Supervisors Set Date for Hearing On Goleta Valley Incorporation

By CYNDE TAISE
The date for the public hearing on the Goleta Valley incorporation proposal was set Monday by the Santa Barbara County Board of Supervisors.

LAPCO, the Local Agency Formation Commission, approved the proposal for the Goleta Valley last week, and sent it on to the Board of Supervisors. Yesterday the supervisors set Dec. 7, 7:30 p.m., in the Commission Hearing Room, as the date for a public hearing to solicit public opinion on the proposal.

If this proposal is approved by the supervisors, it will then face the voters. However, it must meet the filing deadline in order to appear on the March ballot.

Unless little or no controversy arises from the public hearings the proposal may not be placed before the voters. According to Supervisor Bill Wallace, if someone wants to petition either to be incorporated into the city or to object to the proposal or boundaries, the proposal will have to be referred back to LAPCO for review and possible revision. Wallace stressed that the proposal may not be placed on the March ballot.

The proposal would incorporate the entire Goleta Valley area, including Isla Vista, into a city. The area, which is composed of residential and agricultural land, has been excluded in LAPCO's proposal.

The supervisors also allotted an additional $1,000 to Isla Vista for improvements and decided to put the issue of whether or not to import state water on the March ballot.

The money awarded to Isla Vista will be used for wheelchair ramps construction on curb corners. This is part of the park district's continuing project to aid handicapped citizens of the community.

The supervisors also approved the wording of the measure. According to Supervisor William Wallace, the wording would permit importation of state water. The decision will be left to the voters whether or not the county will turn to state water.

Parapsychologists Seek Public Acceptance of Their Research

By WALT HALLEY
Since the Society for Psychical Research was founded in England in 1882, scientific inquiry into psychic and paranormal phenomena has proceeded at a slow, but steady rate.

Parapsychologists today have their own professional group, the American Society for Psychical Research, which was admitted to the American Psychological Association in 1968.

Prof. Morris Hetherington, noted parapsychologist, said there were many more a tribute to the scientific method than to the unorthodoxy advocated by the PA than an endorsement of the findings of psychological research on the part of the AAA.

But there was a triumph for a science which is as yet unsure of itself and its place among the traditional disciplines. Contact had been made and parapsychology is now being planted in the cold—entirely, at least. Parapsychologists know they have a long road ahead of them, and that it may be rocky.

At UCSB course material in parapsychology has already been offered by the university. Prof. Morris is now at U.C. Irvine, since 1972 under the now defunct parapsychology program.

Hetherington Lectures on Current Industrialization of Iranian State

By DAVID KIRBY
A comparison of the current Iranian situation to that of Great Britain on the eve of the industrial revolution was presented in a lecture yesterday by Morris Hetherington, who recently completed an extensive visit to Iran.

Hetherington's theory was that although the events taking place in Iran today are similar to that of old England, the state taken by the government to relieve social, economic and political pressures are not.

Today Iran is turmoil! Public dissatisfaction with the Shah and his military supported regime is widespread. According to Hetherington, this is because of the Shah's ideal of turning his country into a modern, westernized industrial nation. He has raised the expectations of his people to the point that he can no longer keep all his promises, therefore creating discontent and disappointment among them.

Hetherington stated that Iran has the potential and opportunity to become the industrial nation the Shah desires but will not do so because of his policies. He suggests that "much disaster could be avoided if (people) would look at history." Because of her vast oil supplies, Iran has the money to bring about industrialization. However, her oil is not expected to last until the end of the century. "The opportunity is brief and short of money has already been squandered in attempts to industrialize," said Hetherington.

In comparing old England to Iran, Hetherington pointed out several aspects that were developed in the former but are not being developed in the latter.

One was transportation. England developed canal and other transport systems which facilitated commerce and greatly contributed to industrialization. In contrast, Iran's transportation system is poorly developed. Britain in a small, densely populated country in contrast to rugged Iran with her widely dispersed population centers. "Increased air traffic will un-doubtedly help to ease this problem but at the present there are not enough in the aviation system of the country."

Turning to communications, Hetherington compared the royal mail system to the Iranian mail system. Of the 23 million citizens only one million have phones. "This is the most serious obstacle to industrialization," said Hetherington.

Britain's education system at the time was closely linked with science and technology. According to Hetherington, this type of unison is necessary for an improved society, but is still not adequate.

Hetherington stressed that if what was done in England along these lines were done in Iran, the country would have been developed. He stressed that money needed to be more effectively invested back into the country.

"We maintain what I like to refer to as 'enlightened uncertainty,'" Hetherington said. "We don't know what those modifications may deal with. It will have to be clear to those who do the research that there is a need to clarify the basic concepts of Parapsychology to interact with other sciences."

"We are studying what appear to be new modes of communication between an organism and its environment," Morris explained. "It's an interdisciplinary area for research."
LOS ANGELES — Police in Los Angeles say they are uncertain if two stabbings in the skid row area Sunday night are linked to nine skid row knife murders since Oct. 23. The two men survived and were taken to County USC Medical Center. Their conditions are not yet known. Investigators say the two men were found on the streets just after midnight. They had been stabbed several times in the torso, as were the nine men considered victims of the so-called "Skid Row Stabber." But unlike the previous skid row victims, these two are described as young and Spanish-speaking. A police spokesman says the latest victims don’t seem to fit the wino image of previous victims. But investigators haven’t ruled anything out yet.

LOS ANGELES — Police say actor Paul Newman’s 28-year-old son, Allan Scott, died in a West Los Angeles motel room yesterday of an accidental overdose of a combination of alcohol and a depressive-type drug. Investigators report the body was found in a room at the Ramada Inn where young Newman had been staying since last Tuesday.

WASHINGTON — The federal government says you won’t be contributing to runaway inflation when you buy a Hershey bar. The Council on Wage and Price Stability ruled yesterday that Hershey’s recent five cent price increase for the chocolate falls within President Carter’s anti-inflation guidelines. The council said the 20 percent increase is okay because the bar contains 14 percent more chocolate.

WASHINGTON — A former undercover policeman told a House panel yesterday he doesn’t believe Martin Luther King’s 1968 murder was the result of an FBI plot. Merrell McCullough testified in the assassination committee’s probe of whether King was lured to Memphis to help stem the violence surrounding a strike by Black garbagemen.

WASHINGTON — Westinghouse Electric pleaded guilty yesterday to 30 counts of filing false statements to conceal the payment of bribes to a former Egyptian official. Under a plea-bargaining agreement, Westinghouse will pay $300,000 in fines.
NATIONWIDE THANKSGIVING FAST PLANNED IN FARM WORKERS HONOR

By KIMBERLY GREEN

Deviating from the traditional mode of celebrating Thanksgiving, people nationwide will prepare for this holiday by fasting in honor of the farmworkers today.

The Friends of the Farmworkers on campus will be struck, fast locally, in conjunction with the National Farmworkers Ministry, as well as adding an ecumenical service and canned food collection.

Thanksgiving, as viewed by the NFWM, "presents each of us with the opportunity to give thanks to the farm workers—the men, women and children who harvest our food. All of us have a special connection, a bond, with these laborers. The work of their hands actually goes into our bodies. We are connected to the farm workers whether we know it or not—we acknowledge it or not."

Besides expressing a call to attention to the farm workers singing, it's hoped to be another purpose also. "The purpose is two-fold—to raise awareness and support for the farm workers movement," said Hank Tavera, past chair of Friends of the Farmworkers.

Supporters hope that the farm workers will materially benefit from this fast in several ways. According to Tavera, approximately 30 fasters have volunteered to try to solicit people to sponsor their fast, at an hourly rate. The fasters themselves are requested to send the money they saved on food to the farm workers.

Finally, canned foods will be collected on campus all day at central lounge in building 60.

The Friends of the Farm Workers will send all proceeds and cans to the United Farm Workers' field office in Oxnard, where it will be given directly to the farm workers. 

According to Julia Curry, chair of the Friends of Farm Students, UCSB, if you prefer, send your resume to the Navy Nuclear Officer Candidate Program, Code 312-B537, 4015 Wilson Blvd., Arlington, Virginia 22201. If you're a junior or a senior majoring in math, physics or engineering, the Navy has a program you should know about.

It's called the Nuclear Propulsion Officer Candidate-Collegiate Program (NUPOC-C for short) and if you qualify, you can earn as much as $650 a month right through your senior year. Then after 16 weeks of Officer Candidate School, you'll receive an additional year of advanced technical education. This would cost you thousands in a civilian school, but in the Navy, we pay you. And at the end of the year of training, you'll receive a $3,000 cash bonus.

It isn't easy. There are fewer than 400 openings and only one of every six applicants will be selected. But if you make it, you'll have qualified for an elite engineering training program. With unequaled hands-on responsibility, a $24,000 salary in four years, and gilt-edged qualifications for jobs in private industry should you decide to leave the Navy later. (But we don't think you'll want to.)

Ask your placement officer to set up an interview with a Navy representative when he visits the campus on Nov. 28-30, or contact your Navy representative at 213-468-3212 (collect).

If you prefer, send your résumé to the Navy Nuclear Officer Program, Code 312-B537, 4015 Wilson Blvd., Arlington, Va. 22203, and a Navy representative will contact you directly. The NUPOC-Collegiate Program. It can do more than help you finish college: it can lead to an exciting career opportunity.
Letter to the Editor

A Real Education

Editor, Daily Nexus:

Do most instructors really care about their students? It is now apparent to me that some instructors care less than others. For example, I am a student in an electronics class with 3A instructor. My opinion was formulated when my humble request for taking a midterm at a later date was met with a "closed" time of 6 pm Tuesday night was blandly rejected for no apparent justifiable reason.

Before 8 a.m. on Thursday morning I held him of my situation, a problem set due the Friday before and two midterms the previous day. I asked for an extension until the discussion sections on Thursday morning, only 38 hours later.

Don Davis: Allow me to finish, and then you can talk!... that you say... Chancellor Sinsheimer.
"A Real Education"

the power of the Regents is in response to our request that he ask the Regents to hold a special hearing on investments and urge them to vote... 

Huttenback: Look, they've already had a meeting, and I'm not going to write the letter... What they attend or not is important... 

Student: But that is the point! 

Huttenback: Look, you can request all you want but I'm not going to do it, and in about two minutes I'm going to have to leave. 

Don Davis: There was a hearing, but the Regents did not show up, and there was no testimony in favor of their current investment policies. What we are asking you to do is to stand up for a real dialogue within the University, for a real hearing on the issue, so that we can get a real quarum and a resolution. Will you do that? 

Huttenback: I don't think there's any way to compel the Regents to come to such a meeting. There's absolutely no way you can do it... that's democratic. 

Don Davis: Are you aware that in the past seven years when the Regents have had the opportunity to vote on shareholder's resolutions concerning social responsibility, with some of those being in South Africa, that they have voted against every single one of them. And that when they decided to subscribe to the Investor Responsibility Research Corporation (which provides information of corporate social responsibility), several of the Regents threatened to throw their shares in the dustbin. 

Huttenback: That's their privilege. The Regents in some sense are absolute. 

Student: I thought they were supposed to represent the people. We're not supposed to have ab

alpine rulers in this country anymore. 

The Chancellor was also asked whether he supported what is going on in South Africa. 

Huttenback: "No, of course not. I don't beat my wife or abuse my mother, either. I don't know anyone who supports what goes on in South Africa." 

Students: The Regents do! 

Huttenback: They do not. 

Students: They don't?! 

Huttenback: No, they don't. 

Finally, the Chancellor was asked what he was doing if "you are here to represent the students, and you are not representing the students?" 

Huttenback: Do you find yourself totally representative of all students on this campus? 

Student: No, we're the ones who give a damn; we've taken the time...

Intramural Playoffs Begin

By A.J. Houston

Today’s 13th Annual College Football Playoffs will consist of nine games to be played in various fields at various times. There is one A Division content scheduled between the "Fleons" and "The Raiders" on field ten, while eight B Division playoff games are scheduled.

Play will involve eight bracket B Division games. Field four: "Go For Broke"

plays the victory of yesterday’s "AB Division" game.

Field seven: "The Winner of "Sed-

n Teabot" - "Minny's Boys" will face the winner of the "Team Hug" - "Tidy TV" battle.

Field eight: "Royal Flush" plays the winner of yesterday’s "Doors" - "Worthless Wonders"

In bracket two play, on field ten, "Seventh Swirlmend" will play the winner of yesterday’s "Dazed and Confused" - "My ass is on fire"

Field nine: "Six-Pack" will play the winner of yesterday’s "The Flip" - "Apathy Streak".

Field ten: "Don Quixote's Wild" (Please turn to B, col. 1)

Lost & Found

DD Reward for embroidered blue workbook. Has palm tree on back, Zip symbol, other stuff. Very important. Call 968-6459. Any time.

Lost: Pair of prescription glasses in tan case, around 11:30. Fri. Pls. call Tracey 968-4430

Lost: 11:15 orange backpack along with notebook and Geox, book inside. Important. Please call Jim. 968-2643

Special Notices

See the beautiful panoramic views from John's Smoke Tower. Only 10 cents. Your hosts: Bob Gibson & Opal Bibles call 968-4619. TOWER TOUR

Next Daily M: 11:30-11:20 p.m.

Satur Sun: 11:30-3:30 p.m.

DESPERATE! Need volunteer tutor for 15 year old who can not read! Call Carol 961-4130

DON'T DARE TO BLEEP IT!!!

To all campus members: 4 through Jan.

Please may use walkways in the area

Film is lecture. Eckankar, Way of Life. Times: Nov 11 - 7-10 p.m. UC. Sponsored by Eckankar Path of Total Awareness.

Game O Rama is open from 10 to 11

"Students are to turn in their lockers after 5. 6521 Cordoba No.7."

"Good speaker, we may be the people you're looking for."

"I am single and looking for someone to share in a quiet way."

"We are a multi-cultural, world known group. We enjoy the finer things in life."

"A wonderful young lady from Mexico in Jan. pref. Spanish speaking."
**IM's Begin Second Season**

(Continued from p.6)

Rider" will face "Eight Miles High" in a first round battle while on field two "Team Rhodesia" battles "D&D Association".

**Floor Hockey**

It took until the final Sunday of regular season play, but the Mens A division, playoff pairings have been determined. There are six teams in the post season affair, with two brackets of three teams each.

In bracket one, fourth place "Shades" plays fifth place "lieoe" on Nov 20 at 9 p.m. The winner will then face first place "What the F Punk" at 10 p.m. of the same night.

In bracket two a not as grueling schedule is slated as third place "Ted's Pizza" meets fourth place "Sharks" at 10 p.m., Nov 26. The winner returns the following night to face "Phuckers United" at 11 p.m.

In bracket one the winner of the "White Line Fever"-"Nice Game" of last night will face the winner of yesterday's "Sticks Up Our Ass"-"Father Puckey". The B and C Divisions were won by Robertson. The duo toppled Ron with a win over the duo of Mary Beth and Mike Herbert by a game of 10-6.

Closely behind were the second and third place finishers respectively, Jack Wiggins and Brian Billings. They in turn were pursued by both place finisher Michael Bergkamp and fifth place Blair Goodrow. In the one and one half mile race also held Justo Garcia won easily in 7:39. Trailing far behind were Steve Painge, who took second and Kathy Kline who finished third.

**HOUSING OFFICE security checklist**

Are you security conscious? Don't encourage crime! The Hope Vista Foot Patrol suggests that you examine the following list and see how "secure" your home is:

1. Do you have an apartment entrance lock capable of withstanding great force?
2. Do you have extra locks for all doors in your apartment?
3. When you leave your apartment for any period of time, do you lock all windows and doors?
4. Do you have a night chain on your door?
5. Do you have a window opening onto a fire escape, patio or balcony, do you lock all windows when you go to sleep?
6. Are cabinets, closets and drawers where you keep valuables locked?
7. Do your have a spare key in a place where it cannot easily be found?
8. Do you conceal your single status on your door and mailbox number?
9. Do you have your apartment number and address on your door?
10. Do you have a "charity bar" or secondary lock for your sliding glass door?
11. Do you lock your car when you leave it?
12. Do you have a "fire" or security system for your garage?
13. Do you put extra credit cards, identification or blank checks in a safe place?
14. Have you recorded all serial numbers to identify property?
15. All apartment buildings carry liability and property insurance; this doesn't cover the personal property of the tenants - just the apartment and its contents as furnished at the time of renting.
16. Personal property policies are available from local insurance agencies, but check first with your parents to see if they already have insurance on you and your belongings. If you don't have sufficient coverage, talk the problem over with a local insurance agent.

Parapsychologists...

(Continued from p. 1) instance, we study psychological phenomena which are not currently explainable in terms of memory phenomena. 

"We have to be knowledgeable about other disciplines. We're not just left on our own. We look for other ways to do things. And we're looking for those same ways to do things."

Both Phillips and Morris agree that the public is not well informed. They do, however, think that the public is improving, and that real advances are being made in experimental techniques. They point out that they are careful to explain that parapsychology has lacked the possibility of repeatable experiment that is the mark of a genuine science. Phillips explains, "The methods of the other sciences have been so much more satisfactory than those of parapsychology."

Another area that psi researchers feel is being clarified is the need for new forms of humanistic and experiential approach to the experimental design. Phillips and Morris emphasize that the concept of research is not transferable from lab to lab. They do not expect research to be a simple method that can be used to explain what Morris termed "anecdote variables"—the elements of an experimental arrangement which can change what research tells." 

"We use progressive relaxation and guided imagery to extend the subject toward the target of the experiment," Morris stated.

"People score better when they're relaxed and comfortable, when they care about the results. We want to put humanism inside the lab without losing methodological rigor." 

Pilgrim, 25,000 Miles for Peace

(Continued from p. 1) place to place, without any money, speaking to individuals, groups and the news services on human potential and the way of peace.

"A pilgrim is a wanderer with a purpose," she explained, gesturing with graceful hand movements. "A pilgrim can be either to a place or for a thing and mine is for peace. Peace among nations, peace between groups and inner peace within a person."

Peacemiler Pilgrim lives an orderly life with a purpose. She is a deeply religious woman, she has never been affiliated with any church organization. She prefers dealing "directly" with God herself, and says she never is alone in her pilgrimages.

She gets around through a combination of walking and hitchhiking. She is a harmless looking, silver-haired woman you don't have much trouble getting a ride. Only the ones that pick me up, the others pass me by.

"I walk until I am given shelter and I fast until I am given food. Without ever asking these things have been given. People are good and they have the hope for mankind," she commented.

Food is given regularly and she says she seldom skips more than three or four meals in a row. She has fasted for as long as 48 days, but this was a prayer discipline. Shelter, clothing and anything else she needs is given, most often by strangers. She prefers having perfect health because she is never tense or worried.

She claims she does not know how old she is and she does not intend to figure it out. "As long as I thought of myself getting older, I did not live. Since I quit counting birthdays time has sort of stood still," she said happily.

Me, take another exam? Are you crazy?!?

Q. The Navy Officer Qualification Test (NOQT) is a piece of cake, right?

A. Not necessarily.

If you're majoring in engineering or another technical area, we would expect you to do better on the test than an Inner Mongolian Cultural Arts major, but you won't hear us telling anyone that the test is easy. The NOQT is an attitude exam dealing with number and letter comparison, instrument interpretation, word analogy, practical judgement, mathematical reasoning, and mechanical comprehension involving gears, levers, pulleys, fluids, etc. For those interested in an aviation program, there is an extra section dealing with aircraft orientation.

The Navy Officer Information Team will be administering the test in the UCen room 2294 Tuesday, November 28, at 12:30 P.M., Wednesday, November 29, at 7:30 A.M., 1:00 P.M., and 6:30 P.M., on Thursday, November 30, at 9:00 A.M., and 5:00 P.M., on Friday, December 1, at 9:30 A.M.

Tests will be scored immediately and an Officer will be available to discuss your results and the various programs you may want to consider.

Taking the exam in no way obligates you to the Navy, but it just might tell you something about yourself. Come in and give it a shot — you might even pass!
