"What do I get for my \$7.80 per semester?" Here is the answer.

LETIC PROGRAM. Student- lows: body appropriations for that program total \$11,242. for the current fiscal year, about one-third of the total expected income from sale of studentbody cards of \$34,500.

Equipment, travel, and miscellaneous expenses of intercolegiate athletics are customarily paid for by students. The University contributes coaching instruction and

supervision.

As partial compensation for student-body financial contributions to intercollegiate athletics, students are admitted to all home games at the reduced rate of 25 cents instead of the general admission price of \$1.00 for football and 75 cents for basketgall. The saving on admission prices does not quite equal the student's contribution to the athletic program, but the plain fact is that there could be no athletic program of intercollegiate sports if the student-body contribution was not

Editors and staff all work free of charge and devote a great deal of time and effort to the college publications. Those not familiar with the details of publications are not aware of the heavy expenses necessarily involved, else they would not criticize the quantity of advertising now presented in El Gaucho.

#### **EDITORIAL**

Another relief campaign is opening on this campus—the annual World Student Service Fund Drive.

"Another relief campaign?" Not quite. This one is different. This one is ours.

There are over eight hundred thousand studenets-college students like ourselves—in need today in the world. 'Need" means just that—need of food, of books, of clothes, of medicine. There is one relief organization in this country which concentrates on helping those students—and only one. That is the World Student Service Fund. There is one group in which the WSSF campaigns—and only one: the students and faculty members of American colleges and universities.

This is a unique appeal. There are other appeals for needs just as severe-but there are other audiences to meet those needs. This appeal is our responsibility alone. If we fail, it fails.

What would that failure mean? It would mean less doctors, lawyers, engineers for countries which will not have enough trained workers for years. It would mean prejudice and ignorance in high places-because there wouldn't be enough educated men and women to go around.

Aside from all humanitarian aspects, we don't think the world can afford to lose a single university class. We don't think America can afford the loss of a single class anywhere in the world. We can afford it today, yes-because we won't The Staff. unless otherwise ind have to pay the price until tomorrow. But tomorrow's price may be much higher than we want to pay.

This is an era when all bonds between men in different nations are disappearing. It is vital that we preserve trained The effectiveness of its work has been endorsed by UNESCO, the Association of American Colleges, and the American Association of Junior Colleges
