coast before returning to New York. He is replaced by the equally famous Jan Garber and his orchestra. We remember that Garber was enthusiastically received last year and will undoubtedly score again. His music will be broadcast nightly beginning July 2nd.

REGRETS

Many lovers of symphonic music will miss the Ford Sunday Evening Hour which concluded it's series last Sunday evening. A highlight of each program was a brief address by Mr. William J. Cameron. One of the outstanding of these was directed to college students. Any and all of them may be had in pamphlet form by writing to the Ford Motor Car Co. in Dearborn, Michigan. Followers of this program will undoubtedly be anxiously awaiting it's resumption, scheduled for September 29th.

FRED WARING CHANGED

The program of Fred Waring, one of the best of it's kind, has been changed from Thursday evenings to Tuesdays, same time, 5:30, released locally through KDB.

Mr. John Branding, superintendent of schools in Needles, California, was in Santa Barbara last week end interviewing candidates for teaching positions in Needles.

Two Classes Combine to Witness Testing

The fourth hour classes of Miss Elsie A. Pond, head of the junior high department, and of Miss Edith Leonard, head of the kindergarten-primary department, will combine next Friday morning to witness the administration of an intelligence test.

Miss Marilyn Lee Morgan, the little girl who gave the readings in the Tuesday morning assembly, will be given the Binet-Simon test, under supervision of Miss Pond.

Members of the two classes are requested to be on time so as to avoid confusion as much as possible.

Nature Study Class Meets in Open Rooms

(Continued from Page One)

Botany (flowers, trees, and shrubs), Home Gardens, School Gardening, Elements of Physical Science, Personal Health Conservation, Tide-pool Plants and Animals, and Sky Study will be offered. Special lecturers secured for the session include Frank E. Dunne, county forester, Dr. E. Kost Shelton, Dr. Henry Profant, Dr. Edward Lamb, Grace Ruth Southwick, David B. Rogers, and others. The faculty will include Harry Bauer, Ph.D., head of biology department, Santa Monica junior college, Alice Bradley, M. A., professor of dietetics, State college, Lewis Carson, Ph.D., Astronomy, Hazel Severy, Dr. Sc.O., head of science department, State college, Seldon Spaulding, Headmaster, Laguna Blanca school, Hope Ranch park, Harrington Wells, M. A., director, school of nature study and professor of natural science, and Harry Wilson, A. B., instructor in Santa Barbara public schools.

Additional information may be secured from Mr. Wells.

OMIT LECTURES IN EDUCATION DEPT. ASSEMBLY

Believing that we hear too many lectures during regular class attendance, the education department in charge of the Tuesday morning assembly presented a program that was purely artistic entertainment.

Bill Mann, student body president, called the meeting to order following which announcements were made. He then turned the assembly over to Miss Edith Leonard, head of the kindergarten-primary department, and chairman of the assembly program, who in turn introduced the first artist on the program.

Howard Stafford, nine year old harpist and pupil of Mrs. Roscoe Lyans, played a group of three numbers; "Believe Me If All Those Endearing Young Charms," by Thomas Moore, "The Mocking Bird," by Prescott and "Lullaby" by Butler.

Miss Marilyn Lee Morgan, elementary school girl from San Bernardino, won the applause of the audience with her group of readings which included "Six O'Clock in the Morning," "Little Boy Blue," "The Chestnuts" and "The Bumble Bee."

Allen Neil, caricature artist and student of the art department, concluded the program with drawings of President C. L. Phelps, Bill Mann, Adolph Hitler and Franklin D. Roosevelt.

It was announced that next week's program will be under the auspices of the art department and will have as a guest speaker, Mr. Wetzell, a well known Los Angeles artist.

College Chess Club Meets Monday Night

The College Chess club meets every Monday evening at 7:00 o'clock in the men's club room.

All those who are interested in learning the game as well as those who already know how to play, are invited to come. If you have a set, please bring it, however, don't stay away if you haven't one.

As a special attraction for next Monday night, Louie S. Taylor will meet all-comers, playing all games at the same time. At a later date, members of the Santa Barbara Chess club will be challenged to a match.

Nature Study Class Has First Field Trip

Harrington "Pop" Wells, instructor of the summer session nature study course, and his morning class, visited the Blakesley Botanic gardens Monday, on their first regular field trip.

Meeting again at 8:00 P. M., the class was entertained by Mr. Higgins, nature study student and amateur astronomer, who enabled the students to view the Moon, Venus and Jupiter, by means of his eight and one half inch home made telescope.

Mann Asks Activity Leaders for Reports

In accordance with an announcement made by Bill Mann, student body president, activity leaders of the various groups in the recreation class are asked to comply with the request that notices of their activities of each week be sent to El Gauchito office.

The following leaders will be held responsible for this information: Mrs. Alberta Stow, Morgan Smith, Charles Darland, Harry J. Moore, George Atmore, Alex Mueller, Kenneth Holland, Howard Marvin, Charles Leister, Bob Morrilli and Earnest Carter.

President C. Phelps Gets Strange Letter

President C. L. Phelps received a letter from the State Board of Prison Terms and Parole yesterday, which was addressed as follows; Mr. C. L. Hielphy, President, Santa Barbara State College, Santa Barbara, California.

"From now on I shall have my name printed on my stationary," stated Mr. Phelps. "I didn't realize my handwriting was so hieroglyphical."

SQUABBLE CLUB SUMMER SESSION EXHIBIT PLANNED

Plans for a summer session exhibit took definite shape at the last meeting of the squabble club. It was decided that the fifth week of school or the week beginning July 22nd, would be the most appropriate time, as this would allow men from the department to bring articles from home and also to finish summer work in time to get it into the exhibit.

Mr. Louie S. Taylor was appointed to take charge of the display this summer. It will be conducted in the new class room building among the pine trees on the upper side of the campus, and will be open to visitors every day during that week.

Contestants are asked to bring their collections of teaching materials, teaching aids, pet projects and other articles and devices suitable for the use of teachers in the Industrial Arts field.

The judging will take place early in the week in order that visitors might appreciate the Judges decision. The work will be judged on its merits and value as teaching material and not necessarily the workmanship or the execution of materials.

All members of the Industrial Education Department are invited to participate. Bring your work any time and it will be stored in a safe place.

ELEMENTARY EXHIBIT

Mrs. Florence F. French, publisher's representative of Mogan-Dillon company, will present an exhibit of "The Grade Teacher" and a series of elementary grade work-books here during the coming week. The time and place will be announced at a later date.

George Cutler, I. E. '31, formerly of Compton, will teach in Ventura.

College Grade?

How often have we heard some college students boast that their good grades have been gotten with the least possible effort. We apparently go to school to learn, yet some of us apologize if we succeed.

The apologies could not be sincere. Undoubtedly we desire to accomplish, yet we hesitate to admit it. The fact that colleges are filled with young people who are working their way through, with no financial assistance from their families, proves that youth is coming to realize the value of a cultural as well as a practical education.

Certainly we should encourage natural curiosity with intensive study, the ultimate end being perfect enjoyment and appreciation of the better things in life.

It should be our desire as the fortunate ones who can attend institutions of higher learning to feel the joy that comes with the successful achievement of a job that has taken lots of hard work and hard thinking.

There are many students in college who are here solely for the social end of college life and are not sincere. They only do the minimum of studying—just enough to get by. It is unfortunate that such people are allowed to waste their time as well as the facilities of the school and the taxpayers money.

As long as these conditions do exist, probably we as educators should formulate measures to correct this deficiency.

—B.K.

Tuckers Grove Scene of College Fun - Fest

Tucker's Grove in Goleta has been selected as the scene for the next student body social event. Plans have been made for a basket lunch party, scheduled for Saturday, July 13, beginning at 4 o'clock.

"All that you have to bring is the lunch and yourself," stated Bill Mann, student body president. The college will furnish coffee, ice cream and pie.

Games will be held from 4 o'clock until 5:30 o'clock and will include horseshoes, volley ball and baseball. Eating will begin promptly at 5:30 o'clock and will be followed by dancing from 8 to 11 p. m.

Students, friends and families are invited to attend.

W. Beach Picnickers Make New Record

Basket-lunch picnickers that met last Wednesday at West beach established a new kind of record or something. Considering that about 50% of the student body went home for the holidays, a record crowd of 84 attended the party.

The record-making started when two games of volley ball started with 28 players, two full ball games were in session, and as many horseshoes played as could be found. The games started in the afternoon and continued until dark. Having worked up a sufficient appetite, the group partook of their lunches, basket and all, after which the college served the crowd 175 cups of coffee.

According to reports, it was lots of fun and quite a success.

Personals

Robert Hughes, '33 industrial education graduate, recently received his secondary credential and M.A. degree at Stanford. Mr. Hughes will teach at Albany, California, this fall.

Helen E. Johnson, '34 graduate of home economics, has secured a teaching position in the Fresno school system.

Evelyn Steinmeir, home economics '35, has been selected to teach in the Dinuba high school.

Geraldine Hopkins, art '34, has secured a part time position in the Visalia high school.

William Curley, industrial education, 1932, left Ventura to teach in the Beverly Hills system.

Technical Degree Is Offered in I.E. Dept.

According to E. E. Ericson, head of the industrial education department, a new technical degree course in industrial education has been organized. "This course," Mr. Ericson states, "is to meet a definite need expressed by industry for men who have had the technical institute type of training and who can work toward managerial and other key positions in the technical and manufacturing fields."

It is recommended by the head of the industrial education department that the student select elective technical subjects under the guidance of the department head and that these subjects be chosen with reference to his interest in major fields of industry.

In the field of aeronautics, cooperative arrangements have been made with the Boeing School of Aeronautics and the Curtis Wright school through which credit can be earned in these schools for a part of the requirements of this course.

The course grants a B.A. degree leading to direct employment in preferred positions, according to Mr. Ericson.

State College Holds New Transfer Record

The Santa Barbara State college believes that it holds a record for building up its student body transfers during the current year. Of the total regular enrollment of 849 students, more than 36% of all the students in the school have come via transfer at some period in their college course.

Transfers for this year came from 19 junior colleges, 3 teachers colleges and 14 other collegiate institutions. More than 44% of the transfers came from the following junior colleges; Bakersfield, Chaffey, Compton, Santa Maria, Santa Ana, Los Angeles, Pasadena and Ventura. Los Angeles county furnished approximately 21% of the transfers.
